You have done a pretty fair bit of describing the actions of the first white settlers in South Africa and Hawaii. A good mathematical analysis of the demographics in those two areas indicates that miscegenation began about an hour and a half after arrival.

This is not entirely true. If you hold an amateur license or another license that allows the use of such amplifiers, you are right, but if you DO NOT hold such license posession of such a device CAN be illegal. Here is the text from the FCC:

PART 95--PERSONAL RADIO SERVICES--Table of Contents

Subpart D--Citizens Band (CB) Radio Service

Sec. 95.411 (CB Rule 11) May I use power amplifiers?

(a) You may not attach the following items (power amplifiers) to your certificated CB transmitter in any way:
(1) External radio frequency (RF) power amplifiers (sometimes called linears or linear amplifiers); or
(2) Any other devices which, when used with a radio transmitter as a signal source, are capable of amplifying the signal.
(b) There are no exceptions to this rule and use of a power amplifier voids your authority to operate the station.
(c) The FCC will presume you have used a linear or other external RF power amplifier if--
(1) It is in your possession or on your premises; and
(2) There is other evidence that you have operated your CB station with more power than allowed by CB Rule 10, Sec. 95.410.
(d) Paragraph (c) of this section does not apply if you hold a

license in another radio service which allows you to operate an
external
RF power amplifier.

[48 FR 24894, June 3, 1983, as amended at 63 FR 36610, July 7, 1998]

Effective Date Note: At 63 FR 36610, July 7, 1998, Sec. 95.411, paragraph (a) introductory text was amended by removing the term ``type-accepted'' and adding in its place ``certificated'', effective Oct. 5, 1998.

If the amplifier is on your primmises and there is "other evidence" that you were using more than legal power with your CB, IT IS ILLEGAL.

Floyd, it appears that the reason you are not getting results out of eBay is that you are not providing them with the necessary information.

I routinely keep a watch on linears being sold on the CB section of eBay and when I see them being sold, I send a message to safeharbor@ebay.com with the link to the auction and the text of PART 95 of the FCC concerning the use of such devices.

About 90% of all auctions I bring to the attention to eBay are ended. A 90% success rate is fantastic and I applaud eBay for its efforts of keeping illegal devices off of eBay.

FOR SALE

Heath HW-16 QRP transceiver. Excellent condx.,
all tubes, original knobs, etc. No scratches,
nicks, dents, rust.
"Might" have original manual (its from an estate
and thought I'd seen a manual drifting around the
club storeroom).
$75.00 plus shipping
No charge for packing (assuming we can find a
suitable box) and taking to USPO/UPS (your choice).
If not happy with it, return for full refund.
Located in central Florida.

>> there are Black and Hispanic hams in the hobby because there are more
>Whites in
>> the country
>
>11% of Americans are black. 2% of hams are black.
>You are shot down.
>
>

First of all, Burt, I stated that there's nothing keeping any group out of ham radio in this country. Regardless of the fact that there are a few non-minority hams who prefer to exclude minority hams, that is not keeping those minorities from entering the hobby. It may of course keep them from being as happy in it as others, but it does not keep them out of it. There are plenty of people across this great planet to talk to and communicate with aside from a few racist American hams. The way a few hams treat anyone is not a true indicator of any aspect of reality within the hobby. There are more people willing to be nice to everyone else regardless of ethnicity than there are those who want to stir up the pot of racism and separatism and catagorize people as a deciding factor as whether or not to talk to someone.

Secondly, you do not provide numbers on the other side of the coin. As you stated, 11% of Americans are Black and only 2% of hams are Black. What percentage of Americans are White and what percentage of Americans are hams? What is the percentage of Whites who are hams, and what is the percentage of Blacks who are hams? I don't feel shot down. You have given example of my point. There are more Whites in the U.S. than there are Blacks, therefore, there are more White hams in the U.S.

Is this the best you could to to counter a point that you obviously do not share, and in doing so, not even provide a valid arguement. Is just saying "wrong" and "You are shot down" and not providing substanciating numbers to back up your claim as good as it gets?

To paraphrase Nature Magazine from some years ago, using logic with
Kevin Alfred Strom is akin to using a sledgehammer to crack peanuts.
The problem is that the nuts are quite impervious to its impact.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WA2VUY, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4NA, WA4ZJJ, W6IS, WC7N, K8YSE, W9DC, DJ5AV & DX News Letter, DK9IP, DL5MO, F5NOD, F6AJA & Les Nouvelles DX, G4ZVJ, G0MTN, HA0HW, HL1IWD, JA1ELY, JA1HGY, JF2MBF, JI3DST, LA5HE, YU1AB and The Prairie DX Group for the following DX information.

3XY2, GUINEA. "The 59(9) DX Report" reports that Dan, VE2DPS, has returned to Conakry as 3XY2D, but has antenna problems. He hopes to be active soon. QSL via W3HNK.

4W, EAST TIMOR (Web site updated). Rod, WC7N, reports that the upcoming DXpedition's Web site has been re-done to increase its usefulness. The data is the same, it is just presented in a different format. Check it out at: http://www.qth.com/k7bv/timor
The web page has been updated to include a picture of Thor, 4W6MM.

A3, TONGA ISLAND (also Fiji). Hrane/YT1AD and Dragan/Z32AU are active as A35AD and A35AU until October 28. After Tonga Island, they will be operating as YJ0AD and YJ0AU, between October 28 and November 5th. They will return to Fiji to be active as 3D2AD and 3D2AU between November 5-10th. Activity will be on CW and SSB on all HF bands including 6 meters. QSL via YT1AD and Z32AU.

A5, BHUTAN (Activity).....
A Japanese team led by Yoosuke, JH1NBN (who has been active from TI9X, TN7A, HK0, and etc...) will be active from Paro, Bhutan, between October 27th and November 3rd. The team consists of JA1PCY, JF1PJK, JH1NBN, JK1AFI and JR7TEQ. They will take three HF transceivers and one 6 meters transiver for this DXpedition. They will operate on all bands 160-6 meters, SSB/CW/RTTY. They will use their own callsign (callsigns not mentioned). Some of members will participate in the CQWW DX SSB Contest while others will continue to be active on CW/RTTY

or the WARC bands during the contest. Although only using a 100 watts, they will try to work 160m and 80m with a 65 foot vertical. JK1AFI strongly wishes to give a new one for any 6m DXers. QSL all callsigns via JH1NBN: Yoosuke Uchiyama, 924-4 Yokokawacho, Hachioji, 193-0823 JAPAN.

Charly, K4VUD, announced this past weekend: "I have it on good authority that I will be able to use at least 1000 watts xmit power in Bhutan (A5) during my trip there in early December 2000. At this moment, I do not have a 1Kw linear, but the permission is good news, at least. I want to try 160, 80 and 40 and am inquiring about 580 feet of straight line beverage installation. With Bhutan's wind (the thunder dragon!), a balloon vertical is likely out of the question. Antenna suggestions are welcome. I have already purchased my airline ticket for this trip, so if you know my thrift-iness, you know I am going! I will have more details to release soon... watch this space..." Charly's E-mail address is: k4vud@hotmail.com

FO, FRENCH POLYNESIA (IOTA Activity).....
Look for Joel, F5JJW, to be active as FO0SUC or FO/F5JJW from Mangareva (OC-063) October 10-18th, Moorea (OC-046) October 18-22nd and Tikehau (OC-066) October 22-26th.

Look for Eric, F5SIH, to be active as FO/F5SIH from Tahiti (OC-046) October 9-11th, Moorea (OC-046) October 12-15th, Huahine (OC-067) October 16-18th, Raiatea (OC-067) October 18-20th, Bora Bora (OC-067) October 20-24th and Rangiroa (OC-066) October 24-27th.

By the time you read this, Marcel, ON4QM, should be active. He will be staying with Patrick/FO5QS and Guy/FO5NL for a few days. No callsign was given/mention at press time. Marcel, however, will be active mostly on CW on the high bands. He plans to go to Hereheretue Island (OC-052) and possibly be active for one month starting around September 25th. He will then return to Tahiti and may then activate Maupihaa (OC-057) until November 25th. QSL via ON4QM.

GM, SCOTLAND. On his way to the RSGB/IOTA meeting in Windsor, Don, W9DC, will be visiting the beautiful Outer Hebrides. The purpose of the trip is to identiy future island operations and to operate when possible from various islands when the weather and opportunity arises. Don will focus on trying to give North American stations a few Scottish islands from EU-10. He will use the callsign MM/W9DC when he visits the Outer Hebrides from October 5-7th. Don states that he hopes to be on Scalpay (OH-25) during the evening of October 5th. He also plans to operate from 2 private islands, Oronsay (SC16) and Carna (SC-17) in the Sugart Loch, sometime between October 8-11th depending on the weather. MM/W9DC will use the IOTA frequencies. QSL via home call direct or via bureau.

HQ, HONDURAS (Correction). Slight mistake in OPDX.477. The HQ0R Web page should be: http://www.ure.es/honduras/honduras.htm (not ending .html as reported in last week's OPDX.)

IOTA NEWS.................
AS-049. Takeshi, JI3DST, will activate the Takara Islands (Kuchinoshima Tosima-Mura, Kagoshima-Gun, Kagoshima, JAPAN) between November 23-25th, as JI3DST/8. Activity will be on 17/15/12/10/6 meters. QSL via the JARL Bureau (BUREAU is Best) or direct to (Please don't send USD): Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho, Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN

AS-137. Zheng, BA4EG, reports that BT20OO will be active again from Zhoushan Archipelago, October 1-4th. QSL via through the bureau or direct to the following two addresses:
Zheng Feng, 552-39-502 Zhao Zhuang Road, Shanghai,200135, China
Zheng Feng, P.O.BOX 122-001, Shanghai,200122, China

AS-147. Takeshi, JI3DST, activated the Hokkaido's Coastal Islands (Okushiri Is., Hokkaido) this past weekend as JI3DST/8. QSL to the same address above under AS-049.

EU-063. A group under the leadership of Mat, JW5NM, is planning a trip to Axeloya in the Svalbard Archipelago. This is an extremly rare IOTA entity because most of the area is off limits due to environmental concerns. Because it is so remote, an expedition to this area will be expensive, so the team is looking for some financial support for this venture. Send E-mails to Rag (LA5HE, OZ8RO, JW5HE) at: la5he@yahoo.no

J8, ST. VINCENT. Look for Angel/WA2VUY, Peter/NO2R, and Douglas/W2EN to operate from "The Grenadines" (NA-025) October 23rd through October 31st. They will sign J8/homecall prior to CQWW SSB Contest; they hope to obtain a special callsign for the contest. Activity will be on all bands CW/SSB. ALL QSLs via W2EN.

KOREA DX CONVENTION 2000. Lee, HL1IWD, informs OPDX that the Korea DX Club plans to have the 2000 Korea DX Convention take place November 4-5th, at Chonan City, about 130km south of Seoul. They invite all countries to come and visit. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

QSL INFO AND NEWS.............
As announced earlier, two groups of operators (DF2UU/DK9IP and I4UFH/IK4UPB) have visited the ISAJC Club Station 3V8BB between September 6th and 13th, participating together in the Worked All Europe Contest (SSB). Some 8000 QSOs were made during that one week activity. All QSLs ONLY for this period go via DK9IP (bureau preferred). A online log search plus more information on QSLing and some pictures are now available at: http://www.dk9ip.de

9M0F BUREAU QSLS. Nao Mashita, JA1HGY, reports that you can receive a QSL via the bureau (he does not need your QSL) if you send him your QSO data via E-mail at: ja1hgy@jarl.com

Gil, F5NOD, reports that they have already received many QSL requests for the FR/F6KDF/T Tromelin DXpedition (around 6000). The QSL cards are not printed yet. He also states to "Please don't forget to send

with your QSL a "Self Addressed Envelope" (SAE). They have received a lot of QSL already without it, and it takes a long time to write addresses etc... They report that they will confirm only requested QSOs. If you have sent a QSL during the DXpedition and you made some other afterwards, and if you want these QSOs confirmed, send them another card. You can also check your QSO on the online log at the FR/F6KDF/T Web page at: http://perso.easynet.fr/~f6jjx/menu.htm

BI2J QSLs. Mac, W3HC, reports that he is currently awaiting for info and a photograph from Alan, BA1DU, for the BI2J operation. The cards will be printed after receiving this information. Any and all cards (any station) handled by Mac, W3HC, will be delayed for a while due to the recent death of his daughter (SK on September 16,2000). Mac adds, all mail received is being stored in boxes until he can get to them. OPDX and subscribers would like to send out our deepest sympathy to him and his family.

Zheng, BA4EG, the QSL Manager of BI4CM (AS-136), BI5X (AS-137) and BT20OO (AS-137), reports that all QSLs sent for BI5X have been replied to.

Patrick, FR5FD, has the logs for TO150 and FR5FC. QSL via Patrick Lebeaume, 40 rue Louis Desjardines, Bois de Nefles, F-97411 Saint Paul, Reunion Island via France.

Andy, G4ZVJ, made 15083 CW QSOs (including over 1000 QSOs on 80m) as 5V7VJ during his 7 day operation from Lome, Togo. He also made 1140 CW QSOs as 9G5VJ from Accra, Ghana. QSL via G4ZVJ: Andy Chadwick, 5 Thorpe Chase, Ripon, HG4 1UA UK or via RSGB. Check out his Web page at: http://www.g4zvj.demon.co.uk

NOT THE QSL MANGER. Tom, K4NA, reports that he is receiving dozens of QSL requests for KH2/K4NA. He thinks this is KH2/K4ANA. So, Tom is not the manager. KH2/K4ANA should be QSLed via W2PS.

Eduardo, CO8LY, active in this past weekend's RTTY contest, should be QSLed via EA7ADH.

Tim Totten, N4GN, made a serious single operator, all-band effort from EA8BH in last weekend's CQ/RJ World Wide RTTY Contest. QSL EA8BH via OH2BH. He was also active as EA8/N4GN before and after the contest. QSL EA8/N4GN via N4GN.

Jean/F6FYA and his wife Genevieve/F5SQM are back in France. The QSLs for OD5/F5SQM will be printed soon.

As always, Baldur, DJ6SI, surprised everyone on the air and became active from Guinea-Bissau as J5X (on CW) with Franz, DJ9ZB, as J5Z (on SSB). Their operation will be QRT by the time you read this. QSL via their homecall direct or via the bureau.

TX0DX, 4W/N5KO AND 4W/W3UR QSL STATUS. Many OPDX InterNet Subscribers received the special bulletin (OPDX.477.1) and have made inquires about

when these cards are good to send in for credit. Again, these cards cannot be sent in for credit until the submission date of October 1st.

XW1UD QSL STATUS. Charly, K4VUD, has informed everyone that he has submitted a translation of his Laos operating permission papers (which took place last December) to the head of DXCC at the W9DXCC event last week. Charly states, "I still do not know if all the papers I have submitted will be deemed 'enough' but I have jumped thru my last hoop regarding this. I am in the process of sending my XW1UD QSL to everyone I worked via the bureau, but if you want a card fast, send the usual SASE to me at K4VUD address..."

RSGB 21/28 MHZ CONTESTS. Lee, G0MTN, is reminding everyone that the 2000 RSGB 21/28 MHz Contests will be occurring soon. Here's a brief summary of the rules and dates/times: SSB - Sunday, October 1st (0700-1900z)
CW - Sunday, October 15th (0700-1900z)
UK stations contact overseas stations only, and vice versa.
UK stations send RS(T) + Serial Number + UK District Code
Overseas stations send RS(T) + Serial Number
Open / Restricted / QRP / SWL sections, with awards to be won.
Full rules, with details of exact frequencies, scoring etc. are on the Internet on the HF Contests Committee website at:
http://www.g4tsh.demon.co.uk/HFCC/Rules-2000/28.htm

SLIM REPORT. Jean Michel, F6AJA, reports that a station signing 5R8O is very active and is stating that 5R8FL is his QSL Manager, but unfortunately 5R8FL knows nothing about this station.

SPECIAL EVENT. The Hampden County (Massachusetts) Radio Association will operate the special event station, WB1HOF (Hall of Fame), at the Basketball Hall of Fame in Springfield, Massachusetts. The operation will be on October 14-15th as the Hall of Fame receives its latest crop of honorees. Operation will be from 10 AM until 4 PM (EDT) on October 14th and 10 AM until 2 PM (EDT) on October 15th. Two stations will operate in the 40 and 15 meter phone bands. A special QSL is available by sending an SASE to Hampden County Radio Association WB1HOF, PO Box 562, Agawam, MA. 01001.

SV9, CRETE. Geza, HA4XG, will be active from EU-015 between September 28th and October 12th as SV9/HA4XG/p. He will work mainly on the WARC bands. QSL via HA QSL bureau or direct to CBA.

TI8, COSTA RICA. A group of hams from the Atlanta area will operate from Quepos, Costa Rica (EJ79) for a week beginning October 7th as K4QFF/TI8. Satellite operations will include UO-14, AO-27, SO-35 and RS-13. QSL to K4QFF.

V5, NAMIBIA. Frank, V51AS, can usually be found on 30/20/17/15 meters CW between 1930 and 2130z. Also, check 10 meters after 1530z. It was also reported by "The 59(9) DX Report" that he was heard on 80 meters between 0200-0400z.

YJ, VANUATU. The Prairie DX Group is pleased to announce their 2nd DX-pedition to take place between November 18-28th, from Vanuatu and Efate

Island (OC-035). They will be operating at least two stations around the clock (24/7) and possibly more on 160-6 meters SSB, CW, RTTY, SSTV and PSK31. During the DXpedition, they are planning a sub-trip to one or more of the rarer YJ IOTAs. In addition to operating from the other islands, they will be participating in the CQ World Wide CW Contest from Vanuatu. The six members of the traveling team are: Rick/KF9ZZ, Todd/W9YK, Fred/ KF9YL, Mike/N9WM, Bill/W8LVN and Tim/KB9QYL. As in their previous DX -pedition (FP/N9PD September 1998), one of their main goals is to give every amateur the opportunity of working them at least once (and hopefully more often). The callsigns for the DXpedition is to be announced (TBA) later. Their QSL route is via N9PD direct (The Prairie DX Group, 1206 Somerset Ave., Deerfield, IL 60035 USA) or via bureau. Please include SASE with postage, IRC or greenstamp. Direct QSL cards received without return postage will be returned via bureau. For further info, check the Web page at: http://www.n9pd.com
Or send E-mail to Rick, KF9ZZ at: kf9zz@arrl.net

YJ, VANUATU. Alan/VK4BKM and Graeme/VK4FI will be active between October 8-16th as YJ0DX. Activity will be on all bands, especially 6 meters. QSL direct only via VK4JSR.

ZK1, NORTH COOK ISLANDS. Look for operators Yu/JR2KDN (also KD1N, XW8KPL/ CSN, 3W5KDN, 8Q7US etc) and Yasu/JI1NJC (also A35CC, C21/YI, T20CC, T30CC, ZK1NJC,8Q7CC, 3D2YI, S79CC, KH0/JI1NJC, FW/JI1NJC etc) to be active from Penrhyn Island (IOTA OC-082; Grid Locator BI11) from October 28th through November 4th, as ZK1NDK and ZK1NJC (callsigns being requested. The license will be issued upon arrival.). Operations will be on CW/SSB/RTTY with activity on 160-6 meters. Suggested 160 meters frequency is 1832.5 kHz (QSX 1837.5 kHz and UP, QSX 1815 kHz for JA). Six meter activity will be on 50.100 MHz (QSX 50.140 MHz and UP) and a 6m beacon (BREAKABLE) will be running on 50.100 MHz (send CQ CQ de ZK1NJC ZK1NJC QSX 50.140 K). QSL via JR2KDN (SASE, SAE+sufficient return postage or Bureau) to: Yuichi Yoshida, 4th Floor Kato Building, 529 Rokugaike-cho, Kita-ku, Nagoya, Japan 462-1112. QSL requests via E-mail are welcome (returns via the bureau) at: jr2kdn@pluto.dti.ne.jp
OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

>outnumbered _in your own homelands....

So, if the majority or cars in the U.S. were black, and the minority were white, that would be a
threat to the white cars? Cars are just vehicles which transport human bodies, just as human bodies
are vehicles which transport human souls. I'm sure human souls have no color, at least at birth.
So, the color of a vehicle (car or body) is of no importance to its purpose. But since you don't
believe in the existence God, then you must also not believe in the existence of the human soul.
And so, you mistakenly believe the the human body (and especially its color), are of great importance. You would make a great car (and human body) salesman.

And as I said, if those amps are bought by amateurs who then use them on 10m,
not 11m, there isn't a problem.

All I asked was:
Were you bitching about these amps being used on 11m? OR
Were you bitching about the unavailability of amps for 10m?
The question was that simple. I asked because your post was unclear. Also,
what is "an unlicensed ebay user"? I wasn't aware that eBay required licenses.

On Sun, 24 Sep 2000, Floyd Sense wrote:

Note that the original question was being asked by a ham, someone who DOES hold a license in another radio service.

I don't need an education in what the regulations say from you. I was merely inquiring into what was the subject of the bitching by the original poster. Was it:

1) The sale of 11m amps to CB'ers (and not to amateurs who move them to 10m)?
2) The lack of availability of 10m amps for amateurs?

I clearly would have thought about #1 above if it weren't for the contents of his SECOND paragraph.

Also, I don't see where possession is illegal. What the regulation says is that if one does have possession (and no radio license where the device could be used legally), there is a PRESUMPTION THAT THE DEVICE HAS BEEN USED. Use is the illegal act, not possession.

Go back to elementary school and learn how to read.

You over-reach in your thought that just because interference
laws exist that they preclude using a scanner outside one's home.
Nothing I have seen or read about has offered any actual case
where someone listening to a scanner has been charged with
interferring with police under such a law. If you have case
example(s). please provide the details.

Now if someone with a scanner in a state that allows
them in autos actually interferes with police because
of what that individual heard on the scanner, then I
have no problem with the police throwing the book at
that person.

Otherwise, I restate my comment, only a handful of states
actually prohibit scanner use anywhere...and none outlaw
use at home in any case. A 1991 book entitled: The Listeners
Lawbook" identified the following states as outlawying scanner
use in some manner: CA, FL, IN, KY, ME, MI, MN, NE, NJ, NY,
ND, OK, RI, SD, VT, and WV. Most all of these laws focused
ONLY on scanner use in autos. Since then the law in NJ has
been changed and allows scanners in autos.

Most, if not all, of those states also had exemptions for
licensed hams...but even without such an exemption, the
FCC pre-empted all such laws as they might have been used
against a ham with an extended recieve range transciever.

Michigan is one of those states I noted above with a specific
statute against having scanners in autos. The specific law
is: Penal Code 750.508. The law has been on the books in
Michigan since before 1982... so it is not a new threat to
anyone. If, as you say, the cops are arresting race fans
that have scanners, then perhaps you need to make a concerted
effort amongst those in MI to allow scanners at races. The
current law (750.508) only involves having a scanner in an
automobile.

If I were a race fan in MI I'd make sure my scanner was
well packed away from plain sight so no police could see
it and even think I was using it while in my car...BUT,
then too, I'd be exempt anyway since hams are exempted
in the MI law.

Limiting your "ability" to do so is not the
same as saying it is illegal to do so. Limiting
ability can be based on technology advances
and encryption alone.

> As the police go to trunked digital radios, they
> want it made illegal to make a scanner that can listen to trunked

That doesn't outlaw existing scanners. The government
may outlaw the manufacture of such devices, but
that is not what you were saying before.

> What they are doing is making
> the way that they digitize the voice information non public therefore

If it is encrypted, you'd have a tough time decoding
it anyway without the key. Are you opposed to
government or anyone else encrypted digital
transmissions?

> Look at Strong
> Signals web page (http://www.strongsignals.com). If you can not

>
> Bill you seem to be out of touch.

If you mean I don't buy your "sky-is-falling"
worries, then perhaps I am...in your eyes anyway.

However, just
what exactly do YOU want. You appear to be
unhappy that certain communications are now
being encrypted and you, therefore, are unable to listen
to those transmissions. Frankly, had cellphones started
out as encrypted digital channels the ECPA probably
wouldn't have ever been needed or passed.

Cheers,
Bill K2UNK

Charles, do you realise how many personal ham radio related web sites
there are? There are many hundreds of them on the QSL.NET server alone.
Have you thought what would happen if every ham with a web page posted
an advertisement for it in half a dozen of the major ham radio newsgroups?

I certainly hope this nonsense does not become a trend. I would
certainly hate to look through a few hundred web page advertisements
everytime I opened this newsgroup.

You'll have to ignore him, or complain to his ISP. He's crazy, this
is all the life he has, and since that implies running roughshod over
manners and custom, that's what he's going to do.

Unsure precisely what "gender" might mean as applied to an antenna, but guessing it may have something to do with design, I say such characteristics have a large impact on how much noise an antenna picks up. Monopoles are prone to be among the noisier antennas due to imbalance of currents. It takes a very well engineered, large radial/counterpoise system for a monopole to approach the relative quietness of a dipole, let alone a closed loop. I have had all three up simultaneously, on an A/B/C switch, and my results have shown the typical, generally observed differences in received noise. The most dramatic example of the effect of grounding on a monopole can be heard when using a random wire. With no ground, noise can easily rise above S9+. Connecting a ground, to a 8' CCS rod, will typically drop the noise by more than 20 dB.

In dealing with nearby noise sources, like power lines, HV street lamps, and transformers, I have found that polarization of a receiving antenna is even more important than any directional characteristics of the antenna. Much of the noise-avoiding ability of yagis owes to their (usual) horizontal polarization, as it is a first principle of antenna theory and design that most manmade noise is *vertically* polarized. The combined effects of polarization and a marginal counterpoise (which is typical, unless the ham has the space and takes the time to install a good one) make vertical monopoles the least desireable antennas in a noisy environment. The omni pattern of single verticals just makes things worse.

It sounds like you've had some experience with guy in the past. I don't know him, so I didn't want to make a major issue out this. Instead, I was hoping an appeal for restraint would be enough (if not for him, then for the others reading this thread - who might get the idea to copy him by posting a message about their own web page).

Unbalance of current has nothing to do with noise pickup, unless you
are talking about feedline unbalance.

Noise, once it propageates a short distance, is exactly the same toi
the antenna as any other type of signal.

>It takes a very well engineered, large
>radial/counterpoise system for a monopole to approach the relative
>quietness of a dipole, let alone a closed loop.

What does a "closed loop" have to do with noise pickup?

Noise is an electromagnetic wave just like the signal from an
intentional transmitter. In close, within the nearfield and induction
foeld region, noise can be either electric or magnetic field dominant.

The reason a "dipole" is quiet is because noise, once it propagates
any distance along earth, has any horizontal components attenuated.
The same is true for any signal source, even intentional transmitters.
The dipole has two nulls, as well as poor response at low angles where
local noise comes from.

It is the pattern of the dipole that rejects noise, not the fact it is
balanced.

The same is true for the loop. It is the pattern of the loop that can
be used to reject noise, it has nothing to do with the fact it is
"closed".

A folded monopole is "closed", as is a folded dipole, and neither is
any different for noise pickup than the "unfolded" examples of each.
The exception is if the antenna is in incliment weatehr, and corona in
the antenna is involved.

>I have had all three up
>simultaneously, on an A/B/C switch, and my results have shown the
>typical, generally observed differences in received noise.

It isn't suprising the S/N is different. The antennas has different patterns. The one with the highest ratio of response in the direction and polarization of signal to response in direction and polarization of noise will always be the most quiet antenna.

>The most
>dramatic example of the effect of grounding on a monopole can be heard
>when using a random wire. With no ground, noise can easily rise above
>S9+. Connecting a ground, to a 8' CCS rod, will typically drop the noise
>by more than 20 dB.

That's because without a ground, the power line an house wiring and everything connected to them become part of the antenna system! The noisey wiring in the house become the counterpoise for the Marconi antenna.

It isn't because a "grounded antenna" is quieter, it's because you have eliminated or reduced common-mode coupling to the power lines!

>In dealing with nearby noise sources, like power lines, HV street lamps,
>and transformers, I have found that polarization of a receiving antenna
>is even more important than any directional characteristics of the
>antenna. Much of the noise-avoiding ability of yagis owes to their
>(usual) horizontal polarization, as it is a first principle of antenna
>theory and design that most manmade noise is *vertically* polarized.

Manmade noise is randomly polarized at the source. The fact is horizontal antennas have limited response along the horizon, and ground wave propagated horizontal components from noise sources are attenuated much more rapidly than vertically polarized components as they are propagated along the earth's suface.

It isn't because manmade noise is somehow magically vertically polarized, but rather how ALL signals propagate and how all antennas respond.

>The
>combined effects of polarization and a marginal counterpoise (which is
>typical, unless the ham has the space and takes the time to install a
>good one) make vertical monopoles the least desireable antennas in a
>noisy environment. The omni pattern of single verticals just makes
>things worse.

The "quietest" receiving antennas I have are arrays of short verticals.

The best receiving antenna in any environment depends on that environment. What works well in one place might be a "dog" at another.

Dipoles are just as susceptible as vertical monopoles to unwanted common mode currents. There is little difference between feeding a balanced dipole with an less than perfectly balanced line.... and feeding less than perfectly unbalanced monopole with an unbalanced line.

In either case the feedline choke will cure the problem.

The only thing that makes any antenna quieter than another, assuming you do nothing foolish in the installation and the noise source is not right next to the antenna, is the directional response of the antenna. You simply need a response null in the direction of noise that isn't also in the direction of the signal.

Gee,
now you are ignoring the proper "on-topic" posts by asking little side
questions
to divert it (again).

I use a standard scanner antenna for the scanner, and a CX-902 tribander
for the relevant amateur spectra. in fact, I did respond ON-TOPIC, but you
are now calling me a liar yet again. I just didn't specify antenna types
in my original postings. in fact, you are probably using my responses
to bolster the stats in your favor so far as on-topic postings are
concerned.

Both are located at 40 feet from the ground (tower mounted) and with
the tribander, I am able to work nearly any repeater within 100 miles
on just 5 watts. The scanner antenna is nothing more than a typical
radioshack braodband antenna (Often referred to as a "discone
antenna").

Now, answer me this:
where did you report for bootcamp training?
(sorry, but you have avoided this and I feel you are LYING about
your so-called military service).

>battery-
>> chargers are very unlikely to be suitable.

(snip)

When a gel battery is charged with a taper or constant-current charger,
it is likely to receive overcharge, as the charge current will continue
to flow after the battery reaches full charge. This will cause gassing
and loss of water from the electrolyte, which results in a permanent
degradation of the battery's capacity. This may not be noticed at first,
but will become more apparent with repeated overcharges, especially at
high currents.

When a correctly-set constant-voltage charger is used, charging current
will drop to a minimal value when the battery reaches the fully-charged
state. Loss of electrolyte due to forced overcharge will therefore be
avoided.

Regards,
Andrew.

Folks,

If this were analyzed in a logic course, then:

Stipulations/Initial conditions:
Any power amplifier use is illegal w/o Amateur (or other suitable
service) ticket;
Use of power amplifier by anyone in 11m band is illegal;
Possession presumes Use;

Deduction:
Therefore - Possession w/o Amateur or suitable service ticket = illegal
use.

Conclusion:

Possession is illegal w/o Amateur or suitable service ticket.

Al,
That's a common 'standard' DIN plug. Even Radio Shack should
carry them.

Wrong. "Possession = use" is NOT automatic. The regulation indicates a
PRESUMPTION, nothing more. Presumptions can be refuted, where there is clear
evidence that indicates the presumption is false. That's why the regulation
has a presumption PLUS a requirement that other evidence indicative of use be
present.

If possession were in itself illegal, then the regulation would DIRECTLY state
so - and not go through this round-a-bout exercise regarding use.

1254. MDT's

_____=
____________
Attention!! This is not a scam, this is the real deal--this is money in =
your pocket!
Note: I made the $6 leap of faith and it is paying off big time! You =
should too.
Just read what is below and see for yourself. This will change your =
life:

$6 Investment to make $1000s

: Make A Lot Of Money Fast !!!!!

:=20
: A while back, I was browsing newsgroups, just like you, I came across =
an article similar to this that said you could make thousands of CASH =
within weeks with only an initial investment of $6.00 plus stamps! So I =
thought, "Yeah, right, this must be a scam!" But like most of us I was =
curious and kept reading. It said that if you send $1.00 to each of the =
6 names and addresses listed in the article, you could make thousands in =
a very short period of time. You then place your own name and address at =
the bottom of the list at #6, and post the article to at least 300 =
newsgroups. (There are about 32,000 of them out there and that's quite a =
large market pool). No catch, that was it. Even though the investment =
was a measly $6, I had three questions that needed to be answered before =
I could get involved in this sort of thing.=20

: 1. IS THIS REALLY LEGAL? I called a lawyer first. The lawyer was a =
little sceptical that I would actually make any CASH but he said it WAS =
LEGAL if I wanted to try it. I told him it sounded a lot like a chain =
letter but the details of the system (SEE BELOW) actually made it a =
legitimate legal business.=20

: 2. IS OK WITH THE POST OFFICE OR IS IT MAIL FRAUD? I called them: =
1-800-725-2161 and they confirmed THIS IS ABSOLUTELY LEGAL! (See 18, h =
sections1302 NS 1341 of Postal Lottery Laws). This clarifies the program =
of collecting names and addresses for a mailing list.=20

: 3. IS IT RIGHT? Well, everyone who sends me a buck has a good chance =
of getting A LOT of CASH ... a much better chance than buying a lottery =
```

ticket!!! So, having these questions answered, I invested EXACTLY $7.92 =
... six $1.00 bills and six 32 cent postage stamps ... and boy am I glad =
I did!!! Within 7 days, I started getting CASH in the mail! I was =
shocked! I figured it would end soon and didn't give it another thought. =
But the CASH continued coming in. In my first week I made between $20 to =
$30. By the end of the second week I had a made a total of $1,000.00. In =
the third week I had over $10,000.00 and it was still growing. This is =
now my fourth week and I have made a total of just over $42,000 and it's =
still coming in...=20

: It's certainly worth $6.00 and 6 stamps !!! Also, make sure you print =
a copy of this article NOW, so you can get the information off of it as =
you need it. I promise you that if you follow the directions exactly, =
that you will start making more CASH than you thought possible by doing =
something so easy! Suggestion: Read this entire message carefully! =
(print it out or download it.) Follow the simple directions and watch =
the CASH come in! It's easy. It's legal. And, your investment is only =
$6.00 (Plus postage) IMPORTANT: This is not a rip-off; it is not =
indecent; it is not illegal; and it is virtually no risk - it really =
works!!!! If all of the following instructions are adhered to, you will =
receive extraordinary dividends.=20

: PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or =
more can be yours in 20 to 60 days. This program remains successful =
because of the honesty and integrity of the participants. Please =
continue its success by carefully adhering to the instructions. You will =
now become part of the Mail Order business. In this business your =
product is not solid and tangible, it's a service. You are in the =
business of developing Mailing Lists. Many large corporations are happy =
to pay big bucks for quality lists. However, the CASH made from the =
mailing lists is secondary to the income which is made from people like =
you and me asking to be included in that list.=20

: Here are the 4 easy steps to success:=20

: STEP 1: Get 6 separate pieces of paper and write the following on each =
piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 =
bills and place ONE inside EACH of the 6 pieces of paper so the bill =
will not be seen through the envelope (to prevent thievery). Place one =
paper in each of the 6 envelopes and seal them. You should now have 6 =
sealed envelopes, each with a piece of paper stating the above phrase, =
your name and address, and a $1.00 bill. What you are doing is creating =
a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate =
service and you are paying for it! Like most of us I was a little =
skeptical and a little worried about the legal aspects of it all. So I =
checked it out with the U.S. Post Office (1-800-725-2161) and they =
confirmed that it is indeed legal! Mail the 6 envelopes to the following =
addresses:=20

:=20
:=20

: #1) Aditya Venkataraman 14215 Lake Trail Driv Sugar Land, Texas 77478=20

: #2) Charlie Baltimore 71-20 Sutton Place #3 Fresh Meadows, NY 11365=20

: #3) Shaun Littman 3061 Clubhouse Road Merrick, N.Y. 11566=20

: #4) Joseph Morris P.O. Box 37 Union Grove, Al 35175=20

: #5) M. Dixon P.O. Box 767412 Roswell, GA 30076

: #6) Lee Higginbotham 8505 Columbus Ave. #209 North Hills, CA 91343
:=20
: STEP 2: Now take the #1 name off the list that you see above, move the =
other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as =
number 6 on the list. DO NOT JUST COPY OVER THE LAST NAME, BUT REMEMBER =
TO MOVE EACH NAME UP ONE LINE!!!!!!!!=20

: STEP 3: Change anything you need to, but try to keep this article as =
close to original as possible. Now, post your amended article to at =
least 300 newsgroups. (I think there are close to 32,000 groups) All you =
need is 300, but remember, the more you post, the more CASH you make!=20

: This is perfectly legal! If you have any doubts, refer to 18 Sec. 1302 =
& 1341 of the Postal lottery laws. Keep a copy of these steps for =
yourself and, whenever you need CASH, you can use it again, and again.=20

: PLEASE REMEMBER that this program remains successful because of the =
honesty and integrity of the participants and by their carefully =
adhering to the directions. Look at it this way. If you are a person of =
integrity, the program will continue and the CASH that so many others =
have received will come your way.=20

: NOTE: You may want to retain every name and address sent to you, =
either on a computer or hard copy and keep the notes people send you. =
This VERIFIES that you are truly providing a service. (Also, it might be =
a good idea to wrap the $1 bill in dark paper to reduce the risk of mail =
theft.) So, as each post is downloaded and the directions carefully =
followed, six members will be reimbursed for their participation as a =
List Developer with one dollar each. Your name will move up the list so =
that when your name reaches the #1 position you will be receiving =
thousands of DOLLARS in CASH!!! What an opportunity for only $6.00. Send =
it now, add your own name to the bottom of the list and you're in =
business!=20

: ---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS=20

: Step 1) You do not need to re-type this entire letter to do your own =
posting. Simply put your cursor at the beginning of this letter and drag =
your cursor to the bottom of this letter, and select 'copy' from the =
edit menu. This will copy the entire letter into the computer's memory.=20

: Step 2) Open a blank 'notepad' file and place your cursor at the top =
of the blank page. From the 'edit' menu select 'paste'. This will paste =
a copy of the letter into notepad so that you can add your name to the =
list.=20

: Step 3) Save your new notepad file as a .txt file. If you want to do =
your postings in different settings, you'll always have this file to go =
back to.=20

: Step 4) Use Netscape or Internet explorer and try searching for =
various newsgroups (on-line forums, message boards, chat sites, =
discussions.)=20

: Step 5) Visit these message boards and post this article as a new =
message by highlighting the text of this letter and selecting paste from =
the edit menu. Fill in the Subject, this will be the header that =
everyone sees as they scroll through the list of postings in a =
particular group, click the post message button.=20

: You're done with your first one! Congratulations...THAT'S IT! All you =
have to do is jump to different newsgroups and post away, after you get =
the hang of it, it will take about 30 seconds for each newsgroup!=20

: **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE CASH YOU WILL =
MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 300** That's it! You will begin =
receiving CASH from around the world within days! You may eventually =
want to rent a P.O.Box due to the large amount of mail you will receive. =
If you wish to stay anonymous, you can invent a name to use, as long as =
the postman will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE =
CORRECT.**=20

: Now the WHY part:=20

: Out of 300 postings, say I receive only 7 replies (a very low =
example). So then I made $7.00 with my name at #6 on the letter. Now, =
each of the 7 persons who just sent me $1.00 make the MINIMUM 300 =
postings, each with my name at #5 and only 7 persons respond to each of =
the 7 original 7, that is another $49.00 for me, now those 49 each make =
300 MINIMUM posts with my name at #4 and only 7 replies each, I will =
bring in an additional $343.00! Now, those 343 persons turn around and =
post the MINIMUM 300 with my name at #3 and only receive 7 replies each, =
I will make an additional $2401.00! OK, now here is the fun part, each =
of those 2401 persons post a MINIMUM 300 letters with my name at #2 and =
they each only receive 7 replies, that just made me $16,807.00!!! Those =
16807 persons will all deliver this message to 300 newsgroups with my =
name at #1 and if still 7 persons per 300 Newsgroups react I will =
receive $117,649.00! With an original investment of only $6.00! And some =
stamps. AMAZING! When your name is no longer on the list, you just take =
the latest posting in the newsgroups, and send out another $6.00 to =
names on the list, putting your name at number 6 again. And start =
posting again.=20

: The thing to remember is: Thousands of people all over the world are =
joining the internet and reading these articles everyday? JUST LIKE YOU =
are now!! So, can you afford $6.00 and see if it really works?? I think =
so... People have said, "what if the plan is played out and no one sends =
you the CASH? So what! What are the chances of that happening when there =
are tons of new honest users and new honest people who are joining the =

internet and newsgroups everyday and are willing to give it a try? =
Estimates are at 20,000 to 50,000 new users, every day, with thousands =
of those joining the actual internet. Remember, play FAIRLY and HONESTLY =
and this will really work.=20

: ** By the way, if you try to deceive people by posting the messages =
with your name in the list and not sending the CASH to the rest of the =
people already on the list, you will NOT get as much. Someone I talked =
to knew someone who did that and he only made about $150.00, and that's =
after seven or eight weeks! Then he sent the 6 $1.00 bills, people added =
him to their lists, and in 4-5 weeks he had over $10k. This is the =
fairest and most honest way I have ever seen to share the wealth of the =
world without costing anything but our time!!! You also may want to buy =
mailing and e-mail lists for future CASH.=20

: Remember, HONESTY IS THE BEST POLICY. You don't need to cheat, the =
basic idea is to make the CASH!! GOOD LUCK to all and please play fairly =
and reap the huge rewards from this, which is tons of extra CASH. Keep =
an eye on the newsgroups and when the cash has stopped coming (that =
means your name is no longer on the list), you just take the latest =
posting at the newsgroups, send another $6.00 to the names stated on the =
list, make your corrections (put your name at #6) and start posting =
again.=20

: $$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!=20

: GOOD LUCK!!!=20

bill will not be seen through the envelope (to prevent thievery). Place =
one=20
paper in each of the 6 envelopes and seal them. You should now have 6 =
sealed=20
envelopes, each with a piece of paper stating the above phrase, your =
name and=20
address, and a $1.00 bill. What you are doing is creating a service. =
THIS IS=20
ABSOLUTELY LEGAL! You are requesting a legitimate service and you are =
paying for=20
it! Like most of us I was a little skeptical and a little worried about =
the=20
legal aspects of it all. So I checked it out with the U.S. Post Office=20
(1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6=20
envelopes to the following addresses:

:
:

: #1) Aditya Venkataraman 14215 Lake =
Trail Driv=20
Sugar Land, Texas 77478

: #2) Charlie Baltimore 71-20 Sutton =
Place #3 Fresh=20
Meadows, NY 11365

: #3) Shaun Littman 3061 Clubhouse Road =
Merrick,=20
N.Y. 11566

: #4) Joseph Morris P.O. Box 37 Union =
Grove, Al=20
35175

: #5) M. Dixon P.O. Box 767412 Roswell, =
GA=20
30076

: #6) Lee Higginbotham 8505 =
Columbus Ave.=20
#209 North Hills, CA 91343
:
: STEP 2: Now take the #1 name off =
the list=20
that you see above, move the other names up (6 becomes 5, 5 becomes 4, =
etc...)=20
and add YOUR Name as number 6 on the list. DO NOT JUST COPY OVER THE =
LAST NAME,=20
BUT REMEMBER TO MOVE EACH NAME UP ONE LINE!!!!!!!!

: STEP 3: Change anything you need to, =
but try to=20
keep this article as close to original as possible. Now, post your =
amended=20
article to at least 300 newsgroups. (I think there are close to 32,000 =
groups)=20
All you need is 300, but remember, the more you post, the more CASH you =
make!=20

: This is perfectly legal! If you have =
any doubts,=20
refer to 18 Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy =
of=20
these steps for yourself and, whenever you need CASH, you can use it =
again, and=20
again.

: PLEASE REMEMBER that this program =
remains=20
successful because of the honesty and integrity of the participants and =
by their=20
carefully adhering to the directions. Look at it this way. If you are a =
person=20
of integrity, the program will continue and the CASH that so many others =
have=20
received will come your way.

: NOTE: You may want to retain every =
name and=20
address sent to you, either on a computer or hard copy and keep the =
notes people=20
send you. This VERIFIES that you are truly providing a service. (Also, =
it might=20
be a good idea to wrap the $1 bill in dark paper to reduce the risk of =
mail=20
theft.) So, as each post is downloaded and the directions carefully =
followed,=20
six members will be reimbursed for their participation as a List =
Developer with=20
one dollar each. Your name will move up the list so that when your name =
reaches=20
the #1 position you will be receiving thousands of DOLLARS in CASH!!! =
What an=20
opportunity for only $6.00. Send it now, add your own name to the bottom =
of the=20
list and you're in business!

: ---DIRECTIONS ----- FOR HOW TO POST =
TO NEWSGROUPS=20

: Step 1) You do not need to re-type =
this entire=20
letter to do your own posting. Simply put your cursor at the beginning =

of this=20
letter and drag your cursor to the bottom of this letter, and select =
'copy' from=20
the edit menu. This will copy the entire letter into the computer's =
memory.=20

: Step 2) Open a blank 'notepad' file =
and place=20
your cursor at the top of the blank page. From the 'edit' menu select =
'paste'.=20
This will paste a copy of the letter into notepad so that you can add =
your name=20
to the list.

: Step 3) Save your new notepad file as =
a .txt=20
file. If you want to do your postings in different settings, you'll =
always have=20
this file to go back to.

: Step 4) Use Netscape or Internet =
explorer and try=20
searching for various newsgroups (on-line forums, message boards, chat =
sites,=20
discussions.)

: Step 5) Visit these message boards =
and post this=20
article as a new message by highlighting the text of this letter and =
selecting=20
paste from the edit menu. Fill in the Subject, this will be the header =
that=20
everyone sees as they scroll through the list of postings in a =
particular group,=20
click the post message button.

: You're done with your first one!=20
Congratulations...THAT'S IT! All you have to do is jump to different =
newsgroups=20
and post away, after you get the hang of it, it will take about 30 =
seconds for=20
each newsgroup!

: **REMEMBER, THE MORE NEWSGROUPS YOU =
POST IN, THE=20
MORE CASH YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 300** That's =
it! You=20
will begin receiving CASH from around the world within days! You may =
eventually=20
want to rent a P.O.Box due to the large amount of mail you will receive. =
If you=20
wish to stay anonymous, you can invent a name to use, as long as the =

postman=20
will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.** =

: Now the WHY part:

: Out of 300 postings, say I receive =
only 7 replies=20
(a very low example). So then I made $7.00 with my name at #6 on the =
letter.=20
Now, each of the 7 persons who just sent me $1.00 make the MINIMUM 300 =
postings,=20
each with my name at #5 and only 7 persons respond to each of the 7 =
original 7,=20
that is another $49.00 for me, now those 49 each make 300 MINIMUM posts =
with my=20
name at #4 and only 7 replies each, I will bring in an additional =
$343.00! Now,=20
those 343 persons turn around and post the MINIMUM 300 with my name at =
#3 and=20
only receive 7 replies each, I will make an additional $2401.00! OK, now =
here is=20
the fun part, each of those 2401 persons post a MINIMUM 300 letters with =
my name=20
at #2 and they each only receive 7 replies, that just made me =
$16,807.00!!!=20
Those 16807 persons will all deliver this message to 300 newsgroups with =
my name=20
at #1 and if still 7 persons per 300 Newsgroups react I will receive=20
$117,649.00! With an original investment of only $6.00! And some stamps. =

AMAZING! When your name is no longer on the list, you just take the =
latest=20
posting in the newsgroups, and send out another $6.00 to names on the =
list,=20
putting your name at number 6 again. And start posting again. =

: The thing to remember is: Thousands =
of people all=20
over the world are joining the internet and reading these articles =
everyday?=20
JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really =
works?? I=20
think so... People have said, "what if the plan is played out and no one =
sends=20
you the CASH? So what! What are the chances of that happening when there =
are=20
tons of new honest users and new honest people who are joining the =
internet and=20
newsgroups everyday and are willing to give it a try? Estimates are at =
20,000 to=20
50,000 new users, every day, with thousands of those joining the actual=20

internet. Remember, play FAIRLY and HONESTLY and this will really work.=20

: ** By the way, if you try to deceive =
people by=20
posting the messages with your name in the list and not sending the CASH =
to the=20
rest of the people already on the list, you will NOT get as much. =
Someone I=20
talked to knew someone who did that and he only made about $150.00, and =
that's=20
after seven or eight weeks! Then he sent the 6 $1.00 bills, people added =
him to=20
their lists, and in 4-5 weeks he had over $10k. This is the fairest and =
most=20
honest way I have ever seen to share the wealth of the world without =
costing=20
anything but our time!!! You also may want to buy mailing and e-mail =
lists for=20
future CASH.

: Remember, HONESTY IS THE BEST POLICY. =
You don't=20
need to cheat, the basic idea is to make the CASH!! GOOD LUCK to all and =
please=20
play fairly and reap the huge rewards from this, which is tons of extra =
CASH.=20
Keep an eye on the newsgroups and when the cash has stopped coming (that =
means=20
your name is no longer on the list), you just take the latest posting at =
the=20
newsgroups, send another $6.00 to the names stated on the list, make =
your=20
corrections (put your name at #6) and start posting again.

:=20
$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!

: GOOD LUCK!!!

Asshole Mike was heard on 313 today. I thought he was in jail. Too bad he isn't along with his buttbuddy AMP. By the way, if AMP calls or e-mails your employer just have your lawyer sue him for harassment.

I guess not, since they are seldom smoothed or regulated.

>For most gel batteries, the charger should also be current-limited to
>0.25 amps per ampere hour of the battery.

What would be a reasonable lower bound? IIRC, just about any current
will charge a lead-acid, lower current is slower.

harbor freight sells a little "Automatic Float Charger" composed of a
750ma wall wart, wires leading to a small regulator block with an LED,
and more wires terminated with alligator clips. Opening the regulator
block (or drilling a hole in the correct location) allows one to adjust
the voltage. Factory setting is regulated to 13.5 volts. Setting it to
13.8, or sometimes 14.2, seems to nicely charge my 7ah gell-cell.

Oh, and harbor freight regularly puts this little gadget on sale for
about $8 or $9.
http://www.harborfreight.com/cpi/taf/Displayitem.taf?itemnumber=41288
http://www.harborfreight.com/cpi/taf/Displayitem.taf?itemnumber=37137
(those are almost the same, but the circuit inside is slightly
different, and one of them seems to work fine as a regulated power
supply. I think it is the curly cable one, #41288)

They have another "Automatic 1.25 amp trickle charger" spec'ed to output
13.45 volts. Don't know if it is adjustable... Also more expensive,
but the faster charge could easily be worth it.
http://www.harborfreight.com/cpi/taf/Displayitem.taf?itemnumber=38895

>The battery should always be fully recharged immediately after use, and
>*never* left in a state of discharge.

That's true of any lead-acid battery.

Poor K1TP. Too chicken to give his call. Poor no-esteem jerk. You know what his kids see when they look in his face? A failure.

A few automotive chargers I've seen on sale in the UK claim to be
'regulated', but those I've actually checked usually deliver anything up
to 15V off-load; *way* too high - and there's no adjustment facility.

>>For most gel batteries, the charger should also be current-limited to
>>0.25 amps per ampere hour of the battery.
>
>What would be a reasonable lower bound? IIRC, just about any current
>will charge a lead-acid, lower current is slower.

The smallest of my (home-built) chargers delivers 1.5A maximum; I have
no experience of charging with very-low-current chargers. I'd say that a
charger would need to deliver at least the self-discharge current to
maintain the status quo, and any capability above that would contribute
to restoring any lack of charge.

>harbor freight sells a little "Automatic Float Charger" composed of a
>750ma wall wart, wires leading to a small regulator block with an LED,

That sounds reasonable. (14.2V is OK-ish for restricted-period cyclic
charging, otherwise 13.8V tops; personally, I never exceed 13.8V and
accept the longer charge time).

I have a box full of 'wall warts<tm>' here, mostly acquired second-hand
at amateur radio rallies, and have used home-built regulator units
(using the LM317T regulator, mostly) fed from the higher-voltage
examples (around 20V) to stabilise the unregulated voltage down to 13.8V
for gel battery charging.

(snip)

I won't generally pay more than UKL0.50 (c. USD0.75) for secondhand
examples. Rarely have I found one with anything like adequate regulator

circuitry for gel battery charging - some contain 7812 fixed regulators,
delivering anything from 12 to 15V with the aid(?) of resistors in the
earth lead.

>>The battery should always be fully recharged immediately after use, and
>>*never* left in a state of discharge.
>
>That's true of any lead-acid battery.

Absolutely; but IMHO worth mentioning, as, like overcharge, it's a major
cause of premature battery failure.

73,
Andrew.

If the mod doesn't allow all users on the channel to run with low
TxDelay settings(on the order of 5-8) - then don't bother, as you won't
be able to "play with the others" on the channel. Besides, with high
TxDelay settings, your thruput won't be significantly better than at
120bps.

Get a dedicated data radio. TEKKs are good, and cheap.

Not proven. Even _Nature_ magazine had to retract their original assertion that Jefferson had fathered mixed-race children. See

http://www.aim.org/publications/media_monitor/1999/01/06.htm

The Hemings fable is essentially a media fiction now, since they've produced a feature film to titillate the boobs and tell them what to think; and the original false assertion was given major play, while the retraction was hardly covered at all.

Two years ago the swineherds made up another lie about Jefferson -- that he favored "integrated" schools -- which I exposed at the time.

The liars can't seem to decide what they want to do: expel Jefferson from the American pantheon because he was so "evil" that he actually wanted his race to survive; or tell incredible whoppers about him to make him seem other than he was.

With all good wishes,

You seem to have a remarkable amount of knowledge about the color
(!) and nature of something that no one has ever seen.

At any rate, race and color are not the same thing.

Silhouettes of the major races, in which skin color cannot be
distinguished, are easily identifiable.

The Congoids and Capoids and Australoids are different racially, but
their skin colors are essentially the same.

The Japanese and Southern Europeans have similar skin colors, but
are quite different racially. The Amerinds and modern Egyptians have
similar skin colors, but belong to totally different races.

Forensic anthropologists are able to make racial identifications
based on only a few bone fragments.

Skin color has little to do with it.

With all good wishes,

--

Yes, but what about if I have no penis, not saying I haven't now, but IF I had no penis, how on earth can I be expected to lead the next generation into the bright glorious future that we all want. As Colin Powell says "Command is lonely", and he was talking about a normal commander, not one with, well you know. Anyway, I am prepared, have been for a long time. Read all the books, you know the ones. I'm a barber by trade, the only one in the village. Over the last 2 years I've been cutting their hair shorter and shorter, an imperceptible bit at a time. Now the council meetings are like a Nuremberg rally, except I think they had hair back then. Just doing my part, it's not much I know but it's more than others are doing.

Btw, Australians are ok, aren't they ?.

The original post was crossposted to six NGs, thus most replys were to all six of these NGs. Most
posters either forgot to trim their headers or wanted their reply to show up on all six NGs, such as
you have done. :^)

1274. Re: Any old time SSTV ops know about the Venus SS2 ???

Somehow I have managed to deactivate the "transmit" function on this 2 meter rig and I don't have the manual handy to find out how to turn it back on.
If anyone knows the key sequence to reactivate the this, would you please email me at harnden@mail.com.
Many thanks ki4dn/9v1ch

I've seen no perceptible difference between a 5/8 wave mag mount and the 1/2 wave through-the-glass antenna. I've had the latter for 3 years now and like it very well. I still have the mag mount as well and use it for rentals, etc.. I got them both at Radio Shack for reasonable cost and no longer get water inside the car at the car wash.

For these batteries, a constant-voltage charger is required. For a 12 volt battery, the charger should have a smoothed and regulated output of 13.8 volts, measured and accurately set *off-load*. Automotive battery-chargers are very unlikely to be suitable.

For most gel batteries, the charger should also be current-limited to 0.25 amps per ampere hour of the battery.

The battery should always be fully recharged immediately after use, and *never* left in a state of discharge.

Regards,
Andrew.

It's funny Dwight. You see people post "linears" in the CB section of eBay but say "Not for CB use." GET OUTTA HERE! They posted it in the CB section for a reason! hehe

Anyway, a simple email to safeharbor@ebay.com with the section of PART 95 about CB power restrictions does the job. About a day or two later the ad is GONE!

What is this, the Soviet Union? Turn in your neighbor to Big Brother!
How does it harm you if someone sells 11M amps on ebay? The whole
process just highlights the utter absurdity of the concept of outlawing
the possession of inanimate objects which are totally neutral in
themselves and do no harm unless misused. It is the misuse by people
which should be the only target of the regulations.

That's not true. Clinton and Gore and their wives get gifts all the time and alot of them are known
and told to the public. In some places, not accepting a gift is an insult and disrespectful.
Also accepting money is not illegal either.
Where are you getting your legal information? You hired Ronald McDonald as your legal informant? :)

I make $100,000 a year, am an American Airlines Platinum member and my house is worth over $300,000.
Not bad for a high school dropout who knew what he wanted to do and studied and mastered that, instead
of conforming to the rules and ways of society. As Frankie sang it, "I did it my way".
I've been on the other side of the fence though and know what its like to eat beans at every meal if I could
afford beans. I used to make money driving people in my neighborhood to the beer store (or crackhouse) and back.
I used to be a hardcore republican until I understood that there is more to life than myself, what I look like to other people
and my great white american dream. I grew an intolerance to smug, pompous asses in suits.
When it comes to my vote, it doesn't matter if I'm a republican or democrat, as I vote for who I think will put our company
in the direction I want it to go in, not political party I belong to. I feel that Bush is a spoiled brat arrogant asshole and would
make a
lousy president. He's a kid who considers the presidency as another aquired toy to make himself feel good, which he will grow tired
of
quickly. Anyhow, this is politics and this is way too sensitive of a subject, esp when this has nothing to do with shortwave radio.

> Let me guess... You're either an hourly wage earner or else on welfare,
> right?

Below is exactly what I hate about republicans. The pompous smugness when I'm the one with more
money, more morals, more education and a better image. I thank goodness that I'm not a smug pompous
ass and think that the world revolves around me like this guy thinks it does for him.

Since the indigenous populations of Austrailia and the Americas are
both non-white, it appears that mother nature is pushing the racial mix
back away from white in both cases. Excellent trend.

That's not surprising if you live in the insane asylum which is still sardonically referred to as "the United States of America," where a Boston Housing Authority "diversity training seminar" has recently declared the shamrock to be a symbol of "hate" and "intolerance."

See http://www.adversity.net/newsanal.htm

Anything that symbolizes the old Euro-America, even the founding fathers themselves, is now in the process of being demonized or jettisoned down the memory hole.

So it isn't surprising that "your" representative might say such a thing.

What to do?

Prepare the next generation to build a new society and a new civilization.

With every good wish,

--

Thanks for the excellent Jefferson quotes. Here's another from
Jefferson, who was a lifelong racial separatist:

☐Among the Romans emancipation required but one
effort. The slave, when made free, might mix with,
without staining the blood of his master. But with
us a second is necessary, unknown to history. When
freed, he is to be removed beyond the reach of
mixture.☐

I think that old Tommy was quoting his dear wife, after she found out
about his daliance with a lovely slave girl.

Doc, you're right, of course. Do these people ever wonder where these things start? Why should I pay when I get a bunch of buddies and we simply start a few WITH OUR NAMES on the letter? Then, we have no investement costs, just a bunch of suckers sending us money. Even better, if we get caught, we get 10 years of FREE ROOM AND BOARD! What a deal!

Yes, this is the United States and if eBay (a private company) doesn't wish to have such devices sold on ITS web site, they have that right! Or are you proposing that we should restrict eBay's rights?

As for selling CB linears to CBers in America, what do you think they are going to do with them? Set them in a corner and look pretty! hehehe

You ask what it is going to harm. If I live in the SCUM BAG'S neighborhood and my television reception sucks, that is the harm. If I can't use my telephone half the time because BUBBA is pumping 1kW into the 11m band, that is the harm. If I am in my home and I hear "FOOT, FOOT, FOOT" coming through my stereo speakers when my stereo is not on, that is the harm.

One of the Navy's (older) finest ship board receivers 4 through 28 mHZ with
power supply and power supply and speaker connectors.
The agc meter has the range to allow the receiver to be used as a tuned
voltmeter.
We are moving from the area and this and other lab equipment and components
must go.
The receiver is yours for a (non-profit institution) contribution statement.
The lab equipment and components are negotiable.
FOB northern New Jersey.

> I guess- Just how much IS your hobby
> worth?

No, I don't think so, Vance. I'm more than willing to spend money on this hobby. But, when it comes to possible damage to an expensive vehicle, I have to decide how much an slightly better antenna is worth versus that damage. In this case, I'm not willing to damage a $30k vehicle just to get slightly improved antenna performance.

But, I don't know why I'm explaining this to you. It's my vehicle, my antenna, and my radio. And I'll decide what is best for my situation. And I trust that you'll do the same for your situation.

And, now that the person who originally asked this question knows about all the available choices, I trust you'll allow him to made the decision for what is best in his situation, without judging what he considers the hobby worth by his antenna choice.

> inept. [snip]

No, you don't get it. That is your opinion. Millions of other Americans don't share that opinion. All of them with more, less, or equal, knowledge of Bush's history in Texas. But, like I said, that is only a small part of the picture. In the end, it is what he plans to do in Washington that really counts, not what did or didn't happen in Texas sometime in the past.

And, for what it is worth, we have a much better idea of what Gore will do in Washington - he's been there for eight years. But even that is not as important as what he plans to do when he is elected as president. And, for many Americans, what he says he is going to do scares the hell out of them.

And, if you would get off your anti-Bush campaign, and take a much harder look at Gore, you might also be surprised by what you learn.

Enough said. Take care.

I agree. I've seen eBay pull many ads for linears designed for CB use.

Yes, they will always insist they are not responsible for illegal
items sold on their service. And, as long as they don't know the item
is illegal, I would tend to agree that they should not be held responsible.

And, yes, they will not take the word of a third party regarding the
legality of such items. But, this situation is quickly resolved when a
copy of the applicable regulations are included.

In the end, I tend to think that eBay makes a good effort to restrict
the sale of illegal items on their service. In fact, in some areas, I
tend to think they actually go a little overboard.

I dissaggree. The white race has contributed much to the world, and the world owes it a lot, as a result. Modern medicine is the reason that I and several of the members of my family are alive today. So is modern agriculture. All of mankind have benefited from these things.

As well as this, the white race has done a far better job of preserving OTHER people's cultures, than they have themselves. For example, the Egyptians were very careless about ancient Egypt. It wasn't until European explorers searched through the ruins of the temples and the pyramids, that anyone in the modern world really discovered alot about ancient Egypt. For that, and other such achievements, the world owes the white's a second time.

It is perhaps easy for whites nowadays to dismiss the things that I have mentioned, and this is the natural attitude of anyone who has never lacked these things, and so doesn't appreciate them.

I, for one, would like very much for the white race to persist, and for western civilization to never die out. It is most preferable that this endeavor be made by the white race itself, for although non-whites may concieve an affection for the white race,and its remarkable civilization, it would be the biggest Irony if whites themselves did not take a hand in saving their own civilization and race from extinction.

Tom,

I guess it depends on what mode you are operating. For CW, most of the activity I hear is between 28.015 - 28.030; for SSB it's between 28.400 through 28.450 (there is an active 10-10 calling frequency at 28.425); for PSK it's 28.120.

Hope this helps,

The only homeland any human has is the earth. We've been moving around it ever since we came to be, and long before that. One man's ancestors might have lived in one place for millennia and somebody else might have arrived yesterday, but the former does not have any more absolute right to be in that place. There might be laws in place that favor one over the other, or one might be able to beat the other one up and make him leave, but that's a different.

People have often moved into a new area, set up shop for a period of time, and thought that somehow they have a sacred moral right to settle and control it. Sometimes they can even maintain that illusion for a long period of time. If people were displaced, they too think they have a right to the area that they've been living in. Who's right? Whoever wins, but mutual cooperation is a lot less painful in the long run. You sound like the type who'll try to do it the hard way, though.

This is going to be the only point that you and I will agree on. Nobody has seen a soul, let alone know its color, because they don't exist. "Me" is definitely more my kind of guy, though. He's got the right idea and his metaphor wasn't all that terrible.

1332. Manual for MFJ 941C

Newsgroup: rec.radio.amateur.misc
Date: 2000-09-26 00:00:00 UTC
From: kc2fft@hotmail.com
Message-ID: <8qqgol$1th$1@nnrp1.deja.com>
Source record: 102776

Does anyone have a manual for a MFJ 941C antenna tuner? I'd be willing to pay a reasonable price for a faxed or mailed copy. Alternatively, does anyone know of an on-line site where I can get a manual?

Thanks

I've decided to move up the ladder regarding to scanners.

I only have an old PRO-25 and researched almost every "top end"
models. It looks like almost everything is pointing me toward the
AR8200 MkII.

Having read almost all of the reviews for this model, can you give me
your personal feedback for this model? Any Links?

Thanks

Oh come on. Who are you trying to fool? I have YET to see ANY brand new, shrink wrapped LINEARS on eBay...AND WE ARE TALKING ABOUT EBAY SALES OF LINEARS IN THE CB SECTION!

There is ONLY ONE reason to put a linear for sale in the CB section of eBay...Illegal use. eBay does not arrest anyone! They DO, HOWEVER have the right to make the decision to NOT allow linear sales in its CB section. ARE YOU ADVOCATING TAKING AWAY EBAY'S RIGHTS?

From: "O.C." <mortuus1952@my-deja.com>
Message-ID: <8qqnk4$5ir$1@nnrp1.deja.com>
Source record: 102779

Could anyone please recall the manufacturer of some of those
HT-sized QRP HF radios? I recall seeing some advertised about
5 years ago... 40 meters, 80 meters, etc.

One of these with a tiny homebrew tuner + meter, plus a hundred
feet of wire, would be really super for backpacking.

1336. EARN $50,000 OR MORE IN 90 DAYS!!!

Newsgroup: rec.radio.amateur.misc
Date: 2000-09-26 00:00:00 UTC
From: mile33@bcc.co.UK
Message-ID: <200009261903.AA07995@intrapia3.kotel.co.kr>
Source record: 102780

Hello,

This e-mail contains the ENTIRE PLAN of how YOU can make
$50,000 or more in the next 90 days by simply sending e-mail! Seem
impossible? Just read on to see how it works AND HOW EASY IT IS....

*** PRINT THIS INFORMATION NOW FOR FUTURE REFERENCE ***

Due to the popularity of this letter on the Internet, a major nightly
news program recently devoted an entire show to the investigation of the
program described below to see if it really can make people money.
The show also investigated whether or not the program was legal. Their
findings proved that there are absolutely no laws prohibiting the
participation in the program. This has helped to show people that this
is a simple, harmless and fun way to make some extra money at home. The
results have been truly remarkable. So many people are participating that those
involved are doing much better than ever before. Since everyone makes
more as more people try it out, it's been very exciting. You will understand
once you try it yourself!

********* THE ENTIRE PLAN IS OUTLINED BELOW *********

$$

If you would like to make at least $50,000 in less than 90 days! Please
read this program...THEN READ IT AGAIN!!

$$

This is a Legitimate, Legal, Money Making Opportunity!!

It does Not require you to come into contact with people or make or take
any telephone calls.

Just follow the instructions and you will make money. This simplified
E-mail marketing program works perfectly 100% EVERY TIME!!!

References..

Hello my name is Johnathon Rourke, I'm from Rhode Island.

The enclosed information is something I almost let slip through my
fingers. Fortunately, sometime later I re-read everything and gave some
considerable thought and study to it.

Two years ago, the Corporation I worked for the past twelve years
down-sized and my position was eliminated.

After unproductive job interviews, I decided to open my own business.
Over the past year, I incurred many unforeseen financial problems.

I owed my family, friends and creditors over .. $35,000. The economy was
taking a toll on my business and I just couldn't seem to make ends meet.
I had to refinance and borrow more against my home to support my family
and struggling business.

At that moment.. something significant happened in my life.

I am writing this reference to share the experience in hope that this
could change your life .. Forever!!! Financially $$$$!!!

In mid December, I received this program in my E-mail. Six months prior
to receiving this program I had been sending away for information on
various business opportunities.

All of the programs I received, in my opinion, were NOT cost effective,
they were either too difficult for me to comprehend or the initial investment
was too much for me to risk to see if they worked.
As I was saying in December of 1998 I received this program.
I didn't send for it, or ask for it, they just got my name off a mailing
list.

Thank goodness for that!!!

After reading it several times, to make sure I was reading it correctly.
I couldn't believe my eyes!

Here was a MONEY MAKING MACHINE I could start immediately without any
debt. Like most of you I was still a little skeptical and a little worried
about the legal aspects of it all. So I checked it out with the U.S. Post
Office (1-800-725-2161 24-hrs) and they confirmed that it is indeed legal!

After determining the program was LEGAL I decided "WHY NOT!?!?!?!?".
Initially I sent out 10,000 e-mails. It cost me about $15.00 for my time

on-line. The great thing about e-mail is that I don't need any for
printing to send out the program, and because I also send the product (reports)
by e-mail, my only expense is my time.

In less than one week, I was starting to receive orders for REPORT # 1.

By January 13, I had received 26 orders for REPORT # 1.
. YOUR GOAL IS TO RECEIVE (at least) 20 ORDERS FOR REPORT #1 WITHIN
2 WEEKS, IF YOU DON'T, SEND MORE PROGRAMS UNTIL YOU DO

My first step in making $50,000 in 90 days was done. By January 30, I
had received 196 orders for REPORT #2.
. YOUR GOAL IS TO RECEIVE AT LEAST 100 + ORDERS FOR REPORT #2
WITHIN 2 WEEKS, IF NOT, SEND OUT MORE PROGRAMS UNTIL YOU DO. ONCE YOU

HAVE 100 ORDERS, THE REST IS EASY, RELAX, YOU WILL MAKE YOUR $50,000 GOAL

Well, I had 196 orders for REPORT # 2, 96 more than I needed. So I sat
back and relaxed. By March 1, of my E-mailing of 10,000, received $58,000 US

with more coming in every day. I paid off ALL my debts and bought a much needed new car!

Please take your time to read this plan, IT WILL CHANGE YOUR LIFE FOREVER $!!!!!!! Remember, it won't work if you don't try it.

This program does work, BUT you must follow it EXACTLY!

Especially the rules of not trying to place your name in a different place. It won't work and you'll lose out on a lot of money!. In order for this

program to work, you must meet your goal 0f 20+ orders for REPORT # 1, and 100+ orders for REPORT # 2 and you will make $50,000 or more in 90 days.

I AM LIVING PROOF THAT IT WORKS !!!!!!

If you choose not to participate in this program, I am sorry. It really is a great opportunity with little cost or no risk to you.

If you choose to participate, follow the program and you will be on your way to financial security. If you are a fellow business owner and are in financial trouble like I was, or you want to start your own business, consider this a sign. I DID $$$

Sincerely,
Johnathon Rourke

****

A PERSONAL NOTE FROM THE ORIGINATOR OF THIS PROGRAM:

By the time you have read the enclosed program and reports, you should have concluded that such a program, and one that is legal, could not have been created by an amateur. Let me tell you a little about my self.

I had a profitable business for 10 years. Then in 1979 my business began falling off. I was doing the same things that were previously successful for me, but it wasn't working. Finally, I figured it out. It was not me, it was the economy. Inflation and recession had replaced the stable economy that had been with us since 1945.

I don't have to tell you what happened to the employment rate.... because many of you know from first hand experience. There were more failures and bankruptcies than ever before. The middle class was vanishing. Those who knew what they were doing invested wisely and moved up. Those who did not, including those who never had anything to save or to invest, were moving

down into the ranks of the poor. As the saying goes, "THE RICH GET RICHER AND THE POOR GET POORER."

The traditional methods of making money will never allow you to "move up" or "get rich", inflation will see to that.

You have just received information that can give you Financial-Freedom
for the rest of your life, with "NO RISK" and "JUST A LITTLE BIT OF EFFORT."
You can make more money in the next few months than you have ever imagined.
I should also point out that I will not see a penny of this money, nor
anyone else who has provided a testimonial for this program.

I have retired from the program after sending thousands and thousands of

programs. Follow the program EXACTLY AS INSTRUCTED. Do not change it in
any way. It works exceedingly well as it is now. Remember to e-mail a copy
of
this exciting report to everyone you can think of. One of the people you

send this to may send out 50,000... and your name will be on everyone of

them!

REMEMBER though, ~~~~ the MORE YOU SEND OUT, the more potential
customers
you will reach. So my friend, I have given you the ideas, information,
materials and opportunity to become financially independent.

IT IS UP TO YOU !!! NOW JUST DO IT !!!!

BEFORE YOU delete this program from your in box, as I almost did, take a

little time to read it and REALLY THINK ABOUT IT.

Get a pencil and figure out what could happen when YOU participate.
Figure
out the worst possible response and no matter how you calculate it, you
will
still make a lot of money! You will definitely get back what you
invested.
Any doubt you have will vanish when your first orders come in.

$$$$$ IT WORKS!!! $$$$$

Jody Jacobs - Richmond, VA

****

HERE'S HOW THIS AMAZING PROGRAM WILL MAKE YOU THOUSANDS OF DOLLARS
$$$$$

This method of raising capital REALLY WORKS 100% EVERY TIME.

I am sure that you could use up to $50,000 US or more in the next 90
days.

Before you say "BULL...", please read this program carefully. This is
not a
chain letter, but a perfect legal money making business.

As with all multi-level businesses, we build our business by recruiting
new partners and selling our products. Every state in the USA allows you to
recruit new multi-level business partners, and we sell and deliver a

product for EVERY dollar received.

YOUR ORDERS COME BY MAIL AND ARE FILLED BY E-MAIL, so you are not involved in personal selling. You do it privately in your own home, store or office. This is the EASIEST marketing plan anywhere! It is simply order filling by E-mail.

The product is informational and instructional material, keys to the secrets for everyone on how to open the doors to the magic world of E-COMMERCE, the information highway, the wave of the future!

PLAN SUMMARY:

(1) You order the 4 reports listed below ($5.00 US each). They come to you by e-mail.

(2) Save a copy of this entire letter and put your name after Report # 1 and move the other names down.

(3) Via the internet, access Yahoo.com or any of the other major search engines to locate hundreds of bulk email service companies (search for "bulk email") and you will find lists with a few hundred thousand to several million e-mail
addresses starting at about $49.00 +. Remember though REPORT #2 will show you how to do all of this in full detail.

(4) Orders will come to you by postal mail - simply email them the Report they ordered. Let me ask you - isn't this about as easy as it gets?

****

By the way there are over 50 MILLION email addresses with millions more joining the Internet each year so don't worry about "running out" or "saturation". People are used to seeing and hearing the same advertisements every day on radio/TV.

How many times have you received the same pizza flyers on your door? Then one day you are hungry for a pizza and you order one. Same thing with this letter. I received this letter many times - then one day I decided it was time to try it.

****

YOU CAN START TODAY - JUST DO THESE EASY STEPS:

STEP # 1. ORDER THE FOUR REPORTS

Order the four Reports shown on the list below (you can't sell them if you don't order them).-- For each Report send $5.00 US CASH and
. NAME & NUMBER OF THE REPORT YOU ARE ORDERING
. YOUR E-MAIL ADDRESS
. YOUR NAME WITH RETURN ADDRESS (in case of a problem)

to the person whose name appears on the list next to the report.

MAKE SURE YOUR RETURN ADDRESS IS ON YOUR ENVELOPE IN CASE OF ANY MAIL PROBLEMS!

Within a few days you will receive, by e-mail, each of the four reports.

Save them on your computer so you can send them to the 1.000's of people who will order them from you.

STEP # 2, ADD YOUR MAILING ADDRESS TO THIS LETTER.

IMPORTANT-- DO NOT alter the names of the people who are listed next to each report, or their sequence on the list, in any way other than is instructed below
in steps "A" through "F" or you will lose out on the majority of your profits. Once
you understand the way this works, you'll also see how it doesn't work if you change it.
Remember, this method has been tested, and if you alter it, it will not work.

A. Look below for the listing of the four reports.

B. After you've ordered the four reports, take this Advertisement and remove the name and address under REPORT #4. This person has made it through the cycle and is no doubt counting their $50,000!

C. Move the name and address under REPORT # 3 down to REPORT # 4.

D. Move the name and address under REPORT # 2 down to REPORT # 3.

E. Move the name and address under REPORT # 1 down to REPORT # 2.

F. Insert your name and address in the REPORT # 1 position. Please make

sure you COPY ALL INFORMATION, every name and address, ACCURATELY.

STEP # 3, SAVE THIS E-MAIL TO YOUR COMPUTER

Take this entire letter, including the modified list of names, and save it to your computer. Make NO changes to these instructions. Now you are ready to use this entire E-mail to send by E-mail to prospects.

Report #2 will tell you how to download bulk e-mail software and e-mail addresses so you can send it out to thousands of people while you sleep!

Remember that 50,000 + new people are joining the internet every month.

Your cost to participate in this is practically nothing (surely you can afford $20.00 US and initial bulk mailing cost). You obviously already have a computer and an Internet connection and E-mail is FREE.

STEP # 4, DISTRIBUTE THIS E-MAIL OVER THE INTERNET

There are two primary methods of building your downline network:

Method # 1: Sending Bulk E-Mail

Let's say that you decide to start small, just to see how it goes, and
we'll assume you and all those involved email out only 2,000 programs each.
Let's also assume that the mailing receives a 0.5% response. The response
could be much better. Also, many people will email out hundreds of thousands
of programs instead of 2,000 (why stop at 2,000?) But continuing with this
example, you send out only 2,000 programs. With a 0.5% response, that
is only 10 orders for REPORT # 1. Those 10 people respond by sending out
2,000 programs each for a total of 20,000.

Out of those 0.5%, 100 people respond and order REPORT # 2. Those 100
mail out 2,000 programs each for a total of 200,000.

The 0.5% respond to that is 1,000 orders for ..

REPORT # 3. Those 1,000 send out 2,000 programs each for a total of
2,000,000. The 0.5% respond to that is 10,000 orders for..

REPORT # 4. That's10,000 $5.00 US bills for you. CASH!!!

Your total income in this example is.. $50 + $500 + $5,000 + $50,000
for a total of .. $55,550!!!!

Remember friend, this is assuming 1,990 out of 2,000 people you email
to will do absolutely nothing and trash this program!

Dare to think for a moment what would happen if everyone, or half sent
out 100,000 programs instead of 2,000, believe me, many people will do just
that and more!

Method # 2.. Placing Free Ads on the Internet

Advertising on the Internet is very, very inexpensive, there are
HUNDREDS of FREE places to advertise. Lets say you decide to start small just to
see how well it works. Assume your goal is to get ONLY 10 people to participate
on your first level. (Placing a lot of FREE ads on the Internet will easily
get a LARGER response). Also assume that everyone in your organization gets

only 10 downline members, just look how this small number accumulates to

achieve the STAGGERING results below...

1st Level-- Your first 10 send you $5 = $50.00
2nd Level-- 10 Members from those 10 ($5 X100) = $500.00
3rd Level-- 10 Members from those 100 ($5 X1,000) = $5,000.00
4th Level-- 10 Members from those 1,000 ($5 X10,000) = $50,000.00

$$$$$$$ THIS TOTAL'S = $55,550 $$$$

AMAZING ISN'T IT?? Remember friends, this assumes that the people who
participate only recruit 10 people each. Think for a moment what would
happen if they got 20 people to participate! Most people get 100's of
participants and many will continue to work this program, WITH YOUR NAME
ON THEM FOR YEARS!! THINK ABOUT IT!

People are going to get details about this plan from you 'or' someone
else... the question is... Don't you want your name to be on the Emails

they will send out??

** DON'T MISS OUT!!! ** JUST TRY IT ONCE!!! ** SEE WHAT HAPPENS!!! **
YOU'LL BE AMAZED!!!

****

ALWAYS PROVIDE SAME-DAY SERVICE ON ORDERS!

This will guarantee that the E-mail THEY send out with your name and
address on it will be prompt because they can't advertise until they receive the

REPORT!

****

GET STARTED TO-DAY: PLACE YOUR ORDER FOR THE FOUR REPORTS...NOW!!

NOTES.. -- ALWAYS SEND $5.00 CASH (US CURRENCY) FOR EACH REPORT.
CHECKS, MONEY ORDERS, OR CASHIER CHECKS ARE NOT ACCEPTED!

Make sure the CASH is concealed by wrapping it in two sheets of paper.
On one of those sheets write...

A. The Number and Name of the Report you are Ordering.

B. Your E-mail address, and .

C. Your name and postal address.

PLACE YOUR ORDER FOR THESE REPORTS NOW:

REPORT # 1 " The Insider's Guide to Advertising for Free on the
Internet".

ORDER REPORT # 1 FROM...

Cris Mathis
22506 Tullis Trail Court
Katy, TX 77494
USA

REPORT # 2 "The Insider's Guide to Sending Bulk E-mail on the Internet"

ORDER REPORT # 2 FROM....

DANNY CONNELL
2100 FAIRWAY COURT
KENNESAW, GA 30144
USA

REPORT # 3 "The Secrets to Multilevel Marketing on the Internet".

ORDER REPORT # 3 FROM....

Cainco Associates
8001 San Miguel Cyn
#254
Salinas, CA 93907
USA

REPORT # 4 "How to Become a Millionaire Utilizing the Power of
Multilevel
Marketing and the Internet".

ORDER REPORT # 4 FROM...

RANDY BOMAR
P.O. BOX 66696
HOUSTON, TX 77266-6696
USA

*******TIPS FOR SUCCESS*******

TREAT THIS AS YOUR BUSINESS!! Be prompt, professional, follow the
directions
accurately -- send for the four reports 'IMMEDIATELY' so you have them
when
the orders start coming in because:

When you receive a $5 order, you MUST send out the requested
product/report.
It is required for this to be a legal business and they need the reports
to
send out their letters (with your name on them!)

ALWAYS PROVIDE SAME-DAY SERVICE ON THE ORDERS YOU RECEIVE.

BE PATIENT AND PERSISTENT WITH THIS PROGRAM!!
If you follow the instructions exactly-- results WILL FOLLOW. $$$$.

******* YOUR SUCCESS GUIDELINES*******

Follow these guidelines to guarantee your success:

If you don't receive 20 orders for REPORT # 1 within two weeks,
continue
advertising or sending e-mails until you do. Then, a couple weeks later
you
should receive at least 100 or more orders for REPORT # 2. If you
don't,
continue advertising or sending e-mails until you do. Once you have
received
100 or more orders for REPORT # 2, YOU CAN RELAX, because the system is

already working for you, cash will continue to roll in!!

THIS IS IMPORTANT TO REMEMBER... Every time your name is moved down on the
list, you are placed in front of a DIFFERENT REPORT.

You can keep track of your PROGRESS by watching which report people are
ordering from you.

To generate more income, simply send another batch of e-mails or continue
placing ads and start the whole process again!!

THERE IS NO LIMIT TO THE INCOME YOU WILL GENERATE FROM THIS BUSINESS!

Before you make your decision as to weather or not to participate in this
program. Please answer one question.

ARE YOU HAPPY WITH YOUR PRESENT INCOME OR JOB?? If the answer is no, then
please look at the following facts about this super simple MLM program:

. No face to face selling, No meetings, No Inventory, No telephone calls, No
big cost to start, Nothing to learn, No skills needed! (Surely you know how
to send an e-mail?).

. No equipment to buy- you already have a computer and Internet connection-
so you have everything you need to fill orders!

. You are selling a PRODUCT which does NOT COST YOU ANYTHING TO PRODUCE OR
SHIP! E-mailing copies of the Reports is FREE!

. All of your customers pay you in CASH! This program will change your LIFE
FOREVER! Look at the potential for you to be able to quit your job and live
a life of luxury that you could only dream about!

. Imagine getting out of debt and buying the car and home of your dreams and
being able to work a super-high paying leisurely easy business, from home
with no overheads!

$$$ FINALLY MAKE SOME DREAMS COME TRUE !! $$$

ACT NOW!! Take your first step towards achieving financial independence.
Order the REPORTS and follow the PROGRAM outlined above--SUCCESS WILL BE

> >
> Name one.

Kennewick man is the most spectacular recent example, but such cases arise in many a murder investigation, as ably stated by Masastugu Hashimoto, Ph. D, a lecturer on racial identification through skeletal and dental remains at Tokyo Dental College:

"Physical Anthropology is the study of man as animal, and is mainly concerned with human variation and human evolution. Forensic Anthropology is that branch of Physical Anthropology which, for forensic purposes, deals with the identification of more or less skeletonized remains known to be, or suspected of being, human. The identification process undertakes to provide opinions regarding race, sex, age, stature, and such other characteristics of each individual.

"But it is quite recent that Forensic Anthropology has developed as as area of specialization. It was not until just after World War II that there was more than an occasional demand for the services of the expert in the field of skeletal identification. With the massive programs for the repatriation of U.S. dead from World War II and the Korean War, anthropologists were employed full time in the identification of human remains.

"In recent years, human exchanges among nations have become more and more brisk in Japan. Under this situation, some foreigners are involved in murder cases or accidents. Therefore, race identification is a most important subject. In my lectures, the racial characteristics of the caucasoid, mongoloid and negroid and the differentiation between Japanese, Chinese and Koreans observed on the skeleton are presented."

And Dr. George Gill, a professor of anthropology at the University of Wyoming and a forensic anthropologist at the Wyoming State Crime Laboratory states:

"First, I have found that forensic anthropologists attain a high degree of accuracy in determining geographic racial affinities (white, black, American Indian, etc.) by utilizing both new and traditional methods of bone analysis. Many well-conducted studies were reported in the late 1980s and 1990s that test methods objectively for percentage of correct placement. Numerous individual methods involving midfacial measurements, femur traits, and so on are over 80 percent accurate alone, and in combination produce very high levels of accuracy. No forensic anthropologist would make a racial assessment based upon just one of these methods, but in combination they can make very reliable assessments, just as in determining sex or age."

Honor bright,

--

Kevin Alfred Strom.

I wouldn't be so certain of that. If you are right, then the sincerely expressed belief in the soulfulness of the African, or "the soul of the Irish," among many other such beliefs (which I observe to contain more than a germ of truth), would then cease to have any meaning whatsoever.

And if the mind and soul of man and woman are the product of the brain, as all evidence suggests they are, then we are left with the fact that the brain is the product of the genes and so will likely vary racially.

If the arts and music of the races are the expressions of their souls, then they are far from identical from race to race -- nor should they be.

And it is not "hate" to point this out.

Nor is it "hate" to point out that our current social policies and quasi-religious beliefs (such as the belief in human "equality") threaten to exterminate a uniquely beautiful and creative life form.

With every good wish,

--

Kevin Alfred Strom.

Hi
Just a quick question. I have been looking for the CQ call frequency
for 10m and unable to find. Could someone please provide to me. I hear
the band has been really good recently.

Thanks in advance

t cobban

...And if those amplifiers are all in their original shipping boxes, shrink-wrapped, etc., there is absolutely nothing illegal about that, especially if there is NO 11m radio anywhere near by.

It's not a matter of "splitting hairs." It's a matter of properly UNDERSTANDING what the law says and that the common, misguided conclusion of "possession is illegal" is a non-sequitur falsehood.

Analogy: We all know that "murder" is illegal. However, that doesn't mean that the loss of life at the hands of another in all cases is murder. A self-defense situation is such that defeats the presumption of intent that murder carries. PRESUMPTIONS can be overcome. It's that simple. It's not my problem that some of you are [apparently] not intelligent enough to understand the difference.

Sigh ... oh us poor 440 FMers. We had a guy with a similar whine on the repeater about 6 months ago. Fortunately, the repeater owner was on in a roundtable discussion. INT F2? (geeze, ain't there a new fangled way to express F2?) So, - gawd I hate bringing that old HA1 TO keyer down from the attic - a brief exchange to please the guy - at a relatively sedate 40 WPM over the repeater. Say whaaa ?? can't copy? Geeze, be glad we didn't crank it up! Who cares?

Hmmm ... was this a similar response I made to this post some while back? Geeze, I must be getting old. My CW ain't what it used to be .. I'd be pressed pretty hard nowadays to do 50. My typing has slowed a bit too ... I'm down to maybe 65 (from perhaps 80). Guess I'll have to practice up a bit in case I run into you on the air. Could be interesting.

Ok, so how about this:

So, if the majority of cars in the U.S. were Fords, and the minority were Chevrolets, that would be
a threat to Chevrolet cars? Cars are just vehicles which transport human bodies, just as human
bodies are vehicles which transport human souls. I'm sure human souls have no 'race'. So, the
distinguishing features of a vehicle (car or body) are of no importance to its purpose. But since
you don't believe in the existence God, then you must also not believe in the existence of the
human soul. And so, you mistakenly believe the the human body (and especially its distinguishing
features), are of great importance. You would still make a great car (and human body) salesman.

Your love and sadness (if you do it beside yourself, can I watch?) are interesting but not of gigantic importance in the great scheme of things. Nor, for that matter, are mine.

The first step in wisdom, understanding, system design, whatever, is TO CALL THINGS WHAT THEY ARE. The second is not to make the classic error of confusing correlation with causality.

As at least one of the sophists who find it necessary to point out that 'race' has no genetic basis, I object strenuously to your misuse of the

term; note the + above. You are using it interchangeably with skin color which is simply bullshit. It is the intellectual equivalent of worshipping a post.

You do, however, make a point. The dominant culture in AD 2000 certainly correlates to skin color. Before making the conclusion that skin color was causal, and worshipping a post, you might want to sit down and contemplate and cogitate just why that might be. Unless you like to deal only with things that fit your preconceptions, you have to first exclude such things as:

1. Statistical chance. Sheer dumb luck. One of the common characteristics of humanity is a really terrible ability to come close to true odds a priori. Kept a lot of gamblers, charlatans, and shell-game artists in beans, beds, booze, and broads for many centuries.

2. A variation on the Cathedral Syndrome. The Cathedral Syndrome is so named because of the tendency of American tourists to view old Gothic cathedrals with awe and wonder, not realizing that they are looking at the 1% or so of the bastards that stood up. Few tourists know that it was customary to wait a year before holding the first Mass; wiping out the town was a real risk. Being the best of a bad lot is not a huge recommendation; worshipping the best post is not a real improvement over worshipping the worst.

3. A possibly mistaken assumption that past success insures future success. There is no question that Islam was the dominant culture from 800 AD to about 1300 AD, longer than European success today. Its achievements were many. China is a similar situation and for far longer than either. Both have tended toward enshrining the past. All of the Founding Fathers drivel does not bode well for our culture -- life moves on.

4. The natural but ultimately silly idea that this is the best of all possible worlds. See Voltaire on this one. "Onward and Upward to Bigger and Better thru More of the Same, Forever!" is not really a prescription for survival.

Yes, something is lost when cultures die out. The maternal side of my family is Czech. My grandparents did not speak Czech in the home -- a conscious decision. Do I feel a sense of loss? Of course. Am I going to avenge the battle of the White Mountain where the Austrians handed the Czech nobility their heads? Not bloody likely. Hell, I don't even get the Czech national urge to throw the terminally inconvenient out of high windows.

When you get tired of kneeling in the general direction of a post, read a little of the social sciences; study mankind in general. You may never get any answers but with any luck you will achieve the first, last, and basic function of education: the creation of an infallible bullshit detector.

Delving into this a little - "presumption" is a strong enough legal term
to shift the burden of proof to the accused, and it's pretty difficult
to prove a negative - "nope, never did use that dang thing...I'ts a real
neat conversation piece for the coffee table though...". While it
appears that there is a knit-picking contest going on here, a reasonable
person (in the legal sense) would conclude that possession (without
license in an approved service) is a de facto illegal act since use is
presumed.

> but will become more apparent with repeated overcharges, especially at
> high currents.

I generally agree with this, in principle, but practically have to disagree
for the following reason. The constant volage charger must be very precisely
set to deliver the correct charge into the battery. Even a few mv off
(usually it is undervoltaged) and the battery will never accept full charge.
It will then slowly die off due to sulphation. If the battery is set into
floating service, then a constant voltage is what you have to work with.
If it is used in cyclic service, my experiences with these things over
the past 25 years would suggest that constant voltage charging is not the
best way to charge them, but current charging is.

> When a correctly-set constant-voltage charger is used, charging current
> will drop to a minimal value when the battery reaches the fully-charged
> state. Loss of electrolyte due to forced overcharge will therefore be
> avoided.

You wind up playing a game with this. It all depends upon the type of
service to which the battery is put, and the load capacity used out of
the battery. In typical floating charge service, such as in UPS systems,
the batteries constantly float, and thus must be voltage charged.
Little actual charge is used out of the battery in this class of operation.
In this case, the battery only comes on line a few times per year, and
then for only a short time. To maximize the life of the batteries, they
are voltage charged. But, that is a physical and chemical tradeoff that
is done to prevent excessive outgassing and dehydration of the cells over
the life of the battery. IFF you are cyclically using the batteries, e.g.,
in a small radio station where you use them until discharged, then recharge
them, putting them onto a voltage charger, typically set for 12.6 volts
or thereabouts, you will wind up never fully recharging the battery,
after each use. It will slowly die off, and you will never get full use
or full charge out of it after each recharging. Remember that a battery

must have additional charge to overcome the chemical processes going on inside the battery. That is typically 10-20%, historically, for lead acid batteries. I use a target of 10-15% on the sealed cells, since it is difficult to rewater the cells without physically removing the vent seal caps and rubber vent septum valves. More than that can slowly outgas and dehydrate the cells. If you fail to fully charge the cells, the slow sulphation of the cells will increase the cell resistance, and cause heating and the typical bulging of one or more cells that is very common in these small sealed lead acid batteries. What I have often found in these small 7ah 12v sealed lead acid batteries is that they have been surplussed as dead, but they really have only been undercharged over many years, and a proper current charge at high voltage (I typically use 50-100v current regulated at a few ma) will restore them to capacity and get another several years of low capacity use out of them (typically as plate batteries in OT radio sets). That is a sure indicator that they had constant voltage charging set to too low a voltage.

Guys, a compromise between glass-mounted and exterior-mounted antennas is this: Take the end of your feedline and remove about 19 inches of the outer cover; at that point separate the inner conductor from the copper braid and run them opposite to each other and perpendicular to the feedline, taping them to your rear window:

```
inner cond. copper braid
-------------||--------------
||
||
|| coax feedline
||
||
```

It's nothing but a 2m dipole made entirely from the last 19 inches of your feedline, taped to your car's back window. If the horizontal orientation bothers you, run the two legs at a 45 degree angle from the vertex (where the conductors separate) with that point taped to the base of the window:

```
\ /
\ /
\ /
\ /
\/
||
||
||
```

No muss, no fuss, no damage to the car, and much better results than the glass-mounted "dummy load."

It makes a fine indoor antenna at home, too; mount it as a vertical dipole taped to a window.

Poor Jeffy. Here are the contacts currently looking into Psycho Jeffy's
last slew of harassing posts, all made at Hawaiian taxpayers expense:

dosmith@ginger.bachman.hawaii.edu, help@hawaii.edu,
dcma-agent@hawaii.edu,usenet@hawaii.edu

Also include both of these Senators, they are involved as well:

http://www.senate.gov/~akaka/

http://www.senate.gov/~inouye/

The poor idiot is in so much trouble now he is using several sockpuppets.
Here are a few:

jeffrey4901@my-deja.com

jeffreyh <jeffreyhje@loxinfo.co.th>
Little Jeffy's DAD, must be in Thailand!

And, of course, here is his recent history before his trouble at the
University started Jeffy into the sockpuppet thing:

and many, many more.

I would quote some of this idiot's posts but I feel that everyone having
read the 3,082 posts from this no-life nut case in the last two years is
ENOUGH! Just remember we can at least try to kill filter him. The Thailand
puppet is kind of sad, though. Spas on Jeffy, my boy. And please try to
obtain a life.

P.S. It's O'Brien, with an "E". At least learn how to use QRZ, my wonder of
Hawaiian Academia! Or is that Macadamia? NUT?

Some people never learn.

Gee,
then I know you are a LIAR.

for training purposes, you would have had to report tp PARIS ISLAND!

thank you for confirming that you have lied yet again.

I do believe that impersonating military personel is a federal offense.

First of all, it's Parris Island.
Second of all, Parris Island is the Marine Corps training facility, not the Navy.
Third of all, Great Lakes is the Navy training facility
Fourth of all, even if he was in the Marines he also could have gone to San Diego.

Please give it up.

First, you are on the wrong track.
Second, he doesn't need your idiocy cluttering up his idiocy.
Third, there are other, much more accomplished, "fans" who can take care of tweaking him.

1360. QST: INVITATION TO 3 ANTENNA-RELATED LISTS (REFLECTORS)

Newsgroup: rec.radio.amateur.misc
Date: 2000-09-27 00:00:00 UTC
From: fractenna@aol.com
Message-ID: <20000927082357.21888.00000937@ng-cc1.aol.com>
Source record: 102710

QST--

You are invited to join one or all of the following lists on e-groups(formerly onelist). All these reflectors are e-mail based, friendly, objective, and moderated ,so that no spam, porn, off-topic, or personal-offensive posts are sent out. You will receive no off-list e-mails by subscribing: again; no spam. Occasionally free offers of antenna files and other info are presented, along with photos of relevant antennas (unlike most NG's you CAN do attachments).

These lists (with average recent subscriber sizes) are:

ANTENNAS@EGROUPS.COM 190 members
CROSSFIELDANTENNA@EGROUPS.COM 70 members
FRACTALANTENNA@EGROUPS.COM 260 members

Please review the descriptions at:

http://www.egroups.com

Please note the CFA list specifically deals with this antenna in an objectively critical fashion and no posts will be allowed that make grandiose claims without supporting data presented. To date, no data has been presented which requires the extraordinary claims made by some pundits: there is no evidence for better performance than any other small vertical antenna (and that performance is poor).

Fractal antenna posts should go the the fractal antenna reflector; not the antennas reflector.

To subscribe to any list, either go through the process at egroups, or to skip the process (and some say 'annoying questions') just do:

---------- -subscribe@egroups.com

where the ---------- is the name of a given list (such as 'fractalantenna')

If you have a specific question on this post, please e-mail me off-NG at chipn1ir@aol.com.

73,
Chip N1IR

Dear Friend,

This really works! Have the faith, don't miss this opportunity, get involved also, and it will work for you as it does for us!!!!!

Thank you for your time and interest.

This email contains the ENTIRE PLAN of how YOU can make $50,000 or more in the next 90 days simply sending email!

Seem impossible? Just read on and see how easy this is....

Due to the popularity of this letter on the Internet, a major nightly news program recently devoted an entire show to the investigation of the program described below to see if it really can make people money.

The show also investigated whether or not the program was legal. Their findings proved that there are absolutely no laws prohibiting participation in the program. This has helped to show people that this is a simple, harmless and fun way to make some extra money at home.

The results have been truly remarkable. So many people are participating

that those involved are doing much better than ever before. Since everyone makes more as more people try it out, its been very exciting.

You will understand once you try it yourself!

********* THE ENTIRE PLAN IS HERE BELOW *********

*** Print This Now For Future Reference ***

$$

If you would like to make at least $50,000 in less than 90 days, please read this program...THEN READ IT AGAIN!!

$$

THIS IS A LEGITIMATE, LEGAL, MONEY MAKING OPPORTUNITY!!

It does NOT require you to come into contact with people or make or take any telephone calls. Just follow the instructions, and you will make money. This simplified e-mail marketing program works perfectly 100% EVERY TIME!

E-mail is the sales tool of the future. Take advantage of this virtually

free method of advertising NOW!!! The longer you wait, the more people will be doing business using email. Get your piece of this action!!!

~~~~~~

Hello - My name is Johnathon Rourke, I'm from Rhode Island.

The enclosed information is something I almost let slip through my fingers. Fortunately, sometime later I re-read everything and gave some thought and study to it. Two years ago, the corporation I worked for for

the past twelve years down-sized and my position was eliminated. After unproductive job interviews, I decided to open my own business. Over the

past year, I incurred many unforeseen financial problems. I owed my family, friends and creditors over $35,000. The economy was taking a toll on my business and I just couldn't seem to make ends meet. I had to refinance and borrow against my home to support my family and struggling business.

AT THAT MOMENT something significant happened in my life. I am writing toshare the experience in hopes that this could change your life FOREVER. FINANCIALLY$$$!!!

In mid December, I received this program in my e-mail. Six months prior to receiving this program I had been sending away for information on various business opportunities. All of the programs I received, in my opinion, were not cost effective. They were either too difficult for me to comprehend or the initial investment was too much for me to risk to see if they would work. But as I was saying, in December of 1997 I received this program. I didn't send for it, or ask for it, they just got my name off a mailing list.

THANK GOODNESS FOR THAT!!! After reading it several times, to make sure I was reading it correctly. I couldn't believe my eyes! Here was a MONEY MAKING MACHINE I could start immediately without any debt.

Like most of you I was still a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161 24-hrs) and they confirmed that it is indeed legal!

After determining the program was LEGAL I decided "WHY NOT!?!??"

Initially I sent out 10,000 e-mails. It cost me about $15 for my time on-line. The great thing about e-mail is that I don't need any money for

printing to send out the program, and because I also send the product (reports) by e-mail, my only expense is my time.

In less than one week, I was starting to receive orders for REPORT #1. By January 13, I had received 26 orders for REPORT #1. Your goal is to "RECEIVE at least 20 ORDERS FOR REPORT #1 WITHIN 2 WEEKS. IF YOU DON'T, SEND OUT MORE PROGRAMS UNTIL YOU DO.

My first step in making $50,000 in 90 days was done. By January 30, I had received 196 orders for REPORT #2. Your goal is to "RECEIVE AT LEAST 100+ ORDERS FOR REPORT #2 WITHIN 2 WEEKS. IF NOT, SEND OUT MORE
~~~~~~

PROGRAMS UNTIL YOU DO. ONCE YOU
HAVE 100 ORDERS, THE REST IS EASY, RELAX, YOU WILL MAKE YOUR $50,000
GOAL."

Well, I had 196 orders for REPORT #2, 96 more than I needed. So I sat
back and relaxed. By March 1, of my e-mailing of 10,000, I received
$58,000 with more coming in every day. I paid off ALL my debts and
bought a much needed new car!

Please take your time to read this plan, IT WILL CHANGE YOUR LIFE
FOREVER$!!! Remember, it won't work if you don't try it. This program
does work, but you must follow it EXACTLY!

Especially the rules of not trying to place your name in a different
place.
It won't work and you'll lose out on a lot of money! In order for this
program to work, you must meet your goal of 20+ orders for REPORT #1,
and 100+ orders for REPORT #2 and you will make $50,000 or more in 90 days.

I AM LIVING PROOF THAT IT WORKS!!! If you choose not to participate in
this program, I am sorry. It really is a great opportunity with little
cost or risk to you. If you choose to participate, follow the program
and you will be on your way to financial security. If you are a fellow
business owner and are in financial trouble like I was, or you want to
start your own business, consider this a sign. I DID! $$

Sincerely,

Johnathon Rourke
~~~~~~

A PERSONAL NOTE FROM THE ORIGINATOR OF THIS PROGRAM:

By the time you have read the enclosed program and reports, you should
have
concluded that such a program, and one that is legal, could not
have been created by an amateur. Let me tell you a little about myself.
I
had a profitable business for 10 years. Then in 1979 my business
began falling off. I was doing the same things that were previously
successful for me, but it wasn't working. Finally, I figured it out. It
wasn't
me, it was the economy. Inflation and recession had replaced the stable
economy that had been with us since 1945.

I don't have to tell you what happened to the unemployment
rate...because
many of you know from first hand experience. There were more
failures and bankruptcies than ever before. The middle class was
vanishing.
Those who knew what they were doing invested wisely and
moved up. Those who did not, including those who never had anything to
save
~~~~~~

or invest, were moving down into the ranks of the poor. As
the saying goes, "THE RICH GET RICHER AND THE POOR GET POORER." The
traditional methods of making money will never allow you
to "move up" or "get rich." Inflation will see to that.

You have just received information that can give you financial freedom
for
the rest of your life, with "NO RISK" and "JUST A LITTLE BIT OF
EFFORT." You can make more money in the next few months than you have
ever
imagined. I should also point out that I will not see a penny
of this money, nor anyone else who has provided a testimonial for this
program.

I have retired from the program after sending thousands and thousands of

programs. Follow the program EXACTLY AS INSTRUCTED. Do not
change it in any way. It works exceedingly well as it is now. Remember
to
e-mail a copy of this exciting report to everyone you can think of.
One of the people you send this to may send out 50,000...and your name
will
be on every one of them! Remember though, the more you send
out, the more potential customers you will reach. So my friend, I have
given you the ideas, information, materials and opportunity to become
financially independent.

IT IS UP TO YOU!! NOW DO IT!!

~~~~~~

Before you delete this program from your in box, as I almost did, take a

little time to read it and REALLY THINK ABOUT IT. Get a pencil and
figure out what could happen when YOU participate. Figure out the worst
possible response and no matter how you calculate it, you will still
make a lot of money! You will definitely get back what you invested. Any

doubts you have will vanish when your first orders come in.

$$$ IT WORKS!!! $$$

Jody Jacobs Richmond, VA

~~~~~~

HERE&#65533;S HOW THIS AMAZING PROGRAM WILL MAKE YOU THOUSANDS OF
DOLLAR$$$$!!!!

This method of raising capital REALLY WORKS 100% EVERY TIME. I am sure
that
you could use up to $50,000 or more in the next 90 days.
Before you say "BULL... ", please read this program carefully. This is
not

a chain letter, but a perfectly legal money making business.

As with all multi-level businesses, we build our business by recruiting new
partners and selling our products. Every state in the USA allows you
to recruit new multi-level business partners, and we sell and deliver a
product for EVERY dollar received.

YOUR ORDERS COME BY MAIL AND ARE FILLED BY E-MAIL, so you are not involved
in personal selling. You do it privately in your own
home, store or office. This is the EASIEST marketing plan anywhere! It is
simply order-filling by email!

****
The product is informational and instructional material, keys to the secrets
for everyone on how to open the doors to the magic world of E-
COMMERCE, the information highway, the wave of the future!

PLAN SUMMARY:

(1) You order the 4 reports listed below ($5 US each.) They come to you by
email.

(2) Save a copy of this entire letter and put your name after Report #1 and
move the other names down.

(3) Via the internet, access Yahoo.com or any of the other major search
engines to locate hundreds of bulk email service companies (search for
"bulk email") and have them send 25,000 - 50,000 emails for you about
$49+).

(4) Orders will come to you by postal mail - simply email them the Report
they ordered. Let me ask you - isn't this about as easy as it gets?

****

By the way there are over 50 MILLION email addresses with millions more
joining the internet each year so don't worry about "running out" or
"saturation". People are used to seeing and hearing the same advertisements
every day on radio/TV. How many times have you received the
same pizza flyers on your door? Then one day you are hungry for pizza and
you order one. Same thing with this letter. I received this letter
many times - then one day I decided it was time to try it.

****

YOU CAN START TODAY - JUST DO THESE EASY STEPS:

STEP #1. ORDER THE FOUR REPORTS

Order the four reports shown on the list below (you can't sell them if you don't order them). -- For each report, send $5.00 (US) CASH, the NAME & NUMBER OF THE REPORT YOU ARE ORDERING, YOUR E-MAIL ADDRESS, and YOUR NAME & RETURN ADDRESS (in case of a problem) to the person whose name appears on the list next to the report.
MAKE SURE YOUR RETURN ADDRESS IS ON YOUR ENVELOPE IN CASE OF ANY MAIL PROBLEMS! Within a few days you will receive, by e-mail, each of the four reports. Save them on your computer so you can send them to the 1,000's of people who will order them from you.

STEP #2. ADD YOUR MAILING ADDRESS TO THIS LETTER

a. Look below for the listing of the four reports.
b. After you've ordered the four reports, delete the name and address under REPORT #4. This person has made it through the cycle.
c. Move the name and address under REPORT #3 down to REPORT #4.
d. Move the name and address under REPORT #2 down to REPORT #3.
e. Move the name and address under REPORT #1 down to REPORT #2.
f. Insert your name and address in the REPORT #1 position.
Please make sure you COPY ALL INFORMATION, every name and address, ACCURATELY!

STEP #3. SAVE THIS LETTER

Take this entire letter, including the modified list of names, and save it to your computer. Make NO changes to these instructions. Now you are ready to use this entire email to send by email to prospects.

Report #1 will tell you how to download bulk email software and email addresses so you can send it out to thousands of people while you sleep!

Remember that 50,000+ new people are joining the internet every month.

Your cost to participate in this is practically nothing; surely you can afford $20 (US) and initial bulk mailing cost. You obviously already have a computer and an Internet connection and e-mail is FREE!

There are two primary methods of building your downline:

METHOD #1: SENDING BULK E-MAIL Let's say that you decide to start small,

just to see how it goes, and we'll assume you and all those
involved email out only 2,000 programs each. Let's also assume that the
mailing receives a 0.5% response. The response could be much
better. Also, many people will email out hundreds of thousands of
programs
instead of 2,000. (Why stop at 2000?). But continuing with this
example, you send out only 2,000 programs. With a 0.5% response, that is

only 10 orders for

REPORT #1. Those 10 people respond by sending out 2,000 programs each
for a
total of 20,000. Out of those 0.5% 100 people respond and
order

REPORT #2. Those 100 mail out 2,000 programs each for a total of
200,000.
The 0.5% response to that is 1,000 orders for

REPORT #3. Those 1,000 send out 2,000 programs each for a 2,000,000
total.
The 0.5% response to that is 10,000 orders for

REPORT #4. That's 10,000 $5 bills for you. CASH!!!

Your total income in this example is $50 + $500 + $5,000 + $50,000 for a

total of $55,550!!!

REMEMBER FRIEND, THIS IS ASSUMING 1,990 OUT OF THE 2,000 PEOPLE YOU MAIL
TO
WILL DO ABSOLUTELY NOTHING AND
TRASH THIS PROGRAM! DARE TO THINK FOR A MOMENT WHAT WOULD HAPPEN IF
EVERYONE, OR HALF SENT OUT 100,000
PROGRAMS INSTEAD OF 2,000. Believe me, many people will do just that,
and
more!

METHOD #2: PLACING FREE ADS ON THE INTERNET
Advertising on the internet is very, very inexpensive, and there are
HUNDREDS of FREE places to advertise. Let's say you decide to start
small just to see how well it works. Assume your goal is to get ONLY 10
people to participate on your first level. (Placing a lot of FREE ads on

the Internet will EASILY get a larger response.) Also assume that
everyone
else in YOUR ORGANIZATION gets ONLY 10 downline members.
Look how this small number accumulates to achieve the STAGGERING results

below:

1st level--your first 10 send you
$5.....$50
2nd level--10 members from those 10 ($5 x 100).....$500
3rd level--10 members from those 100 ($5 x 1000).....$5,000

4th level--10 members from those 1000 ($5 x 10,000)..$50,000

$$$$$$ THIS TOTALS ----------$55,550 $$$$$$

AMAZING ISN'T IT? Remember friends, this assumes that the people who participate only recruit 10 people each. Think for a moment what would happen if they got 20 people to participate! Most people get 100's of participants and many will continue to work this program, sending out programs WITH YOUR NAME ON THEM for years! THINK ABOUT IT!

~~~~~~

People are going to get emails about this plan from you or somebody else and many will work this plan. The question is, don't you want your name to be on the emails they will send out?

* * * DON'T MISS OUT!!! * * * JUST TRY IT ONCE!!! * * *

* * SEE WHAT HAPPENS!!! *** YOU'LL BE AMAZED!!!* *

~~~~~~

ALWAYS PROVIDE SAME-DAY SERVICE ON ALL ORDERS!

This will guarantee that the e-mail THEY send out with YOUR name and address on it will be prompt because they can't advertise until they receive the report!

~~~~~~

GET STARTED TODAY: PLACE YOUR ORDER FOR THE FOUR REPORTS NOW.

Notes: ALWAYS SEND $5 CASH (U.S. CURRENCY) FOR EACH REPORT. CHECKS NOT ACCEPTED. Make sure the cash is concealed by wrapping it in two sheets of paper. On one of those sheets of paper write:

(a) the number & name of the report you are ordering

(b) your e-mail address, and

(c) your name & postal address.

REPORT #1 "The Insider's Guide to Advertising for Free on the Internet"

ORDER REPORT #1 FROM:
Andrew Skidmore
9379 Alexander Rd
Alexander, NY 14005
USA

REPORT #2 "The Insider's Guide to Sending Bulk E-mail on the Internet"
~~~~~~

ORDER REPORT #2 FROM:
Lars Pedersen
Skejbygaardsvej 7, 1, 10
8240 Risskov
Denmark

REPORT #3 "The Secrets to Multilevel Marketing on the Internet"

ORDER REPORT #3 FROM:
John Cole Werner
PO Box 3281
Lihue, HI 96766

REPORT #4 "How to become a Millionaire utilizing the Power of Multilevel

Marketing and the Internet"

ORDER REPORT #4 FROM:
Zac Majors
2242 E Woodchuck Way
Sandy, UT 84093

******* TIPS FOR SUCCESS *******

TREAT THIS AS YOUR BUSINESS! Be prompt, professional, and follow the
directions accurately. Send for the four reports IMMEDIATELY
so you will have them when the orders start coming in because: When you
receive a $5 order, you MUST send out the requested
product/report. It is required for this to be a legal business and they
need the reports to send out their letters (with your name on them!)

-- ALWAYS PROVIDE SAME-DAY SERVICE ON THE ORDERS YOU RECEIVE. -- Be
patient
and persistent with this program - If you follow
the instructions exactly - results WILL FOLLOW. $$$$

******* YOUR SUCCESS GUIDELINES *******

Follow these guidelines to guarantee your success: If you don't receive
20
orders for REPORT #1 within two weeks, continue advertising or
sending e-mails until you do. Then, a couple of weeks later you should
receive at least 100 orders for REPORT #2. If you don't, continue
advertising or sending e-mails until you do. Once you have received 100
or
more orders for REPORT #2, YOU CAN RELAX, because the
system is already working for you, and the cash will continue to roll
in!

THIS IS IMPORTANT TO REMEMBER: Every time your name is moved down on the

list, you are placed in front of a DIFFERENT report. You
can KEEP TRACK of your PROGRESS by watching which report people are
ordering
from you.

To generate more income, simply send another batch of e-mails or continue
placing ads and start the whole process again! There is no limit to
the income you will generate from this business!

Before you make your decision as to whether or not you participate in this
program, please answer one question. ARE YOU HAPPY WITH
YOUR PRESENT INCOME OR JOB? If the answer is no, then please look at the

following facts about this super simple MLM program:

1. NO face to face selling, NO meetings, NO inventory! NO Telephone calls,
NO big cost to start! NOthing to learn, NO skills needed! (Surely
you know how to send email?)

2. No equipment to buy - you already have a computer and internet connection
- so you have everything you need to fill orders!

3. You are selling a product which does NOT COST ANYTHING TO PRODUCE OR
SHIP! (Emailing copies of the reports is FREE!)

4. All of your customers pay you in CA$H! This program will change your
LIFE FOREVER!! Look at the potential for you to be able to quit your
job and live a life of luxury you could only dream about! Imagine getting
out of debt and buying the car and home of your dreams and being
able to work a super-high paying leisurely easy business from home!

$$$ FINALLY MAKE SOME DREAMS COME TRUE! $$$

ACT NOW! Take your first step toward achieving financial independence.
Order the reports and follow the program outlined above--
SUCCESS will be your reward.

Thank you for your time and consideration.

PLEASE NOTE: If you need help with starting a business, registering a
business name, learning how income tax is handled, etc., contact your
local office of the Small Business Administration (a Federal Agency) at
1-800-827-5722 for free help and answers to questions.

Also, the Internal Revenue Service offers free help via telephone and free
seminars about business tax requirements. Your earnings are highly
dependent on your activities and advertising. The information contained on
this site and in the report constitutes no guarantees stated nor
implied. In the event that it is determined that this site or report
constitutes a guarantee of any kind, that guarantee is now void. The earnings
amounts listed on this site and in the report are estimates only. If you

have any questions of the legality of this program, contact the Office
of
Associate Director for Marketing Practices, Federal Trade Commission,
Bureau
of Consumer Protection in Washington, DC.

==========

Under Bill s.1618 TITLE III passed by the 105th US Congress this letter
cannot be considered spam as long as the sender includes contact
information and a method of removal.

This is a one time e-mail transmission. No request for removal is
necessary.

Mr Davies:

You stupid Dipswitch. Read the the News Group titles that this
SPAM was crossposted to.

rec.radio.amateur.dx,rec.radio.amateur.equipment,
rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.swap

Now please tell me what this minusha has to do with these News Groups.

It is just plain SPAM from an IDIOT with another IDIOT defending his
stupid childish actions. where would we be if every IDIOT posted his
Web Page in this News Group

Get a LIFE.. SFB.

Just my opinion..

Bob

Yes it probably does and almost everybody does it.. With Most people
it is a URL at the bottom of the showing where to look if they want..

It is NOT as in AB7SL's case where the whole dam message was SPAM.
Their was NO body to the message. ALL WEBPAGE SPAM.

Just my opinion..

1367. Yaesu VX-5R VFO BAND Problem- Pls HELP

Newsgroup: rec.radio.amateur.misc
Date: 2000-09-27 00:00:00 UTC
From: vikramkrishna@iskconbangalore.org
Message-ID: <8qt3rd$1l8$1@nnrp1.deja.com>
Source record: 102717

I am facing a very peculiar problem with my Yaesu VX-5R HT. I have been using it for an year without any problem. Just yesterday, when I put on the power- I am not sure if I pressed the Light or FW Function button by mistake while powering on- the radio had many of its preprogrammed memory stations not being displayed and it would not listen on frequencies like 161.675 mhz VHF which is well within its range. Then I reset the microprocessor by pressing the MR,VFO,4 while powering on. From then, in the VFO mode, it does not allow me to enter any frequency other than the following range - 50-54, 144-148, 430-450 mhz and in all these bands, the band shows NFM. Even if I press the band button, it just shows these 3 ranges- no AM, WFM, or any other ranges within NFM. There is no service centre in India where I stay. Pls let me know if I can try anything before giving up. Any suggestions would be most welcome.

African Americans are just as smart if not smarter than most White people, what is depressing is people still see black and white and not individuality of each person.
To be equal is to be equal with the same standards of all other human beings, why change somthing for one set of human beings and not all?. Equality is best, to stray from equality is to be different.

just a thought...
P.S. the tests and code is not all that hard to take you just need to study or ask help to learn. Hams will help others who want to be hams.

I feel that the great american dream is under attack.
You remember that dream? The one where there is no one poor, where everyone can afford to take
care of those who are poor, where people pull their weight in society, where one has a white picket
fence with no gangster grafitti on it, where driveby shootings are not even known about, where people
can get decent service at resturaunts and hotels instead of a "don't push me, I'm not your slave anymore"
attitude, where people can send their kids to safe schools that have no crack cocaine, pot and so on being
pushed on them, where a conflict is worked out with reason or with an old fashioned fist fight instead of a gun
shootout, where we don't have morons on TV like Al Sharpton or that Lewis Farrakhan idiot, where each person
can have their own personal dream instead of having a bunch of faggoty liberal's universal dreams forced on them.

Wow Orb...You must be thinking of a Fairyland! I don't think there was any point in American history where there was not poor people. I can't think of any time in American history when there was no "grafitti", they just called it something else.

As for you comments about "decent service at resturanunts and hotels", it is a raciest comment to suggest that they are all black.

You obviously have a lot of anger built up and you want to blame it on someone other than yourself. You choose to be raciest. What a shame. This country does need a change and it needs to have some of its members booted out, but it ain't the minorities in general, it is people like you that must HATE.

What you are losing sight of is the fact that the American dream is opportunity. Opportunity and nothing more.

> You remember that dream? The one where there is no one poor, where
> everyone can afford to take care of those who are poor, where people

Trouble is that greed slipped in and caused those with the cash to keep it all for themselves. Social action was the only thing that forced the wealthy to share the wealth.

> pull their weight in society, where one has a white picket
> fence with no gangster grafitti on it, where driveby shootings are
> not even known about,

Why do gangs exist? There are no real jobs to be had in the inner city. The schools there are neglected and environmental racisism has poluted one thriving neighborhoods. Inner city youth can earn a ton of money off of the drug trade. Where is their alternative?

> where people can get decent service at resturaunts and hotels instead
> of a "don't push me, I'm not your slave anymore" attitude,

I find that if I practice giving kindness then that is what I receive in return. I have yet to encounter the kind of service you mention.

> where people can send their kids to safe schools that have no crack
> cocaine, pot and so on being pushed on them,

Over 90% of all drug users in the USA are white and live in the suburbs. All those white folks buy from white drug dealers. I know when I was a kid my schools local drug ring was run by a white kid who was the son of a local clergyman.

> where a conflict is worked out with reason or with an old
> fashioned fist fight instead of a gun shootout,

How many school shootings in the last few years were perpetrated by white well-to-do white kids? Pretty much all of them. No wait ... I take that back - all of them where white kids.

> where we don't have morons on TV like Al Sharpton or that Lewis
> Farrakhan idiot, where each person can have their own personal dream
> instead of having a bunch of faggoty liberal's universal dreams

> forced on them.

I agree there are far to many morons on TV like Rush Limbaugh, Pat Buchanan, and their ilk. But you know what their existance is a reality that needs to be tollerated. Whether you like it or not the world is diverse. There are diverse opinions, skin colors, cultures, eye colors, etc. The sooner we realize that we are all in this together and get down to the hard work of fixing our world the better off we will be.

Cheers,

Dave

The reader should be aware that the individual responsible for the screen name "Fractenna" is a known troll and has been banned from several mailing lists dedicated to Ham Radio. HIs "discussions" inevitably lead to strife.

ANY response to him is likely to lead to a disagreeable interaction. If you doubt this, please view the archives for rec.radio.amateur.antenna with particular attention to the screen name "Fractenna".

He is an ego-driven person who does not react well to ANY disagreement or difference with his position. He has been known to misquote, misinterpret and distort messages from others that put him in a poor light. He has done damage to some people, off line, because he saw them as a danger to his "reputation".

Be warned

So the solution was to steal from the productive members of society, and subsidize the proliferation of a group of non-productives dependent on society for their day to day existence? It's rather obvious how well that plan worked out...

>SNIP
> Why do gangs exist? There are no real jobs to be had in the inner
> city. The schools there are neglected and environmental racisism has
> poluted one thriving neighborhoods.

The inner city jobs are gone due to the high cost of tyring to run a profitable business in these areas. Many large companies have tried, but most all were forced to move out due to the frequent incidents of robbery, shoplifting, burglary, arson, etc.

>Inner city youth can earn a ton of money off of the drug trade. Where is their alternative?

They could make an attempt at educating themselves instead of worshipping the criminal element of society. Those who have put forth the effort have done well, but the majority are products of parents who themselves are criminals, welfare recepients, and drug addicts. This is what stealing from the productive to subsidize the lazy has accomplished. But the whole "inner city" mess is all part of a master plan designed to ensure that the liberal element always maintains a ready pool of guaranteed votes at election time.

I want to make some clarification to the above statement.

I was refering to HF. I am sure they have done a fine job on line of
site V/UHF. HF is another story.

Additionally I have no first hand knowledge of the Yount case. Only my
opinions. I let me alligator mouth overide my hummingbird butt.

Thank You

Dan/W4NTI

> white procreation an attack?

If you look at it from a biological perspective, a biologist who is trying to preserve a population like the rain forest, will consider clearing areas of rainforest for growing crops, an attack on it.

Its not that he hates crops, but that the one is at the expense of the other.

When people also try to fight those who try to preserve the rainforest, by discounting their arguments out of hand, and by calling them "crazy" without even looking at their evidence, and mounting a public relations campaign to discredit the notion that preserving the rainforest is a valid concern, and by continuing to clear the rainforest, despite pleas and warnings, along with detailed explanations from scientists and environmentalists, then the rain forest IS under attack.

You have the same problem with white people. Today, several American Indian languages are extinct. Only within the space of the last few years, many of them went extinct, and now have no living speakers. Some of this is due to suppression of American Indian culture by whites. But it is also due to the fact that young American Indians alive today, who have the chance to learn the language of their ancestors, choose not to do so, because of the influence of the outside world.

Inter racial marriage is also a factor. More and more American Indians are marrying outside of their race and culture.

The result is that the offspring of marriages have an even lesser likelihood of learning the language and culture of their Indian side(if you read American Indian newspapers, you will be aware that they do, in fact, call themselves Indians, inspite of pious white liberals trying to make everyone use politically correct terminology).

The death of a race and a culture are interwined. Fewer and fewer American Indians can be found, who are of pure blood. For the film "Last of the Mohicans", hardly any of the actors portraying American Indians were pure blooded American Indians.

People who attempt to introduce the sophistry that their is no such thing as a pure race, are trying to dismiss the issue. If what they are saying is true, Biologists would not be so hesitant about breeding the Florida Panther with the Texas Cougar. That project was begun, because populations of one of these, had diminished to the point that there was a lethal amount of deleterious alleles in the gene pool; not enough genetic diversity to ensure continued survival.

The original solution was thought to be breeding the Florida Panther with a closely related subspecies, in order to introduce new genes into an old faultering gene pool. This sounded fine, until people saw what the hybrids looked like: nothing like a Florida Panther.

So biologists began backpedalling, acknowledging that mixing the Florida Panther with another subspecies would cause its disappearance as surely and completely as if they were either hunted to extinction, or allowed to die off from disease and genetic abnormality.

This is why some people are so concerned about White human beings. They have enough forsight to see what most people are ignoring. In the instance of the rainforest, people do not want it to disappear, not only because it is a possible treasure trove for pharmaceuticals, etc. But because it is a form of beauty, and there is something in the human spirit that does not want to see beauty destroyed.

This is more pertinent, when it involves your own relatives, race and culture. Whites have contributed modern medicine, modern agriculture, nearly all of art, science and technology, as we know it today. In Africa, Asia, the Middle East, and India, people can still remember a time when they had no safe drinking water or electricity, no hospitals or modern medicine, no safe method of travel over long distances that is now availabel because of the Automobile, train and airplane, and no reliable way of communicating such as is afforded to us by the telephone, computer, etc.

These things were all given to us by whites. Besides, I LOVE the white race, civilization and its culture and history, and would be beside myself with sadness to see it desecrated or destroyed.

regards

S. Havibakhshi

You are too quick with that explanation. Why is it, then, that in Iran,
where there is an even lower standard of living, do you not see gangs?
And that, in spite of the flow of heroin and opium from neighboring
Afghanistan?

It seems that America's inner city youth are monsters, not human beings.
The criminal types I met in Iran were gentlemen, compared with these.

>
> How many school shootings in the last few years were perpetrated by
> white well-to-do white kids? Pretty much all of them. No wait ... I
> take that back - all of them where white kids.

Those are the ones you've heard about. Stuff like that is so usuall in the inner cities, that no one bothers to report it, any more. There were shootings EVERY week, where I used to live. These were done by blacks, and no one ever read about those incidents in any newspapers...

The reason that those white kids do those things, is because they have become alienated from society, and anti-social. When I was growing up, white kids used to play "Daniel Boone".

Now that it is politically incorrect for whites to look up to their old hero's, and try to emulate them, thanks to the anti-white efforts of liberal educators, the media, and minority interest groups, ... you don't see white kids looking up to White American Hero's anymore.

Wasn't it the anti-white leftists, and liberals in their wake, who first trotted out the argument that a lack of wholesome peers or heros causes kids to go the wrong way, and not absorb wholesome values?

So what is left for white kids to identify with? Some stupid stuff like gangsta rap, or like Gothic subculture, and Marylin Manson, as in the case of Harris and Klebold at Columbine, in Littleton, Colorado.

That does not stop both parties (buyer and seller) from making an
arrangement to purchase the amp. The same goes for "800mhz Scanners"

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help
curb the growing problem of online stalking, a U.S. Justice Department

report recommends. Internet service providers, which link users to e-mail and the World Wide Web, report a growing number of complaints about harassing and threatening behavior online, the report said.

Honolulu Advertiser, 9/16/99

The Illinois State Attorney of Cook County, has proposed legislation prohibiting harrassment or threats on the Internet. From the reported proposed penalty, threatening or harrassing via the Internet would be a Class 4 felony in Illinois, punishable by up to 3 years in prison. The state legislature has not yet considered this proposal.

And here are AF2Y's comments.

My son, an attorney in D.C., has been telling me for quite a while about the type of info Jeff posted I'm happy it is now out for all to see. Rich gets the scoop on a lot of things and he was right on target with this one. I heeded his advice and others should too.

Because of the rising popularity of litigation because of Internet conflicts, I have become a mild mannered Clark Kent instead of running into phone booths all the time, ripping off my shirt and pants and emerging with the body suit and the big red S on my chest. Come to think of it wouldn't it be something if Internet scrappers forgot to put on their Superman body suits in the morning and ran out of the booths butt naked? They'd fly alright; right down to the local pokey.

Calm down Jimmy, Calm down Jeff. This thing is getting out of hand. Jimmy. you're working hard to become successful and Jeff, you're an educator. Both of you are intelligent and resourceful and the escalating war will prove counter productive for both. No one demands you shake hands but backing off, even ignoring one another is the first step. Some hard hitting give and take is not out of the question but you two are escalating this thing to the max and it's unwise and unhealthy. If you two don't back off, I wouldn't be surprised if one or more lawyers made a substantial amount of green from it. You two WON'T. THEY WILL!

Remember John Lennon's words, "Give peace a chance" to which I add on a personal note to you two, "If you don't yoko, the other guy won't ono." Incidentally may I make this suggestion? If you two want to continue this stuff, take it to alt.radio.scanner.flame_fest.

That was not funny. I have feelings for the white race, and will do
whatever I can to fight for it, if I see it threatened, or disparaged.

People who have feelings of love for something will not crawl back under
any rock just because their sentiments were not well recieved by some
particular group or individual. This country is THEIR'S, because
THEY built it.

The only way that people living in its comfort can learn to appreciate
the remarkable job that they did, if for them to go live in a third
world country. I mean, REALLY live there, with no way to ever get back
to the United States.

It is only THEN that you'll understand.

I've heard that many activists (including black panthers) DID, in fact
go live in third world countries like Cuba, etc, thinking "good
riddance" to America. In every case I heard, these folks couldn't get
back fast enough, when they realized how good things had been for them
in the west.

Are you unaware that there is such a thing as Forensics, or Physical
Anthropologists? This is stuff that they're teaching in medical schools.
Its funny, that you treat it like a UFO sighting.

> >Skin color has little to do with it.
>
> Especially when all you've got are bones.

What he meant by that is that skin color is only one single criteria for
telling a person's race.

Bone structure is just as important.

When human skeletal remains are discovered, identification is important.
The Forensic pathologist or anthropologist takes all clues into account,
including these, to identify the race of the person:

Blacks have sloped faces and you cannot put one end of a pencil on their
chin, and touch the other end to the base of their nasal septum (this
condition is called prognathism), with no nasal sill, a round nasal

bone, a large and square palate, and square eye sockets. The chin is not sharp.

Whites tend to have sharp nasal bones, no prognathism, heavy brow ridges, and a nasal sill (this means that you cannot run a ballpoint pen along the maxilla, up into the nasal septum, because there is a small, sharp protrudence of bone, forming a "sill"). The chin is sharp.

RElatively speaking Western Civilization is a short time in history. I
agree that there are achievements, however with utmost arrogance and
usurpation of a "divine" right of domination and forced privilages.

There is no reason for this and good look at "other civilizations"
shows phenomenal contributions as well.
The current status is based on a military power and forced domination.
That is not a right of any civilization or group.

You are looking at limited advantahes from very narrow perspective of
time.

Or else what?

"Countenance"? There are better-fitting word-choices than that. And I'm quite a bit taller than 5-2!

Now, no more of those threats about coming to my home. As I've said before, there are over 50 TV cameras in the high-rise I live in, including the elevators. And the item that came in the mail was turned over to the postal officials.

Up to this point you are doing fine, Blake.

But then below your statements become complete rubbish

SNIP
> to lure people into what is for the most part, the most unwanted
> postions in the Reserve, sort of like cannon fodder.

Blake, if they were unwanted positions then the Navy wouldn't offer
the billets. Certainly the personnel who fill those positions are proud,
or are you saying that "Information Technologists" (known as
"Radioman" before Jan 2000) are "unwanted"?!?!?!?!

> NPSAC is sort of like a wannabee boot camp. According to people
> in the navy, or recent retirees, the enlisted NPSAC is somewhat like
SNIP

Again, more rubbish from you Blake. I am SURE that you could NOT be
able to give names of any "people in the navy, or recent retirees" whom you
had
spoken with that would have given you such information as above. You
certainly
have NO idea of what the NPSAC Recruit Training is like. By the way, Blake,
it
is called "Recruit Training" and has been called as such for over 25 years.
The slang
term of "boot camp" is only used by people who have no recent military
knowledge
of the Navy, so any knowledgable people you would have spoken to would have
NOT used the term "boot camp" in discussions.

Once again, Blake Bowers, you have been proven a liar!!

BTW - NPSAC training includes all the basics such as firefighting, basic
radio
knowledge, PT, history, Gas mask use, etc.

You better hope that does not go into effect in Hawaii, you would be charged immediately. Start saving money for Usenet access, Jeffy. The University is about to withdraw your access. Poor Jeffy. I think you have gone obsessive-compulsive.

Exactly as I said. Those positions are unwanted positions by
most people going into the reserves, hence hard to fill, hence
subject to recruitment enhancements. What part did you
you fail to understand? The program started due to the
lack of recruits for some of the basic ratings, and the
reserves needed to fill those slots.

Actually, you are incorrect again John. NPSAC has only been around
for 1 -2 years, and therefore could not be called "recruit training"
for over 25 years.

> The slang
> term of "boot camp" is only used by people who have no recent military

John, please follow the thread, "boot camp" which for years has been
a slang term to denote basic training in the military, was my words.

> Once again, Blake Bowers, you have been proven a liar!!
>

No John, I have been proven to disagree with you. Nothing I
said was a lie, just as no part of this specific message I
am replying to from you had a lie in it. Do you normally
call everyone who disagrees with your interpetation a liar?

Now, if we were going to call names, we would call you
a troublemaker, for your malicous crossposting to newsgroups
that were not in this thread, and have no desire to be in
this thread, such as alt.firefighters. But, I have no
desire to start trouble, and wish you would decide not to
also. This is an attempt to have a reasoned, intelligent
conversation.

> BTW - NPSAC training includes all the basics such as firefighting, basic
> radio
> knowledge, PT, history, Gas mask use, etc.

Yep, it sure does. I don't disagree with this, it is an
abbreviated version of the basic recruit training program,
designed to help fill vacancies. In the words of the brass,
it is not working to their expectations, but they are
continuing to try for now. Everything I said is on the Web
John, check it out.

So you are saying John, that if the navy had postions that no one
wanted, they would not try to fill those postions?

That does not even begin to make sense. In each branch of the
military, there are postions that are always tough to fill, and
the subject of enhancements to the recruiting program.

They don't just stop trying to fill them!

It depends!

If the language of the bill is specific to cell
phone usage, then perhaps not. If the langauge
is broad and addresses cell phones and other
radio devices (e.g. CB, etc.) then it may.

> Should Chicago hams forget about repeater QSOs during the daily commute?

Well it seems that all you need do is add a
hands free capability to your mobile 2m
set-up. That's not difficult at all.

Has the law actually been passed yet?

Cheers,
Bill K2UNK

You have a federal license that supersedes state regulations, Dave.
In fact, if you watch closely, the ban will almost certainly exclude
licensed radio operators anyway (most of them do). But, if it doesn't,
keep you license handy and don't worry about it.

Dwight,

What aspect of your federal amateur license
allows you to operate a radio in a motor
vehicle where such operation may be prohibited?

Does CB, as a federally authorized service,
also enjoy the federal pre-emption you think
exists for hams? What about private radio
as used in many businesses?

Indeed, doesn't the FCC authorize the cellular
providers to offer the service and, as such,
couldn't you argue that all cell phone users
should have federal preemption over any state
or local laws governing use of the service
in a vehicle?

Cheers,
Bill K2UNK

It worked very well thank you very much. We have 40 hour work weeks,
minimum wage, paid vacation, maternity leave, and on , and on. You can
give that all back if you want.

> > Why do gangs exist? There are no real jobs to be had in the inner

And you think this has not been tried? A good friend of mine is am MBA
grad from the Wharton Scool at the University of Pennsylvania. He is
black. He graduated in the top 10% of his class. He is black and
while all his white fellow students got jobs in the range of 6 figures
he could not find a willing employer. So what good is education if the
racism endemic to the old boy network keeps the good jobs in the hands
of whites?

Bill, I'm not here to educate you about the FCC. Numerious FCC rulings exist that preempt state and local regulations pertaining to Amateur radio. Look them up yourself.

> Does CB, as a federally authorized service,
> also enjoy the federal pre-emption you think
> exists for hams? [snip]

CB users have no license, and there are no rulings by the FCC that preempt state and local regulations pertaining to to this.

Because the difference between the richest and poorest members of
American society is greater than any other nation on the face of the
earth. Add to that the easy availability of guns and you have a
devilish mix that conspires against the inner cities.

> It seems that America's inner city youth are monsters, not human
> beings. The criminal types I met in Iran were gentlemen, compared
> with these.

You have obviously never been there have you. The people in the inner
city are as human as anyone. Stop learning about people from the media
and find out what the real world is realy like.

> You ain't been out in the real world, mate. But give it time... you'll
> learn.

What exactly is the real world that I have been missing? I have
travelled from London to Tokyo, from Portland Maine to Atlanta to
Chicago to LA to San Diego. I have served in charitable ventures in
the inner cities and in Appalachia. Where is this real world I keep
missing?

> newspapers...

NOT. I am talking about real numbers. Not some fantasy land where crime goes unreported. If the ME gets a gunshot victim in his morgue it gets reported. Folks who hold racist views would love for the problem to be with someone other than their group but the fact of the matter is that violence knows no color lines.

> The reason that those white kids do those things, is because they have

Maybe because some of our "heros" never were "heros" to begin with. There are plenty of true white and black heros to look up to. You just have to be willing to look for the right ones.

> Wasn't it the anti-white leftists, and liberals in their wake, who

I'm not much of a gambler, but in this case I bet the FCC bows to
local jurisdiction.

Why? The matter here is not of control of the radio station, but
of control of the motor vehicle. In this case, the greater public
saftey has to be considered, and clearly states DO have the right to
restrict certain dangerous practices in motor vehicles operated on
thier streets and highways.

I agree with Dwight, though, that it probably WILL come down to an
exclusion of two-way radios that do NOT require the operator to hold a
part of the receiver to thier head in order to operate it.

However, I have said similar words before....IT'S IMPERATIVE THAT
AMATEURS AND OTHER RADIO HOBBYISTS BE ACTIVE IN LOCAL POLITICS AND
DECISION MAKING!

This is a prime case. There is NO COMPARISON betwen a microphone
and a handheld telephone. If WE don't get in there and educate the
legislators, THEY will TELL us how it's going to be...and that's
unacceptable.

ah, yes, but there is still other legislation in the works (I assuming that was not a hoax posted a couple days ago) that is designed to give states individual rights to persecute/prosecute licensees (the article referenced CB but you can figure any and all radios will be fair game).

> Amateur radio. Look them up yourself.

Such preemptions exist on a case by case
basis...not on a universal basis. It
remains to be seen if any federal
preemption would be exerted in this case.

Specifically,
you are now attempting to say that FCC
takes a preemptive mode over how you
operate a motor vehcle. The proposed law
does not outlaw cellphones nor ham radio.
The law requires that the person NOT
talk on a cellphone (radio) while DRIVING
a motor vehicle. Do you think that
the FCC is about to exert federal preemption
of such laws. Remember, it usually takes
the feds to assert that pre-emption first.
I don't see that happening at all.

> > Does CB, as a federally authorized service,
> > also enjoy the federal pre-emption you think
> > exists for hams? [snip]
>
> CB users have no license, and there are no rulings by the FCC that
> preempt state and local regulations pertaining to to this.

IF pre-emption exists at all, it needs no
license to prevail. Either the FCC has
preemption of ANY service in this case or it
has none. A license isn't needed.

> > Indeed, doesn't the FCC authorize the cellular
> > providers to offer the service and, as such,
> > couldn't you argue that all cell phone users

> The same with cellular phone users.

The same what?

What about private radio users? The actual user
of a private radio isn't licnesed, the business
is the license holder for a particular frequency
assignmennt with no individual actually being
licensed as a user/operator.

Cheers,
Bill K2UNK

THERE IS NO SUCH THING AS A PURE BLOODED INDIAN. The American Indian were Siberians who forged the Bering Straits into Alaska, down into Canada, into what we now know as the USA, into Mexico, througout Central and finally South America. The Siberians who remained just south of Canada became known as American Indians and for some stupid reasons became known as pure blooded Americans. It's crap!

From the very first existence of man there's been race mixing and all who are reading this post are part of it, like it or not. Those who deny it are deluding themselves because retracing ancestry hundreds of years proves nothing. We have to go way way back in time, thousands of years which no one can do so simply accept your simian to man heritage as fact. That's why white extremists are so damn stupid.

What's so special about having white or pink skin? I say live with it if you have it but never put down anyone who doesn't. No one should be proud of their skin color because it's what's UNDER than skin that counts; we attain thanks to that BROWN brain in that white skull so be proud of your brain if yours works.

For example, have you ever seen a white man with almond shaped eyes and high cheek bones? Now let's suppose he's a KKK or some other white extremist moron. How'd he get those shaped eyes and high cheekbones since neither is a Caucasian trait? FROM THE YELLOW RACE but he would never admit it. His skin is WHITE, he wears his white hood proudly but he's as pure an 80 year old hooker.

That's why all this preservation of race stuff is hooey. It's based on illogical philosophy; the same garbage espoused by Gobineau, handed to Nietsche and ended up with Hitler. When we all see each other for how we act instead of how we look, then there'll be a better world.

That's not a fair appraisal. The legislation SPECIFICALLY stated that this was for illegal CITIZEN'S BAND stuff.

The PROBLEM manifests itself in how do we train local law enforcement to know the difference? Cops aren't idiots and it won't take much to educate them, but again...WE have to do it. They AREN'T going to come ask us to do it!

Wrong. I watched the city of Hawthorne, CA deteriorate from a nice bedroom
community to an extension of the Inglewood/ Compton ghetto. It happened as a
direct result of the building of a large shopping mall in the center of
town. This attracted, and gave an appearance of legitimacy, to the criminal
element from the surrounding cities.

Yeah you're right those Korean shop owners shooting at anyone who came
close to their stores were real animals weren't they? But seriously
you miss the point of the riot - if you keep a group down, and subject
them to mistreatment, if justice is unatainable then you have created a
powder keg. All it takes is one match and BOOM.

Cheers,

Dave

OK, so what about messing with a CW key strapped to your leg while driving, and I'm not kidding, driving a stick-shift transmission car? I had one guy who thought that was all right in another news group posting a while back. I got flamed when I suggested that he would be a safer driver if he left his code key at home.

Have a KPC3 that has no manual. Would be willing to pay for copying
and postage. It has the 6.0 upgrade and material with that, but thats
all and a manual would be useful.
Thanks
Al

> license in an approved service) is a de facto illegal act since use is
> presumed.

You're missing a point: Presumptions can be REFUTED by evidence that shows that the presumption is false. In such situations, since use cannot be proven to have followed from mere possession, there is NO VIOLATION. This means that possession in itself is not illegal.

One easy piece of "evidence": Opportunity. If a person has not had sufficient time to be able to use the device, possession cannot lead to the use presumption. This is what prevents the FCC from tracking the actual, shipped amp. to the buyer, waiting for him to accept delivery, then cuffing him. The presumption is only validated [at best] when the buyer unpacks the amp. from the shipping box. [Then, we're at the point where the presumption shifts the legal burden of proof that use did not occur.]

A properly educated person would not make such a conclusion as quoted above without recognizing that the conclusion may not be true.

> to the legitimacy of a criminal element?

In my area, the vast majority of cars stolen in one particular town are taken from the mall parking lot.

The criminal element from a nearby city takes the bus to the mall. They drive home.

The bus route wouldn't exist without the mall.

Most people who ride the bus are good people, but if you happen to be a car thief, a bus is a more convenient way than a car to get to work. You don't need a second person to drop you off or drive the car you brought home.

Of course if you're swiping a car, you might as well fill the back seat.

Malls are also popular hang outs for kids, and there are always lots of people in the parking lots. Again, while most people are not causing problems, the good ones provide a natural cover for the bad ones.

Malls provide good opportunities, and bad ones.

Have a wonderful day.

Mark

Exactly so, that's what they did when the mall in Hawthorne was built, take
the bus in and go back in/with whatever they could steal. Prior to the mall
being built, groups of undesirables were rare and easy to spot because they
stood out from the normal activities of the town. This gave the police good

reason to check them out, which deterred the majority of crimes. After the mall came, it provided the gangs a "reason" to be in the area, and as a result crime went up and the quality of life in the town deteriorated.

What are you taking as the 'usual' CV voltage? For me, if a charger
can't be accurately set to 13.8V (and be trusted to remain at that
voltage), I won't use it to charge LA batteries.

>> When a gel battery is charged with a taper or constant-current charger,

>> to flow after the battery reaches full charge. This will cause gassing
>> and loss of water from the electrolyte

(snip)

>I generally agree with this, in principle, but practically have to disagree
>for the following reason. The constant volage charger must be very precisely
>set to deliver the correct charge into the battery.

Absolutely so - but I have never found a problem in doing this. My
chargers are all set to 13.8v as per the manufacturers' recommendation
and my batteries charge fully and last for many (typically 5 to 7) years
with regular cycling.

> Even a few mv off
>(usually it is undervoltaged) and the battery will never accept full charge.
>It will then slowly die off due to sulphation.

I've honestly never found it to be that critical (I can set OPV to
within ~10mV). YMMV, but it works here :-)

> If the battery is set into
>floating service, then a constant voltage is what you have to work with.

Yes; according to the data sheets I have, the float voltage developed by
the UPS/PSU should remain constant (at 13.8V).

>If it is used in cyclic service, my experiences with these things over
>the past 25 years would suggest that constant voltage charging is not the
>best way to charge them, but current charging is.

Interesting - I have seen a slightly-higher constant-voltage level (2.4 to 2.5 volts per cell) recommended for cyclic use, but with a limited charge time (i.e. not to be continued after the battery is fully charged, though how this is to be determined is not stated in the literature I have seen). I have not seen constant-current charging recommended for any gel LA battery.

>> When a correctly-set constant-voltage charger is used, charging current
>> will drop to a minimal value when the battery reaches the fully-charged

>them, putting them onto a voltage charger, typically set for 12.6 volts
>or thereabouts, you will wind up never fully recharging the battery,
>after each use.

At 12.6 volts output set from a CV charger, I absolutely agree that nothing like full charge could ever be approached, and that battery deterioration would set in. I cannot understand why anyone would set such a low voltage.

At 13.8 volts (or 6.9 volts for my 6v batteries), I find that they charge fully, no problem. Some recommend an even-higher voltage (2.4 to 2.5 volts per cell) for cyclic charging, but I prefer to stay with 2.3vpc and maximise the battery's life, accepting the longer recharge time).

(snip)

> What I have
>often found in these small 7ah 12v sealed lead acid batteries is that

>undercharged over many years, and a proper current charge at high
>voltage (I typically use 50-100v current regulated at a few ma) will
>restore them to capacity and get another several years of low capacity
>use out of them (typically as plate batteries in OT radio sets).

When I find a 'dead' gel battery, I connect it across a constant-voltage charger, set *accurately* (with a laboratory-standard DVM), and *off-load*, to 2.3 volts per cell, and leave it for a *long* time, perhaps even a week or more. The initial charge current is indeed typically a few mA, but the battery will, if any recovery is possible, usually start to take charge within 24-48hr.

I have brought many gel LA batteries back from the edge in this way, including some 6v 12AH examples which can now run a kid's plastic ride-on toy (several amps drain) quite happily, as if they had never been left to decay. I also have a couple more (6v 7AH) recovered batteries, either of which will run my camcorder (~1.7A drain) for long enough to fill two 60min tapes during a day out at a steam rally, and still have enough spare capacity to review one of the tapes at the end of the day. They are currently into their second season of use after recovery, and show no sign of deterioration.

I wouldn't want to charge any sealed/gel LA battery with constant current for fear of causing damage; I don't mind waiting while the 2.3vpc CV charger brings them round.

>That is a sure indicator that they had constant voltage charging set
>to too low a voltage.

I quite agree; if the CV charging was set to 12.6 volts, someone had got it *badly* wrong in setting the system up.

I don't care. To hell with them. They need to stop messing our society up.
Having sympathy for the devil is what you are trying to get us to do.
I don't feel sorry for them at all. The crimes they commit is out of choice and you can't tell me their crack addiction, driveby shootings and so on is a result of them growing up poor black children as there are many who don't get into that junk and grow up to be normal human beings instead of wild evil animals who thinks the world owes them something.

All of my cordless-phones do not work anymore (3phones). I have tried them at friends houses and they work fine. They used to work fine until one day there was all kinds of interfernce and it has never stopped. Is there a way to track down the interference. I have eliminated anything in my house as a source. is there any legal way of stopping the interference or any other ways to fight back. Thanks in advance

It was USSR over the horizon radar. It could be jammed by running your
CW keyer at about 22 wpm (as I recall) in the dot mode everytime they
transmitted. After a bit they would move off in order to not be
annoyed.

Jon,
Pick up the phone base, turn it over, read the disclaimer.
If the interference is comming from a non-licensed service
transmitter, then yes there ~may~ be something you can do to
stop the noise. If it's comming from a licensed service
transmitter, there's nothing you can do...
'Doc
PS - The disclaimer deals with Part-15 devices. You have
no recourse with interference.

It's worth noting that there are specialized ICs designed for charging lead-acid batteries. I once built a charger with one, though I don't have the details of the part handy at the moment. It requires an external pass transistor, a couple of power resistors for setting two operating current levels, and an unregulated power supply that's several volts more than the maximum output voltage.

Mine was set up for charging a 12 V 2.6 Ah gell cell. The IC controls the charge in 3 phases:

- At first, when the battery voltage is low, charging is constant current at a current set by one resistor. In my charger, this current was about 600 mA.

- Once the voltage rises to about 14.5 V, the IC maintains a constant voltage while the current slowly reduces

- When the current has dropped to about 200 mA (set by another resistor), the output voltage is gradually reduced. At full charge, with very low output current, the output voltage is normally set to about 13.65 V (adjustable by trimpot if you include one in the circuit)

This is designed to give the fastest possible initial recharge that is still safe (current limited to about 0.25 C, voltage of up to 14.5 V) and yet the long-term float voltage of 13.65 V ensures minimal gassing and loss of water.

I think this is an attempt to stick to the letter, if not the spirit, of
a law. I will concede your point that the presumption of use requires
opportunity for use, but the main point is that under any real
circumstances of enforcement action, little (if no) doubt would exist

regarding the opportunity for use (since there would have been other reasons to suspect use). Laws such as these are designed to provide legally useful "teeth" that don't require very high burdens of proof, such as actual observation of illegal use of the device. RICO laws are an example of this type of legal ammunition.

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help
curb the growing problem of online stalking, a U.S. Justice Department
report recommends. Internet service providers, which link users to
e-mail and the World Wide Web, report a growing number of complaints
about harassing and threatening behavior online, the report said.

Honolulu Advertiser, 9/16/99

The Illinois State Attorney of Cook County, has proposed legislation
prohibiting harrassment or threats on the Internet. From the reported
proposed penalty, threatening or harrassing via the Internet would be a
Class 4 felony in Illinois, punishable by up to 3 years in prison. The
state legislature has not yet considered this proposal.

Eric,

The NPSAC class that John did take is a reaction to the fact that the Navy has such a problem attracting qualified people into the reserve, so they have come up with programs like that to try to lure people into what is for the most part, the most unwanted postions in the Reserve, sort of like cannon fodder.

NPSAC is sort of like a wannabee boot camp. According to people in the navy, or recent retirees, the enlisted NPSAC is somewhat like really being in the navy....

For instance, he only travels on private toll roads, never on publicly
funded no toll roads. He only eats food that has never even gone near
any of these socialist publicly funded roads, like interstates, which
he never travels on. He wouldn't be caught dead using tainted
electricity derived from publicly funded damns, so he generates his
own locally.

What a man!

actually, given the history of J.E.M., I should NOT take him at his word.
Given the hostory of this person, I believe that this advice should be
closely adhered to:

"those who ignore the mistakes of history will be doomed to repeat them"
-- Alexander the Great

The "enlisted" program was not mentioned to me..

could be an oversight or unintended ommission.

Still, I have doubts as to the varacity of J.E.M.'s word.

There should be no third party interfering in the agreement between the person who is doing the hiring and the person who is being hired.

It's a private agreement, and both parties must agree on terms before the agreement comes into being.

We, as outsiders, don't need to determine who is "best qualified" -- just as I have no standing in telling you who is "best qualified" to walk your dog. You can make any agreement with anyone on that score.

So it should be -- and, until very recently, so it always was with employment.

If an employer chooses to hire only females with a certain hair color for a position, or only people weighing less than 200 pounds; or if you choose only to work for Latvians who drive 1959 Buicks, that's none of my business -- and it certainly is not the legislature's business to interfere.

With every good wish,

--

Kevin Alfred Strom.

When John Dillenger was asked why he robbed banks he replied "because that is where the money is". A criminal (regardless of color) will always commit their crime in the environment with the lowest risk to reward ratio. For car theifs that would be the mall. Race does not enter into it.

So what if the Indians in "Last of the Mohicans" weren't pure blood which was an impossibilty to begin with? The late white Jewish actor Jeff Chandler used to play Indians constantly. Half breeds, Mexicans or Al Burton could have been used. And the guy who wrote it, James Fennimore Cooper, was hardly a Mohican either. You want real Indians? Go out to Jacobs Field in Cleveland. Did you know that Jay Silverheels who used to play Tonto wasn't an Indian. His name was Jason Silberschuh, a Jewish tailor from Pittsburgh, who went for an audition in 1947 and sewed up the part.

Again, that has to do with the mall and not race.

Let me tell you about a shopplifting ring that was cracked at my local mall:

This guy got a great idea. He got two groups of friends to help him pull of a nearly fool-proof scheme for shoplifting. The first group were three black friend of his. They dressed up like they were stereotypical gang members. The second group were four white guys who dressed up in a variety of outfits ranging from preppy to average teenager and even a jock. They would go into a department store and the three black guys would play the role of the distraction. They would carry on and ask to look a jewelry and they would draw 100% attention from security. While they were acting their part the four white guys would clean up.

You see they were playing on the prejudices of the security folk.

Damn brilliant.

The bible says? You gotta be kidding. It's what paleontologists and archeologists say that counts and what they say validates your statement. Man, as we know him, originated in the crescent and then migrated into east and sub-Sahara Africa which explains why sub-Saharans are darker because of the necessity for melanin pigmentation to protect against more intense heat. The ones who took the high road into southern Europe still retained a nice quantity of melanin which explains the olive complexioned Italians and Greeks. The ones who emigrated into north Europe didn't need melanin because of the cold and therefore became what is known as white or Caucasian which to some signifies superiority because of authors like Herman Melville and many others who inferred that white is alright while brown or black means you stay back. Keep in mind that once upon a time, much of today's land masses were attached which made for easy backpacking. As lands split between waters, if the distances were not too great, the guys would canoe or kayak to their hearts' delight but if great waters separated great lands, then peoples became isolated until the times of the great explorers such as Magellan, Columbus and Microsoft. And thanks to the latter, Strom is allowed to post white extremist materiel on the Internet.

Your question is irrelevant, Cecil. It has nothing to do with a
cop being able to recognize a "mobile Morse code operator."

The solicitation was to provide ONE documented case of an accident
where the driver was an Amateur Radio operator using Morse code at the
time of the accident.

The question stands, unless YOU can provide a DOCUMENTED example
of this.

I'll even make it EASIER on you (and others here....). Provide
the name of a person that would be willing to corroborate a situation
YOU know of where the operator of a moving vehicle was distracted
becuase he/she was using Morse code at the time. This "witness" must
have a phone or a verifiable e mail address. No "JohnDoe@my-deja"
addresses.

I am sure that while you and your white majority motorcycle gang
were crusing the highways and by-ways of Texas prowling for grapejuice
that you must have seen ONE accident where the driver had a Morse key
strapped to their leg....even IN the car...?!?!

I await with bated breath.....

I pay for my use through both State and Federal taxes (at a 38% rate).
What is your tax bracket, sir ? Last year I paid over $28,000 in State and
Federal taxes, which paid for my use, as well as the use by many who don't
even pay taxes.

>He only eats food that has never even gone near

My electric, water, and gas companies are all privately owned, and even then
my bills reflect added fees and taxes to pay for the use by non-paying
"customers".

Speaking as a trained anthropologist you have got your facts wrong.
Humaninty arose at a time when the continents had moved to the
positions they hold right now give or take a kilometer or two. The
fossil record cleary indicates the the spread of homo sapiens sapiens
started in Africa and moved through Israel and outward to all of the
other parts of the earth.

No. The grid is owned by the private companies.

Just a little reminder, OBrian:

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help
curb the growing problem of online stalking, a U.S. Justice Department
report recommends. Internet service providers, which link users to
e-mail and the World Wide Web, report a growing number of complaints
about harassing and threatening behavior online, the report said.

Honolulu Advertiser, 9/16/99

The Illinois State Attorney of Cook County, has proposed legislation
prohibiting harrassment or threats on the Internet. From the reported
proposed penalty, threatening or harrassing via the Internet would be a
Class 4 felony in Illinois, punishable by up to 3 years in prison. The
state legislature has not yet considered this proposal.

And on the flip side of that argument can you provide any data that proves it is in fact safe? Personal experience does not count. All the data used to press the issue, that cell phone use while driving is unsafe, is a conclusion of a large base collection of data.

Since you did bring up the issue, I think it would be a very wise move on the part of Ham Radio operators (ARRL) to begin to collect data on highway driving safety while using a two-way radio, CW key, computer keyboard screwed to a steering wheel (as one Ham claimed in a NG posting), etc. We are going to need HARD DATA to convince our government that we can in fact do some, if not all of the above and more, safely while driving. You tell them "sure we can operate safely mobile", they are going to pull the same thing I did on you by asking US to PROVE IT. If we can't, we're screwed because they can point to cell phone users, and correctly point out they can't yack on the phone and drive safely at the same time, and they DO HAVE the data to prove it. So to play it "safe" we will find our use of mobile equipment restricted. As far as our government know a cell phone held to your ear in not much different than a microphone held to your mouth in their uneducated minds.

Oh, I'm being picky here, but the quote is usually attributed to a bank robber named Willie Sutton that was active from about 1930 to 1950 or so. Though in the end, Willie himself finally confessed that it was probably something some enterprising reporter attributed to him to flesh out his story. See:

And, did these "gentlemen" try it the other way around - three white guys would carry on, ask to look at jewelry, and do whatever to attract the attention of security, while black guys, dressed as preppies, tried to take stuff? I'm sure it would have been just as effective, and would have also proved that your conclusion about racial prejudice is just plain nonsense.

It seems a little strange that you would base your evidence of racial prejudice on the actions of a gang of shoplifters. Are you that desperate for something to back up your argument?

I am going to take the tech exam next weekend. Want to hear something amusing? I took the exam online 6 times and passed every time without even ever looking at a book about laws, freq allocations or radio procedures.

My electronics knowledge and some basic radio knowledge alone are enough for me to pass the test. I don't even know what bands are available to amateurs, (of course I know about a few of them informally).

Is that why it's called "amateur"? I'll probably be licensed in a week from now. Look for me on ???? frequency?? he he he :-)

----- (no code techie haters: please go easy on me... I am in the process of learning the code, the laws, the allocations and will be working on getting into the general class category soon afterwards)...honest...

I think the reason for the lack of racial balance in the ameteur community might simply be a culteral difference that might seem less attractive to some black folks....currently. (I emphasize currently).

I hope more black people *do* see that the ameteur priveledge is a good thing worth getting into. If there's a lack of balance it could be just a temporary obstacle for blacks similar to a party or club that has few black people. Once more blacks start participating in the club or group that currently consists mostly of whites it might just spread to more blacks and things could start a trend towards permanent change.

If I'm on the air and a black person chooses to speak to me I would feel honored to be able to talk to him or her.

I hope most ameteurs feel that same about this. I sure don't think quotas are the solution for this problem, though. I feel there's a lack of blacks just because of their choice of whether they want to join a (currently) mostly white community.

1490. WTB: (or Trade) Large-Digit Nixie Tubes & Sockets

Newsgroup: rec.radio.amateur.misc
Date: 2000-09-29 00:00:00 UTC
From: afranzman@aol.compute.com
Message-ID: <20000929182554.20227.00000483@ng-cg1.aol.com>
Source record: 102566

Wanted, to Buy or Trade:

(Sorry if this isn't quite on-topic. There don't seem to be any newsgroups exactly fitting this subject.)

Large-digit "Nixie" type neon numeric digital display tubes, especially those with digits over 1 inch (25mm) tall. Also, sockets for same.

Most wanted: Burroughs type B-7031 or B-7032 "Jumbo" size - 2 inch (50mm) tall digits in a tube 5.5 inches (140mm) tall by 2.25 inches (57mm) diameter at the base. And the large 14-pin sockets which fit them, type SK-117 or equivalent, having a pin circle diameter of 1.75 inches (45mm).

Actually, I have 5 of the very rare B-7032's, which are the inverted display configuration variation of the B-7031 (pins on top pointing UP when digits are upright). Mine are slightly to moderately darkened; however, due to anode location in these tubes, the darkening is mainly on the sides of the glass and does not significantly affect digit appearance when viewed from the front. All have been tested and function perfectly when driven in the 10-16mA range per preliminary B-7031 data which can be seen here: http://www.wps.com/archives/tube-datasheets/Datasheets/Burroughs-catalog-918A/index.html Will consider trading my B-7032's if I can get more and/or better condition B-7031's in the deal.

I also have available to trade, "Super" size Nixies of types B-6091 / NL-8423 (a.k.a. NL-5423, and interchangable with earlier types B-7153, B-6033, and BD-206). These have digits .808 inch (20mm) tall, in end-viewed configuration. In addition, I have Philips (Mullard) type ZM1040 which have digits 30mm (1.18 inches) tall and a red filter coating on the glass. I have sockets which fit both of these tube types, equivalent to HSK-112, HSK-106, B13B, and VH13/131.

Does anyone in southern California happen to have any of the HUMONGOUS Nixies with ***6 INCH TALL DIGITS***, type CD47/GR414 Rodan Indicator Tube by Okaya Electric Industries Co. Ltd. of Japan? Picture here: http://www.netcomuk.co.uk/~wwl/count.html Even if you're not willing to part with one, I'd love to just see one in operation. I can even build and bring a breadboard driver circuit if you don't have one.

Replies by email please. See below for a clue to repair my email address. 73.

Alan "A.J." Franzman

My real e-mail address does not compute.

The point is that there could have been hundreds of such accidents and the
police would never recognize it as such. Therefore, those particular
situations would go undocumented.

I don't think they're quite that stupid. I found myself behind a ditz on a jammed 70mph commute-time local interstate about a month ago. She had her cellphone in one hand and was alternately waving her other hand as the apparently animated conversation went on plus screwing around with her makeup in the rear-view mirror. As in both her eyes and hands were disengaged from driving most of the time. Every once in awhile she'd get back to driving and re-aim her big bucks ricebox. The trucker behind me and self simultaneously backed down to give the ditz a whole *lot* of room. I've spent a lot of time mobiling myself and riding shotgun with other mobilers and I've never seen anything like that crap. Yes, we are different from the cellphone crowd wrt to having our act together on the road and I don't think the various gummints are gonna lump us in with the cellphone yo-yos any more than they'll lump in mic-using highway patrol officers, public utility trouble-truck mechanics, CBers, ad nauseum.
>
Cometh the question of stats: Comes a fender bender or worse and who really knows if either party was using a cellphone?? If I got into a fendercrunch I sure as hell wouldn't admit I was yakking on a cellphone at the time. The accident rate as it relates to cellphone use is probably an order of magnitude bogus.
>
No, this is not something the ARRL should "officially" get into for two reasons. First, mobiling hams are not even a tiny pimple on map of underway two way radio spectrum users and secondly ARRL VP wt3p is all over the matter on her own.

"Eric Oyen" <n7zzt@home.com> wrote
> Actually, no I should not believe him
> (once a liar always a liar).

I am sure you have had that statement told to YOU several times, Eric. Such as the
time you tried to say here on usenet that you were NOT the same person as "Hawke" or "proudhawk" & were proven to be lying.

> As for the program, that requires a certain amount of time
> already in the service and
SNIP

Wrong, again Eric.
Go read the Navy web site http://www.cnrrc.com/career/APG1b.html It will CLEARLY state under the heading of "Qualifications" the following: "not have prior service, active or inactive".

> His given name: John E. Mackey, Jr.
> (same as his dad).

Wrong!! My father's name is NOT the same is mine. His name is John E. Mackey, Sr.

> His dad's middle name is Earl.

Wrong again! My father's middle name is NOT "Earl".
(How did you get that idea???)

> therefore, this John Mackey posting in here
> is NOT the John Mackey listed in that newspaper article in Sioux City, Iowa.

Wrong again, Eric. The listing for the John Mackey in the Sioux City Journal is
indeed for me!
(http://www.trib.com/scjournal/ARC/2000/MAY/May_3_00_Wed/almanac/service.html)
>John E. Mackey Jr. of Sioux City, son of retired Air Force Lt. Col. John E. and Louise >K. Mackey of Portland, Ore., has enlisted in the Naval Reserve as an information >technologist (formerly radioman) with the rank of third class petty officer. His father >conducted the swearing-in ceremony. >Mackey will attend basic training at Great Lakes Naval Center in Illinois in September.

Eric, now you can't deny this. It simply isn't practical or believable to say that it
is some kind coincidence of two different people named "John E. Mackey, Jr." having roots in both Sioux City, Iowa & Portland, Oregon AND went to Navy Basic Training in September AND have a radio background AND look enough like me to pass for the
picture of me swearing in!!!!!!!!!!

Eric, your denial & suggestion of " John Mackey posting in here is NOT the John Mackey listed in that newspaper article in Sioux City, Iowa" only makes you look like
the complete idiot & fool that you truly are!!

> He has lied repeatedly about how he was removed from scannradio in fidonet,

Eric, please post EXACTLY what I said that was lie & your verifiable proof that it
was a lie within 24 hours or be found to be a liar yourself by default.

> he has lied about how he treated Bill Cheek (even to the point of

Eric, please post EXACTLY what I did that was lie & your verifiable proof that it
was a lie within 24 hours or be found to be a liar yourself by default.

> He has harassed others in here (and in real life by
> calling work places, filing false police reports and

I have NEVER harassed people as you state above. Post EXACTLY what I did that was harassment & your verifiable proof within 24 hours or be found to be a liar yourself by default.

> His history is well known and well documented.

Then you should have NO problem present the proof asked for. Otherwise, YOU are proven to be a LIAR YOUSELF!!!

Actually, YOU are the one who is incorrect again Blake. NPSAC has only been
around for over 20 years, but has only been at Great Lakes for about 1 year.
Previous to that
it was located in New Orleans. (I have met MANY people who are graduates
of the NPSAC -New Orleans program back to 1980)

> John, please follow the thread, "boot camp" which for years has been
> a slang term to denote basic training in the military, was my words.

Blake, Navy Basic Training staff are prohibited from using the term "boot
camp"
to describe Basic Training.

> Everything I said is on the Web
> John, check it out.

Blake, I don't need to get my information from the web as you have done. I
have
actually graduated from the Navy Basic Training and am a member of the US
Navy
so I am able to speak from personal knowledge & experience. I don't have to
rely on the information from others & the web as you have to on this (&
other) topics.

Brian,

As was reported here some time ago, the township
of Middletown, NJ also has passed such a law. That
particular law EXEMPTS all police, fire, and first
aid squad folks from the law.

The law has been on the books for a couple
of months now, but I have heard nothing regarding
the enforcement itself.

Cheers,
Bill K2UNK

Just for the sake of discussion.
If you put a encrypted message on a web site, then the recipient
could see it without anyone being the wiser.
With anonymous websites being a dime a dozen (I've got 3 myself)
You can "Send" a message to who ever you like.....
All they have to do is go to the proper website and pick it up.....

>I don't think I'd rely on the bible for 100% accuracy.

Part of it is the translation you must be using...try reading it in the
original Hebrew, and you'll find that this passage, verse 19 in particular,
doesn't refer to the order in which they were created. It simply says that the
animals, that were {already} formed, were brought to Adam.

It's important to realize that in reading any English Bible, you're reading a
translation....not the original language.

> OK, so what about messing with a CW key strapped to your leg while
driving,....(SNIP)

Or holding hands..or playing the "air guitar", or putting on make-
up...

COME-ON, Leland...we can make lists all day long of things that
MIGHT cause an accident.

Having one hand off of the wheel to hold an object to your head
that (a) distracts you by virtue of the conversation, (b) obscures your
vision (c) reduces your ability to react to an impending accident is NO
COMPARISON.

PLEASE provide ONE documented accident where the driver was an
Amateur Radio operator who was sending Morse Code at the time of the
accident...?!?!

On the other hand, here in the Metro Atlanta area alone there have
been at least 3 accidents that have made prime time news that reported
that a driver was distracted while carrying on a cell phone
conversation in the last week.....imagine the number that DIDN'T make
the news...?!?!

Nice try on making this yet another "DEATH TO MORSE CODE" thread,
though, Leland.

Actually, no I should not believe him
(once a liar always a liar).

As for the program, that requires a certain amount of time
already in the service and Mr. mackey (under his current
legal given name) has served NONE!

His given name: John E. Mackey, Jr.
(same as his dad).
His dad's middle name is Earl.
So, how can John E. be a Junior if he claims his middle name
is Emmet? It can't. therefore, this John Mackey posting in here
is NOT the John Mackey listed in that newspaper article in Sioux City,
Iowa.

Again, he lied.

He has lied repeatedly about how he was removed from scannradio in fidonet,
he has lied about how he treated Bill Cheek (even to the point of
disrespecting the dead), He has harassed others in here (and in real life by
calling
work places, filing false police reports and damaging equipment in failed repair
attempts.

WHY SHOULD HE BE PUT UP WITH?!?!?

His history is well known and well documented.

He can rant and rave all he wants, I have just re-added him to my current
killfile.

hmmm.
ok. I can by that. However, aren't there prior requirements that
have to be met (such as prior military service or ROTC?)? What about
educational requirements?

This among other reasons is why I find it most difficult to believe that
J.E.M
even has the qualifications.

I did run a question regarding this program by the local USN recruiter.
From what I was told, a minimum of 4 years college is required to
qualify for the program. He also mentioned that adfter going through
the said program (mentioned) that one would be in the USN-reserves.

I would very much like to see J.E.M.'s actual qualifications
(such as degree, college attented <transcripts, etc>, certificates
of completion, etc.) Thinking on this, J.E.M. has still yet to produce
any evidence that he has attended university anywhere in the US
for more than 2 consequetive semesters, AND, produce a copy of his
degree(s)/Certificates.

oh well.

Ah yess, the Russian Woodpecker. Back in the 80's, a ham radio geek
who was also quite a party guy at college, used to record the
Woodpecker, find the center frequency it was xmiting on and play
back a *digital sampled copy* via his old TRS-80 exactly 180ms
after the original pulse was sent at a reduced power to try and fool the
Russian
OTH radar that it was an inbound nuclear strike comming over the Pole.
It was great!! After he'd xmit for a window of 10 minures or
less, the Woodpecker would either shut down or go to another frequency!
Our small contribution to the Cold War era....

those were the good ole days!

<huge snip of charging methods and float voltages>

Here's what I did about a dozen years ago, when I wanted gel-cell battery backup for an Amateur Radio Packet Station. Everything was in a room-temperature environment, so I reasoned I could use a constant-voltage float charge without temperature compensation. I wanted to find the right float voltage.

I first set the constant-voltage power supply to around 14 volts, and let the charging current stabilize (many hours) before recording the steady-state trickle-charge current.

Then I repeatedly adjusted the voltage downward in small increments, and recorded the new (stabilized) trickle-charge current at each voltage. That current fell with the reducing voltage until reaching a sharp knee at around 13.7 volts. Below that, the current was a constant value (at least at my constant temperature). I don't have the graph at my fingertips right now, so I don't remember the EXACT voltage, but that's pretty close.

I reasoned that the maximum float voltage should be the knee of that current curve, and that's where my battery runs to this day. Was my reasoning correct, or was my choice of voltage just a lucky coincidence?

>The bible indicates that man originates from the southern iraq area, not Africa proper.
>It indicates that Africa was inhabited later.

The bible also says that man was made AFTER the beasts here:

==
And God made the beast of the earth after his kind, and every thing
that creepeth upon the earth after its kind: and God said, "Let us
make man in our image, after our likeness"
Gen 1:25,26
(man made after the beasts)
==
But here the bible says man was made BEFORE the beasts:
==
And the LORD God said, "It is not good that the man should be alone; I
will make him an help meet for him." And out of the ground the LORD
God formed every beast of the field, and every fowl of the air; and
brought them unto Adam ... but for Adam there was not found an help
meet for him.
Gen 2:18-20
(man made before the beasts)
==

I don't think I'd rely on the bible for 100% accuracy.

Don't panic. It has been tried before to ban ham and especially
CB operation in moving vehicles without success.

This ordinance was proposed a couple of weeks ago, quickly
endorsed by the Mayor, and widely reported that passage was assured
by Monday. So far, it's a quesitiom mark as Aldermen consider the
ramifications of their decisions. There is also research being
presented before not only the Board in Chicago, but state
legislatures that shows a significant difference in road
concentration levels between cell phone useage, where the unit is
held to the head, and conversations are treated as private and
personal, and CB or Ham conversations which are 1) simplex, and 2)
run on open speakers in the car. Patterns of eye movement during CB
and Ham conversations do not show the wandering off road as they do
with cell phones. Further, cellphones require the operator to hold
them to the head continuosly, where as Ham and CB conversations do
not. Similar defenses may be made for business band radio dispatched
vehicles.

The earlier statement that hams need to be active in local
politics is very true. These voices need to be heard. But on this
issue, don't panic. Not yet. The measure in Chicago is fading it's
own heat, and there is abundant evidence that ham, CB and Business 2
way, do not pose the same threat to safety as cell.

During WW2, systems were developed for heating with RF. (for curing glue, I believe) During the war, if it helped military production and didn't interfere with military communications, niceties like Part 15 could be ignored. But with the war over, radiating trash willy-nilly across the shortwave bands ceased to be acceptable. The manufacturers asked the FCC to assign 25-29MHz as a band where they could operate industrial RF heating equipment legally. When the FCC stopped laughing, they told them to shield their equipment. They couldn't shield it that well. They finally comprimised, stabilizing their gear & getting 26.96-27.23MHz assigned. It was known as an "ISM" (Industrial, Scientific, and Medical) band; they could radiate if they had to, as long as their radiation stayed within the band.

I presume those frequencies are familiar. They were originally assigned as a ham band, with the understanding that hams would tolerate any interference received from the ISM equipment. (presumably no ham could radiate enough power to interfere with the ISM gear!) The interference didn't turn out to be as severe as feared, and in 1958 the band was reassigned to CB, which uses it today.

The 900 and 2400MHz bands are also ISM assignments.

In my book it beats the accounts of primitive tribal people. The proof
is in the pudding, if you begin suffering severe chest pains would
you:

1. Head to the hospital (Science)
2.. Head for the church ?

Substitute severe toothache, snakebite, serious injury etc. if you
care to.

Source record: 102444

Our ares group is looking for software that could be used sort of like
the "Reverse 911". We can pay the local telco to do this but it
costs on the order of $200 per shot...

What we would like to do is be able to:
1) Record a message to a PC.
2) Dial members telephones, playing the recorded message

Any information would be helpful.

Thanks
Joel

Blake, the APG school was known a NPSAC, even in New Orleans.
Just like you have stated that Basic Training is known as "Boot Camp".
When it moved from New Orleans to Chicago the name was formally
changed. Substancially the same program, but in a different location.
(The OS-VET program was also moved to Great Lakes)

> Clear proof that NPSAC school has NOT been around for 20 years
> as you state.

Read the above, then you will see how you are wrong.

> > Blake, Navy Basic Training staff are prohibited from using the term
"boot
> > camp" to describe Basic Training.
>
> That does not mean that everyone in the navy is prohibited, nor uses
> the term to describe NPSAC or real basic training.

If you accept the above, then you should have no problem understanding that
APG school in New Orleans was often referred to as NPSAC.

> You are a member of the US navy RESERVE, and possibly should
> consider going back for additional training in the history
> of the program. Your personal knowledge is either lacking,

HEHEHEHEHEHEHAHAHAHAHAHAHA
Blake, YOU have picked up a few scraps of information from the web &
other places about the Navy, & now you are attempting to tell others
what is & isn't correct about the Navy!!!!!!!!!!!!!
This reminds me of the time you tried to tell someone the power ranges of
a Motorola radio & I corrected you (& the rest of the group) by telling what
power ranges the factory has produced. You responded by stating that
the power range I listed wasn't in the catalog. Again, another example of
how you read something & immediately believe it to be gospel truth
without having the practical experience to know what you are talking about!

No comparism. It is two entirely different issues, that even the Bible addresses. Physical Drs. are for physical illnesses. That's not to say the Bible isn't accurate, it's saying that your chest pain argument has nothing to do with what we're talking about. :)))

Yeah, I see :))) So a grade school kid shouldn't question a bug crawling out
of the ocean and eventually becoming a man :)))) Or a grade school kid
shouldn't question the timeline that insists that dinosaurs died out long
before man, but there is plenty of evidence to the contrary.......or.........on
and on and on

I like YMMV. Mind if I use it once in a while :))

Don't feel bad. Glad to have you aboard! For what it is worth, I gun-decked the amateur exam back in 1993. I decided to get the ticket and found out the first test of the season was being given at 7:00 PM that evening. Hadn't used morse since 1969. Hadn't studied either, but for under six bucks, I figured I should pass something. Nutz, 3 hours was a long time to take an exam. I didn't bother figuring the square roots for the resonant frequency questions since I didn't have a calculator, lost my slipstick years ago, and didn't want to take the time to extract them by hand (not difficult); besides, I knew I had answered enough questions correctly to pass. Guess what dropped out of my box of Crackerjacks?

73s from Rochester, NY
Jim AA2QA

ps - same problem you had. I guessed 40 meters went from 7.000 to 7.450 MHz. Oh well, you don't need a 95% to pass! Other than the band segments and the resonant frequency formulas (which I didn't bother with, I just checked off some stupid answers), I probably got the rest of the questions right. I watched from across the room and know I missed 5 questions total on the advanced exam. BTW, the CW format is so stupid simple today, you can pass if you can copy just enough to pick the answers out of what you did copy since it is also multiple guess. If you can get maybe 50% copy, you will probably pass. Just make sure to copy the name, QTH, radio, profession, etc (just enough letters so you can guestimate the probable answer in the multiple guess sheet).

With the META tag inserted into your HTML code you don't have to go
to great lengths to cover all your bases. The META tag alone
does all the work for you.

If I want to find your website, let the search engines do the
work for you.

Keep advertising and people will eventually ignore you, as if
most haven't already.

It was the world, as it was known to the people involved then, that was covered by a flood. That does not necessarily mean that the entire planet was flooded. Their definition of the world may have been different than what is known now, but it was nevertheless a definition that was perhaps valid in their time.

In other words, don't judge the people of the past by the standards of today - its simply not fair.

Gluing the layers of plywood together, that sort of thing. There
are HF bands set aside for it: ISM - Industrial, Scientific and
Medical.

You had trouble over there with these wide-screen TVs which
radiate broadband hash all over (here in Europe) 17/18 MHz?

Dwight, it looks as if you're under the impression that local authorities can never stop an amateur from transmitting. That's simply not true; I can provide scenarios which show otherwise. For example, you'll be asked to QRT if transmitting within a hospital's "No RF Zone"; you'll be asked to QRT if transmitting during a public performance such as at a symphony; you'll *certainly* be asked to QRT if mobiling through a high-explosive area; within your own home, you will be asked to QRT if your transmissions somehow QRM a local public safety communication system. There are many other scenarios we could create, too.

Evan,
Shouldn't be that difficult. Not knowing which keyer you have,
here
are some general things to check.
1. Make sure there is power supplied to the keyer, controls set as
they should be (ON. speed = mid-range, (?)).
2. 'Paddles' connected as required (dit, dash, ground lines).
3. Output of keyer connected to 'key' jack on the '140.
4. TS-140 controls set for CW operation.

If it still isn't working, go back over the steps again, you had
to have missed something. If your absolutely positive that each of
these
steps is correct, I'd say you may have something wrong with the heyer
or
paddles.

1572. Re: Blast of noise down on the bottom of 40 meters

Newsgroup: rec.radio.amateur.misc
Date: 2000-09-30 00:00:00 UTC
From: mailfrmpa@aol.com
Message-ID: <20000930183911.24579.00000601@ng-df1.aol.com>
Source record: 102471

After reading the original post, I spent some time tuning thru the CW portion of 40m. What I heard, at 03:40 UTC and onwards, was a sound that sounded like someone going "ahhhhhhhhhh..." into an electric fan. I first heard it at 7.030, then it moved to 7.060, 7.010, 7.060, 7.030, 7.050mHz. It stayed at each of the various frequnecies for an inconsistent period of time, and I did not monitor long enough to see if there was a repeating pattern to the frequency used. But for those interested, there is a time and a variety of frequencies to check.

On another topic, ARRL has asked hams to help in observing and reporting on the scope of the illegal operators on the 10m ham bands. The survey is in cooperation with ITU, I believe. Full info available on the ARRL web site.

A key-with-wires-emanating, still strapped to the victim's leg (or
such a key-with-wires somewhere at the scene of the accident) would
lead to questions being asked. Just the presence of the rather large
HF mobile antenna would probably cause the accident investigator to
inquire as to whether the victim was operating while driving.

Nonsense. Universities serve as a bastion for free speech. They're
an oasis for open thought and the written word. That news.hawaii.edu
strives to carry *every* newsgroup in existence reinforces that fact.

Now, just a reminder of these news items:

STRICT LAWS URGED FOR NET STALKING

SACRAMENTO -- Federal and state laws should be strengthened to help
curb the growing problem of online stalking, a U.S. Justice Department
report recommends. Internet service providers, which link users to
e-mail and the World Wide Web, report a growing number of complaints
about harassing and threatening behavior online, the report said.

Honolulu Advertiser, 9/16/99

The Illinois State Attorney of Cook County, has proposed legislation
prohibiting harrassment or threats on the Internet. From the reported
proposed penalty, threatening or harrassing via the Internet would be a
Class 4 felony in Illinois, punishable by up to 3 years in prison. The
state legislature has not yet considered this proposal.

They were/are covered under CFR Part 15. Low-power Part 15 bands exist throughout the spectrum. Part 15 is what permits you to transmit QRPp CW on the AM broadcast band, use wireless mics on the FM broadcast band, et cetera. Even your garage door opener operates under Part 15 rules. One of my build-it-yourself books contains a Part 15 transmitter for unlicensed (but legal) CW operation on 80m! 73, Jeff KH6O

Rick,

If memory serves me correctly, the only significant difference between the TL-922 and the '922A is that the latter lacks 10 & 12 meters to keep the FCC happy.

Everything else for running the 922 with a TS-530 should be OK

Actually, it wasn't a ham radio. It was the Schlumberger company radio.
Steve did say, "Ham or otherwise".

Use a search engine META tag in your HTML code, then you save
the trouble of having to manually enter your website URL
to every single search engine out there. While your at it,
if you haven't already, put it in your web address information
on the online callsign databases, such as QRZ.

Leaving it unplugged on the shelf is illegal? Why is that?

The FCC hasn't policed the 11m band in 20-odd years, what
makes you think they're going to start now?

> of the NPSAC -New Orleans program back to 1980)
>

Actually, according to COMNAVRESFOR Instruction 3500.13,
"The APG School in New Orleans will be replaced by a 14
day non-prior service accession course <NPSAC> at recruit
training command <RTC> Great Lakes."

Also, reference message sent routine traffic, 051205Z Jan 00,
From COMNAVRESFOR NEW ORLEANS LA
TO NAVRESFOR

MSGID/GENADMN/COMNAVRESFOR

This message states that previous to last year, non prior service
personnel recieved their "basic training" at the naval reserve
professional development center "APG school". It also states
that the NPSAC school is a NEW class, that replaces APG school.

It even goes on to talk about the DIFFERENCE between APG school,
and the new school NPSAC that replaces it.

Clear proof that NPSAC school has NOT been around for 20 years
as you state.

So, John, there it is. Verifiable proof that you are either WRONG,
which is a nice way to put it, or, if you insist that you
could not be wrong, then you are lying.

> > John, please follow the thread, "boot camp" which for years has been
> > a slang term to denote basic training in the military, was my words.
>
> Blake, Navy Basic Training staff are prohibited from using the term "boot
> camp"
> to describe Basic Training.

>

That does not mean that everyone in the navy is prohibited, nor uses
the term to describe NPSAC or real basic training.

Case in point...

Navy Times, July 31, 2000

"Non-Veteran Reservists go to MINI-BOOT CAMP"

Same article..

"The toughen-up training program STARTED THIS YEAR at Recruit
Training Command, Great Lakes IL where active duty enlistees go
for the FULL 9 week BOOT camp.

> > Everything I said is on the Web
> > John, check it out.

> other) topics.

You are a member of the US navy RESERVE, and possibly should
consider going back for additional training in the history
of the program. Your personal knowledge is either lacking,
or you are lying.

...And it also says that the equipment is NOT to generate interference to other licensed users of the same frequency set.....

That is an issue that I have - someone's 2.4GHz cordless phone is coming through on my repeater's 2.4 input (sometimes - not every time they use it). However, how many consumers really even bother to read that part 15 warning in the device's manual. 900 MHz and 2400 MHz have been trashed by appliance manufacturers.....

With all the "back doors" to software that the government is supposedly requiring I'm not sure that I would even trust PGP that much. Someone once said that the only way to REALLY encrypt a message is for two (or more) people to have EXACT copies of book or document and let each letter (or number) represent a page, line and character number. This could be very time consuming and messages would have to be kept short, or have a program to "convert" it for you, in which case you risk it being "captured" and all future correspondence being exposed.

Al

That is the way it was (and is) done by 1000s of spies over the years.
Find a common book that almost any library would have and use
the first 10 words or so on a particular page ect as the key...

But *who* sets the rates ? Usually in a "given" monopoly situation
like that there's a board/commission that *sets* the rates, like a
Public Service Commission. In certain areas of the country where
competitive gas and power markets have begun to spring up the *rates*
have skyrocketed. No one wants to gamble on building a billion dollar
+ generating plant and then have their rates undercut by some broker
peddling excess power from another less costly source.

Hello all Houston area Hams,
I am planning to have an electronic equipment, parts, Ham items etc. garage, driveway sale sometime in October or November. I am wanting to clean out my garage and attic and I have a lot of misc. stuff from years of ham radio and marine and land mobile electronics. We are planning to sell our home next spring and need to get rid of a lot of stuff. Everything will be priced to move if not free.
If your interested in attending this sale, please RSVP to my email address. Give me your email address and a Saturday in October or November that would be good for you to attend. I will email you back with the exact date and time.
Thanks,
Randy Perkins, WB5KCM, wb5kcm@arrl.net
Pasadena, Texas
Look for me on APRS via this link.

No doubt there are *certain* accounts in the Bible that are
historically correct. The great flood for instance, I truly believe
there was a "great flood" that occurred and that it covered the whole
earth (as *THEY* knew it) They didn't have weather satellites and
means of transportation / communication back then to show that the
flood covered only the section of earth that *THEY* could see.

> And
>paleontological discoveries that throw a wrench in the whole timeline of
>things?

They simply *update* their knowledge. Scientific "knowledge" isn't
locked in stone like religious doctrines and that's the *beauty* of
it.

I was one of the original posters saying that CW was legal on CW as the ARRL manual said it was legal on all bands. I have since found the specific laws dealing with that (I don't have the URL handy, but it's through the FCC website at http://www.fcc.gov) and they state that only voice is legal on CB.

Yep, and we missed the pictures of the kangaroos, polar bears and
other creatures *somehow* being transported *magically* to the ark and
then *magically* back to their native surroundings. I haven't seen or
heard of many kangaroos / polar bears etc anywhere in the Middle East
outside of a zoo.

And then the *number* of animals on the ark seems to be in question
here also.

==
Genesis 6:19 "And of every living thing of all flesh, two of every
sort shalt thou bring into the ark."
Genesis 7:8-9 "Of clean beasts, and of beasts that are not clean, and
of fowls, and of every thing that creepeth upon the earth, There went
in two and two unto Noah into the ark, the male and the female, as God
had commanded Noah."
Genesis 7:15 "And they went in unto Noah into the ark, two and two of
all flesh, wherein is the breath of life."

vs.

Genesis 7:2 "Of every clean beast thou shalt take to thee by sevens,
the male and his female: and of beasts that are not clean by two, the
male and his female."

WRT: our current knowledge, yes, but it's not forever "locked in
stone."

As an example, for decades ulcers have been treated as being caused by
stress, an Australian (IIRC) doctor discovered a few years back that
most all ulcers are caused by bacteria. Ulcers are now mostly treated
with antibiotics.

There has been a trend to remove monopoly status for utilities in the northeast, but until recently, I couldn't choose my electricity supplier. A monopoly still owns the wires, but the actual cost of the electricity is now a free market choice.

The charges for maintaining the wires are greater per KW than the cost to generate the electricity even though most of our electricity comes from oil and coal fired generators.

DPUC control wasn't effective, as the utilities were guaranteed a certain rate of return for their investors. The profit wasn't excessive, but the certainty of a more or less fixed profit meant finding better and more efficient ways to do things would not provide a reward for the company in the form of greater profits.

A similar argument can be made for school vouchers, although there, profit is presumably replaced with quality of education.

Not really.....the first passage you quote is an overview, the second is a set of more detailed instructions.....a modern day example might be of a quick magazine overview of ham radio versus a complete set of instructions.

Noah was instructed to take extra pairs of ritually clean animals to the ark because, for one reason, predatory animals would have needed to eat some of the non predatory animals to survive. Only if Noah were told NOT to take extra of some kinds of animals would there have been a problem. ;))

1614. GM Gas Tank Noise?

Newsgroup: rec.radio.amateur.misc
Date: 2000-09-30 00:00:00 UTC
From: Pat Masterson <bat@grumman.com>
Message-ID: <39D5F748.CBD5B894@grumman.com>
Source record: 102526

When I was at Dayton, GM was distributing a 2 page leaflet showing how to "quiet" down your gas tank pump from making RF hash inside the vehicle.
It looked like you needed to remove the tank, and replace the whole pump
unit. Since it was too expensive for me to do, I didn't take a copy of that
bulletin.
But, thanks to some guy with a cell phone in his ear, the back end of my blazer is on the floor at my body shop. They are getting a brand new gas tank, and I have a great opportunity to have the correct "quiet" pump unit installed very easily.
And of course, I dont have the bulletin with the part number. So, if anybody knows that part number (1995 Blazer 2 door) or can fax me a copy of the buuletin, I would be very grateful. Thanks.

My point was that even though utilities were "private" they usually
still had their rates set by a unit of government which basically made
them as "Socialist" as if they were government run.

FWIW: Some of the reports I've read show that since the "Free Markets"
in electricity have opened up that rates in some areas have
skyrocketed to several times the previous cost. No one seems to want
to dump say a billion dollars into a generating plant and then have
their rates undercut by a broker with a $250.00 a month office and a
telephone line.

Maybe so, but they're still in close proximity to other surfaces and have no groundplane. While antennas can be designed and work satisfactorily under these conditions, they are stil a compromise over a full-sized vertical antenna with a groundplane.

I read somewhere a while back that a new generation of wireless systems
was being authorized by the FCC. And they would be wideband devices
operating at HF. They would be under part 15 I believe.

So, the fact that you've never seen them mean they don't exist? There are plenty of examples in the fossil record of animals showing up where they shouldn't...but, EITHER way what does that mean?

We missed the "picture" but the "thermometer" got it. The thermometer
(some type of space based experiment IIRC) indicates there was a
magical Big Bang. There's a very very slight warmth to space that
scientists expected to find that was leftover from the "Big Bang." The
minute background "heat" was found.

> that *magical* lightning strike that created life, that
>*magical* one celled creature that *magically* became something else. :))))

Yep as well as pictures of the *magical* God that always was and
always will be, that likes to play games with humans. He tosses us
down here on planet earth and leaves cryptic clues and then *really*
confuses us by allowing all sorts of other Gods to come into play. But
if you can't pick the "right God" you risk spending eternal life in
some place called "hell."

1621. Anyone hear strange noise on 20phone???

From about 14.250 to 14.320 I am hearing a noise that sounds like
a "swishing sound". I cant find a center frequency. It is not all
that loud, say about s1 to s2. ANyone else hear it? Any thoughts??

Dan/W4NTI

Are the US Olympic athletes there because it's easy? The rules say they
cannot compete unless they are amateurs.

The definition of the word amateur is "One who engages in an art, science,
or sport for enjoyment rather than money".

Remove instruction
at the bottom

I read your info with much interest, I
am returning in favor: MAKE MONEY WITH THE BANK&#65533;S MONEY.

QUICK CASH SECRET BANKING
SYSTEM, THE SECRETS OF THE RICH & FAMOUS REVEALED AT LAST!!! Make money with the abundance of the bank&#65533;s money&#65533;

&#65533; $$$$

MAKE MONEY WITH THE
BANK&#65533;S MONEY

During a 6-month period you will be able to deposit 50,000 dollars in your
personal bank accounts, without doing anything at all!&#65533; Let me elaborate just a little.&#65533; &#65533;You do not do anything physical to bring
in this kind of money!&#65533;&#65533; The bank
does all the work for you at your convenience, and as long as you keep your
account &#65533;open&#65533; they almost have no choice!&#65533; I will show you how to make a minimum of $5,000 a month by just opening a bank account. &#65533;But
that is just the tip of the iceberg!&#65533; By
opening a bank account, I will teach you how to have that kind of money
deposited into your bank account Automatically, though a built-in
automatic process that I will personally show you.&#65533; That is the beauty of the $ecret Banking $ystem!&#65533; Imagine making $5,000 a month for each bank
account you &#65533;open&#65533;.&#65533; And aside from
opening the account, it does not cost you anything!&#65533; Just one bank account can make you financially independent for life!

Now Think Big.&#65533; Think of the same idea
on a slight larger scale, like two or three bank accounts working at the same
time each producing a guaranteed monthly income of $5,000 each.&#65533; As of today, I have 13 active account @$5,000 = $65,000 per month, every month, 12 months a year.&#65533; I assure you, there is no print error.&#65533; I said 65 thousand dollars per month!

In summary this is how the formula works:&#65533;
YOU walk into a bank, open a bank account, follow the instructions like
a recipe in a cookbook, and 30 days later you will make $5,000. &#65533;And one of the most amazing realities of the $ecret Banking $ystem is that you can begin with literally $0, zero money.&#65533; In the $ecret Banking $ystem manual, in an
easy to duplicate as a set of &#65533;blueprints&#65533;, you will find out for yourself
where all the money comes from and how it is added up for you.

I realize
what I am originating to you may sound impossible, but I promise you, it is
possible, doable and simple.&#65533; There is
not shortage of money, the Federal Reserve Board creates money daily but most
of it must pass through and circulate in the banks over and over again. &#65533;That is how banks run.&#65533; That is where this Ingenious $ecret Banking
$ystem comes in.&#65533; All you need is the $ecret
Banking $ystem manual to start making big money.&#65533; IF YOU ORDER TODAY WE SHALL ADD AT NO EXTRA COST TO YOU, THE FAMOUS "101 High Profit Businesses You Can Start Online For Little Or
No Money", PLUS 1,000,000 ONE MILLION OPT-IN ADDRESSES- FREE!!

That you obtain your very own copy of the $ecret Banking $ystem and the
above mentioned, take the first step and invest only $49US for something that
is worth its weight in gold.&#65533; Copy and
mail-send a money order and Postal Money Order must be INTERNATIONAL.&#65533; You can also send a cheque (we accept cash)

Foundations of Wealth

If you wish to learn more please read on

A few years ago I believed that I really had to work hard to make money. I
thought that the more I worked, the more money I was going to make. But after a

while I realized that I was not getting anywhere. I was working like a slave and I was not seeing any satisfactory results. I wondered why I wasn't because I sure was applying the time and the effort.

I realized that I needed to make a change. For months I tried to find that special answer that I needed. I tried different things, but none of them worked. I was lost. Finally, I was ready to give up my dreams and continue living that ordinary life that I was used to living. You know, that wake up, go to work, come home, have dinner, and go to bed sort of life. That kind of life that I am very sure you are used to living. But no! I had to give it one more chance. I could not quit that easily. So, an idea came to my mind and I decided: "If I want to be become extremely wealthy, why don't I study people who already are extremely wealthy and interpret what they are doing?" So that is what I did. After a few months, I realized that the majority of the extremely wealthy people did not work that hard. Also, the majority of them not only had enough money to buy another planet, but they also had the time and the freedom to enjoy it. That is what I consider true wealth, and that is exactly what $ecret Banking $ystem is all about. The ability to have free time and be able to do what you choose, when you choose it. I think that is where the majority of the people get confused on the definition of wealth. Wealth is not just money. Wealth is also the ability to spend it the way you choose to do, when you want to do so.

Having accomplished my goals, my purpose now is to help those that are in the situation I was in; my purpose is to turn you into a "true" wealthy person; I want you to have great amounts of money, and great amounts of free time to enjoy it. Now, the first step to accomplish this is the one that a lot of people do not pay that much attention to, yet it is one of the most important aspects of true wealth. I am talking about the mental aspect of true wealth. Hang on! I know you are tired of listening the same psychology song over and over. Do not worry! The mental aspect of true wealth is actually very simple and easy to apply. It is actually like a list of steps that you have to "get into your mind" before we really get into the "secrets" of making money with the bank's money that I have been talking about so much. Once you know all these steps and are ready to apply them, then you will really be ready to start the journey.

Please! Do not jump this section thinking that you do not need any mental preparation. It is very important! Remember, follow my instructions and you could be sitting on gold in just days.

Do you remember the three "keys" to success that I explained on the web site? If you forgot, the three "keys" to success are:

* Timing: Being at the right place at the right time.

* Having Vision: Seeing potential in what is being presented. Having the ability to see success.

* Taking Action: Going one step further than the rest. Doing instead of saying.

These
three "keys" are essential to recognize success, and to make it a
part of your life. Now, once you have made the decision to "Take
Action," your next task is to follow what I call "The Ten Steps To
Success." As I said before, they are very simple, but extremely important
if your purpose is to achieve true wealth. I would happily give them to you as
part of the Training I provide when you obtain the $ecret Banking $ystem.&#65533; Get your copy today!

HUNDREDS...?!?!?

BBBBBWWBWWWWWWWWAaaaaaaaaaahahahahahahahahahahahahahahahahahaahhaha ! !
!
You HAVE been on the grape again, Cecil.....

"HUNDREDS", and not a word of any of them in ANY Amateur or hobby
related media...?!?!

And you forget my profession. I SEE incident reports and talk to
police officers every week, many of which are NEVER seen or heard by
the press due to patient confidentiality.

I have yet to hear of ANY accident involving ANY radio operator,
Ham or otherwise, who has been involved in an accident as a result of
operating of the radio in ANY mode.

Just one, Cecil....come on...you cannnn doooooo iiiiiiiitttttt!!!!!

Or maybe not.

In article <st9srhp0ns6r74@corp.supernews.com>,
"Leland C. Scott" <no-spam@junk-mail.net> wrote:

Having had his nosed rubbed in a bit of common sense, Leland tries
a change in tactic:

> And on the flip side of that argument can you provide any data that
proves it is in fact safe? Personal experience does not count. All the
data used to press the issue, that cell phone use while driving is
unsafe, is a conclusion of a large base collection of data.<

ANY distraction, whether it's Ham Radio, a cellphone, or that D
Cup Babe in the C cup bra in the Beemer next to you is dangerous.

NO ONE here, ESPECIALLY me, has made ANY assertion that operating
CW while in motion is "safer" than phone, Leland.

> Since you did bring up the issue, I think it would be a very wise
move on the part of Ham Radio operators (ARRL) to begin to collect data
on highway driving safety....(SNIP)

(1) Where did I bring up anything about "collecting data" by Hams?

(2) What data do you propose to collect that the NHTSA or NTSB
doesn't collect? How do you suggest we implement it?

(3) Have YOU ever been a part of such a study and have even the
REMOTEST idea of the cost or logistics of it?

>You tell them "sure we can operate safely mobile", they are going to
pull the same thing I did on you by asking US to PROVE IT.<

Leland, when was the last time your 10PM news was interrupted to
tell you about an accident where someone was killed or injured in an
auto accident using Ham Radio...???

This is one case where the ABSENCE of data is proof. If Hams WERE
racking up a score in traffic, WE'D hear about it! If not through the
ARRL or the Amateur media, then certainly from the "general" press.

However, this recent recent feeding frenzy in the press over MVA's
has not said A SINGLE WORD about any Ham, CBer, Police Officer,
Paramedic or other user of two way radios being in ANY MVA as a result
of using the radio.

Do you NOT think that the press, infamous for raking the muck,
would made a spalsh about this? And if NOT them, then certainly the

cellular industry looking to deflect attention from them!

>If we can't, we're screwed because they can point to cell phone users, and correctly point out they can't yack on the phone and drive safely at the same time, and they DO HAVE the data to prove it.

They HAVE the data because something HAS been happening. People with a very poor sense of "situational awareness" are talking on telephones when they SHOULD be driving the car.

>So to play it "safe" we will find our use of mobile equipment restricted. As far as our government know a cell phone held to your ear in not much different than a microphone held to your mouth in their uneducated minds.<

You are close to the truth, but again, NO DATA supports ANY suggestion that the use of a microphone is anywhere NEAR as dangerous as a telephone held to the head.

Try again, Leland.

I have moved and don't have room for some of my PERSONAL Collins Collection I have been collecting for 10 years. I need to thin some of the pieces out. All these pieces are BEAUTIFUL. I thought I would give the group the first chance....73

A. I have a Collins KWM-1 transceiver, 516F-1 Collins matching power supply for the KWM-1, original box for the KWM-1, Astatic SSB head desk microphone wired for the KWM-1, comes with the original manual also. This station was bought be me from the ORIGINAL owner he purchased it new in 1959. I also have the matching Collins 312B-2 station console (Rare Item). The KWM-1 was worked on by Wayne W6IRD. If I was to rate this one it would be a 9.6, but remember I am very conservative with my grading.... $3000.00 CCA Very good (cleanest one I have seen)

B. Collins 75A-3 receiver with all the OPTIONAL internal accessories. 6.0 khz AM filter, 8R-1 Crystal Calibrator, and NBFM adaptor. I have the had the case repainted with black krinkle paint (Painted at a place that paints, and bakes the paint on) They paint military components.....Its a hair darker than the front panel but it beautiful. This is my favorite Collins receiver.
$1500.00 This is a beauty !!!!!!!!!!!!!

C. Collins 399C-1 external VFO for the KWM-2, this beauty does not have a phone patch/wattmeter/swr meter
$1500.00 Very clean !!!!!!!!!!!!!!!

D. Collins 312B-3 speaker only $275.00

E. Collins PM-2 power supply for a KWM-2 $199.00 CCA very good

F. Collins 62S-1 144/50 MHZ converter $2000.00 with manual , and cable CCA very good (I have 2 of them for SALE)

G. Collins 62S-1 144/50 MHZ converter $2000.00 with manual, and cable CCA very good

H.. Collins 75S-3 winged emblem receiver $550.00 looks great... CCA very good

I. (2) Collins 270G-2 speakers repainted with black krinkle paint $350.00 each

J. Beautiful S-line consisting of a 75S-3, 32S-3, 516F-2 manuals, and cables, all winged emblem in excellent condition $1500.00
all original....CCA Excellent...

MORE ITEMS TO FOLLOW......STAY TUNED

LEO KJ6HI

1634. NEWPORT STH WALES RALLY

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-01 00:00:00 UTC
From: fireham@aol.com
Message-ID: <20001001142219.24230.00000041@ng-fg1.aol.com>
Source record: 102336

The Radio,Computer & Electronics Show takes place on Sunday 15th October at
THE NEWPORT CENTRE, NEWPORT, Sth WALES just 1 mile off junc`s 26 or
25a M4.

The show opens at 11.00am

Many new and all the regular traders attending, plus specialist groups
including
the R A with their test gear, bring and buy, refreshments and BAR.

Want to sell that radio/computer gear or W H Y, too much for the bring and buy
then hire a table.

Contact FIREHAM@AOL.COM now to book or for more info.

Traders ring 07970 777756 now.

Come to NEWPORT the GATEWAY of WALES.

1635. License renewal

1638. FCC Redesigns ULS interface - but WTF!

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-01 00:00:00 UTC
From: "D. Stussy" <kd6lvw@bde-arc.ampr.org>
Message-ID: <Pine.LNX.4.10.10010011902390.11532-100000@exp.bde-arc.ampr.org>
Source record: 102340

Apparently, about a week ago, the FCC redesigned the ULS web site.

However, when I went there to SEARCH (and NOT SUBMIT any changes), the site tried to cram about 3Mb of something downloading into my computer, just by clicking on search. It is documented that for submitting information, it needs to install a browser plug-in module, but nowhere does it say that it needs this just to search, nor has such been needed in the past. Additionally, my browser indicated that as a security risk, whatever it was that was downloaded wanted to read a file local to my computer's hard drive. Needless to say, it was promptly cancelled.

Does anyone know what's going on here?

There was no issue going back well over a half century about ditzy mobile radio ops
until the advent of cellphones in massive volumes came along recently. The problem is
cellphone users and I rather doubt it will take much lobbying to convince the pols

that the few mic users here and there who have been doing useful things with their radios like answering 911 and "pole down" calls for decades without cluttering up the Interstates with vehicle components should be excluded from a hands-off thingey rigorous stats completely aside.

Interesting. I guess the German and Israeli politicians missed it when they enacted their nationwide hands-free laws. Ditto several municipalities in this country. One more Great Truth being that the whole planet knows full well that stats are bogus as often as not and in many instances can be easily twisted to suit specific agendas. Folk trust their own observations a helluva lot more than they trust stats.
>

> This result actually
> matches well with the findings of a number of human factors studies, but

>
This is a whole 'nother topic area. Engineer's brains run on data and coming to logical conclusions therefrom and I are one of those. The world would be entirely different if it was run by engineers, thank God it isn't else nothing would happen until all the "stats" were in and properly analyzed. Politician's brains are driven

by their perceptions and the perceptions of their constituencies and they write the laws, stats be damaned.
>

> applied to both.

>
Ya got me confused here. I support hands-off cellphone ops. I support specific exclusions to legislation like that for hams and a bunch of other services which do not make themselves blatently obvious threats, if only perceived threats on the highways. Not the same medicine at all. The huge boil is doing it to itself, the pimple hasn't. Engineers historically have had a helluva time understanding why the world doesn't run on Aristotilian logic.

Driving what, this thread or the lawmakers??
>

> Dennis Ferguson

>
Methinks we are gonna see more clamp-downs on cellphone operations before we see less. It will be driven by perceptions and emotions and bits and pieces of statistics will not play in the process as has already been demonstrated. The only lobbying force I see in any of it is the cellphone service providers and I haven't seen any activity in the matter on their part yet. None of the 70 million cellphone users are organized as a bloc and have no real unified voice except via their elected politicians. Hams on the other hand are organized, neither the cellphone service providers or the users have any stake in what hams do or don't do and are not "an opposing force". I'm convinced that the ARRL and the neighborhood clubs will effectively jump in if the pols mess with us and it'll wind up being business as usual for the pimple.

How ridiculous. Just because I try to extend a welcome to people
different from myself? You're confused about what I'm saying or you
just want to argue and make an issue out of something you don't agree
with. Are all born again South Carolina republicans like you? Afraid
of people that are different from yourselves? It looks like you are
afraid.

Dwight just wants to argue with someone who doesn't agree with his
narrow point of view. Too bad for Dwight of South Carolina. Home of
Pat Robertson's and Jerry Falewll's friends and supporters.

I don't know if this is appropriate for this newsgroup but I just acquired some old amateur radio equipment from my elderly uncle. I might put it on ebay but I thought I could give this group a chance at it first if anyone wants to buy some of it at any reasonable price. I believe he said that the transmitter is 6 meters and I have a receiver and some boxes of tubes as well. Please let me know if there is any interest. Thanks -Dave

>K�MB

***I heard the above as well many nights and have no idea what it is.

I recommended the OO's report it since it seemed to cover over into
the ham bands. I'm sure it's not real local stuff since several other
hams on our repeater have mentioned it from several different sections
of the state.

Yes, Woodpecker was over the horizon radar last I knew back
in the 70's..

I did hear Air Force one nite blasting in 30-40 over 9 one night
at 6.995 SSB and it was wide enough to put junk down into
the lower end of 40Meters. But what is going on now is something
different.

It stays on one frequency but looking at a scan of the usb audio
coming out, there are some noise bands and they do shift around for
the few seconds it's on.

Thanks for the replies...

Err, once WHO announces that it's a "slim"? How do you know that the
information given has any validity? How do you know that the person
making the annoucement is who THEY claim to be? Suppose someone came
on using your call and QRMed by saying that a legitimate operation was
a pirate?

It's still deliberate QRM, also.

73, doug

Dumb analogy. Human beings are all of one species. Tigers are of a
different species than the domestic cat and the lion, altho' all fit into
the same genus, namely felines.

Body handling: HTML body converted to readable text

I starting to have a problem with power line RFI in the spring of 1999.
I called the local power company, and told the girl that answered what
was happening. A day or so later a couple of flunkies arrived, and asked
me if I had a portable AM radio they could borrow. I politely told them
to go back, and find someone that knew what he was doing, and send him
out. They left. I called back, and politely asked to talk to the resident
RFI engineer. At the time, he was unavailable, but he did call me back.
He asked a few questions, and told me he'd be out to check things as soon
as possible.
Much to my surprise, he did come, about two days later. After asking more
questions, to make sure I had done my home work, he produced
the correct equipment to check things with, and disconnected my house to
make sure it wasn't coming from there. It wasn't.
In less than 30 minutes, he had 2 bucket crews, along with 2 smaller
truck crews on the scene. two, and one half days, (20 hrs) later, I had
the quietest location for radioing I have ever had. They practically
rebuilt 10 poles with new insulators. Tightened everything. From an S9
constant noise, to no noise. NONE. These boys knew their stuff. One guy
was constantly coming back to my house to check to see what kind of
progress they were making.
When I was fully satisfied, they continued to fix 2 more poles, just in
case. After they were through, the RFI guy came back to chew me out for
letting things get so bad. Told me, as an Amateur, it was my
responsibility to help the power company stay informed.
What I learned, is that if you are persistent, but not rude, check out
the situation so you know how to answer questions correctly, and make
sure you let the power company know that you are aware of the rules, most
times they will cooperate.
Whatever you do, don't just call, and tell the lady that answers what you
THINK, and rely on her. She probably hasn't a clue.

Ohio/Penn DX Bulletin No. 479

The Ohio/Penn DX PacketCluster
DX Bulletin No. 479
BID: $OPDX.479
October 2, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, KL7JR/1, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4VUD, KM6HB, N4ZC, K6RO, N6DCD, NI6T, AA7KE, W7TVF, WC7N, K8AV, K8YSE, 4L1BR, 4X6UO, BG1HZF, CT1END, DJ5AV & DX News Letter, DK9IP, G3SWH, G3VMW, JA1ELY, OH3RM, RU4SS, VE3XAP, VK5FV and ZS5BBO for the following DX information.

3B6, AGALEGA. Just a reminder that the 3B6RF operation starts next weekend (October 8-24th), and a frequency chart will be sent to all OPDX InterNet Subscribers as an additional bulletin.

4S, SRI LANKA. Phil, G3SWH, and his XYL will be here (IOTA AS-003) from November 9-22nd, and Phil has been allocated the callsign 4S7WHG. They will be travelling extensively during their stay, and he hopes to be active on CW only, all bands from 40-10 meters, for a few hours at least on most days, circumstances permitting. This will be a holiday type operation with limited activity, although they will spend the last few days relaxing on the beach at Unawatuna in the south part of the island, where he hopes to be a little more active. Phil will have his IC-706 and R-7000 antenna with him. QSLs will be via G3SWH, either direct or via the RSGB bureau.

4W, EAST TIMOR. Rod, WC7N, the East Timor Pilot Station, reports that all things are going according to plan for next weekend's 4W/K7BV operation (Refer to OPDX.475). There are some problems with flight schedules and weight limitations, but they are being worked on and all should arrive near to schedule. For up-to-date info, check Web page: http://www.qth.com/k7bv/timor

8Q, MALEDIVES. Just a reminder to look for Adam, W7MP, to be active as 8Q7AB from now until October 9th. His activity will be mostly on 40 meters CW and 20 meters CW/SSB. QSL via W7MP. (Refer to OPDX.475)

9X, RWANDA. "THE 59(9) DX REPORT" reports that Charlie, N4XT, will be working at the U.S. Embassy in Kigali in the year 2001 between January 12th through March 12th. He hopes to be active from this African nation.

A5, BHUTAN. It is official! The Bhutanese Dept. of Communications has given the go-ahead to Charly, K4VUD, to utilize 1000 watts transmit power in Bhutan in December 2000 for the three low bands. Charly states, "It will be cheaper per person if four people go at once... are there three more folks out there who want to be in Bhutan in early December 2000???" E-mail him at: k4vud@hotmail.com

BT4, CHINA. Look for the special amateur radio station during the 10th ARDF World Championships, BT4ARDF. The station will be located in the New Century Hotel. Reportedly, QSL cards are printed.

D44, CAPE VERDE (IOTA DXpedition Update to OPDX.475). Jose, EA8EE, informs OPDX that he and Maneul/EA8BYG's plans for their November 1-8th operation from the Island of Sao Vicente (IOTA AF-86, new IOTA as of June) near the capital of Mindelo continue. The two will be active from Carlos', D44AC, QTH and use his callsign. Activity will be on all modes and bands. Please refer to OPDX.475. They now announce that their logs will be updated daily, as long as they are able to, on the Web page:
http://www.qsl.net/dxgrancanaria

DXCC STATUS. Wayne Mills, N7NG/1, from Membership Services Department reports that the current turn-around for DXCC applications is about 8 weeks. They are working overtime to reduce this figure. The ARRL will be installing a new computer platform. This will allow them to make some improvements in the way the DXCC program works. By the end of the year 2001, they should be able to generate an E-mail receipt automatically for each DXCC application received. OPDX InterNet Subscribers will receive a message that Jim, AD1C, received from Wayne, N7NG/1, on this status as an additional bulletin.

EP, IRAN (New Iranian Stations). Mac, W3HC, informs OPDX that he received an E-mail from Iran which indicates that there will be 7 stations set up for the "Civilization Talks". Look for the old timers EP2FM, EP2CM and EP2ES, along with 4 new novices to be active with most of the activity from EP3PTT (the club station). They will notify Mac as soon as they have the callsigns of the new stations.

FS & PJ8, ST. MARTIN AND ST. MAARTEN. Rodger/N4ZC and Don/K4ZA will be active from both the French and Dutch sides of this island. Rodger informs OPDX that he will fly down to St. Maarten on October 16th. His activity will be on 160-6 meters CW/SSB before the CQWW SSB Contest. He states that he will try to operate around .025 kHz on CW for the non-Extra class guys when he is on 80-10 meters. Rodger will operate as both FS/N4ZC and PJ8/N4ZC before the contest. Don, K4ZA, will fly down on October 21st. He will also operate FS/K4ZA and PJ8/K4ZA before the contest. Each side (of the island) has a C4 beam. Rodger will be PJ8/N4ZC during the contest. QSL vis his home callsign. Don will be FS/K4ZA during the contest. QSL via his home callsign. Rodger states that the FS location is the highest point on the island at 424m, so the blue Caribbean can be seen for 360

deg. They will both fly home the morning after the contest.

IOTA NEWS.....
EU-012. Look for GS2MP to be active during the CQ WW Phone Contest (October 28/29th). GS2MP will be a separate multiplier for the CQWW scoring. The operators of this Multi-Multi entry will be Chris/GM3WOJ, Stewart/GM4AFF (GM0F), Jim/GM4TXX, and Keith/GM4YXI. The Shetland Islands have the reference number: IOTA EU-012, IOSA reference SH1, WAB HU27 and locator IP90. This island can be reached by a 14 hour, 220 mile sea crossing from Aberdeen to Lerwick. The GS2MP QSL cards will be via their QSL Manager: Edwin Musto ZS5BBO, PO Box 211032, Bluff 4036, South Africa. For a few days before the contest some HF CW only operation may take place, and GM4AFF/P will be active on the 50 and 7 MHz bands. For more information, contact Chris, GM3WOJ, via E-mail at: gm3woj@talk21.com
Or from his Web page at: http://www.gm7v.com

NA-055. John, KL7JR/1, will be on from Mt. Desert Island (USI ME-021S) on October 8th (possibly 7th too) starting around 1400z on 28460 kHz (primary) and 14260 kHz (secondary). QSL CBA only.

KH0, MARIANA ISLANDS. Hide, JF1VXB, will be operating from Saipan Island (OC-086) from Octover 5-10th as KH0M. Activity will be on 80-6 meters SSB/CW/RTTY/PSK31 with a KW amp. He hopes to participate in the Oceania DX Conetst. QSL to homecall via JARL bureau or direct to CBA:
Hidenobu Nakamura: 23-139 Chojabara, Kasuya, 811-2311 JAPAN

KH0, MARIANA ISLANDS. Look for Tsutomu, JA1VND, to be active from Saipan Island (OC-086) as KH0/JA1VND from October 13-16th. Activity will be on CW/SSB on all bands. He hopes to see big pileups from either Europe and/or East Coast of N.A. QSL to JA1VND via JARL bureau or direct to:
Tsutomu HorikoshiI, 656 Yoshii, Yoshii, 370-2132 JAPAN

KH0, MARIANA ISLANDS. Look for operators JQ1UKK, JF2SKV, JG3VEI and JH5OXF to be active in the CQWW CW Contest as NH0S in a Multi/Single/High Power Category effort. Outside the contest, between November 23-27th, they will be operating on all bands 160-6 meters SSB/FM/CW/RTTY/PSK31 with a FL7000 and HL1KGX amplifier. Operators (with callsign/QSL info) are: KH2F (QSL via JF2SKV), NH0V (via JG3VEI), KH0/KD6CJF (via JH5OXF) and KH0/JQ1UKK (via JQ1UKK). QSL NH0S via JF2SKV to JARL bureau or direct to:
Hisashi Matsushita, 14-1 Ugasemae Iwakura, Toyota, 444-2225 JAPAN
Any questions can be direct to Hisashi, JF2SKV, via E-mail:
8877@hm.aitai.ne.jp

KH2, GUAM ISLAND. A group from the Nagoya area will be active from Guam Island (OC-026) on November 10-15th. They will have two IC-736, IC-706, FT-100 and a 500W Linear Amplifier for 160-10 meters, SSB/CW/RTTY. The following antennas will be used:
160m - Inverted L 40-10m - Cushcraft R-7000 Vertical
80m - Inverted L 6m - 5 element Yagi @ 25m up
The operators will be active as: KH2F (QSL via JA2TBS), KR6CZ/KH2 (via

JA2VFW), AB8EW/KH2 (via JH2SON), K1HP/KH2 (via JE2EHP), KH2/JH2ABL (via JH2ABL), KH2/JH2KDP (via JH2KDP), KH2/JJ2MST (via JJ2MST), KH2/JL2WNA (via JL2WNA) and KH2/JQ2PTN (via JQ2PTN). If you have any questions or requests, contact Masao, JA2TBS/KH2F via E-mail at: ja2tbs@jarl.com

KH5K, KINGMAN REEF (Update). The latest press release by the Kingman Reef/Palmyra DX Group and Garry Shapiro, NI6T, states preparations continue at an accelerating pace for the Kingman Reef DXpedition in mid-October. Some equipment has arrived in Honolulu with antennas, amplifiers and cables on their way. The motor schooner Machias is being prepared for the journey. Site planning is almost complete. Financial support is coming in from foundations, clubs and individuals (more is still needed). Contributions should be sent to Tom Harrell, N4XP, 2011 New High Shoals Rd., Watkinsville, GA 30677. For more updates, check out the Web site at: http://www.qsl.net/krpdxg
OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

KP2, ST. CROIX (U.S. Virgin Islands). Look for Larry/K6RO and Herb/KG6OK to be active from October 25-31st. They will be active on CW, RTTY and SSB and possibly PSK-31. They will concentration on the WARC bands before and after the CQWW Contest. Larry, K6RO, will participate in CQWW SSB Contest as a SO/AB/HP effort using WP2Z. QSL WP2Z via KU9C. QSL KP2/K6RO and KP2/KG6OK via their home callsign.

OH0, ALAND ISLAND. A group of OH3 operators will be active from here (IOTA EU-002, OH County 008) until October 7th. Look for operators Mikko, OH0/OH3FM (QSL via OH3FM); Jussi, OH0/OH3YM (via OH3YM); Pertti, OH0LQK (via OH3LQK); Alpo, OH0MFP (via OH3MFP); and Markus, OH0KCB (via OH3RM) to be active on 80-10 meters, mainly on CW and RTTY.

PJ2, NETHERLANDS ANTILLES. Joeke, PA0VDV, will once again be active from here as PJ2/PA0VDV, October 26th through November 16th. Activity is expected to be CW only. QSL via homecall.

QSL INFO AND NEWS.....
4L0JAZZ was activated by Shale, 4L1BR, in Georgia on RTTY this past week. Shale told OPDX to QSL via his address on "QRZ.COM".

A52JS QSLs. Reports have surfaced that modified A52JS QSL cards are being sent out by Jim, VK9NS, with a note attached. It's actually a A51JS card from Jim's previous operation to Bhutan. It seems that the A52JS cards are missing in transit between EU and VK9NS. Jim sent out this modified card so that many can summit them in time for the DXCC September deadline submission. Notices will be sent out through the proper DX channels when the new A52JS card have arrived. Those who would like to receive a card should resend a SAE and IRC. We are sure that many would like to thank Jim for his thoughtfulness.

QSL QSOs for A61AJ in the RTTY DX Contest last weekend go to W3UR: Bernie McClenny, 3025 Hobbs Road, Glenwood, MD 21738 (no bureau E-mail requests!). Bernie is the QSL Manager for all QSOs with A61AJ (what

ever date, mode or band). By the way, the operator was Walter, DJ6QT.

All stations needing a card from BI2J are to send them direct to Mac, W3HC, and not to China. If you send them to China, Mac will have to mail a supply of cards to Alan so he can answer them. This takes more time and creates a greater expense. This mistake was made on the BI3H, BI4C, BI5Z and the BI5P cards. Mac will place an order for the BI2J cards as soon as he receives the photograph and the details from Alan.

QSLs for EZ8CW and EZ3A. Vit, EZ8CW, states that he doesn't have a QSL Manager and QSLs for him (EZ8CW) and the club station EZ3A should be sent direct only to: Vitaly Dotsenko, P.O.Box 73, Ashgabat, 744020, Turkmenistan.

By the time you read this, the YP1W DXpedition will be over. Activity was from Sacalinu Mare Island (IOTA EU-183) in the Black Sea close to the Danube Delta. OPDX was told that this "island is a virgin and a wildlife Romanian territory, part of the Biosphere Reservation "Danube Delta". The DXpedition was organized by the Romanian Radio Amateur Federation (FRR) and by Pit, YO3JW. Operators were YO3JW/Pit, YO3FWC/ Ciprian, YO9FJW/Ionut, YO3FLR/Cristi and possibly others. QSL via YO3JW. For more info about previous trips on the island, check the Web pages: http://www.qsl.net/yo3kaa http://www.qsl.net/yo3jw

Mark, KM6HB, reports that he has received an E-mail from Bill, NC1L, at the DXCC desk stating that his documentation for his ZK1AHB operation to South Cook Island (July 10-18th, 2000) has been accepted by the ARRL for DXCC credit. QSLs have been received from the printer and are being mailed out daily. Bureau requests will be handled as they are received.

SPECIAL CANADIAN PREFIXES AND ACTIVITY.....
Look for a special prefix to be activated to commemorate the 250th anniversary of the end of the British and French capitals of Nova Scotia. The Industry Canada approved the prefix XM1 for VE1's and XL1 for VA1's, and is also available for all Canadian Radio Amateur operators residing within the boundaries of Annapolis County. Their operation was authorized and will be valid from October 27th through November 27, 2000.

The special callsign VC5C has been assigned to Todd Bendtsen, VE5MX, to commemorate the 125th Anniversary of the Supreme Court of Canada. This callsign is valid between October 27-30th, 2000 only.

The special event callsign VB2R as been authorized to be used by Carleton Styan, VE3BY, to commemorate the 100th Anniversary birth of Mr. E.S. Rogers Sr. inventor and creator of "Rogers Batteryless Radio". This operation is valid from October 21st through November 5th, 2000. The station will be active in the CQ WW SSB Contest (Zone 2).

SPECIAL EVENT. Look for the special event callsign MB2HFC to be used during the International HF and IOTA Convention, October 13-15th.

SPECIAL EVENT. During the year 2000 the "Signal Corps of the Australian Army (Royal Australian Signals)" celebrates their 75th anniversary of its formation. To mark the occasion, former and current members of the corps will operate VI5RAS throughout November from various locations within Australia. QSL direct with SASE to VK5FV or via the Bureau.

SLIM ALERTS!!!!
A station being active as 3W1A on 28495 kHz this past week stating to QSL via N6HK is a SLIM. Steve, N6HK, states, "The guy's a phoney. I'm not the manager for any station."

Gene, TZ6YV, reported hearing a station using the callsign TZ1GH who was advising people to QSL via the Bureau! According to Gene, the call TZ1GH has not been issued, and additionally Mali has no QSL Bureau.

V4, NEVIS ISLAND. Doc, W9NY, will be active again as V47NS, October 26-30th. He will be in the CQWW SSB Contest as a 10 meter Single Band entry (or possible 20/15 meters single band entry). QSL via W9NY.

V6, MICRONESIA. Due to freight schedules, the V63DX operation date was shifted a little. Shoji, JA7HMZ, will operate from Pohpei Island from October 27th through November 2nd. He will be Single Operator/All Band/ High Power entry in the CQWW DX SSB Contest. He received the callsign V6A for the contest. QSL V6A via JA7AO: Tokro Matsumoto, 3-62 Okachimachi, Yuzawa, 012-0856 JAPAN. Outside the contest, Shoji, V63DX/JA7HMZ, and Koh, V63DQ/JA7KAC, will operate mainly on CW and the WARC bands. QSL via their homecall either the JARL bureau or direct to:
JA7HMZ Shoji Igawa - 17 Shirogane, Yokobori, Ogachi, 019-0204 JAPAN
JA7KAC Kosaku Sasaki - 3800-42, Shimotsuruma, Yamato, 242-0001 JAPAN

ZD9, TRISTAN DA CUNHA. Bob's, G3ZEM, activity as ZD9ZM has ended. On Saturday, September 23rd, Bob and Karen finally left the island and are headed to Capetown. All the equipment was safely loaded onto the ship, including the slightly bent Titanex vertical. Bob E-mailed the final ZD9ZM log by satellite from the Agulhas today as promised. The final tally is 20,538 QSOs, and the full log has now been uploaded to the ZD9ZM log search page available at: http://www.dxtechnology.com/zd9zm
OPDX InterNet Subscribers will receive the complete final press release by Steve, G3VMW, as an additional bulletin.

ZK2, NIUE. Bill, W7TVF, will be active again from November 19th through December 10th as ZK2VF. Operations will be on 160-6 meters. Priority will be given to Europe, Africa, and South America on 160 and 80 meters during their grayline. Plenty of time will be spent on all bands for anyone who needs a QSO. A 847 will be used as a beacon on six meters all the time that he is active, so if six opens he will be QRT on HF until six meters closes. The six meter beacon will be on 50.115 MHz. Bill will be operating from the "Beautiful Namukulu Motel" with Alpha power and good antennas. QSL info is the same as last time. QSL direct with a SASE and return postage to: Bill Dawson "W7TVF", P.O. Box 4049, Pahrump, Nevada 89061. Bill states, "No donations are needed. Again, I would like to thank all of you for the extremely courteous operating by almost everyone and that made it a pleasure for me also. The pile ups were big but easy for me to operate because of

your help. I will try to create some even bigger pile-ups this time. Thanks
and CU from Niue Island in November." Bill's Web site is at:
http://coyote.accessnv.com/ad7k/w7tvf

Since I am STILL in service & have never been discharged there is no
way I could have a DD-214 or any Discharge paperwork.

So then you think I might post a copy of my (Armed Forces) ID card??
hahahaha
Would YOU post a copy of your drivers license????

"Jeffrey Herman" <jeffreyh@Hawaii.Edu> wrote

Blake, have you ever gone thru the NPSAC/APG program or witnessed it to know
the facts?

> No, you are wrong, and clutching at straws to try to make it
> seem that you might correct. The United States Navy
> clearly says you are wrong, yet you don't believe it? Nah,

Please post your verifiable proof you are referenceing with the web link
within 24 hours or be found to be a liar by default.

I STRONGLY suspect that you closest you have ever come to Navy duty
was the "Oceans of Fun" theme park in Kansas City!

> Just you John, a raw, very little trained, raw recruit.

A "raw recruit" would still be higher & more experienced that YOU, Blake!!!
But actually, I am clearly NOT a recruit of any kind. I have graduated from
Basic Training and am now an NCO (Non-Commissioned Officer). At this point
I
would supervise recruits & lower enlisted members!!

>up?
>

If your license hasn't yet expired, and you're concerned with the two year grace period, go to http://www.fcc.gov, and sign up for ULS, then using the instructions renew your license electronically. If your license has lapsed and you're within the two year grace period, you have to download form the forms selection on the same web site, the Form 605 PDF or WordPerfect versions, print them out, them fill it out following the instructions and mail them to the Gettysburg, PA address (I believe off the top of my head it's 1270 Fairfield RD, but check carefully). You can also renew by sending in the form 605 by mail to Gettysburg if your license hasn't lapsed and you're within the 90 day period allowed for renewal. I also believe that the FCC now sends out a notice to remind you.

One more comment, some folks are upset that the FCC asks for your social security number, if that bothers you, you can't renew your license, but I note that anyone with a credit card has also had to give up his or her social security number to a private concern, which legally has little duty to protect information.

Well,

I wasn't commenting about whether or not enforcement would be taken seriously -- that's a whole different matter. My response was directed towards the argument of whether or not the "possession presumes use" phrase that is in the FCC rules means that possession itself is illegal. I contend that for all practical purposes, possession is illegal since use is illegal (w/o suitable ticket) and possession presumes use (according to the regulations). There are rare circumstances where this wouldn't be so, but it transfers the burden of proof from the government to the accused.

Look, I'm all for extending a welcome to people, but you said that you would be "honored" to be able to talk to a black person. That seems to suggest something far more than just a simple welcome.

And, before you start criticising me, I suggest you take a good hard look at your own prejudiced attitudes towards southern people - your liberal intolerance is showing.

Yep, the FCC's site is fairly intrusive. However, contrary to what
the site says, it seems to work just fine without Java and SmartUpdate
enabled (assuming you have a compatible browser). In fact, it looks
like the only place Java is really needed is with the SmartUpdate feature.

As for your situation specifically, it appears that you triggered
SmartUpdate into installing something on your computer. Without
SmartUpdate (and Java), the problem will probably not repeat itself.

I'm not sold on this SmartUpdate stuff. There are far too many things
that can go wrong during an update (or any software installation),
therefore I only want updates when I have the time to check out the
results carefully (and fix any of the possible problems it causes).
Microsoft's site is the worst - I had a computer go down hard during an
automatic update at Microsoft's site (trashed the kernel).

I don't think it is worth paying for this. The ULS is not that difficult to use once it is set up. To change your address, for example, all you have to do is go to the site, sign in (SSN and password), change the address info, and press the submit button. Set up takes some time, but again its not that difficult.

It is thier obligation according to the FCC to fix it. Identification
of the problem equipment is the problem of the power company.
(hire an expert and give him or her the equipment to do the job).
Once identified he can go to the next problem and the problem
equipment can be replaced by a line crew.
>

It was 3am in the middle of an oil field on a one lane dirt road
in dense fog. The completely unexpected oncoming truck, IMO, was
driving at a dangerous speed under the circumstances. It was probably
50ft dead ahead before the headlights became visible to me. If I had
not had the dome light on in my car so I could see what channel my
radio was on, I might have seen the truck sooner through the fog.
I jerked the car out of the path of the truck directly into a
concrete culvert.

Autopatch is commonly used on Repeaters. Has anyone using or heard of Autopatch being used or is using this on Simplex? Can this be done on any band? Yaesu has an LL-7 patch unit that hooks-up to the SP-8 external speaker. I'm wondering if this will patch a mobile to the base rig for a telephone call.

[...]

For that matter, all vertebrates (like us) can trace our roots back
to a common ancestor in the ancient seas.

That's hardly an argument that we are the same as fish, or that we
shouldn't be concerned for the survival of our race.

That's about the same as saying that we shouldn't care about the
survival of tigers, since they share an ancestry (and most of their
genes) with lions and tabby cats.

Some prehumans stayed in sub-Saharan Africa, and evolved quite
differently from those who migrated to non-equatorial climates. It's
an environmental crime on a cosmic scale to attempt to exterminate
the unique subspecies that have thereby developed.

With all good wishes,

--

>KG8PM
>http://www.mindspring.com/~helmsman

1==> Doubt if it is that easy to "fix" actually. Glazed ceramic
insulators would be pretty good when newly installed, but get coated
with dust, various salts from various sources, pollution, develop
micro-cracks in glazing, etc. All these provide high voltage leakage
paths to earth from miles of wiring which makes an excellent radiator.

In Australia, primary transmission is usually 330 kilovolts [kV] or
330,000 volts. Secondary transmission lines are usually from 132 kV
to 66 kV, and high voltage distribution lines from 33 kV to 11 kV.

So it doesn't take much leakage somewhere to produce a fair bit of
broadband interference, but for most people this isn't a problem.

2==> The first main problem with "fixing" leaky insulators is to find
the faulty one, which isn't that easy unless there is enough leakage
to cause a visible discharge. If caused by accumulation of dust and
salts, possibly only a problem in high humidity conditions. Enough
wind driven rain can wash surface contamination off, temporarily

clearing the condition.

3==> The second & third problems is that even if did find it would usually involve closing down the line to replace it which would usually involve a fair number of service interruptions and greatly increased line maintenance costs.

4==> The fourth problem is that although only a tiny proportion of customers are bothered by interference, most are bothered by increases in costs of electrical power. Would the majority of users be willing to pay, say, twice as much for their electrical power just to reduce or eliminate interference that only bothers a small percentage of users? Very doubtful.

5==> Then too, insulators aren't the only problems. Line fuses, cable clamps, etc. can become corroded, causing minor sparking. Again, at voltages involved, enough to cause interference, and again difficult to find.

There are often problems on customer premises that radiate interference back on to the supply lines. TV, microwave ovens, welders, various sorts of industrial & medical equipment, etc.

6==> Basically, it all comes down to cost effectiveness. I suppose it would be possible to produce a PTFE ["Teflon"] coated insulator which would be far superior to a glazed insulator, as nothing sticks to PTFE. However, the cost of such insulators would be much higher than glazed insulators, and the cost of replacing all the glazed insulators on a system with PTFE coated ones would be very high.

Placing all power lines underground would probably help a lot as well, but this isn't a cheap solution either.

7==> A minor warning: Suggesting any sort of government regulation of private enterprise for any purpose on misc.survivalism will cause some members to foam at the mouth and reach for their keyboards to issue scathing and highly critical replies. ;-)

>officers, public utility trouble-truck mechanics, CBers, ad nauseum.

I think you are aware, of course, that anecdotal evidence doesn't tell you
a whole lot, particularly in a situation where the disparity in numbers is
so huge. There are, what, 70,000,000 active cell phone users in the U.S.
(we know they're active because someone pays the bill every month) compared
to less than 700,000 licensed amateurs of which some unknown fraction is
really active (there is not much incentive to let your license lapse even
if you don't use it). Given this, it goes without saying that you are far
more likely to see a cell phone user driving down the road like a drunkard
than an amateur radio operator, just as you are more likely to see a cell
phone user brushing his teeth while driving to work, or having sex in the
parking lot down the street, or going to church on Sunday. The fact that
you might often see cell phone users, but seldom amater radio operators, doing
any of these things in no way suggests that there is a correlation between
cell phone use, but not amateur radio operation, and any of these things, it
may just mean that there are more cell phone users than amateur radio operators.
You need to do rigorous studies on large samples to prove correlations, and while
some studies have suggested a correlation between cell phone use and inattentive
driving, you should not take comfort in the fact that no similar studies
have been done for amateur radio operation at all as an assurance that you

won't get painted by the same brush. The activities are, after all, very similar in form and function.

>Cometh the question of stats: Comes a fender bender or worse and who really
>knows if either party was using a cellphone?? If I got into a fendercrunch I
>sure as hell wouldn't admit I was yakking on a cellphone at the time. The
>accident rate as it relates to cellphone use is probably an order of magnitude
>bogus.

The best accident analysis done so far, in Toronto, was conducted by looking at the cell phone call records of drivers involved in accidents to discover if they where on the phone at the time. This study is additionally unique in that they were also able to find evidence that it made no difference whether regular or hands-free phones were being used. This result actually matches well with the findings of a number of human factors studies, but since the broadcast-radio-in-car tempest in the early '50s no one really trusts human factors studies.

The fact is, however, that there is still not enough data available to determine just what it is that cell phone use does to drivers with any degree of certainty (there is no data at all about mobile amateur radio operation), so law makers who pass laws are really guessing at the reason the law is needed. If you are depending on politicians making guesses that justify excluding amateur radio operation you may be disappointed, particularly when all those drivers who are cranky because of cell phone addiction withdrawal begin to notice the microphone you have stuck to your mouth and complain to said politicians about that.

>No, this is not something the ARRL should "officially" get into for two reasons.
>First, mobiling hams are not even a tiny pimple on map of underway two way
>radio spectrum users and secondly ARRL VP wt3p is all over the matter on her
>own.

But you still need to worry about the similarity between the tiny pimple and a huge boil being used to conclude that the same medicine should be applied to both. I'd personally prefer that they didn't remove any freedom until they were really sure why they were doing it (just on principle, I personally usually turn the phone off when I'm driving), but just about everyone has seen a cell phone user driving like an idiot so the popular perception that there is a correlation between the two behaviours is driving this.

The attached article seems like racist paranoia. First off the
figures given assume that all humans who are not 100% white are not
white at all. I'll bet that the figures might also include some ethnic
groups that would have been considered "non-white" by various anti-
humanists, who do not usually classify races very scientifically. For
example; I believe that the California figures assume that all Latinos
are not white. I can not go along with that concept because it is
technically erronious.
As communication, transportation and education improve, making the
world smaller, it is foolish to believe that separation of the races
will remain the norm of the future.
If the 100% non-white races do prevail, we can only attribute it to
scientific evolution...or as Darwin professed..."Survival of the
Fitist". I hate to say it, but if white folks want to survive, they
had better stop their wives from getting educated, having careers
outside the home and opting for abortions...and maybe white folks had
better learn to run faster, jump higher and dance a bit sexier too.

Don't just say "no"...Do something reproductive!...Be fruitful and
multiply! Passing around the below message can only arouse foolish
hate in racist paranoids...but taking the responsibility of raising a
family of the race of your choice can be the only way to do anything of
a positive nature.

There is hope...because gentlemen prefer blondes.

Ask not which race will survive...Ask if the human race will survive
racial inhumanity.

Bob Wex, (White, but an equal opportunist.)

1==> Doubt if it is that easy to "fix" actually. Glazed ceramic
insulators would be pretty good when newly installed, but get coated
with dust, various salts from various sources, pollution, develop
micro-cracks in glazing, etc. All these provide high voltage leakage
paths to earth from miles of wiring which makes an excellent radiator.

In Australia, primary transmission is usually 330 kilovolts [kV] or
330,000 volts. Secondary transmission lines are usually from 132 kV
to 66 kV, and high voltage distribution lines from 33 kV to 11 kV.

So it doesn't take much leakage somewhere to produce a fair bit of
broadband interference, but for most people this isn't a problem.

2==> The first main problem with "fixing" leaky insulators is to find
the faulty one, which isn't that easy unless there is enough leakage
to cause a visible discharge. If caused by accumulation of dust and
salts, possibly only a problem in high humidity conditions. Enough
wind driven rain can wash surface contamination off, temporarily
clearing the condition.

3==> The second & third problems is that even if did find it would
usually involve closing down the line to replace it which would
usually involve a fair number of service interruptions and greatly

increased line maintenance costs.

4==> The fourth problem is that although only a tiny proportion of customers are bothered by interference, most are bothered by increases in costs of electrical power. Would the majority of users be willing to pay, say, twice as much for their electrical power just to reduce or eliminate interference that only bothers a small percentage of users? Very doubtful.

5==> Then too, insulators aren't the only problems. Line fuses, cable clamps, etc. can become corroded, causing minor sparking. Again, at voltages involved, enough to cause interference, and again difficult to find.

There are often problems on customer premises that radiate interference back on to the supply lines. TV, microwave ovens, welders, various sorts of industrial & medical equipment, etc.

6==> Basically, it all comes down to cost effectiveness. I suppose it would be possible to produce a PTFE ["Teflon"] coated insulator which would be far superior to a glazed insulator, as nothing sticks to PTFE. However, the cost of such insulators would be much higher than glazed insulators, and the cost of replacing all the glazed insulators on a system with PTFE coated ones would be very high.

Placing all power lines underground would probably help a lot as well, but this isn't a cheap solution either.

7==> A minor warning: Suggesting any sort of government regulation of private enterprise for any purpose on misc.survivalism will cause some members to foam at the mouth and reach for their keyboards to issue scathing and highly critical replies. ;-)

One didn't need PC's for remote control of irrigation pumps, mate.
Are talking about simple tone control, and well within the technology
of the time, although not as easy to implement as it is today.

However, if you would like to challenge me on this issue, think that
could probably dig up some information on how tone control circuits
were available even before CB was available, or was here at least.

No need for even the technology of pocket calculators, let alone PC's.
:-)

AFIK, "tone keys" have been legal for a long time, at least on
commercial 2 way equipment, were legal on amateur equipment, and
possibly even on CB gear.

However, permission for "selectacall" operation doesn't mean that
could use code for messages.

4 sale a HENRY 2002A 2 METER AMPLFIER uses a 3CX800A7 tube, in excellent condition. I am the original owner. This amplifier was made custom for me. I used to work at Henry Radio in amateur sales for 9 years. The amplifier was made with a separate RF deck, and a separate power supply to fit into a small space in my ham shack. Works GREAT $1100.00 plus boxing, and shipping....

1704. Chess match between Jeff and OBrian; loser to leave for 1 year

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-01 05:14:53 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <8r6h8d$b2h$1@news.hawaii.edu>
Source record: 102399

In article <39D5C60C.C3683BBE@bellsouth.net>, <w4amp@bellsouth.net> wrote:
>I find him to be an anal retentive net cop with absolutely no life
>whatsoever.

No life, as I sit here in a 10th floor ocean-front condo watching a
beautiful sunset! (If you're ever in the islands, I'll invite you up
for a beer so you can see the place for yourself.)

>His posting is obsessive compulsive, and mostly negative. He is
>a pathetic little geek with no control in his life, who desperately begs
>for control here.

Whatever.

Let's have a little fun, OBrian. I challenge you and your mental
abilities to an online chess match right here on .misc. Let's put
your frustrations to work on a chess board and see if you can do
something else besides harass people. You can be White, which means
you'll make the first move.

Now go get a chess board (a $5 model will be fine), read the
instructions, and encode your board as follows:

```
_______________________
8 |__|__|__|__|__|__|__|__|
7 |__|__|__|__|__|__|__|__|
6 |__|__|__|__|__|__|__|__|
5 |__|__|__|__|__|__|__|__|
4 |__|__|__|__|__|__|__|__|
3 |__|__|__|__|__|__|__|__|
2 |__|__|__|__|__|__|__|__|
1 |__|__|__|__|__|__|__|__|

a b c d e f g h
```

Note that the board is oriented so that a1 and h8 are black squares.

The white-colored pieces ("White") will always begin a game in rows 1 and
2, while the black-colored pieces ("Black") are initially set up in rows 7
and 8.

If you're unfamiliar with the game, I can provide enough lessons to get
you going. To make the match more interesting, the loser will leave this
newsgroup for one year. Are you up to the challenge?

73, Jeff KH6O

I think he was talking about radio users in general, Dennis. That would include police, fire, ambulance, tow trucks, taxi, delivery drivers, truckers, CB'ers, ham operators, and anyone else that might use a radio with microphone. Therefore, the numbers are not that different.

But we're not just talking about anecdotal evidence here - check around the web for both private and government studies that show a clear link between cell phones and accidents. Of course, we just had this (radio versus cell phone) debate in this newsgroup about a month ago (where all this was covered fully), so I'll back out of this one from this point on.

Do you mean the Military Engineers' Association of Canada? Yes they
are a bastion of paleontology for sure. Come on. So what was tested?
The shell? The actual flesh of the mussel? What lab did they use?
How many mussels were tested? How many produced this result?

Hello Keith,
Many have taken it upon themselves and totally outside of my control to perpetuate some of the threads that are related to www.ab7sl.com .
Occasionally some of them merit a response from me. More often though I let them go with no response. I believe if you examine the threads you'll see this is the case.

Thanks for posting. 73 / DX

1721. www.ab7sl.com - 1 YEAR OLD !!

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-02 00:00:00 UTC
From: Charles <charles@ab7sl.com>
Message-ID: <8ratv9$782$1@nnrp2.phx.gblx.net>

Greetings to all,

As of October 5 ,2000 www.ab7sl.com will have been on the web for a full year. This is a real milestone in the site's existence. www.ab7sl.com started out this time last year with 0 (zero) visitors and now has almost 16,500 visitors on the counter. The average visitor count per day is now at 55 visitors daily . There are nearly 100 entries in the guestbook now and several dozen user-added links on the Free-for-all-Links Page.

Many features have been added since the basic site went up last year. One of the most popular is The DX Page with the active and clickable DX Cluster Telnet links. I have received a lot of positive feedback on that. Another recent feature is the addition of the AB7SL Monthly DX Online Logbook. This page receives several updates - each day - depending on my activity and band conditions. It lists chronologically all the DX stations I have worked for the current month.

The most recently added page is the 3D-Art Gallery which showcases 3D art I have created with Bryce 3D graphics application. Besides the thumbnail for each image there are two popular resolutions available for download that can be used as desktop wallpaper.

www.ab7sl.com has grown tremendously over it's first year and I look forward to sustained and increased growth over the years to come. Thank you all for making www.ab7sl.com a great success for me and all it's users.

73 / DX

>Bullshit, Herman.

Easy there, Hans. No need to burst an artery. This is all supposed
to be in fun.

As I said before, it amounts to voice recognition and point of view:
If I personally knew ZZ1ZZZ and heard someone else using that call,
I'd know for certain that the user was a pirate. And from my point
of view, anyone in QSO with him would be working an unlicensed
operator.

Now go eat some prunes to loosen up a bit.

This, besides being meaningless, doesn't answer the question put forth to you.
What part of the statement do you disagree with?
"Are YOU the judge and jury?

Do YOU have enforcement power to enforce Federal Rule and Regulations
granted by Congress?"

These are the questions being asked. An inability or unwillingness to answer
would seem to me to be an admission of guilt.

Now, where have I heard that before??? Oh, yeah!!!

"It doesn't dawn on this depraved bourgeois world that this is positively a sin against all reason; that it is criminal lunacy to keep on drilling a born half-ape until people think they have made a lawyer out of him, while millions of members of the highest culture-race must remain in entirely unworthy positions; that it is a sin against the will of the Eternal Creator if His most gifted beings by the hundreds and hundreds of thousands are allowed to degenerate in the present proletarian morass, while Hottentots and Zulu Kaffirs are trained for intellectual professions." - Adolf Hitler (Mein Kampf)

My, see what exalted company you're in!

If I were ARRL president, I would respond to Mr. Joly that the ARRL will not be coerced into choosing politics that have nothing to do with radio. Both Lambda and the Boy Scouts would be welcome to advertise in QST. The ARRL should remain silent.

The sig line is a parody of another guys in another NG. He often comes up with the dumbest sig files and I redo them which prompts him to change it. I usually try to delete it before sending to other NGs but sometimes I forget. I do use spell checker and welcome replies.

I hear the KKK is very short on Black members. I think some action should be taken here.

So, what you're saying is that we should buy them everything they want, or give them high paying jobs so they can buy it themselves, so they won't break the law. Sounds good. I think I'll go join a gang so you will buy me everything I want. Or, I'll even stay away from the gang if you give me Bill Gates' job.

Look man, thats silly. These people can do what everyone else does - find a job and earn the money. In other words, they already have no excuse for their gang existance.

> If you try to eliminate them using evil means like the
> Rampart division of the LAPD did then you will just
> make the situation worse.

If these bums choose the easy way out (crime), than we need solid law enforcement to throw them in jail. Now, I'm not advocating police abuse, but I'm also not advocating that the police kiss the butts of criminals either. Abuse should be prosecuted, but I'm not willing to paint hundreds of officers as bad simply because a few abuse.

> I say fight crime by creating an environment that is
> truly just society.

Does that "just society" apply to everyone, including the victims of these gangs? For them, a "just society" is one that makes criminals pay for their bad deeds. Or are you just concerned with being nice to the criminals in gangs?

The repeater owners in the area can all go to court and obtain
a restraining order to prevent abuse and use of their property.
If they violate the restraining order the repeater owners can
have a fine levied plus receive all court cost.
Continued contempt of court would mean a nice jail term for the
two violators. There is more then one way to skin a cat.

> Nothing wrong with trying to help these guys out in not wasting their time and $$$ in working and trying to QSL a pirate station. I also properly identified myself. Now...who is the frequency cop?

Yes, you DID identify...good for you.

And yes, there is something wrong with your conduct, regardless of your motives. FCC regulations and DXCC rules are very clear. It is both ILLEGAL and unsportsmanlike to wilfully interfer in the otherwise lawful operation of other Amatuer Radio Service communications.

It's NOT up to YOU to determine what is valid and what is not.

As for being a frequency cop, YOU are. That wasn't ME trying to force myself on the pileup, it was you. It was YOU heckling the pile-up.

I think a recording of your behaviour would be of interest at the DXCC desk. This type of conduct is defintely frowned upon by those who encourage sportsmanlike conduct and adherence to rules.

You are NOT the type of operator that is (supposedly) exemplified by DXCC rules.

Carry on, Charles. You are your own worst enemy. The REAL problem is that it's people like YOU who act the way YOU do on the air that give Hams in general and DXers in particular a bad name.

Well, gosh John, for someone of your vast experience, one would
think that you would qualify this a bit. Some satelite reception
is done with basic analog recievers, capable of recieving from 144
up, which is well in the capablity of any current vhf scanning
reciever, and would not require any mods of the same.

Exactly what are you talking about?

Sadly, if Congress acts in the typical manner, they will exempt the federal government in that new bill. So there may be no effect on the ULS, Jeffrey. We'll have to see if that exemption extends to state government (in other words, your drivers license).

> work him will knowingly be in QSO with an unlicensed operator.

Bullshit, Herman.

AB7SL is not a licensing authority for "3W" so he has no authorative
knowledge of the fellows license status. He is simply QRM, like all
the other "frequency cops" who show up for every DX pileup. Lower
than whaleshit in other words.

Whether or not the law is rigorously enforced doesn't change the
fact that FCC regs require a suitable license for use, and
possession presumes use. Possession is illegal.

The argument that it's only illegal if you're caught is not
likely to be an effective defense.

1748. Lambda Amateur Radio Club vs. ARRL & BSA

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-02 00:00:00 UTC
From: Jon Pearl W4ABC <w4abc@gte.net>
Message-ID: <V21C5.1214$k14.79635@dfiatx1-snr1.gtei.net>
Source record: 102296
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

As gleaned from the pages of: http://news.repeater.net/index.php

The Lambda Amateur Radio Club wants the American Radio Relay League to sever ties with the Boy Scouts of America. This, over what Lambda says is the scouts policy of discriminating against gays. The Lambda Amateur Radio Club is an organization comprised prime of gay and lesbian radio amateurs. In an open letter from its President Art Joly, N1RPN, to League President Jim Haynie, W5JBP, Lambda requests that the ARRL officially and publicly distance itself from the Boy Scouts of America because of the organizations policy to dismiss and exclude gay scouts and scoutmasters. As of airtime neither Haynie or any League spokesman has issued a public reply to the Lambda request.

You can leave your comments on that above captioned discussion board.

From: Randy Krenz <randykrenz@erols.com>
Message-ID: <970501439.554339972@news.erols.com>
Source record: 102297

The Columbia Amateur Radio Association (CARA) presents the 24th annual
Howard County Hamfest. Come join the fun! Bring the family! Lots of amateur
radio gear, computers, electronics, and dealers!

Amateur exams will be given at no charge.

40,000 square feet of indoor display area. Inclement weather is not a problem!
Large outdoor and indoor tailgating area. Great food and refreshments on-site!

Where: Howard County Fairgrounds on Route 144 in West Friendship Maryland.
Take I-70 to MD 32 south to Route 144 west. The fairgrounds are one
block west of the 32/144 intersection.

When: Sunday October 8, 2000 (8AM to 3:30PM, vendors enter 6AM)

Talk-In: 147.135/R+ (No CTCSS required on the day of the Hamfest)

Admission: $5 per person (children under 12 FREE)
Tailgating: $10 per space
Tables: $20 (1-4), $18 (5 or more)
(Tailgate/Table prices include admission)

Tables may be reserved in advance by:
1. using our on-line registration system by following the link
at http://www.qsl.net/cara
2. emailing John King (kb3wk@arrl.net)
3. calling John King (410)465-6324 (evenings, voicemail available)

For more information, please write to:

CARA Hamfest Committee
P.O. Box 911
Columbia, MD 21044

or send email correspondence to: cara@qsl.net

or call Randy Krenz at (410)750-0379

> transmitters, therefore not their problem.

In the States, Part 15 of the FCC regulations does place restrictions on devices that, while not designed to transmit radio signals, do incidentially radiate. The regulations are sporadically enforced.

Two good examples: Computers, which must be qualified either for residential (less radiation) use or commercial use. The Commission has been known to prosecute the import & sale of unqualified computers. But an awful lot have gotten through & been sold. And, cable TV systems, which are required to keep their signals in the cable. Systems have been required to suspend operation when excessive leakage has interfered with other services - usually aircraft communications, but in at least one instance amateurs. Actually, these are much better about compliance (I suppose they don't want to risk the nightmare of being blamed for an airplane crash!) though they have defacto reallocated 145.25mHz out of the amateur service...

Anyway, incidential radiators *are* theoretically the FCC's problem. It's just that they don't assign them a very high priority.

I am not advocating sympaty for gangs. They break not just civil law
but the laws of God.

What I am saying is to eliminate them we need to give them no excuse
for their existance. If we were to create a just environment in the
cities then gang activity would decrease. It has decreased every time
unemployment decreases.

If you try to eliminate them using evil means like the Rampart division
of the LAPD did then you will just make the situation worse.

I say fight crime by creating an environment that is truly just society.

Hello Hans,
The Daily DX had the day before confirmed 3W1A was a pirate. Also the QSL manager that 3W1A was using also had been quoted as saying he did not know 3W1A. So I - DID - have authoritative reference for declaring 3W1A a pirate. It had already been determined to be so in the DX community and since I keep myself up-to-date I was aware of this consensus.

Evidently you were not. Thanks for posting. 73 / DX

Hello Steven,
You are entitled to your opinion but please don't start speaking for the FCC. They have already made their position very clear it is impossible to QRM a pirate station. IMHO I was certainly not heckling the pileup. I was giving them up-to-date info they obviously did not have or they would not be wasting their time and $$$ in working and QSL'ing a slim. Thanks for posting 73 / DX

Should ARRL also sever ties with RAC because of Ottawa discriminates
against French minorities, or server ties with WIA because there has
been discrimination against aboriginals, or sever ties with HV4NAC
because the Vatican won't appoint a Jewish Pope?

Gimme a break!

ARRL should not meddle in the internal policies of any other
organization -- ARRL is about radio, not gender preferences.

Absolutely! There have been recent discoveries of a great flood event in the Black Sea off the coast of Turkey. It would seem that there was land where the Bosporus and Dardenels separates the Balck Sea from the Mediteranian. Several thousand years ago the black sea was a much smaller lake that was below sea level. In a catastophic event the land that was holding back the Mediteranian gave way and the lake valley was flooded.

Archaelogists have discovered intact human settlements in the Black Sea at a depth of over 300 feet. Because there is no oxygen in the water at that depth the buildings are intact and they are hoping to find human remains.

Truly exciting!

Sorry "Charles"

You do not have the right!

You are not the judge and jury!

You do not have enforcement power, only the FCC has this power in this
country!

Ever hear the phrase "Work First, Worry Later".

Hello Steven,

Not that your opinion matters to me but I do take exception when I am misquoted. Just for the record I did not call anyone foolish or stupid during the 3W1A pileup.

You evidently are making that up to bolster your flimsy allegations. I think it's time I put you in the kill file. " plonk "

Thank you for posting. 73 / DX

First off, in the general case, even Bernie isn't perfect and could
make a mistake.

Secondly, given your known propensity for anti-social behavior, that
is your repeated postings, I could easily conceive of your doing other
ant-social acts, like deliberatley telling a lie on the air. You
might even do it when you're not in complete control of yourself due to
your mental illness.

Thirdly, even if your record were totally clean, what's the guarantee
that the person using your call is you? I could again easily conceive
of someone intentionally using your call or Herman's call on the air
to make you look even worse than you already are, and perhaps bring
the FCC down on you.

Hans has got the right of it here. Only the licensing authority for 3W is authorative on this, and even they can make mistakes.

HAMFEST/COMPUTERFEST CALENDAR 2000 - ILLINOIS
last updated August 15, 2000

o Please report additions or changes to Bob Parnass, AJ9S, office phone: (630)979-5414, electronic mail: parnass@bell-labs.com. Thanks to Dennis Dale, Rick D. Wilson, John Wass KA9QJX, Tom Harker, and ARRL for providing some of the information.

OCTOBER 2000

Oct 1 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Oct 8 (Sun): Cedarville, IL - Stephenson County Repeater Association amateur radio and computer hamfest. Jane Addams Community Center 430 W. Washington St., Cedarville IL. 8:00am-2:00pm. Admission $4.00. No advance ticket sales. Indoor table cost $9.00 for one, $5.00 per each additional. Tailgaters $4.00 same as admission, limited space available. Talk in 147.390. VE testing, times to be determined. For table reservations: coordinator Ruben Dowman KB9OLF (815) 563-9020, email: drads115@aol.com or Mel Welch (815) 563-4377 or Russ Love (815) 563-4921.

Oct 14 (Sat): Grayslake, IL - Computer Country Expo (see below). Lake County Fairgrounds Exhibit Hall, Rt. 120 (Belvidere Rd.) & Rt. 45. 4 miles west of I94. Admission $6, or $5 with discount coupon available at WebSite.

Oct 15 (Sun): Orland Park, IL - Giant Computer Show & Sale (see below). Orland Park Civic Center, 147th St. & Lagrange Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Oct 22 (Sun): Glen Ellyn, IL - Computer Central Show (see below). College of Dupage. Corner of Park Blvd. & College Rd. 9:30 AM - 3 PM. Admission $6, children $2.

NOVEMBER 2000

Nov 5 (Sun): Davenport, IA - Davenport Radio Club. Iowa National Guard Hanger, Mt. Joy Airport. Talk-in 146.88 MHz repeater. http://www.gwltd.com/hamfest

Nov 11 (Sat): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Nov 12 (Sun): Orland Park, IL - Giant Computer Show & Sale (see below). Orland Park Civic Center, 147th St. & Lagrange Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Nov 18 (Sat): Grayslake, IL - Computer Country Expo (see below). Lake County Fairgrounds Exhibit Hall, Rt. 120 (Belvidere Rd.) & Rt. 45. 4 miles west of I94. Admission $6, or $5 with discount coupon available at WebSite.

Nov 18, 19 (Sat, Sun): Ft. Wayne, IN Fort Wayne Hamfest & Computer Expo. Allen County Amateur Radio Technical Society. 2000 Indiana ARRL State Convention. Allen County War Memorial Coliseum Exposition Center. Hours 9 AM - 4 PM EST Sat, 9 AM - 3 PM EST Sun. Admission $5 plus $2 parking. http://www.acarts.com

Nov 26 (Sun): Glen Ellyn, IL - Computer Central Show (see below). College of Dupage. Corner of Park Blvd. & College Rd. 9:30 AM - 3 PM. Admission $6, children $2.

DECEMBER 2000

Dec 3 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Dec 16 (Sat): Grayslake, IL - Computer Country Expo (see below). Lake County Fairgrounds Exhibit Hall, Rt. 120 (Belvidere Rd.) & Rt. 45. 4 miles west of I94. Admission $6, or $5 with discount coupon available at WebSite.

Dec 17 (Sun): Orland Park, IL - Giant Computer Show & Sale (see below). Orland Park Civic Center, 147th St. & Lagrange Rd. 9:30 AM - 3 PM. Adults $6, children $2.

COMPUTER SHOW NOTES

Computer Central computer shows are held at the College of DuPage, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 847-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm. See http://www.computercentralshows.com web site.

Giant Computer shows are held by Micro Media, Inc. Shows are usually held at the Orland Park Civic Center, 147th St. & LaGrange Rd., Orland Park, IL or at the DuPage County Fairgrounds, County Farm & Manchester Rds., Wheaton, IL. Admission is $6. Show hours are 9:30 AM - 3 PM. To get on the mailing list or get more information, call (708)974-3123. See http://www.giantcomputershow.com

Computer Country Expo is Lake County's largest computer
expo. The event is held on designated Saturdays from 9:30
AM to 3:00 PM. This show features computers, supplies,
games, parts, software, accessories, CD-ROM, monitors,
diskettes, printers, keyboards, modems, disk drives, cables,
expansion boards, services, etc. Lake County Fairgrounds,
Route 120 (Belvidere Rd.) & Route 45, in Main Exhibit Hall
Building #1=9720,000 sq. feet. For a show map, exhibitor
info, and discount coupon, visit the web site at
http://www.ccxpo.com.

I didn't disagree. I just wanted to honor someone who's perfect. That
truck at 3am in dense fog in the middle of an oil field had approximately
the same chance of being there as a meteor. And of course, Steve is too
perfect to ever be hit by a meteor.

SNIP

So you do you admit that you have NEVER been thru the NAVY NPSAC/APG
program or directly witnessed it and are basing your statments only on your
personal research & understanding of what others have said or wrote?

Obviously, your knowledge on the subject would be VERY limited
& based on heresay!

> John, first off, your liar by default thing is a joke, and widely

Perhaps by YOU!

> However, understanding that your level of training and experience
> in Navy matter is sorely lacking, I will give you some web pages

I have completed the Navy Basic Training. That's a lot more than YOU
& most others!

Actually, NPSAC is only ONE PART of FOUR PHASES of the
required APG training. Blake, please read the qoute below from
the web page YOU mentioned!

> "NPSAC WILL BE ONE OF FOUR PHASES OF TRAINING DESIGNED TO
> MEET TITLE 10 STATUTORY AND SECNAV POLICY REQUIREMENTS."

> > I STRONGLY suspect that you closest you have ever come to Navy duty

Thank you for your honesty, Blake.

What branch of the military were you in & for how long? What rank were you?

> John, you can't even wear your rating!

Wrong, again!

> John, you have never even come close to approaching the level that I
> am at in the Two Way field, and you will most likely never get that
SNIP

Since I have never been an installer like you & I have always been either a Technician, Senior Technician, or Technical Supervisor you are probably correct that I could never have the Installer experience that you have.

> I just recently purchased an Optocom reciever, including Cellular

Voice recognition and point of view. If I personally knew ZZ1ZZZ
and heard someone else using that call, I'd be 100% certain the
person was a pirate. From my point of view, anyone working the
pirate would be working an unlicensed station.

>It's still deliberate QRM, also.

The FCC has responded to the "deliberate QRM" question when
asked if transmitting on top of ten-meter bootleggers could
be considered intentional interference: "It's impossible to
interfere with an unauthorized signal" was the FCC's reply.

09/26/00: Giant Sunspot May Mean Large Magnetic Storms

Scientists say that magnetic fields above the largest sunspot group to appear on the surface of the sun in the past nine years are becoming unstable, and could lead to a coronal mass ejection from the sun within a few days. If this happens, the resulting magnetic storm could be exceptional. Given the right weather conditions, auroral displays could be visible as far south as the Gulf of Mexico.

While disruptions of radio communications, power blackouts and satellite transmission are unlikely, they are always possible during a solar magnetic event.

John, one does not have to actually go through a program in order
to research it, understand it, and be able to expound on it. Did
your recruiter know about it? Yet, he did not go through it!

> > No, you are wrong, and clutching at straws to try to make it

John, first off, your liar by default thing is a joke, and widely
known as such. Secondly, I have provided clear reference to you,
in a manner that a Navy Radioman, or IT person, should rapidly
be able to reference.

However, understanding that your level of training and experience
in Navy matter is sorely lacking, I will give you some web pages
for you to reference. Perhaps, with time and someone taking the
time to guide you, you too will be able to reference a message
by its header.

http://www.navres.navy.mil/navresfor/n7/apgmsg.txt

or

http://www.nera.org/scuttlebutt/

or

http://www.navres.navy.mil/navrsfor/nrn/past/feb00/page3.html

They clearly state this program REPLACES the APG school, and the
standards have changed due to that. That is NOT the same program
rather one they decided did not meet their needs, and they changed
to the NPSC program.

> I STRONGLY suspect that you closest you have ever come to Navy duty

John, you have never even come close to approaching the level that I
am at in the Two Way field, and you will most likely never get that
high. My advice is to keep dreaming.

Now, to drag this on topic, <Notice I changed your malicous subject
to something much nicer, and in line with where I am going with the
message>

I just recently purchased an Optocom reciever, including Cellular
due to what I do for a living, and am very impressed with the
quality of the reciever, as well as the capabilities. We are using
it for remote logging of frequencies, for our nationwide customers
when licensing new sites, and a plethora of other items. <Our
customers foot the bill for us to fly to the remote tower site,
set up the equipment, and then for us to return to the site
later and analyze what is in the log, finding them the best
new frequency for them to license on> We gets lots of
helicopter time that way. What has your personal experience been
with this unit, and is there some other product that your
personal experience would recommend for the same type of use?

Could it BE that you don't even know your own Rate??

Information Systems Technician (IT): Formerly known as Radioman (RM). Naval activities often involve people working at many different locations on land and at sea. ITs operate the radio communications systems that make such complex teamwork possible. ITs operate radio-telephones and radio-teletypes, prepare messages for international and domestic commercial telegraph, and send and receive messages via the Navy system, including satellites and antennas. ITs also are responsible for all computer systems, network administration (including LAN hardware), peripheral operations and systems modifications. Data Processing Technician (DP) rating merged into the RM field in 1997.

There a bill before Congress that will prohibit requiring the use
of a person's SSN for ID. (I will be glad to get it off my driver's
license.) One wonders if this will affect ULS logins.

>>to pay, say, twice as much for their electrical power just to reduce
>>or eliminate interference that only bothers a small percentage of
>>users? Very doubtful.

>Irrelevent, it is mandated by the FCC.

2==> Obviously the FCC doesn't agree with you. :-) ...And are you even sure that your FCC is required to do anything about it? From memory, have seen something about this problem somewhere several years ago. Don't remember if the article was reprinted from a US source and dealt with your FCC or local and dealt with our equivalent.

In any case, though, the government agency involved pointed out that their job was to minimize interference between users of communication devices, or perhaps more broadly, devices designed to emit RF energy.

Their argument was that power lines, fluorescent light fittings, neon advertising signs, the neighbors welder, etc. were _not_ designed as transmitters, therefore not their problem.

Vehicle ignition systems can cause a lot of interference, especially when owners replace carbon leads from coil to distributor and distributor to plugs with stranded wire high voltage leads thinking it will "improve performance". It won't, but I doubt that there is any law against doing it.

It is possible to almost completely shield vehicle ignition systems, but I don't think that the FCC could force vehicle manufacturers to do it.

3==> However, it would be very easy to find out, wouldn't it? Contact your nearest FCC office, tell them that you think your local power lines are causing you a problem and ask if the power company can be made to fix the problem. See what sort of an answer you get and let us know.

I've heard ops transmit "CQ Germany" or "CQ DX" but have never heard anyone "CQ American Polictics" or "CQ Bass Busters." Would this be an acceptable protocol?

Maybe the internet has me spoiled with all these rooms of specific topics that I can choose from. On radio, the topics seem constrictive. "CQ Contest" is about as limited a conversation as can be imagined, while on the other hand, I am really not interested in using my air time listening to political conditions in Reno, NV.

If I would like to engage someone in a meaningful conversation on the topic "Antigun legislation VS NRA citizen's rights," on the radio, is there an approved method to reach another operator with such interest? A typical CQ contact would probably be as bored with this as I would be with a contact with a contester.

Maybe that is why the internet is such a popular medium. Tell me, how do YOU start a QSO with something that interests you at the moment?

Dwight,

All of society needs to be just. But right now that means cleaning up the mess that has been created in our cities, on Indian reservations, and in Appalachia.

We need to fix what's wrong - the root cause - and stop reacting to just the symptoms of the illness.

Dave

Yes, we learned all about dendrochonology, etc., etc. And we also learned how radiometric dating has been dramatically improved. Different testing methods work best in different situation for different kinds of materials.

Liberal intolerance? New term for me. I'm not even liberal. Funny how
some folks think that every (non-southern) person that doesn't share
their narrow views are liberal.

Why don't you go find some other anonymous internet personality to
bicker at. Perhaps you will find some other poor soul who mistakingly
uses the wrong word in an idea or you might get lucky and find a true
foe to have a good argument with.

Good luck.

I don't think anyone can define what is just but we certainly can see when a situation is not just. My personal opinion is that the Golden Rule is the ultime expression of justice. If we were to truly aply that one concept our world would change dramatically.

So I guess my answer is that we can find the ultimate expression of justice in the heart of all the worlds great religions since they all share the Golden Rule.

Cheers,

Dave

I am looking for an editor to translate schematics and block diagrams
from QST magazine into a descriptive narrative that can be read as part
of QST on cassette for distribution to blind readers. The amount of
work will vary from 16 to 20 hours per month for one year. For further
information please contact me via e-mail.

Who are you to determine what's "wrong" and what "illness" are you talking about?
If you want to volunteer then fine, but keep your beliefs away from me and don't let them effect me.

I thought I was in your killfile?

Anyway - each of us is intertwined in this vast web of life. We cannot detatch ourselves from our fellow man. Humanity is much like the human body in a way. We need both legs to walk, we need both eyes to see. How can I tell my hand to leave me alone and go live somewhere else when I need it to survive.

The illness is greed, corruption, hatred, violence, prejudice, spite, etc. The wrongs are committed every day when parts of humanity abuse other parts of humanity in a suicidal race to see which "race" is the most supperior when in fact what we think of as race is a false idea that has no basis in reality. We are one race - human. We come in many colors, shapes, and sizes but we are all still one organic whole. We are bound by love and united by the recognition of our common humanity. That is light upon light!

Why cling to hate? Is hate so familliar that we fear its loss? Wouldn't it be much better to heed the golden rule and love our fellow man as we would want to be loved?

There is a saying in my faith "Love is a light that dwelleth not in a heart possed by fear." I say give up fear and feel the love that comes from accepting that we can all be different but united.

I would have a hard time putting up a valid defense for a radio licensee who, when notified that his transmissions were interfering with a public safety radio system, did not take any and all immediate measures to alleviate the harmful interference (up to and including QRT) even if his system was "clean".

The definition of "harmful interference" found in international and US communications law (FCC Rules, Part 2) makes no distinction of who is at fault but only deals with degradation or interruption of safety communications.

In California, Section 148 of the Calif. Penal Code deals with interfering with a law enforcement officer in the performance of duty and has been held to cover IX to police communications which continues after notification, withour regard to who was at "fault".

In all the tower space lease agreements which I drafted for local governmental clients, there has always been a clause that in the event of harmful interference any lessees of vault and tower space had to cease operation upon reasonable demand of the agency after a genuine technical investigation of the source and solution, but the affected lessee could require that the agency refer the matter to the FCC for final determination. There recently was a U S Court of Appeals decision that supported this procedure,

However, "in yer face" is not a smart idea when the PD comm tech comes knocking at the door.

Who said anything about hate? If I hate anyone it's the bleeding liberals that try to cram love down
everyone's throat and then hate and bitch at everyone else who doesn't fit their ideal of what love should be.
If I don't like someone, that's my right, be it based on truth or a lie. I don't care, it's still my belief and is what
makes me, me. No one has a right to bitch, and bitch and bitch and insult me for my beliefs. If anything, liberals
are adding to the problem because they demand people be open to races. I say screw them, what if I don't want to be?
This isn't your life, it's mine and I have a right to whatever I want and you can't do or say anything about it.
I don't hate anyone but if I will hate anyone, it's you as you are the one who's trying to make me miserable for having an
opinion apart from yours, which is the biggest load of hypocritical horse shit. As far as detatching myself from fellow man,
you just watch me do it, just because you said I can't. That's my whole point, I feel the need to rebel against your ideals
as you force them on me and think they are standard and ok and should be applied to everyone. Again, screw you and your
ideals.

I accidently deleted the message I got on this NG this morning.....but just a few thoughts about how to have interesting QSOs.

I think the best way is to ask the other person about their families, their jobs, their interests other than ham radio. As I've said before, as a professional musician, I've had the opportunity to travel all over the central United States, and I'm very seldom without a radio to keep my company on those long hours on the road. You'd be suprised at the interesting conversations I've had. Everyone from vets (Animal Drs) to airline pilots to Preachers to School teachers to factory workers to well, the list goes on and on.

I think the best way to have an interesting QSO is to talk about the other person other than ourselves :))))

Can you tell me how I _NEED_ gang members? Why I _NEED_ to have them in my neighborhood? Why I _NEED_ the crime they bring? If this is need, then it is a need I can truly live (and I do mean "live") without.

> The illness is greed, corruption, hatred,
> violence, prejudice, spite, etc.

The illness is the thought that the world owes a person everything - and if the world does not give it, that person has a right to take it. That is the core thought process behind most crimes. And, until people like you stop reenforcing this thought, crime is not going to stop.

> Wouldn't it be much better to heed the
> golden rule and love our fellow
> man as we would want to be loved?

The golder rule says the we should treat others as we would have them treat us (the word "love" is not mentioned). I certainly don't expect gang members to give me anything (it would never happen even if I did expected it), so why should they expect me to give them anything? If I committed a crime, I would expect to be a "guest" of the legal system. And I expect the same for gang members. In other words, I do treat my fellow man as I expect to be treated.

> I don't think anyone can define what is just but we certainly can see
> when a situation is not just. My personal opinion is that the Golden
> Rule is the ultime expression of justice.

Is it? The classic expression of the "Golden Rule" is "do unto
others as you would have them do unto you". If I apply that in
the case of a masochist, some....ummm, interesting results
occur. Even if you don't go to such an extreme case, the Golden
Rule still boils down to the notion that each individual is supposed
to interact with others based on THEIR OWN beliefs about what
is right, or what is desirable. Why should I expect others to WANT
to be treated the same way I do? If you turn it around - treat others
the way they want to be treated - it might get a little more workable,
but THEN you have the problem of having to figure out just what
it is they want.

I'm not claiming to have an answer to any of this - I simply want to
point out that you're painting a pretty simplistic picture in terms of
"just" and "not just". Unfortunately, the world doesn't work quite
as simply as we might like.

> Liberal intolerance? New term for me. I'm not even liberal. Funny how
> some folks think that every (non-southern) person that doesn't share
> their narrow views are liberal.

I'm not basing that claim (of liberal intolerance) on where you live,
or the fact that you don't share my views. I'm basing that on your
specific comments in the reply quoted above ("Are all born again South
Carolina republicans like you?").

That specific comment tells me that you have a problem with religious
people ("born again"), republicans, and people from South Carolina.
Since very few conservative republicans who live in the south would feel
that way, it is fairly certain that you live elsewhere, are not
religious, and are not a republican. And, the fact that you made that
comment a key part of your response, tells me that you are a liberal (as
opposed to others), since only a liberal would see that as something bad
enough to point at.

So, you are a liberal (in spite of what you choose to call yourself).
And you are intolerant. Hince, like I said before, your liberal
intolerance is showing in your comments.

It doesn't work too well when you get to specifics, but it isn't
too bad a rule in general. If you interpret the Golden Rule as
"Don't be a jerk" and follow that you don't do too badly.

>If you turn it around - treat others
>the way they want to be treated - it might get a little more workable,
>but THEN you have the problem of having to figure out just what
>it is they want.

And supplying it. Somehow Jennifer Lopez hasn't grasped the idea
that what I want involves her, a hot tub, some soft music ("John
Tesh plays: Music to Freak By"), and a long weekend.

In case anyone thinks I am being unreasonable, I am *perfectly*
willing to take Selma Hayek instead of Ms. Lopez.

>Unfortunately, the world doesn't work quite
>as simply as we might like.

Yet we still insist on trying simple approaches to solve the
world's problems.

It used to be considered "good operating practice" to avoid topics of high opinion on the air; ie, religion and politics. Times change , of course, but areas as subjective as these do not lend themselves to quiet discussion. Did you read the "pro-code/no-code" debates here in the newsgroups? Lots of compelling arguments from both sides, yet I'd bet not one participant changed his own opinion because of the strength of the other side's argument!

That's funny, I just bought a TM-V7 brand new, and mine does not have any
Part 15 sticker on it...

No, it is based on YOUR limited interpretation with NO assistance
or guidance from knowledgable people.

You have provided nothing but hearsay.

Blake - do you admit that you have NEVER been thru the NAVY NPSAC/APG
program or directly witnessed it and are basing your statments only on your
personal research & understanding of what others have said or wrote?

> Goes back to the old saw, "just enough training to be dangerous"

The above saying sums up YOUR knowledge of Naval issue very well.

> > > "NPSAC WILL BE ONE OF FOUR PHASES OF TRAINING DESIGNED TO
> > > MEET TITLE 10 STATUTORY AND SECNAV POLICY REQUIREMENTS."
>
> That has nothing to do with the fact that the NPSAC school is
> not 20+ years old as you incorrectly stated.

Your above statement clearly indicates that you are not aware of what NPSAC
was more that a year ago. So OBVIOUSLY you are incorrect!

> Nothing but honesty, thats me!

You must be trying something new!

> > What branch of the military were you in & for how long? What rank were
you?
>
> Chuckle.

That's pretty bad when even YOU laugh at your own military duties!

I thought the glass mount antenna would extend above the top of the
vehicle. That would cut down on a lot of the RF inside the vehicle right?
I'm not installing any such antenna but I commonly run 15 to 20 Watts on 2
Meters. Mind you I am not cutting down the idea, just curious.

1867. Short film "Ham Radio" on TCM

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-03 01:27:30 UTC
From: Paul Crissy <pgc@beer.com>
Message-ID: <8rbcm2$1c2$1@news.netmar.com>
Source record: 102208

I wonder if anyone caught the short film, "Ham Radio" that showed on the Turner Classic Movies cable channel today (2 October). It was about a 10-minute film produced by Pete Smith in the early 1940's promoting amateur radio.

Source record: 102212

I purchased a Rigblaster to try my hand at PSK31, and connected the jumpers and wires just the way the website had posted. (I have a Kachina) I get a pwr and a digital light. The PTT switch makes the digital light go away. However, no matter which PSK31 program I try, I cannot get any receive signal. I can test transmit
as well. I haven't gotten an answer back from the rigblaster folks. I tried to set up the receive just like the manual said but I think I am missing something important. Like maybe brains, Any help??
Thank you -

Being "asked" has nothing to do with the law. About a quarter century ago
the dim bulbs finally came to the conclusion that mobile radios never did
trigger a detonator and I haven't seen one of those signs since then.
Those old signs "asked" and had no force of law.
>

I have NEVER seen any part 15 warning on amateur equipment (new or used), nor should there be one since such devices are manufactured for power levels in excess of what part 15 permits (because they're subject to another part - part 97).

If you're not joking, then someone has played a joke on you. For that matter, I'll sell you a can of squelch after the normal amount your radio needs has all leaked out. ;-)

Who cares? Anybody who is concerned about the further ruining of the military, the massive expansion of entitlement programs at the expense of the working class, the selling off of the country's secrets to our enemies, the decimation of our Constitutional rights via liberal re-interpretation, the turning over of command of our military to foreign nations, the furthering of the "New World Order" with the United Nations running the US via their "one world government", the confiscation of private citizens' firearms, the selling off of the airwaves, the increase in taxes of the working class to fund all of the new giveaway programs for the nations' unproductive elements of society, and on and on and on...

Take a good look at the Peoples' Republic of Kalifornia - if Gore wins, the whole nation will soon follow in kind.

I don't really miss the 'old style' QST, but I do miss
the 'old' organization! Once upon a time, the ARRL '~did~
represent the amateur community. That's no longer the case.
The advertisements in QST let me know what's new in the
hobby. Gives me a chance to 'see' what the new equipment
looks like (no place to see anything 'live' in this part of
the country since 'Tuckers' was closed). I miss the style
of a few of the 'old style' QST articles, and I like some
of the 'new' style QST articles too. So... I think I agree
with you.
'Doc

Dear Friend,

Thank you for your time and interest. This email contains the ENTIRE PLAN of how YOU can make $50,000 or more in the next 90 days simply sending email! Seem impossible? Just read on and see how easy this is...

Due to the popularity of this letter on the Internet a major nightly news program recently devoted an entire show to the investigation of the program described below to see if it really can make people money. The show also investigated whether or not the program was legal. Their findings proved that there are absolutely no laws prohibiting the participation in the program. This has helped to show people that this is a simple, harmless and fun way to make some extra money at home. The results have been truly remarkable. So many people are participating that those involved are doing much better than ever before. Since everyone makes more as more people try it out, it's been very exciting. You will understand once you try it yourself!

**********THE ENTIRE PLAN IS HERE BELOW**********

Print This Now For Future Reference

$$$

If you would like to make at least $50,000 in less than 90 days Please read this program...THEN READ IT AGAIN!!!

$$$

THIS IS A LEGITIMATE, LEGAL, MONEY MAKING OPPORTUNITY!!! It does NOT require you to come into contact with people or make or take any phone calls. Just follow the instructions, and you will make money. This simplified e-mail marketing program works perfectly, 100% EVERY TIME! Email is the sales tool of the future. Take advantage of this virtually free method of advertising NOW!!! The longer you wait, the more people will be doing business using email. Get your piece of this action!!!

~~~~~~

Before you delete this program from your in-box, as I almost did, take a little time to read it and REALLY
~~~~~~

THINK ABOUT IT. Get a pencil and figure out what could happen when YOU participate. Figure out the worst possible response and no matter how you calculate it, you will still make a lot of money! You will definitely get back what you invested. Any doubts you have will vanish when your first orders come in.

$$$ IT WORKS $$$

Jody Jacobs Richmond, VA

~~~~~~

HERE'S HOW THIS AMAZING PROGRAM WILL
MAKE YOU THOUSANDS OF DOLLARS $$$$!!!!

This method of raising capital REALLY WORKS 100% EVERYTIME. I am sure that you could use up to $50,000 or more in the next 90 days. Before you say, "BULL..." please read this program carefully. This is not a chain letter, but a perfectly legal money making business.

As with all multi-level businesses, we build our business by recruiting new partners and selling our products. Every state in the USA allows you to recruit new multi-level business partners, and we sell and deliver a product for EVERY dollar received. YOUR ORDERS COME BY MAIL AND ARE FILLED BY E-MAIL, so you are not involved in personal selling. You do it privately in your own home, store or office. This is the EASIEST marketing plan anywhere! It is simply order filling by email!

****

The product is informational and instructional material containing the secrets on how to open the doors to the magic world of E-COMMERCE, the information highway, the wave of the future!

PLAN SUMMARY:
(1) You order the 4 reports listed below ($5 each) which come to you by e-mail.

(2) Save a copy of this entire letter and put your name after Report #1 and move the other names down.

(3) Access Yahoo.com or any of the other major search engines to locate hundreds of bulk email service companies (search for "bulk email") and have them send 25,000 - 50,000 emails for you (amount $49+)

(4) Orders will come to you by postal mail -simply email them the report they ordered.
~~~~~~

Let me ask you - isn't this about as easy as it gets?

****

YOU CAN START TODAY-JUST DO THESE EASY STEPS:

STEP #1: ORDER THE FOUR REPORTS

Order the 4 reports shown on the list below (you can't sell them if you don't order them) For each report, send $5.00 CASH, the NAME & NUMBER OF THE REPORT YOU ARE ORDERING, YOUR E-MAIL ADDRESS, and YOUR NAME AND RETURN ADDRESS (in case of a problem) to the person whose name appears on the list next to the report. MAKE SURE YOUR RETURN ADDRESS IS ON YOUR ENVELOPE IN CASE OF ANY MAIL PROBLEMS!

Within a few days you will receive, by email, each of the 4 reports. Save them on your computer so you can send them to the 1,000's of people who will order them from you.

STEP #2: ADD YOUR MAILING ADDRESS TO THIS LETTER
a. Look below for the listing of the four reports.

b. After you've ordered the 4 reports, delete the name and address under Report #4. This person has made it through the cycle.

c. Move the name and address under REPORT #3 down to REPORT #4.

d. Move the name and address under REPORT #2 down to REPORT #3.

e. Move the name and address under REPORT #1 down to REPORT #2.

f. Insert your name/address in the REPORT #1 position.

STEP #3: Take this entire letter, including the modified list of names, and save it to your computer. Make NO changes to these instructions. Now you are ready to use this entire email to send by email to prospects.

Report #1 will tell you how to download bulk email software and email addresses so you can send it out to thousands of people while you sleep! Remember that 50,000+ new people are joining the Internet every month. Your cost to participate in this is practically nothing surely you can afford $20 and initial bulk

mailing cost. You obviously already have a computer and an Internet connection and email is FREE!

There are two primary methods of building your down-line:

METHOD #1: SENDING BULK EMAIL. Let's say that you decide to start small, just to see how it goes, and we'll assume you and all those involved email out only 2,000 each. Let's also assume that the mailing receives a 0.5 response. The response could be much better. Also, many people will email out hundreds of thousands of programs instead of 2,000(Why stop at 2,000?) But continuing with this example you send out only 2,000 programs. With a 0.5% response, that is only 10 orders for REPORT #1. Those 10 people respond by sending out 2,000 programs each for a total of 20,000. Out of those 0.5% 100 people respond and order REPORT #2. Those 100 mail out 2,000 programs each for a total of 200,000. The 0.5% response to that is 1,000 orders for REPORT #3. Those 1,000 send out 2,000 programs each for a 2,000,000 total. The 0.5% response to that is 10,000 orders for REPORT #4. That's 10,000 $5 bills for you CASH!!!

Your total income in this example is $50 + $500 + $50,000 for a total of $55,550!!!

REMEMBER FRIEND, THIS IS ASSUMING 1,990 out of 2,000 PEOPLE YOU MAIL TO WILL DO ABSOLUTELY NOTHING AND TRASH THIS PROGRAM! DARE TO THINK FOR A MOMENT WHAT WOULD HAPPEN IF EVERYONE, OR HALF SENT OUT 100,000 PROGRAMS INSTEAD OF 2,000. Believe me, many people will do just that, and more!

METHOD #2 - PLACING FREE ADS ON THE INTERNET

Advertising on the Internet is very, very inexpensive, and there are HUNDREDS of FREE places to advertise. Let's say you decide to start small just to see how well it works. Assume your goal is to get ONLY 10 people to participate on your first level. (Placing a lot of FREE ads on the Internet will EASILY get a larger response) Also assume that everyone else in YOUR ORGANIZATION gets only 10 down-line members. Look how this small number accumulates to achieve the STAGGERING results below:

1st level--your first 10 send you $5.......$50

2nd level-10 members from those($5x100)....$500

3rd level-10 members from those($5x1000)...$5,000

4th level-10 members from those($5x10000)..$50,000

$$$$$$$$$THIS TOTALS-------------$55,550 $$$$$$$$$$$$$

AMAZING ISN'T IT? Remember friends, this assumes
that the people who participate only recruit 10
people each. Think for a moment what would happen
if they got 20 people to participate! Most people
get 100's of participants and many will continue
to work this program, sending out programs WITH
YOUR NAME ON THEM for years!

~~~~~~

People are going to get emails about this plan
from you or somebody else and many will work
this plan-the question is-Don't you want your
name to be on the emails they will send out?

DON'T MISS OUT!!!JUST TRY IT ONCE!!!***

SEE WHAT HAPPENS!!!YOU'LL BE AMAZED!!!***

~~~~~~

ALWAYS PROVIDE SAME-DAY SERVICE ON ALL ORDERS!

This will guarantee that the email THEY send out
with YOUR name and address on it will be prompt
because they can't advertise until they receive
the report!

~~~~~~

GET STARTED TODAY: PLACE YOU ORDER FOR
THE FOUR REPORTS!

Notes: ALWAYS SEND $5 CASH(US CURRENCY) FOR
EACH REPORT. CHECK NOT ACCEPTED. Make sure
the cash is concealed by wrapping it in two
sheets of paper. On one of those sheets write:
(a)the number & name of the report you are ordering,
(b)your email address, and
(c)your name & postal address.

REPORT #1 "The Insider's Guide to Advertising for
Free on the Internet!

ORDER REPORT #1 FROM:

GARRY DEAN

309 A HUTTO
~~~~~~

KENAI, AK 99611-7829

REPORT #2: "The Insider's Guide to Sending
Bulk E-mail on the Internet"

ORDER REPORT #2 FROM:

DAVID WEBBER

6307 CALIFORNIA AVE. SW

APT # 1B

SEATTLE, WA 98136

REPORT #3: "The Secrets to Multilevel Marketing
on the Internet"

ORDER REPORT #3 FROM:

KATHY BARROW

410 SYCAMORE ST..

CONWAY, SC 29527

REPORT #4 "How to become a Millionaire
utilizing the Power of Multilevel Marketing
and the Internet"

ORDER REPORT #4 FROM:

PAM BARESSI

3321 WILLIAM JOHNSTON LANE #11

DUMFRIES, VA 22026

*********TIPS FOR SUCCESS*************

TREAT THIS AS YOUR BUSINESS! Be prompt,
professional, and follow directions accurately.
Send for the four reports IMMEDIATELY so you
will have them when the orders start coming in
because: When you receive a $5 order, you MUST
send out the requested product/report. It is
required for this to be a legal business and they
need the reports to send out their letters(with your
name on them!) - ALWAYS PROVIDE SAME-DAY SERVICE
ON THE ORDERS YOU RECEIVE. Be patient and persistent
with this program - If you follow the instructions
exactly-results will follow$$$.

*********YOUR SUCCESS GUIDELINES***************

Follow these guidelines to guarantee your success:
If you don't receive 20 orders for REPORT #1 within

2 weeks continue advertising or sending out emails
until you do. Then, a couple of weeks later you
should receive at least 100 orders for REPORT #2.
If you don't, continue advertising or sending out
emails until you do. Once you have received 100
or more orders for REPORT #2, YOU CAN RELAX,
because the system is already working for you, and
the cash will continue to roll in! THIS IS IMPORTANT
TO REMEMBER: Every time your name is moved down on
the list, you are placed in front of a DIFFERENT
report. You can KEEP TRACK of your PROGRESS by
watching which report people are ordering from you.
To generate more income, simply send another batch
of emails or continue placing ads and start the
whole process again! There is no limit to the
income you will generate from this business!

==========

Under Bill S. 1618TITLE III passed by the 105th US
Congress this letter cannot be considered spam as
long as the sender includes contact information and a
method of removal. This is one time e-mail transmission.
No request for removal is necessary.

Hi Hamish...

You are right, I don't need a weekly reminder about the site as I have it bookmarked. However, there are new people subscribing to this and other newsgroups on a daily basis who may have never seen one of the posts before. I suspect that is the precise reason why the posts show up frequently. I am always on the lookout for good ham sites, and there are many new ones appearing every day. This is one resource for finding out about new sites or existing sites that I wasn't aware of. Therefore the weekly posts (or whatever frequency they are, I don't count them) don't bother me. My cursor keys work well, so I can choose to scroll right on by any post I don't want to bother with. Included in the posts that usually get this treatment are the VERY frequent childish exchanges of insults and name-calling from people who obviously only like to practice their typing skills. This is a ham dx newsgroup...If someone has a site that will point me to a good new source of information about ham/dx, then I look forward to hearing about them. I don't mind repitition once a week... I DO mind 10 posts daily about how once a week is too much though.

73 and gd DX from Canada

There was a guy in my area that actually added a VCO modulator to make
FM, and coupled the L.O. output of his scanner to an antenna, and made a
low power transmitter out of it. He was fine until he started messing
around on the local police repeater, and then the FCC popped him.

> And I have seen super regens that leaged mW to the antenna. Would wipe out

Ah yes, super regen walkie talkies. I always knew when one of them was
sneaking around my house. The noise level would jump up proportionally
as they got closer.

Yes. Your point is well taken. Lets say that "do no harm" is implied in the golden rule. In each faith the golden rule is surrounded by other rules and admonitions on personal conduct that I feel are a good guide for how we should treat each other.

I feel strongly, however, that religious law and civil law should be two distinct things. But if the authors of civil law are able to evaluate the consequences of their actions and "do nor harm" then the world would start to be a better place.

Orb,

I am not forcing anything on you. You are a voice in cyberspace that I do not even know. I have no influence over your life. All I am doing is trying to get you to see that the world should not be a place to fear. That the reality of this world is unity. If you do not want to be a part of it and you keep to yourself I have no problem. But if you preach hate and separation for all I must raise my voice against it.

Do what you need to do. But if you want to come to this public space and preach hate there will always be folks like me who will speak out.

No matter how much you hate me that will not stop me from showing you love.

You don't need what they do, but you do need to show love to all people
and help raise them out of their hell and into a place where they can
be accepted as human. A place where they can turn their swords into
plowshares.

I agree. You are talking about greed. The world owes me nothing. But
we owe each other respect and love. We owe each other the recognition
that we are all in this together.

> > Wouldn't it be much better to heed the

Matthew 5
43-45 "You have heard that it was said, `Love your neighbor and hate your enemy.' But I tell you: Love your enemies and pray for those who persecute you, that you may be sons of your Father in heaven.

Mark 12
29-31 ...`Hear, O Israel, the Lord our God, the Lord is one. Love the Lord your God with all your heart and with all your soul and with all your mind and with all your strength.' The second is this: `Love your neighbor as yourself.' There is no commandment greater than these."

The golden rule is not meant to be twisted into individual comparisons. Treat everyone the way you would want anyone to treat you. Think general, not specific.

1895. Newbie needs advice on new transceiver purchase

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-04 00:00:00 UTC
From: Scott Heinen <heinens@ghsp.com>
Message-ID: <8rfvl8$as8$0@205.138.138.3>
Source record: 102160

Hello everyone,

I got my novice license in 1991 and played with my radio off and on for the next 3 or 4 years. Then my radio broke. It was a cool Drake(not sure which model) that my dad's friend had given to him. I have had no luck fixing it since my expertise is in web application programming, not electronics. Anyway, I've had this neverending itch to get back into the ham radio stuff again, but I think I am gonna need a new tranceiver.

Here is the situation. I live in a suburban-ish area in an apartment complex. That's gonna limit what I can do with my antenna. So I am looking for some advice from you experts on what is a good low-cost most-bang-for-the-buck tranceiver? What other equipment would I need, etc. I don't know if it's realistic or not, but I am hoping for something that would at least allow me to hear outside the US on good days. I clearly remember straining to hear distant hams overseas (on 80, 40, 15, and 10 meters) and desparately trying to CQ them. :) So that's kind of what I was hoping to get.

Thanks in advance for any help anyone can offer!

Scott

You didn't ask me, but I will give you my views on this subject.

This is the rec.radio.amateur.misc newsgroup. Unless Al Gore or G.W. Bush holds an amateur ticket and is using it to campain, I don't see why such messages should show up here.

There are political newsgroups. IT SHOULD BE THERE, NOT HERE.

Now now ...I wouldn't say that.
Don't give up on Ham Radio just because of the present licensing
format....and the present leadership. Ham Radio may still become an
educational technical hobby in the future as it was in the past.

Hams need more license classes and/or technical endorsements.

Bob Wex w2ilp (Increase License Potential)

Today you can go to a gas station and find
the cash regisdter open and the toilets
locked. They must think that toilet
paper is worth more than money.
--Joey Bishop--

Enuf of this toilet humor. Renew your Ham
license and as for toilet paper...flushit!

You are entitled to your own sexually motivated opinions. The subject
was the possibility of preserving the "white race". I dunno if that is
possible...especially if many white gentlemen prefer white gentlemen.
For those who marry female redheads and brunettes, the "white race" may
be capable of survival and eventually the 'good time Charlies" may have
to make do with synthetic peroxide bleached blondes.

We are the sheep in the 23rd Psalm of David, which says that "The Lord is my shepherd". Internet advertisers have become modern "sheep shaggers" because they still have faith in the fact that most of us are sheep. Dot-com prosperity must rely on biblical prophesy.
>
> 2) Date anything in the Bible to the Paleolithic era/age

The Paleolithic era/age must have occured during one of the six days in which G-d created the entire universe and every thing that is or was in it. If it isn't mentioned in the Bible that is probably because the guys who wrote the Bible were not paying attention. We know for sure that it couldn't have occurred on the Sabbath because G-d was resting at that time.
>
> 3) Tell us why such things as "You shall not Murder" has no relevance
in
> today's world.

Because there is no statute of limitations on the Ten Commandments and "Thou shall not kill" is one of them - IMHO the concept of no murder committing still holds...but some may say that all is fair in love and war and if killing some people helps your own clan of people to survive this has no relevence. Surely we can get along by killing fewer people in today's scientific world, when there are better ways to distribute food, clothing, shelter, medicine and green tea than in past centuries. There are also better ways to control population (by the pills and such diversions as TV, the Internet and boring politicians who can serve to dull any sexually motivated reproductive drives in the modern population.)
>
> Of course, you can't.........

Of course nobody can...unless they have faith in their religion. Religious faith and science are two different paths which work with different types of logic. You can not prove or disprove the reality of G-d scientificly...can you?

Neither can you prove or disprove that the faith that some people have
in G-d is real...can you?

Of course, you can't.....

because the concept of a G-d need only be a fantastic dream for it to
survive in the minds of men who want to have faith.
Heck... Scientists have enough trouble trying to disprove the Loch Ness
Monster, UFOs, pyramid clubs, psycic fortune sellers and Hams who claim
to have worked DXCC on six meters.

> 73,

REBEL RADIO wrote:
>This is a HOOT!

If "talking on a radio" is what you think ham radio is all about, then you are sadly, mentally disadvantaged. That kind of thinking mostly comes from 11 meters since that avocation is also disadvantaged.

1. You have ham radio to thank for the music stations you listen to at drive time.

2. It was a ham who sent the first signal across the Atlantic.

3. You can thank the experiments of hams that first made mobile phones possible--along with the engineers at Motorola, Dumont, RCA et al, who were, themselves, likely ham experimenters.

It is NOT about just "jabbering on a radio" that makes ham radio what it is. Have you ever BUILT an AM transmitter, put it on the air, and had the pleasure of seeing your efforts bear fruit? Have you ever seen the plate current of a transmitter suddenly go wild and had a clue as to why? In my case, it was a next door kid who thought it would be funny to slip into my yard and drop one end of my antenna on the ground. I found the problem in a short time. Why? Because ham radio TAUGHT me something about troubleshooting.

Have you ever had the pleasure of paticipating in a world wide net while a pleasure boat was receiving help via ham radio? I have.

Ham radio is recognized as a national resource in time of emergency, and that is one of the reasons it enjoys the amount of radio spectrum it has--even though commercial interests have been trying to grab said spectrum for years with minimum success.

If one is not LEARNING something from ham radio other than beating his gums, then you are right to leave. The attraction of ham radio for me is the process of learning something everyday that I didn't know yesterday, and, indeed, THAT should be the goal of every ham. This is one of the bad results, I feel, of the new question pools for the hobby. People memorize the questions and answers and enter the hobby not knowing any more than they did before the test. If you asked many new hams, "NOW: Can you go out, string a dipole for a certain frequency, prune it to resonance, and go on the air?" No.

The hobby is wide enough, long enough, BROAD enough for everyone willing to seek out particular areas of interest (CW, Phone, RTTY, ASCII, etc) that he can AVOID those he doesn't care for.

As for your disrespect for those "Old Men", you just remember something: Those Old Men you so blatantly disrespect, yes, those pioneers that had to DRAW a circuit, identify the components, and PROVE it would work BE-FORE they got their tickets have already forgotten more than you OR I will EVER know about ham radio. I am 52 Y/O, have been into radio of some sort since I was 9, and spend more time BUILDING something than I do talking! So go play your old golf where you will find just as many "old men" obsessed with their ailments as there are on the radio.

And when you reach 78 years of age--if you are lucky enough to reach that age--you just remember what you said about those "OLD MEN"! Those old men are the ones who went to Europe, the Pacific, and, to Korea in 1950 to preserve the freedoms we all have. They fought on the ground, flew the planes, manned the ships that kept the two H's from enslaving us (Hitler and Hirohito). Their hair was dark, blond, or red. Their reflexes were quick and ready. YOU and I will be there someday (I hope). Who are YOU to judge them? And, finally, when I get stymied by a radio project I can't solve, guess who I go to? Those "old men".

And that's what I think about it!

Lets see, you hold a cellphone up to your ear, and a microphone up to
your mouth. Gee, I think even the cops can tell the difference between
a mouth and an ear. So, yes, they should be able to tell the difference.

No, it is based on YOUR limited interpretation with NO assistance
or guidance from knowledgable people.

You have provided nothing but hearsay.

Blake - do you admit that you have NEVER been thru the NAVY NPSAC/APG
program or directly witnessed it and are basing your statments only on
your
personal research & understanding of what others have said or wrote?

> Goes back to the old saw, "just enough training to be dangerous"

The above saying sums up YOUR knowledge of Naval issue very well.

> > > "NPSAC WILL BE ONE OF FOUR PHASES OF TRAINING DESIGNED TO
> > > MEET TITLE 10 STATUTORY AND SECNAV POLICY REQUIREMENTS."
>
> That has nothing to do with the fact that the NPSAC school is
> not 20+ years old as you incorrectly stated.

Your above statement clearly indicates that you are not aware of what
NPSAC
was more that a year ago. So OBVIOUSLY you are incorrect!

> Nothing but honesty, thats me!

You must be trying something new!

> > What branch of the military were you in & for how long? What rank
were
you?

Yes. During the years I worked the radio room for a MSHP troop there were several times when we'd experience interference to one or the other of our three 42.xx mhz receivers from some ham operating, usually on 40 meter CW from his 6th harmonic. It doesn't take much RF to open the squelch of a sensitive receiver. While we had console mounted squelch controls I'd just open the squelch and copy the CW as noise quieting. When they removed the console squelch controls in an equipment upgrade things got a little more difficult since it was much more difficult to copy the "thumping" that resulted from not being able to open the squelch. Usually it was some local but not always. If the signal was persistant I'd go to the "doghouse" and manually open the squelch, and once I turned on a signal generator to near the UHF repeater frequency involved which remotely relayed the distant 42 mhz signal., and copied the resulting heterodyne. I kept a ham radio callbook in the desk drawer for lookups. Never had a problem with anyone resisting QRTing when advised of the QRM.
Heck, early on they even had to call me a couple times when I was off duty and working CW at home -I only lived a couple blocks away-, before I posted a note at my CW rig to "avoid 7010, 7036 and 7063".

Dick

You might wish to brush up on part 15.
All recievers that use a local oscillator must be part 15.
The LO RF energy is what is restricted.
Often it will be outside of the ham band.
IE, assume a 10.7Mc IF and a receive frequecncy of 146.000
The LO will either be 10.7Mc above (156.70) or 10.7 below (135.300)
Leakage on a low side LO could really cause problems with civil aero
operations.
I do not have the rules with me, put the leakage is spec-ed so as to not carry
very far. As a side issue, you can use a scanner [either scanning HT or
Radio Shack like the Pro34] as a RF generator. You have to figure out if it
is hidg side or low side LO etc, but they can make a dandy calibration source
for those on a budget.
And I have seen super regens that leaged mW to the antenna. Would wipe out
reception for 1/4 mileor more.

Normally what you say would be true, however as device that is
intended to transmit (it IS a Transceiver), it is exempted from most
of part 15. (It is pretty hard to build a transmitter that complies
with the conducted and radiated emissions requirements of part 15).

1922. Ameritron ALS 500M Solid State Mobile Amp - SOLD!

Source record: 102282

I have a Collins KWM-1 transceiver, 516F-1 Collins matching power supply for the KWM-1, original box for the KWM-1, Astatic SSB head desk microphone wired for the KWM-1, comes with the original manual also. I also have the original bill of sale.

This station was bought be me from the ORIGINAL owner he purchased it new in 1958. I also have the matching Collins 312B-2 station console (Rare Item). The KWM-1 was worked on by Wayne W6IRD. If I was to rate this one it would be a 9.6, but remember I am very conservative with my grading.... $3600.00
CCA Very good (cleanest one I have seen)

Please look at the web page below for pictures

If you tried e-mailing me, sorry but the Toronto Freenet was having
problems which are now fixed.

As for the items you can check out the 6 lists at
http://www3.sympatico.ca/metaphors/sale1.htm

A friend has set up a web site for me to sell off a 28 year accumulation
of electronic components including:

Coaxial Power switch,
RF power and other transistors, RF I.C.'s,
Minicircuits mixers, ceramic 455kHz and 460kHz filters,

variable capacitors, both panel mount shaft type and trimmer
variable inductors and coil forms, RF feedthrough and standoff capacitors,

High voltage: VACUUM RELAYS, RECTIFIERS, resistors and capacitors,

Other capacitors including, Photoflash, polypropylenes, tantulums,

Switches, such as foot switches and industrial limit (micro) switches,

Ferrites cores, Transformers and inductors,

Transistors for power audio amplifiers and television deflection,
Super fast (35ns) 1 and 3 amp rectifiers, and lots, lots more.

Do you really believe that???

Who would have even thought we would ever have such debates over code say 20 years ago?

It seems to me that the numbers against code grows each year. It is highly more likely that more people who use to be pro-code walk away a no-code. Certainly verry few no-coders walk away as pro-coders. Each year you see more and more join the oppinion that morse code is dead, has been for a long time.

It is becoming more and more apparent the the code requirement is as comical as sending smoke signals, it's long over due to retire this ancient "tool".

Debates are good, opinions change, perhaps not imediately, but it certainly happens.

You are an interesting lot! Down under if the antenna does not suit the car ... we get a new car. Glass mount Antennas do work just not well! They are in essence a compromise. At 40mhz and above a 1/4 antenna properly installed on the roof will out perform any glass or mag mount.
Get used to the smell of a hot hole saw going through the paint, it grows on you!

Martin Orloski wrote:

That bunch of F*$$)%s took the ARRL to court because the League refused
to publish their add in QST. And now they want to push it one more
step. What difference does it make if you operate ham radio and are a
Q*&&r?

Jason -

I search under your ID & can't find one single on-topic post originated by
you.

Perhaps you should follow your own advice. Given that, I have only the
following
to say to you:

Either start posting on topic, or I will have to start reporting you to your
ISP.
I'm not playing games with you. I will start reporting every single
off-topic
and antagonistic post you make.

1945. GAP antenna question, PLEASE help

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-05 00:00:00 UTC
From: Hayden P Ferdig <pete4www@juno.com>
Message-ID: <20001005.220735.-163387.1.pete4www@juno.com>
Source record: 102046

I have a question. I just bought a GAP TITAN DX antenna and I called GAP asking how to ground the antenna. He told me not to ground the antenna at all. He also told me not to put a lightning arrestor in the feedline, and that I should not ground my transceiver and power supply. The guy I was taking is the man who actually designed the TITAN DX himself. He said that down in Florida (where there is LOTS of lightning) that those who grounded their TITAN DX received many lightning strikes because by grounding the antenna, you are actually raising "ground" to the top of the antenna, and this is attractive to lightning. He said that by not grounding the antenna, the lightning will not be attracted to the antenna as much. The NEXT day I talked to someone else who has installed 4 GAP titans before and he told me the EXACT opposite. This other guy told me to ground my antenna, my rig, my power supply, and to use a lightning arrestor. Could someone else with experience please tell me what you think about this situation because I don't know WHO or WHAT to believe now !!! Thanks,

-Hayden

Lies, and damn lies.
T Paine is credited with "Government, even in it's best state, is a necessary evil: in it's worst state, an intolerable one"

During de -bate # uno, AlGore exampled the little girl in Florida that was in a crowed class room with no sitting appliance.
At that moment when he mentioned it, didnt the hair on the back of your head tingle, and a thought race thru your skull cavity, "Oh boy, here comes another untruth"
Such perfect timing, such appropriate geographical tuning, such blatant "for the kids" crap.
AlGore has these stories for EVERY issue.

Restore honor and integrity to the White House first.
Then, work on the nit noy stuff!

There a about 7 million HAMS in the world, and about as many opinions.

There several classes of radios based on price and features, first decide on what you are looking for and then pick one from that class.

For New radios-
Basic HF radios like the Yaseu FT-840 or the new replacement, ICOM and Kenwood have one also.

General Coverage
These may or may not have 1 or more VHF bands like the Kenwood TS-570, Yaesu FT-847, ICOM IC-746, Ten-Tec Omni VI.

Mobile General Coverage
ICOM IC-706 (MKII)(MK IIG), Yaesu FT-100

Competetion Class
Kenwood TS-940, Yaesu FT 980, 990, 1000

VHF/UHF also have similar features.

READ EVERYTHING, then you decide what you want and can afford.

You people that get your "news" from irresponsible, unaccountable internet sources deserve all the anxiety you get and all the lather you work up over it.

That must be where Tim learned that a sub-committee in congress can pass legislation without further action by the House or the Senate in contravention to the Constitution.

(DISCLAIMER: THE FOLLOWING COMMENT IS NOT INTENDED TO BE IN SUPPORT OR OPPOSITION TO ANY POLITICAL PARTY OR CANDIDATE.)
It is a fact affirmed by Scripture and confirmed by all recorded history that the vast majority of people prefer to believe a pleasant lie over an unpleasant truth, even if they KNOW it's a lie. This assures that in any system where the majority rules, the best liar will win the contest. That's why the U.S. system was established as a constitutional republic with the rule of law rather than a majority-rule democracy. Read Kipling's poem "The Gods of the Copybook Headings" IF you can still find Kipling in today's "democratic" lie-braries!

> Hams need more license classes and/or technical endorsements.

With all due respect for nostalgia (I'm 61 myself) it'll never happen; not because of leadership good or bad, but because technology has moved manufacturing and cutting edge research beyond most individuals' resources. Time was, Hams were building almost all their own gear and pushing the envelope of comm's technology but now integrated circuits require a $million investment to produce the first one, after which they're a penny apiece. Sure, I could build a 1940's technology rig and many do just for fun, but it'll likely cost more for the parts than a new "appliance" rig that's far better. So, why demand that kids learn how to design and build antique gear when 99% of them -and us- will never do that (again)?

No, the future of Amateur Radio, if it has any future at all, lies in providing better personal and recreational communications for enough people to provide the political clout to keep the Ham bands dedicated to that purpose.

Most CBrs are prolly interested in traffic and smokey reports but most of the ones on these NGs are more serious communicators, many doing the same things hams do albiet illegally .. to everybodys loss. That's why I encourage these CBrs to become Hams and Hams to lobby for removing artificial barriers to them doing that. My $0.02

Of course Al Gore never said anything about the millions of dollars that were just spent on that school and all the brand new desks were still in boxes outside of the classroom. Plus they had extra kids in the classroom because he was in there talking. I also liked the one where he said he went to Texas to look at the flood damage back ago and the truth was that he was there for a fund raiser. He has learned from the master of liars. We don't need him in office.

It has been my experience that eBay "allows" both to be listed. The system seems to accept any listing. It is only after someone brings the item to the attention of safeharbor@ebay.com that they take action.

I bought some of these from Stephen as well.

I fine gentleman to do business with, and his products are definately
worth the price.

Highly recommended!

Dan

1966. FS: Motorola Mitrek low band, 4 ch, 110 watt

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-05 00:00:00 UTC
From: "Kirk L. Storey" <kstorey@ix.netcom.com>
Message-ID: <39DCC11A.3FA8E6AA@ix.netcom.com>
Source record: 102128

Hello!
Our Fire Department has recently had a low band Motorola Mitrek donated to us so that we could sell it and raise a little money for the department.
The radio is a 4 channel, 110 watt, 39-50 MHz, with an extender (noise blanker) and is set up for tone squelch.
The info on the data plate is:
FCC Xmtr Data: CC1155
FCC Rcvr Data: RC0214
Model #: T81JJA4900DK
Ser #: 433HJY1476

If you would like to see a few pictures of this radio and accessories, please visit:
http://www.haworthfire.com/mitrek.html

If you have any questions, please feel free to contact me by e-mail or phone (# on website).

Thanks for your interest!
Kirk

Hello all,

Alan G0JNJ has informed me that GB0RBL will be active :-

Friday 6 / 10 / 2000 from 09.30 (local UK)
Monday 9 / 10 / 2000 from 09.30 (local UK)
Tuesday 10 / 10 / 2000 - 19.00 to 22:30 (local UK)
Saturday 14 / 10 / 2000 from 09.30 (local UK)
Sunday 15 / 10 / 2000 from 09.30 (local UK)
Tuesday 17 / 10 / 2000 - 19.00 to 22:30 (local UK)
Saturday 21 / 10 / 2000 from 09.30 (local UK)
Sunday 22 / 10 / 2000 from 09.30 (local UK)
Tuesday 31 / 10 / 2000 - 19.00 to 22:30 (local UK)

Additional operation periods may be possible

Operation will be on Bands from 80M - 10M you will have to
have a look round for him calling as we can not predict which
will be the best band on the day

73 and give a call if you hear him

So do you think it could be any other way with the millions of listings/ Do you not think it is up to the buyer to be wary, even here, and for those bothered by this to report it.

Or do you think this is another thing that the big us government should step into to fix?

If you are only pointing this out and do not feel that way, I apologize, but many do feel that way. They will all vote for Gore! , so he can gore our country.

I bought one for my Icom R2, and it fortunately sacrificed it's life as I sat down in a car with the rig and
antenna in my pocket. (I use a telescopic whip).
It saved the SMA connector from getting ruined.
I've been using my second one now for about 6 months, and it works fine. I even have a third one as a spare in
case
I do something stupid again.

1975. FS: SMA-TO-BNC PROTECTIVE ADAPTER

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-05 01:24:04 UTC
From: gulyas@netzero.net
Message-ID: <8rgl7f$11c$1@nnrp1.deja.com>
Source record: 102088
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment,rec.radio.swap,rec.radio.scanner

If you have a need for an SMA-TO-BNC antenna adapter that is custom made to fit and protect your H.T. or scanner radio, I have the solution.

Adapter allows you to:
Quickly change antennas to base,mobile or different style use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to antenna changes.

Adapter features:
Gold contacts with a teflon insulator.
A low profile design with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio with no spacers needed for moisture and dirt protection.
The base provides an excellent support for any length of antenna or application.
No need to remove adapter once installed to make a quick and safe antenna change.

Sizes to fit radio models:
Yaesu: VX-5, VX-1, VX-10, FT-50-R
Icom: IC-T8A, IC-T81A, IC-Q7A, IC-R2
Kenwood: TH-D7, TH-G71
Alinco: DJ-V5
Standard: C508A, C510A
Radio Shack: HTX-200, HTX-400, HTX-245
Aor: AR-16

Previewed in the May 2000 Issue of CQ Magazine.

$11.95 + $1.50 S+H(One to unlimited)
(Check or money order only in U.S.Funds)
(Specify radio model)

>
Well, you might want to reread part 15.
Receivers and the CPU/Logic section in receivers or transceivers must meet leakage requirements. Type acceptance is dependent on the rx/logic meeting part 15.
And I was wrong when I said superhets.
Any receiver that generates any RF, eihter superhet, regen, super-regen or autodyne must meet part 15. And I think it applies to the IF leakages as well.
I have 2 Icoms. IC-25 and an IC-2AT, ND A UNIDEN mcb-25 [COMMON 3.5Wt 27mc CB] that have part 15 notices on them.
I don't have my regs with me, but CB Tx's, other than the 100mW toys, are not part 15 devices.
I think my Kenwood HF transceiver back home also has a part 15 sticker.
And the sticker is for the Rx and logic not the Tx. Any spurs etc are governed by type acceptance.
Have a good day.

Hmmm....Does this have anything to do with Ham Radio policy? I dunno
for sure and I won't stress any partisan politics here. People are
supposed to be interested in politics because they believe that
presidents, congressmen and even judges of the supreme court must have
power...or why bother making a big deal out of who gets elected or
appointed to these positions??? Politicians of all parties want to be
voted for and make promises to do things...most of which they may have
no power to do and most of which some of them say the government should
not be involved at all. Yep... Many people don't think that the
government should be involved in welfare, medical care, social
security, education, controlling the environment, limiting business
practices, controlling guns and tabacco, collecting information,
controlling political contributions of various types, etc...
unless [maybe] it is seen as beneficial to them personnally.
When I say that HAMS NEED MORE OFFICIAL FCC LICENSE CLASSES and/or
endorsements, some say that HAM EDUCATION can be handled privately
without any official FCC (government) intervention or testing. Who is
right? Do we want to permit Ham Radio testing to be a State or local
school board responsibility?.... An ARRL or W5YI responsibility?...
or a uniform FCC responsibility??? It is debatable.
Some want the FCC (government) to better enforce Ham regulations but
don't think that the government should be involved in more advanced Ham
testing, which others believe is needed in order to enable Hams to be
prepared for the new evolving wireless technologies. How can
regulations be enforced among those who can not properly understand
them? How can we be certain that Hams are prepared for new technology
without evaluating those who claim to be at the highest levels of
reddyness with uniform exams??
Yep... As US citizens, we all must take an interest in politics and
as Hams who post in this NG we must also take an interest in Ham
Policies. The latter belong here...The former may not.

Please keep thinking.

Hams need more FCC license classes and/or endorsements.

Bob Wex w2ilp (Increase License Potential)

Every decent man is ashamed of the government
he lives under.
--H.L. Mencken--

Budists don't sell tobacco, cars, tires, software or oil,
carry guns, pollute the environment, produce violent
or pornographic movies or start wars. Why would
they want to contribute soft money or sleep in the
White House? Has any politician from any party been
able to answer this question?

snip
The VCO is part of most FM radios.
The AFC will accept audio and the receiver will "transmit" on the LO.
Some of the older tube radios make very nice "repeaters". Where we used to
live I could not receive a certain distant FM radio station. But I could
receive it on a ancient tube radio connected to a decent outside antenna.
So I coupled the Rcv audio into the AFC "port".
In the "stock" mode, with no etra antenna off the LO, the transmit range was
only about 50'. But with a 1/4 ground plane the range was extended to about
1000'. And since the radio was "locked" to a commercial station. the "Tx"
stayed right on frequency. I later rigged it to accept an audio signal form
any other source in the "Comm center" [Ham Shack]
I used this up until several years ago when the tube radio died and I found a
"baby monitor" at a good will store for a few bucks. Coupled to a decent high
antenna I could re-broadcast any RF to a scanner and recieve it out to several
1000 feet.
There could be many situations where it would be usefull to re-broadcast
some audio to your common garden variety FM BCB rcvr.
While this clearly violates part 15, and as a ham I should not encourage
anyone to break any radio rules, I have come to the opinion that if the people
charged with enforcment of the rules will not live by them, then screw it,
they applie to none.

First, thanks for the compliment.

Sure, post it. You can easily cover up your Service Number. There's
really nothing else to be concerned about, unless you don't want us
to see your picture. =:o (Oh, what's the color of your card?)

Hmmm....Does this have anything to do with Ham Radio policy? I dunno
for sure and I won't stress any partisan politics here. People are
supposed to be interested in politics because they believe that
presidents, congressmen and even judges of the supreme court must have
power...or why bother making a big deal out of who gets elected or
appointed to these positions??? Politicians of all parties want to be
voted for and make promises to do things...most of which they may have
no power to do and most of which some of them say the government should
not be involved in at all. Yep... Many people don't think that the
government should be involved in welfare, medical care, social
security, education, controlling the environment, limiting business
practices, controlling guns and tabacco, collecting information,
controlling political contributions of various types, etc...
unless [maybe] it is seen as beneficial to them personnally.
When I say that HAMS NEED MORE OFFICIAL FCC LICENSE CLASSES and/or
endorsements, some say that HAM EDUCATION can be handled privately
without any official FCC (government) intervention or testing. Who is
right? Do we want to permit Ham Radio testing to be a State or local
school board responsibility?.... An ARRL or W5YI responsibility?...
or a uniform FCC responsibility??? It is debatable.
Some want the FCC (government) to better enforce Ham regulations but
don't think that the government should be involved in more advanced Ham
testing, which others believe is needed in order to enable Hams to be
prepared for the new evolving wireless technologies. How can
regulations be enforced among those who can not properly understand
them? How can we be certain that Hams are prepared for new technology
without evaluating those who claim to be at the highest levels of
reddyness with uniform exams??
Yep... As US citizens, we all must take an interest in politics and
as Hams who post in this NG we must also take an interest in Ham
Policies. The latter belong here...The former may not.

Please keep thinking.

Hams need more FCC license classes and/or endorsements.

REBEL RADIO <jkiricov@rochester.rr.com> wrote:
>Who would have even thought we would ever have such debates over code
>say 20
>years ago?

The code debate was born in 1922. By then, there were two major categories
of amateurs, phone operators and CW men. That debate has never ended.

>It seems to me that the numbers against code grows each year. It is highly
>more likely that more people who use to be pro-code walk away a no-code.
>Certainly verry few no-coders walk away as pro-coders. Each year you see
>more and more join the oppinion that morse code is dead, has been for a long
>time.

Yet there are still more CW QSOs on HF than any other mode.

Totals for DXpeditions still show many more CW QSOs than any other
mode, too.

>It is becoming more and more apparent the the code requirement is as
>comical
>as sending smoke signals, it's long over due to retire this ancient
>"tool".

Well, that's your opinion. How about a little challenge? You build
a radio from scratch utilizing your favorite mode, and I build one
for CW. Let's see who is the first to get on the air and accumulate,
say, 1000 QSOs.

I find it interesting how eBay will sometimes allow linear amplifiers (which are ALWAYS illegal to use on CB) to be listed in the CB section...yet eBay will never allow cellular-capable scanners to be listed (which are NOT illegal to possess OR sell, provided they were manufactured or imported before April, 1994.)

Anyone else see a double-standard here?

Hmmm....
I live in Suffolk County, NY. It is interesting that in all of the years that Hams have used two way mobile radios nobody in Suffolk County, NY thought of them as probable road hazards. This has not been the case in NJ where there was once legislation to ban mobile Ham operation. The NJ mobile Ham ban was recinded due to the effort of Hams.

To tell the truth, using a Ham HT in a moving car might be just as much a hazard as using a cell phone...unless a hands free VOX and a loud speaker are employed and there is no QSYing in motion. I dunno if the Suffolk mobile cell phone law will be applied to Hams. I would say that it should not if Ham licenses would still require the passing of a

13 wpm CW exam and more theory questions. After all, anyone who can pass such real tests is apt to be more alert to road hazards because he probably has better hearing ability than John Doe public and is also probably able to at least read the road signs while in a QSO. It might also help if the Japanese made the buttons on Ham equipment bigger and if Ham gear was easier to program than VCRs.

Hams need more license classes and/or endorsements.

Should Hams be required to get an instrument rating endorsement to be permitted to transmit on dark roads in bad weather? Why not?

Yep-these minor excursions away from the strict limits of the Amateur Radio HOBBY (like building model airplanes HOBBY, picking belly button lint to stuff pillow cases hobby, amateur golfing HOBBY, Politicking HOBBY, fishing HOBBY, and all the other HOBBY THINGS) do NOT need PRESENTATION ON THIS MISC RADIO FORUM.
Testing a HOBBY?
Yep, that is what we need! That will weed out those that do not want to regiment.
Test the hell out of the HOBBY. That will gain results.
Bottom line - It is just a HOBBY.

"There is hope...because gentlemen prefer blondes."

Seems you were implying that a man is not a gentleman if he does not prefer blondes, that blondes
are more desirable, that only white men are gentlemen, and who knows what else. Was that ment as
a sarcastic remark or a racist remark?

1995. DO WE REALLY NEED ANOTHER PATHOLOGICAL LIAR FOR PRESIDENT?

Source record: 102107

Reprinted from the Internet News Bureau article "Al Gore's 21 Lies"

DO WE REALLY NEED ANOTHER PATHOLOGICAL LIAR FOR PRESIDENT?

FICTION: Al Gore recently claimed that his mother-in-law pays more than $100.00 for the arthritis medicine Lodine; and he claims that his dog takes the same medicine for $37.00, claiming "This is wrong!"

FACT: Gore's aides were quick to apologize for Gore's lie, saying the information was from a Democratic study. Washington newspapers also reported that Al Gore wasn't even sure his mother-in-law was taking any medication and wasn't even sure she had arthritis. And, he doesn't know anything about his dog's "arthritis".

FICTION: Al Gore said his father, a senator, was a champion of civil rights during the 1960's.

FACT: Gore's father voted against the landmark Civil Rights Act of 1964 and was a racist who was fond of using the "N" word.

FICTION: Al Gore said that his sister was the very first person to join the Peace Corps.

FACT: By the time Gore's sister joined the Peace Corps, there were already over 100 members.

FICTION: The same sister died of lung cancer years later and Gore vowed to never accept tobacco money as campaign contributions.

FACT: Just four years later, while campaigning for office, Gore spoke to the tobacco industry and said he was one of them because "I've planted it, raised it, cut it, and dried it." He raised over $100,000 in "reported" contributions.

FICTION: While running for office, Gore's campaign literature claimed he was a "Brilliant Student".

FACT: Washington newspapers said he barely passed Harvard and consistently earned D's and C's.

FICTION: Gore claims an extensive knowledge of law as a result of his extensive study at law school.

FACT: Al Gore dropped out of law school.

FICTION: Gore claimed that his knowledge of God and spirituality came to complete fruition while "finishing" divinity school.

FACT: Al Gore dropped out of divinity school.

FICTION: Al Gore claimed responsibility for inventing the Internet in the 1990's.

FACT : Shocked scientists were quick to speak out, explaining that the Internet had been in widespread use by government and educational institutions since the early 1970's.

FICTION: Al Gore claimed the book "Love Story" was based on his life and Tipper's.

FACT: Author Erich Segal called a press conference to deny his claim. (Couldn't he at least lie about a love story where his sweetheart doesn't die?)

FICTION : Gore claimed that as a reporter for a Nashville newspaper, his stories led to the arrests of numerous corrupt criminals.

FACT: He later apologized for his claim and actually said it was untrue (also known as lying).

FICTION: Gore claims to increase diversity in the staff that follows him daily, especially among blacks.

FACT: Black members of the Secret Service are suing because they claim they are not being promoted to positions guarding the Vice-President.

FICTION: Al Gore said he was the first to discover the Love Canal nuclear accident.

FACT: The incident was already discovered, being investigated, and covered widely in the press for many months before Gore was aware of it.

FICTION: Gore said just recently that if elected president, he would put harsh sanctions on the sleazy producers of Hollywood's extreme sex and violence.

FACT: Just six days later, Gore attended a fundraiser by Hollywood producers and radical gay activists where he told them that he would only pretend to "nudge them" if elected. He raised over $4 million.

FICTION: Al Gore said he built his Tennessee home with his bare hands.

FACT : Totally false.

FICTION: Al Gore says parents should not have a choice between private and public schools because public schools are far better.

TRUTH : Al Gore attended private school and he has sent his children to private schools.

FICTION: Al Gore remembers his mother lulling him to sleep as a baby by singing the popular ditty, "Wear The Union Label".

FACT: The popular ditty was created by the unions when Gore was 27 years old.

FICTION: Al Gore claimed to co-sponsor the McCain-Feingold Campaign Reform Act.

FACT: The Act was not sponsored until he had been out of office for over a year.

FICTION: Al Gore claims to be instrumental in keeping gas prices low.

FACT: Gore has voted on numerous occasions to raise the tax on gasoline. In his book "Earth In The Balance" Gore claims that the nation's Number One enemy is the internal combustion engine. (That's the motor in your vehicle that gets you to work and takes your kids to school)

FICTION: Gore pretends to champion the rights of poor women to be tested regularly for breast cancer with the most modern technology.

FACT: While giving a speech on the subject in September, Gore didn't know what a mammogram was.

FICTION: AL Gore promised Florida's senior citizens that they would finally have low-cost drugs with no interference from government.

FACT: Gore's plan calls for the creation of a huge federal agency that would tell you which doctor you are allowed to see in order to get the "special rates".

FACT: Al Gore told NBC's Lisa Meyers that he had never told a lie. When Meyers pressed harder, "You've never told a lie?!" Gore said, "Not that I know of."

SOUND FAMILIAR?

Al Gore Reasons.

No... Al Bundy... The shoe doesn't fit me...
I admit that using the old cliche "Gentlemen Prefer Blondes" was a
weak attempt at humor. Are there really many "gentlemen" around these
days or were there ever? I dunno. Obviously we may all have our own
preferences when it comes to which types of the members of the opposite
sex may attract us. These preferences may be debated as to
perpetuating either pure races or perpetuating mixtures of the
races.

Another cliche says that, just as in magnetism (where there is attraction between N and S poles)..."Unlikes Attract". We might even be unconciously programed to be attracted to people who are different from us. ...because this is the opposite of incest. We don't want to marry our own sisters, and who knows? - Maybe the gal next door might be a closer relative than we realize! Thus many folks are attracted to members of the opposite sex from other neighborhoods, from the other side of the railroad tracks, from other nations or at least from out of state.
Now-a-days some folks are looking for mates via the Internet. It might be possible to find one that way. In the old days of Ham Radio there were many more men on the air than females...but the statistics say there are now as many females, or maybe even more, than men among those who chat on the internet...With the proper software they can probably change their hair color to any shade that might be preferred.

Please keep thinking.

"Royal"???

Monarchy is indistinguishable from Masturbation.

Wherever you see the word, "Royal", try substituting in your
own mind the word, "Masturbating". I can assure you that you'll
not perceive any difference.

Put it another way....
Income taxes (including all National Insurance "Contributions"
stand at 45%.
You pay in addition 12.5% as VAT.
On fuel you pay something like 75%.

All this tax goes to support your Monarchy and the
various hangers-on on the gravy train.

When you go out to work, you're effectively in slavery until
Thursday lunch-time each week, because it's not till then that you're
earning any money from yourself.

So, are you that in favour of supporting a bunch of eyelid-twitchers
(sorry, winkers) who are parasitising at your expense?

In addition, the British Legion is an organisation to sanitise a
group of people who unashamedly went about killing their
fellow men.

SHAME ON THEM!

Do not ground the antenna.

Place a good lightning arrestor in the feedline where the coax enters
your house, and ground it properly.

Use good grounding at your radio equipment.

Eh, you haven't looked very recently, like in the past 5 or 10 years, have you?

> AND read page after page of ADS..!!!!

First off, I'm *glad* that there are "so many" ads! I mean, the alternative is that fewer and fewer business find amateur radio profitable thus depriving us of services and products (besides Yaecomwood, I mean!). Second, the bulk of the ads are in the back of the book, a few up front and hardly any every appear elsewhere. What do you want, no ads at all?

> ARE THE REVIEWS BIASED???

Not to those who know how to read.

> you bet they are......YOU DON'T THINK THE ARRL WOULD BAD-MOUTH A YEASU
> RADIO...AFTER THEY BUY A FULL PAGE AD DO YOU??????

Why, yes, yes I do, if it deserved it. The fact that they don't may indicate a decent radio. If you read the review of the Elecraft K2, they're pretty positive about them although not uncritically so. Elecraft like the review neverthess less and has a direct link from their website to the article.

> The ARRL is just a publishing house now with little clout....and a
> small staff with poor service... I DID belong when it was a GOOD
> organization...

Well, I'm a life member, have been for 25 years, and the ARRL has been a good organization for all of those 25 years. Sure I disagree with them on stuff, big and little (license restructuring was a recent example) but they do their best to represent us because (get this) they *are* us and we are they (goo goo-ka-chew).

You're entitled to your opinion, but just because it's yours doesn't necessarily make it so for others.

Dwight,

I agree with you. The liberal (socialists) want to take away (punish) the middle class and wealthy who WORK and pay taxes to give it to those "poor" oppressed people on welfare. It's the bulk of society that is to "blame" for their plight. The concept of the re-distribution of wealth is a benchmark of their beliefs. They turn a blind eye to the failures of socialist ventures of the past AND present, believing that THEY are the social "messiahs" THEY can make it work. The real name for it is Communism--and thinking people know what has happened to the bastion of Communism. The failures and difficulties now faced in the former Soviet Union are not the fault of capitalism, but 70+ years of this monster system.

I am all for helping those in true need, and will respond with clothing, money, and food. But I will NOT respond to those who make a "living" by mooching off hard-working people.....like those "homeless", veterans that frequent interstate exits and street corners. The ones I see there have 2 legs, 2 arms, eyes, and are able to stand on their own feet. IF they can stand there holding a sign, they can hold a broom, or a steering wheel, or stand in front of a drill press making an honest living. I realize that most of them got that way because they are addicted to alcohol, and there are places where they can get help to get back on their feet----I see them standing on them everyday!

This socialist idealism sounds good, but it does not work. For those in genuine need, I say, help to the best of ones ability. For those who want a free lunch let 'em starve.

As to gang members and other criminals, they should be punished. A hardened criminal who repeatedly victimizes innocent citizens should be fried or hanged. And to those who have bleeding hearts for the criminals, I say your compassion is misplaced. In their pleas for these miscreants, they NEVER talk about the elderly couple who got beaten and robbed, or the woman who was brutally raped, only about those "poor", abused criminals who only need a "chance", or "rehabilitation". That is why I will NEVER vote for Gore or any other liberal who wants to "redistribute" my wealth (of which there is none), promote immoral, depraved behavior, promote "rights" for sodomites, and, believing that if our country would only lay down its arms everybody else would too, would place us in a dangerous position in a dangerous world.

Uh? Shall we try a few examples, Gareth?

Name a dark blue colour? Masturbating blue? No I don't think so.

Name a kind of writing paper 19" by 24"? A Masturbating? WRONG!

Name the jelly produced by worker bees? K-Y? No I don't think so.

> Hams.

Bob,

As a NJ ham let me correct the inaccuracy of
your statements above. I provide this for
info purposes only.

1. NJ has never banned mobile ham operation.

2. The former NJ law that I believe you are
thinking of is one which outlawed having a
radio receiver in the car that could tune
to police frequencies. The law was, in
a few cases, applied against hams that had
"extended receive" mobile ham radios or ham HTs in
the car. That law was also known in the late
80s and early 90s as the NJ scanner law. The
law itself was passed in the 1930s and
didn't mention any scanners at all.

3. Several years ago (about 1993) we (NJ hams)
did get that law changed so it is now legal
for ANYONE to have a radio receiver in a
car as long as the person is NOT ingaged in
commiting a criminal act.

I was one of the 10 or so hams that actively
was involved in getting that law changed.
We even got to attend the signing of the
new law by then Governor Florio.

Cheers,
Bill K2UNK

Most of the newer software available on the Internet has the ability to
upload CSV (comma-separated-variable) lists. You can designate each column
for a particular item in the logbook software.

The biggest problem is deciding which of the excellent programs you would
like to use!

Thats right Chip...it makes no difference if your a F*&$% and operate
ham radio. Just as it makes no difference if the VP elect daughter is
a Lesbo. But what does matter is Gore is a pathological liar and
supported a criminal in the presidency.

Gore is gone.

Vote Bush

>

I know this is a little out of topic, but one thing I must say at this juncture is that you are so far off base it's unreal... it's not the left-wing that supports independance of businesses and organization from the likes of "N.O.W." and LAMBDA, it is the left wing that receives a LOT of it's funding and contributions from the radical gay-rights groups and organizations, not the republicans. That's a matter of public record. Regardless of the sexual orientation of cheney's daughter, it is a historical fact that the right-wing conservatives are more apt to push for a non-gay agenda on nearly every front, not to MENTION protection groups like the ARRL and all others coming under the attack of the homosexual lobby and such.

If you don't believe me, just catch one of Rush Limbaugh's programs one time.

As a NY Ham I had suffered due to the old law. When I worked for the
old Emerson Radio Corp in Jersey City, NJ in about 1957 I was ticketed
by a NJ policeman near the Holland Tunnel. He spied the homebrewed Ham
gear in my car and wrote a ticket that said that I was not observing
his directions. He made me follow him to a police station. Since I
was from out of state, I had to pay a fine before I was allowed to
leave NJ. I could have challenged the ticket in court and might have
gotten part or all of my fine back, but I would have had to lose time
from work to do so.
I let it drop and chalked it up as an educational experience. After

that the mobile Ham Gear that I built was so designed that it was all
controlled from the dashboard by dials that could not be identified as
part of any radio equipment.
I was not either transmitting or receiving at the time the cop saw
my ham equipment but the ticket only said that I failed to follow
directions.
I dunno if the cop could recognize the difference between a ham rig and
a police scanner but he certainly did not try to look closely to check
for frequency coverage. Since my stuff was homebrewed maybe we have to
give the cop the benefit of his ignorance - because he didn't have a
spectrum analyzer to test it with.

Good thing. I know that Hams worked hard to get the law changed.
Maybe now it will help all CBers and cell phone users who can not be
proven to have criminal intentions as well as Hams. If such a history
had evolved in Suffolk County, NY perhaps the laws would also have
evolved differently here.

> I was one of the 10 or so hams that actively

Well let us take this logic in reverse. When people were getting
excused from having to take the 20 wpm Morse exam if they had a
physicians certificate; as a VE I questioned some of those physician
certificates. I made all applicants show me their valid driver's
license for ID. I was shockled when I learned that some guys who
claimed to be deaf and/or to nervious to pass a 20 wpm test held valid
driver's licenses. If you can't hear the code and/or you can't control
a pencil you better not be driving anywhere near me.

True for you if you think so.... but talking keeps me awake on a long
trip and the next best thing is listening...After that comes chewing
gum. I am willing to bet that monitoring their CB radios and talking
on them has helped to keep a lot of long haul interstate truckers awake
and thus has prevented many serious road accidents.

> : Hams need more license classes and/or endorsements.

I had never seen aurora before but last night (4 Oct to 5 Oct) I was treated to a spectacular display above Spokane, WA. We had shimmering curtains, columns, brilliant luminescent glowing areas, even red columns! The sky was covered from East to West up past the zenith - at one point dropping to about 45 degrees above the SOUTHERN horizon. The K-Index was running at 7. I also tried my hand at some astrophotography. With no experience in that, I actually succeeded inspite of having only ISO 100 film. (I shot f2.8, 24mm lens, ISO 100 film, generally 40 to 120 second exposures). Now I have some ISO 400 film and will be ready for the next opportunity. When I saw the sky glowing at 10:15pm I knew it was going to be the night for aurora - forget sleep. I stood out in the cold and was up until 1:30am. And I can't wait until I can do it again.

Thanks Chas - yes, we have experienced 7+ years of this out of sync opera.
Integrity and honor, recreated in the White House, is the most important issue-far beyond social security, fund raising, taxes, pills, etc.
With a White House that we as Americans can respect, and with an honest effort on the part of the sitting president, OUR country can enjoy a great future.
Best to you Chas.

Hello all!
We live on the 3rd floor of an apartment building. What would be the best way to ground a 170 foot random wire we have up on the roof? Also what is the best grounding source for the radios in our shack? We were told that the screw on an outlet would work but we were also told that using the radiator would be better. Which is? Would eother put RF into the building? Also, to run the wire for either it would have to go under carpetting where people would walk. Would this be a problem? Any help will be greatly appreciated. Please email me direct with any info.

That depends on a lot of things, the length of the VP, does it terminate into PVC somewhere, ect.
The best way to go here is to use radials, I have a old Hygain mounted on my vent and use two radial (cut to the right length) for 10, 17, 20, and 40 meters.

It's a DX killer. :-)

From: gary <gary@g4loe.freeserve.co.uk>
Message-ID: <8rn52dvbu1@newsg1.svr.pol.co.uk>
Source record: 101952

Hi All,

I am thinking of putting a web page together (depending on demand) where amateurs can let others know what frequencies they monitor on a regular (or not so regular) basis.

For instance if you monitor SU20 regularly or 3740 KHz let others know.

All I would need is your approx qth (Town or just County), callsign and frequency.

You may only monitor a few hours a day or week even but it may help to increase activity a little by letting others know that you are around and still active.

Of course any nets would also fit into this category as well.

If you are interested please let me know at g4loe@europe.com

cheers Gary G4LOE

Jim,
It's expensive because it's Kenwood. Do like they used
to do with the TS-440 interface, Radio Shack has a couple
of IC's that do the same function for closer to $30. The
same circuit for the TS-440 should work for the TS-50. One
of the 'mods' pages should have the circuit.

Nah, Navy recon pilots over the Pacific used "knee keys" routinely. There were heaps of those keys for a buck a pop in the surplus joints following WWII. A buddy of mine was the radio op on a Navy AJ bomber following the Korean War and he also used a knee key.

Hi,

A friend gave me a mint HA 460! But I do not have the Power cable for it. It is an 11 pin octal socket. It appears that the rig will work on 110 volt AC or also on 12 volts DC plus or minus polarity. Could some one PLEASE give me the wiring for this plug? I am anxious to try this little rig out on the air if it will work!! THANK YOU for any help you might give me.

Bob, "scanners" didn't come into existence until sometime in the late 60,
right? Before then, we just had "monitor receivers" with analog tuning.
Had a heck of a time tuning in an infrequently-transmitting station on a
particular frequency with those radios.

The Radio,Computer & Electronics Show takes place on Sunday 15th October at
THE NEWPORT CENTRE, NEWPORT, Sth WALES just 1 mile off junc`s 26 or
25a M4.

The show opens at 11.00am

Many new and all the regular traders attending, plus specialist groups
including
the R A with their test gear, bring and buy, refreshments and BAR.

Want to sell that radio/computer gear or W H Y, too much for the bring and
buy then hire a table.

Contact FIREHAM@AOL.COM now to book or for more info.

Traders ring 07970 777756 now.

Come to NEWPORT the GATEWAY of WALES.

2060. Re: Kenwood TS-50 Serial interface: Why so expensive?

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-07 00:00:00 UTC
From: Jeff Pierce <piercej@preferred.com>
Message-ID: <39DFE3C7.8DD921BC@preferred.com>
Source record: 101969

This has always been the case. It was with the TS-140/440/940 line. Well except the 140. The 440/940 already had the circuitry in them and the rear panel connector. All that was needed was an 8259 UART and a 4066 clock divider chip. Less than $10 bucks from DigiKey, shipping included.

However, the 140 kit was a whole circuit board with a connector to the motherboard and a rear panel connector. It was worth the $29 you paid for it. Problem was thou the 440/940 kit, two cheap IC's was also $30..

Now the real costly item was the RS-232 to 5 volt converter. Kenwood radios used 7407 TTL IC's as interface chips. So, the signal levels were 0-5v. RS-232 is minimum -5 to +5v (is memory serves me right about the levels, I know logic low is negative). The unit cost over $90.

This may be what you are talking about. Look at your schematice and see if the actual digital interface is already provided. You may only need the level converter. If so, there are tons of plans in old mags and on the web. From ones that uses transistors and and get their voltage directly form the computers RS-232 interface, to ones that simply use a Max-232 chip to convert. I used a a Linear Devices IC and got the 5v power through a normally unused pin on the interface connector.

Chuckie <muncie@earthlink.net> wrote:
>I thought Jeff spent most of his days policing CBers for illegal pre-amp
>microphones.

You thought wrong, Chuck. (What's an "illegal pre-amp mic" and how does it differ from a legal one? Are you referring to operators who transmit with greater than 100% modulation?)

No, the only thing I try to help eliminate is your illegal operations on the HF trans-oceanic air-to-ground frequencies where you're endangering the lives of those onboard aircraft, and your 10m bootlegging. What you do on 11m makes no difference to me.

>From what we hear,

There's that elusive "we" again! Why do you insist on always inserting "we"?

>evry time theres a "CB" event Jeff cant wait
>to post it on rec.radio.cb.

What's a "CB event"? Is that like a swap meet?

2063. IC-706 MKI Power Out Problem

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-07 00:01:10 UTC
From: "Terrence R. Redding, Ph.D." <terry@oltraining.com>
Message-ID: <B603DFC5.1529%terry@oltraining.com>
Source record: 101939

My 706 has developed a power out problem. I noticed it this morning trying to use 40 Meters on the way from SC to FL. I could hear just fine, no one could hear me, and no indicated power out on the built in meter. I just arrived in West Palm Beach and put the radio on W6LMJ's meter and found that the power tapers off to nothing when moving from the top of the band to the bottom. I listened for the relay clicks and starting just below the click at 8 Mhz I have 50 watts FM and it tapers off to nothing by the time you get to the 40 Meter ham band. (I am using a dummy load for this) This radio has the MARS Mod done for the HF bands (I was until recently AEM1WTM) Any one have any ideas about this or do I box it up and send it to ICOM?

You haven't said whether it's ground mounted, tower, pole or what. be sure to ground the tower. They are good verticals, low angle, I have one, use it on the higher bands. enjoy.
Hans below is for you..... :-)

DO WE REALLY NEED ANOTHER PATHOLOGICAL LIAR FOR PRESIDENT?

FICTION: Al Gore recently claimed that his mother-in-law pays more than $100.00 for the arthritis medicine Lodine; and he claims that his dog takes the same medicine for $37.00, claiming "This is wrong!"

FACT: Gore's aides were quick to apologize for Gore's lie, saying the information was from a Democratic study. Washington newspapers also reported that Al Gore wasn't even sure his mother-in-law was taking any medication and wasn't even sure she had arthritis. And, he doesn't know anything about his dog's "arthritis".

FICTION: Al Gore said his father, a senator, was a champion of civil rights during the 1960's.

FACT: Gore's father voted against the landmark Civil Rights Act of 1964 and was a racist who was fond of using the "N" word.

FICTION: Al Gore said that his sister was the very first person to join the Peace Corps.

FACT: By the time Gore's sister joined the Peace Corps, there were already over 100 members.

FICTION: The same sister died of lung cancer years later and Gore vowed to never accept tobacco money as campaign contributions.

FACT: Just four years later, while campaigning for office, Gore spoke to the tobacco industry and said he was one of them because "I've planted it, raised it, cut it, and dried it." He raised over $100,000 in "reported" contributions.

FICTION: While running for office, Gore's campaign literature claimed he was a "Brilliant Student".

FACT: Washington newspapers said he barely passed Harvard and consistently earned D's and C's.

FICTION: Gore claims an extensive knowledge of law as a result of his extensive study at law school.

FACT: Al Gore dropped out of law school.

FICTION: Gore claimed that his knowledge of God and spirituality came to complete fruition while "finishing" divinity school.

FACT: Al Gore dropped out of divinity school.

FICTION: Al Gore claimed responsibility for inventing the Internet in the 1990's.

FACT : Shocked scientists were quick to speak out, explaining that the Internet had been in widespread use by government and educational institutions since the early 1970's.

FICTION: Al Gore claimed the book "Love Story" was based on his life and Tipper's.

FACT: Author Erich Segal called a press conference to deny his claim. (Couldn't he at least lie about a love story where his sweetheart doesn't die?)

FICTION : Gore claimed that as a reporter for a Nashville newspaper, his stories led to the arrests of numerous corrupt criminals.

FACT: He later apologized for his claim and actually said it was untrue (also known as lying).

FICTION: Gore claims to increase diversity in the staff that follows him daily, especially among blacks.

FACT: Black members of the Secret Service are suing because they claim they are not being promoted to positions guarding the Vice-President.

FICTION: Al Gore said he was the first to discover the Love Canal nuclear accident.

FACT: The incident was already discovered, being investigated, and covered widely in the press for many months before Gore was aware of it.

FICTION: Gore said just recently that if elected president, he would put harsh sanctions on the sleazy producers of Hollywood's extreme sex and violence.

FACT: Just six days later, Gore attended a fundraiser by Hollywood producers and radical gay activists where he told them that he would only pretend to "nudge them" if elected. He raised over $4 million.

FICTION: Al Gore said he built his Tennessee home with his bare hands.

FACT : Totally false.

FICTION: Al Gore says parents should not have a choice between private and public schools because public schools are far better.

TRUTH : Al Gore attended private school and he has sent his children to private schools.

FICTION: Al Gore remembers his mother lulling him to sleep as a baby by singing the popular ditty, "Wear The Union Label".

FACT: The popular ditty was created by the unions when Gore was 27 years old.

FICTION: Al Gore claimed to co-sponsor the McCain-Feingold Campaign Reform Act.

FACT: The Act was not sponsored until he had been out of office for over a year.

FICTION: Al Gore claims to be instrumental in keeping gas prices low.

FACT: Gore has voted on numerous occasions to raise the tax on gasoline. In his book "Earth In The Balance" Gore claims that the nation's Number One enemy is the internal combustion engine. (That's the motor in your vehicle that gets you to work and takes your kids to school)

FICTION: Gore pretends to champion the rights of poor women to be tested regularly for breast cancer with the most modern technology.

FACT: While giving a speech on the subject in September, Gore didn't know what a mammogram was.

FICTION: AL Gore promised Florida's senior citizens that they would finally have low-cost drugs with no interference from government.

FACT: Gore's plan calls for the creation of a huge federal agency that would tell you which doctor you are allowed to see in order to get the "special rates".

FACT: Al Gore told NBC's Lisa Meyers that he had never told a lie. When Meyers pressed harder, "You've never told a lie?!" Gore said, "Not that I know of."

SOUND FAMILIAR?

Al Gore Reasons.

2066. To Break The First Commandment...Trinity 9799

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-07 04:15:52 UTC
From: unityNO-SPAM@cfl.rr.com
Message-ID: <YrxD5.48221$1H2.3529154@typhoon.tampabay.rr.com>
Source record: 101942

Mark 12:29 And Jesus Answered Him, The First Of All The Commandments Is, Hear, O Israel; The Lord OUR God Is One Lord:

This is the first commandment that Jesus gave and that is "The Lord OUR God Is One Lord". If Jesus only said: "The Lord YOUR God Is One Lord" ,there would have been some ambiguity as to whether Jesus was God. But Jesus said ♦The Lord OUR God Is One Lord♦ therefore he removed all ambiguity by his utterance so that no one can ever rightly say that Jesus was God. Someone who has a God can never be your God. This is the first commandment of Jesus yet we see that the majority of Christiandom break this very first commandment by making Jesus their God and then they think they are saved and will inherit paradise. Such a belief is totally unbiblical and against the teachings of Jesus.

Jesus said:

Mt 19:17 And He Said Unto Him, Why Callest Thou Me Good? There Is None Good But One, That Is, God: But If Thou Wilt Enter Into Life, Keep The Commandments.

Jesus didn't say "take me as your personal savior and you will go to heaven" he said "Keep The Commandments", yet most Christians break the very first commandment of Jesus in the Bible let alone other commandments, by taking Jesus as a God and then they expect to go to heaven! It is one of the strangest religious phenomenon in existence.

Jesus said:

Mt 5:20 For I say unto you, That except your righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no case enter into the kingdom of heaven.

Righteousness is not defined by faith alone but through faith and deeds, and Jesus is saying that heaven is not for you if your righteousness is not better than the practicing jew. Now we shall look at other biblical verses that make the picture more clear, though the above is quite sufficient for those that are truthful to themselves:

Num 23:19 God Is Not A Man, That He Should Lie; Neither The Son Of Man, That He Should Repent: Hath He Said, And Shall He Not Do It? Or Hath He Spoken, And Shall He Not Make It Good?

This verse is in the Old Testament and it is quite explicit and clear. No man can be God. Not only that but no son of man can be God. The New Testament did not come to contradict the Old Testament; it came to fulfill it so it is obvious that Jesus was not God.

John 9:11 He Answered And Said, A MAN That Is Called Jesus Made Clay, And Anointed Mine Eyes, And Said Unto Me, Go To The Pool Of Siloam, And Wash: And I Went And Washed, And I Received Sight.

Mt 8:20 And Jesus Saith Unto Him, The Foxes Have Holes, And The Birds Of The Air Have Nests; But The SON OF MAN Hath Not Where To Lay His Head.

Jesus is called both a man and the son of man in the New Testament so many times.

Job 25:4-6 How Then Can Man Be Justified With God? Or How Can He Be Clean That Is Born Of A Woman? Behold Even To The Moon, And It Shineth Not; Yea, The Stars Are Not Pure In His Sight. How Much Less Man, That Is A Worm? And The Son Of Man, Which Is A Worm?

This verse shows that man can not even be rightly compared to God (let alone be God). Nothing is pure or clean compared to God. We are all like worms compared to God. Even the son of man is like a worm compared to God (there is no comparison). It is very interesting that the verse states that "How Can He Be Clean That Is Born Of A Woman". Jesus was born of a women, though Mary was the holiest of women but she was still a woman. So in the biblical terminology even Jesus is not pure compared to God so how in heaven or earth can anyone call him God? This reminds me of the well recorded statement of Jesus recorded in the New Testament so many times:

Luke 18:19 And Jesus Said Unto Him, Why Callest Thou Me Good? None Is Good, Save One, That Is, God.

Mark 10:18 And Jesus Said Unto Him, Why Callest Thou Me Good? There Is None Good But One, That Is, God.

Mt 19:17 And He Said Unto Him, Why Callest Thou Me Good? There Is None Good But One, That Is, God: But If Thou Wilt Enter Into Life, Keep The Commandments.

Jesus is repeatedly saying, "I am not good, only God is good, I am not pure, only God is Absolutely Pure and Holy and glorious is His name. If you want to go to heaven KEEP THE COMMANDMENTS. " But what do we say? We say "If you want to go to heaven call Jesus GOD and believe he died for you!" It is so unbiblical let alone against common sense.

Jesus says:

John 20:17 Jesus Saith Unto Her, Touch Me Not; For I Am Not Yet Ascended To My Father: But Go To My Brethren, And Say Unto Them, I Ascend Unto My Father, And Your Father; And To My God, And Your God.

Jesus is calling God both my God and your God, my Father and your Father. If Jesus has a God Jesus can't be God. It is simple common sense. If Jesus was God who did Jesus pray to, himself? Imagine Jesus (if he was God) falling on his face praying to himself? God does not pray, but his servants pray to Him.

John 11:42 And I Knew That Thou Hearest Me Always: But Because Of The People Which Stand By I Said It, That They May Believe That Thou Hast Sent Me.

Mt 26:39 And He Went A Little Farther, And Fell On His Face, And Prayed, Saying, O My Father, If It Be Possible, Let This Cup Pass From Me: Nevertheless Not As I Will, But As Thou Wilt.

Heb 5:7 Who In The Days Of His Flesh, When He Had Offered Up Prayers And Supplications With Strong Crying And Tears Unto Him That Was Able To Save Him From Death, And Was Heard In That He Feared;

Mt 27:46 And about the ninth hour Jesus cried with a loud voice, saying, Eli, Eli, lama sabachthani? that is to say, My God, my God, why hast thou forsaken me?

Mark 15:34 And at the ninth hour Jesus cried with a loud voice, saying, Eloi, Eloi, lama sabachthani? which is, being interpreted, My God, my God, why hast thou forsaken me?

Luke 5:16 And he withdrew himself into the wilderness, and prayed.

Luke 22:44 And being in an agony he prayed more earnestly: and his sweat was as it were great drops of blood falling down to the ground.

Mt 26:36 Then cometh Jesus with them unto a place called Gethsemane, and saith unto the disciples, Sit ye here, while I go and pray yonder.

Mt 4:10 Then saith Jesus unto him, Get thee hence, Satan: for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve.

Lu 4:8 And Jesus answered and said unto him, Get thee behind me, Satan: for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve.

We all know that only God is omnipotent. God can do anything He wills. He has full power over all of His creation. If somone admits that he/she is not omnipotent it is obvious as the sun that that person can never be God. So what did Jesus say about this?

John 5:30 I Can OF MINE Own Self DO NOTHING: As I Hear, I Judge: And My Judgment Is Just; Because I Seek Not Mine Own Will, But The Will Of The Father Which Hath Sent Me.

John 12:49 For I have not spoken of myself; but the Father which sent me, he gave me a commandment, what I should say, and what I should speak.

John 7:16 Jesus Answered Them, And Said, My Doctrine Is Not Mine, But His That Sent Me.

John 8:42 Jesus Said Unto Them, If God Were Your Father, Ye Would Love Me: For I Proceeded Forth And Came From God; NEITHER CAME I OF MYSELF, But He Sent Me.

John 17:3 And This Is Life Eternal, That They Might Know Thee The Only True God, And Jesus Christ, Whom Thou Hast Sent.

John 6:29 Jesus Answered And Said Unto Them, This Is The Work Of God, That Ye Believe On Him Whom HE Hath Sent.

Let alone claiming to be omnipotent, not only does Jesus admit that he is not but he says that he is capable of doing absolutely nothing on his own. That is how humble he is before his Creator. He furthermore admits that there is a difference between his will and the will of God but that which makes him special is that he seeks the will of God and not his own will. He furthermore clarifies that God sent him. If Jesus was God he wouldn't say God sent him, he would say I came on my own power and leave. Imagine someone saying "I sent myself"! It doesn't make any sense at all to say that Jesus is God.

Joh 13:16 Verily, verily, I say unto you, The servant is not greater than his lord; neither he that is sent greater than he that sent him.

Joh 14:28 Ye have heard how I said unto you, I go away, and come again unto you. If ye loved me, ye would rejoice, because I said, I go unto the Father: for my Father is greater than I.

We all know that only God knows everything. God is omniscient. If someone admits that they don't know everything that person can never be God. It is very obvious. So what did Jesus say about knowing everything?

Mr 13:32 But of that day and that hour knoweth no man, no, not the angels which are in heaven, neither the Son, but the Father.

Mt 24:36 But of that day and hour knoweth no man, no, not the angels of heaven, but my Father only.

Jesus admits that he does not have knowledge of the hour (the day of Judgement). Only God knows that. Therefore it is clear that Jesus is not God. A lot of poor christians take the words of Jesus out of context and interpret it the way they want to believe but Jesus himself makes the meanings of his words quite clear for those that want to listen. Some take the words of Jesus "I and my father are one" to mean that Jesus is God. Such poor christians are unfair only to themselves. Jesus explains the meaning of biblical oneness:

John 17:21 That They All May Be One; As Thou, Father, Art In Me, And I In Thee, That They Also May Be One In Us: That The World May Believe That Thou Hast Sent Me.

So looking at the above verse do you ever hear anyone saying that all of us are also God because Jesus is one with the Father and we are all one with the Father and Jesus? Of course not, so why deliberately misinterpret the words of Jesus? The &#65533;oneness&#65533; that Jesus talks about is oneness in purpose.

Lastly I will quote something that alone makes the truth clear for those that want to see:

1Jo 4:12 No man hath seen God at any time. If we love one another, God dwelleth in us, and his love is perfected in us.

1Ti 1:17 Now unto the King eternal, immortal, invisible, the only wise God, be honour and glory for ever and ever. Amen.

1Ti 6:16 Who only hath immortality, dwelling in the light which no man can approach unto; whom no man hath seen, nor can see: to whom be honour and power everlasting. Amen.

No man can see God. Jesus was seen therefore Jesus is not God. It is simple as 1+1=2 but for those that have been indoctrinated (brain-washed) since childhood that 1+1+1=1, no wonder so many people can't see straight!

peace,

Is it possible to connect the Kenwood TH-D7 transceiver to a real external *9k6 bps TNC? Are there parts that need to be replaced on the PCB or does some "wiring"(where exactly??) do the job?

Please give me some clues!

A 1970 license would qualify you for QCWA (Quarter Century Wireless
Association). They have callbooks with which to check eligibility.
Contact them at http://www.qcwa.org Kill two birds with one stone by
joining while you're at it.

Of course, having passed a 5 wpm code test in 1970 indicates that about
a week's work would get you past 5 wpm today. Give that a try.

Why would you buy license manuals when the question pools are available for free?

The books you should buy are any written by Kevin Trudeau, Harry Lorraine, or Tony Buzan. These men are memory experts. Download the question pool from the ARRL website, and apply their techniques. The ARRL license manuals will be worthless to you after you pass, but the memory techniques can be applied to other areas of your life.

wrote:

:The attitudes and morale of the military have been decreasing for the last
:five years due to the fact that leaders of the military are not taking the
:time and the responsibility to get the job done. As stated below, YES, it is
:true that commanding officers tries to spend all of the budget given to them
:before the end of the year in order to receive a bigger budget the next
:year. But, what they are failing to see is that, they are spending those
:budgets on non-essentials instead of spending the money for training. Some
:of the most essential things that the commanding officers fails to see is
:the spending on the equipments needed for their personnel to their job.

We are using trucks from the Korean War, radios from the Vietnam War,
helicopters from the Vietnam War, and Chevy Blazers instead of
Hummers. All modernizaition stoped in 1992.

But then why would most Americans care? It isn't their sons serving.
And American left is not serving. Who cares??

:I for one is a good example. My Army unit is continually recruiting soldiers
:for a certain job. The soldiers go to their required training (BASIC & AIT).
:However, when they return to the unit, the soldiers no longer able to
:exercise what they have learned because they don't have any equipment to
:work on. All they have is an open promise that they will have one. Although
:this is a Reserve Unit, it is a Force 1 unit, which is a capable ready 24
:hour deployable unit within the Pacific region if a conflict of US interest
:arise within the region. I have asked the personnel who has been with the
:unit for at least five years if they have known about this promise and they
:stated that the promised have been made years ago and until know, it has not
:been delivered. Many of the soldiers has either requested a change of job
:within the military or left the military prior to their end of tour. In my
:case, everyone within that section has left the unit and most the Army in
:exodus due to their failure in providing the necessary equipments to do the
:job. I went on to work for a private company and was able to employ what I
:learned in training which I could have done also in the military with the
:proper equipment.
:
:Surprising to see unpreparedness? You will hear more and see more as the
:military enters the new millenium. The military is now a joke. The story of
:the new half-ton-truck and one-ton truck is true that the drive shaft falls
:off after a certain speed limit is reached. I am a Telecommunications
:Computer Specialist who worked at the mechanic shop assisting the mechanics
:since they did not have the equipments for my job.

:
:Although Ft. Jackson is not mentioned, it is one of the saddest basic
:training facility I've ever been to. The soldiers call the place Camp
:Jackson, as if they were in summer camp. Many of the basic training
:facilities I have heard off from my fellow soldiers are so terrible, that
:the soldiers will end up getting themselves killed if their is to be a war
:that the US is involved with.
:
:> > So, where is all the money going if not being used for actual
:> training needs. Well, in addition to the nonsense mentioned above, the
:> military is in the middle of the largest equipment upgrade in this country's
:> > history. Older, but still very effective, equipment is being replaced
:> > on a massive scale (Abrams replacing the M60 tank, humvees replacing
:> the jeep, new ships replacing old, new planes, and the list goes on).
:
:I am not sure that this is totaly correct. Many of the older military
:vehicles with the exceptions of the tanks, is considered useless under a
:real military conflict. For instance, the old 1/2-ton to 6-ton truck series
:that the military has is so poor in performance, they are unable to climb a
:hill at speeds greater than 15 mph. A new truck has been provided but due to
:some job security features, they are not yet fully operational or
:deployable. And yes, I am still licensed to drive the new and old trucks the
:military has.
:
:
:> In addition, new technology is being purchased at an shocking cost.

Right wing Timmie, who never let a fact interefere with has politics
entitled this thread "Top Ranking military resign; Here's WHY"

Yet, if you wade through the letter submitted by Hackworth, who WAS
(not is) a sort of a high ranking officer, but certainly not flag grade,
which most consider high ranking, you find out that all this blubbering
is from a CAPTAIN! An O-3! A company commander! He doesn't even have
eggs on his brim. Five years and he's out. Some patriot.

Future George Marshall, my ass.

I've just acquired one of these rigs and cannot find much info on connecting it's CAT up to my computer. Do I need a piece of interfacing equipment? Can it be directly wired? Does anyone have some info on this? I've tried to e-mail Yaesu, but have not received a response. I guess I'll call them next, but thought I'd ask this post first.

Thanks, I didn't know about the online question pools.

I'm assuming that the manuals include introductions,
explanations, definitions, and such--not just the questions and
answers. Is that correct?

>The books you should buy are any written by Kevin Trudeau, Harry Lorraine, or
>Tony Buzan. These men are memory experts. Download the question pool from the

I ordered Trudeau's tape series years ago, finished part of it,
then gave it to Goodwill this year. I have a poor memory for
information that's not connected logically. I'll be looking for
any information that connects the band and frequency type rules
to some kind of reason or at least some kind of story.

I think Trudeau would say I should make up my own story. Let's
see, the ITU region 2 is a soccer player, the 6 meter band is a
ball, the goal posts are set at 50 Mhz and 54 Mhz. Region 2
kicks the 6 meter band through the goal posts, SCORES!!!
I hope I get that question. OK, just gotta make up a couple
hundred more stories. Maybe this will work. Thanks for the
suggestion.

Yes. If you already have the background, they're not necessary -- this includes background not only in electronics and radio, but also in things like amateur radio operational procedures, etc. But all the books have added value.

Some go through the question pools, question by question, giving answers and explanations. They are complete, but their logical organization is only as good as the question pools themselves.

Other books (I believe the ARRL books fit this category) go through the question pool categories with explanatory and tutorial material followed by the questions answered within the material. There is generally an appendix containing just the straight question pool which is useful for review.

hmmmm.....when ol' Hiram got into ham radio, there were NO licenses, NO separate classes, and NO code tests. What if we clone ol' Hiram, and find out he was actually a Libertarian, an doesn't believe in ANY government regulation of ham radio at all ? :)

Be careful what you ask for; you may get it.

Don't forget, "I am not a crook." (Nixon, if you needed a reminder)

Hmmm, that's 3 out of the 4 Republican presidents in the last 40 years.

Sickening? Yes. But technically there was no threat. The poster only "wished" that something ill would befall someone. From a legal standpoint,it's no different than wishing that someone would get terminal disease and die a slow, agonizing death.

You're thinking of the "link system", which is good for remembering things in a specific order. Tony Buzan has a system called the "major system" which is more adept to the question pools. The techniques are the same, but the application of these techniques are different.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KF2TI, WA2VUY, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4VUD, N4CT, NA5G, NI6T, K7AR, WC7N, K8YSE, NE8Z, N0KV, 9M2TO, DJ5AV & DX News Letter, DF4RD, EA4DX, G4ZVJ, G0IAS, IT9BLB, LX1NO, OH1EH, SP5EWY, SV/OK1YM, VE3SRE, VE5MX, VK2RD, VK6APK and XE1J for the following DX information.

3B6, AGALEGA (POSTPONED). If you are not an OPDX InterNet Subscriber, you may have missed the special bulletin announcing that the 3B6RF operation was postponed (Click on the links below to SUBSCRIBE). Basically, officials of the newly elected Mauritius Government have asked the team to postpone the expedition for 2-3 weeks for security reasons. Since there are only two regular ships per year heading to 3B6 they have to postpone their activity for six months until May 2001. For more details and updates, check their Web page at: http://www.agalega2000.ch

3W/DU/XU, SOUTHEAST ASIAN TRIP. Andy, G4ZVJ, will be on vacation in South East Asia between October 13th and November 11th. There may be some CW activity from the following countries:
3W (Vietnam) - October 15-22nd, callsign assigned upon arrival.
XU (Cambodia) - October 23-26th, callsign XU7AAV
DU (Philippines) - October 29th- November 10th, callsign DU3/G4ZVJ
QSL via G4ZVJ: Andy Chadwick, 5 Thorpe Chase Ripon, North Yorkshire, HG4 1UA England, U.K. His Web page is at: http://www.qsl.net/g4zvj

4W, EAST TIMOR. Dennis/K7BV, Made/YB9BV and Dick/N6FF are now active. As of of publication, the only station spotted so far is 4W/K7BV on 40/30/20/17 meters CW. Two stations are expected to be active. Keep a lookout for 4W/N6FF. According to one of the press releases, a big decision was made that 4W/N6FF will be the callsign used on 160 and 80 meters. The 4W/K7BV callsign will be used on all other bands. QSL via KU9C. Also, check their Web site at:
http://www.qth.com/k7bv/timor

5R, MADAGASCAR (SLIM NOT!). A few weeks ago OPDX received a report on a possible SLIM operation by 5R8O. This station continues to be active on 20 meter CW signing with the callsign 5R8O, giving his name as Albert and his QTH as Tananarive, Madagascar. He also is saying QSL via 5R8FL. However, thanks to Ed, NA5G, who has been in contact with 5R8FL the following status report was given on 5R8O. Andreas, 5R8FL, states that the station "is legal, his callsign is a bit special because he operates inside the Gendarmerie county. So to simplify the QSL reception, he ask me to be his QSL manager." WFWL!

IRANIAN WEB PAGE. Mac, W3HC, reports that for those who are interested, he has a Web page for Iran up and running. Any news he receives from Iran will be posted on: http://www.ep3sp.homestead.com/index.html

8R, GUYANA. "THE 59(9) DX REPORT" reports that Arliss, W7XU, will be active from here (after the FY operation, see below) October 30th through November 7th as 8R/W7XU. Activity will be on 50.110 MHz CW and SSB, coordinating on 28885 kHz. QSL via W7XU.

9G. GHANA. A group from the Netherlands will be active from here October 6-24th. They plan to use the callsign 9G1AA plus their own 9G5 callsigns. Activity will be on 80/40/20 meters CW and 6 meter SSB. Also, there may be some activity on 160 meters.

9M STATIONS ON 6 METERS. Tex, 9M2TO, reports that this season 9M2 6 meter stations (9M2NK, 9M2KE, 9M2KT, 9M2TO, 9M2XA and 9M2/JI1ETU) are looking for EUs, NAs and SAs on 6 meters. They know that they have a "SHORT-PASS-OPENINGS-EUs" at 0700z (+/-) in November, but they do not know the other passes for the areas. Please watch for the 9M2TO/B beacon on 50.005 MHz running 24 hours and inform them. The 9M2 station check the DX-SUMMIT cluster for QSNs. You can also send E-mail to Tex at: izumo@pc.jaring.my

9M6, EAST MALAYSIA. The Cinco Nueve Contest Group will be active from the Hillview Gardens Resort from October 21st through November 2nd. The operators include Al/K7AR, Lee/N7NU, Bob/W7YAQ, Bob/W7RR and Dave/N6NZ. The group will be a Multi-Single operation using the callsign 9M6AAC during the CQWW SSB Contest. Outside the contest the group will be using their own callsigns, still waiting to be issued. Check the group web site at: http://www.qsl.net/k7ar
Web site will have photos and log searches during the expedition.

A5, BHUTAN (Update). Charly, K4VUD, reported this past week that he has applied for the callsign A52UD for his operation in December. He also states the following: "As of today (October 4th), two hams are slated to arrive in A5 on December 1, 2000. The 1KW xmit power is ok-ed (with an extra fee!!!). If we can get a third ham on this trip, all three of us will save some money on Bhutan's tourist fees for groups of 3 or more. Come on, just need one more daring adventurer for this trip!" Charly's E-mail address is: k4vud@hotmail.com

E30, ERITREA. Chris/DL5NAM and Dieter/DF4RD are going to be active and have confirmed the date of October 17th through November 1st. Callsigns are still unknown and will be issued after their arrival in Asmara. Activity

will be on 160-6 meters on SSB, CW, RTTY and PSK31 including participation in the CQWW DX SSB Contest. They will operate from the Nyala Hotel (QTH of E30GA). QSL via home callsigns. OPDX InterNet Subscribers will receive the press release as an additional bulletin.

FS, ST. MARTIN. A report indicates that members of the NJDXA will be active from here soon or possibly during the CQWW DX Contest. Operators mentioned are K2CO, N2BIM and possibly others.

FY, FRENCH GUYANA. "THE 59(9) DX REPORT" reports that Arliss, W7XU, will be active as FY/W7XU October 27-30th on the same plan as 8R (above).

GD, ISLE OF MAN. Joe/K1JB and Mike/K1EU are expected to sign GD6IA from October 26-29th. Activity will include an entry in the CQWW SSB Contest with operations on 160-6 meters CW/SSB.

GJ, JERSEY (Update to OPDX.473). Barry, N0KV (M0CQS), provides OPDX with the following update concerning the upcoming operation from the Jersey Amateur Radio Society club station, October 23-30th. The group of operators is finalized now and includes members of the Mile High DX Association (Denver, CO) and the Darley Amateur Radio Club (UK). The callsigns are:
GJ1Y (CQWW contest only) GJ0HHY (outside contest)
MJ/N0KV (outside contest) MJ/KU4CG (outside contest)
MJ/W0DM (outside contest)
The group of operators will be active from LaMoye, Jersey, Channel Islands, UK (Zone 14), as a Multi/Single entry in the CQWW SSB Contest. Operation outside the contest will be CW, SSB, and possibly PSK31, starting Monday, October 23rd, and ending after the contest. Activity will take place largely day/evening hours (local) before the contest. The station is located in "Worked All Britain" square WV64, and Jersey is IOTA EU-013. There will be two stations:
Station 1: IC-756PRO, Alpha amp (400W), A3 tri-bander, R7000(WARC), bandpass filter
Station 2: IC-756, club tri-bander, 40/80M dipoles, bandpass filter
QSL via N0KV (CBA: 12200 Boothill Dr., Parker, CO 80138), except MJ/KU4CG goes via KU4CG CBA.

HC, ECUADOR. Once again Doctor Rick, NE8Z, will be operating as HC1MD from here, November 25th through December 11th. Activity will be on 40-10 meters CW/SSB (500 watts) and 6 meters (10 watts). He will travel to different areas in Ecuador and will sign: HC1MD, HC1MD/HC2, HC3, HC6 and HC7. Rick will also be looking for the following new DXCC entities for his HC1MD DXCC: East Timor, Austral Islands and Laos (any assistance/ideas will be appreciated, send E-mail to: ne8z@yahoo.com). QSL via K8LJG: John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. Also, please view the HC-DX AWARDS at: http://www.octavia.com/qsl/awards.htm

IOTA NEWS.....
AF-018. The Pantelleria Contest Team, IH9P, will once again travel to Pantelleria Island (CQWW zone 33, African Italy, IIA:TP-01) for this year's CQWW SSB contest at the end of October. The Pantel-leria's Team's goal will be to be more competitive than in 1999's

effort, with the addition of a few new operators, new antenna systems and a new site located just few meters far from salt water. The team will be arriving on the island on October 22nd and should be testing the station installations by Thursday. This year's team members include KR7X, W1NA, W7ZB, OL5Y, I2IFT, IK2ANI, IK2CIO, IK2HKT, IK2RZP, IK2YCN, IN3QBR, I8QLS, IK8ETA, IT9BLB, IT9VDQ, IT9WPO, IT9ZGY and IT9ZMX. This year's operation looks again to be an all FT-1000 MP effort with assorted amplifiers. Team Pantelleria (IH9P) looks forward to being your zone 33 multiplier for the contest and working all of you in the contest. QSL via KR7X (CBA). Their Web site is at: http://www.qsl.net/ih9p2k

OC-140. The VK6 DX Chasers Club will be active from Direction Island November 5-13th. Direction Island is part of the Mackerel Islands of which Thevenard Island has been activated previously by Mal, VK6LC. The Island is located 12 Km offshore from the small West Australian town of Onslow in the state's North West and some 1400 Km by road from the capital city, Perth. A group of 10 operators will activate the island with 4 HF stations. Six meter operations will also be included. This is the same group that activated Woody Island (OC-170) in March 1999. The callsign to be used will be VK6DIR and operation will be on 40-6 meters, including the WARC bands. 75/80 meter operations will be at-tempted but hopes are not high for any great success on that band due to the latitude and time of year. QSL via Neil, VK6NE. Inquiries will also be handled by Neil at: vk6ne@upnaway.com
For a look at the Mackerel Islands, go to the Web page: http://www.mackerelislands.com.au
News of the expedition will also be posted from time to time at the VK6ANC Web site at: http://www.ncrg.org.au

OC-212. Look for Broughton Island to be on the air now through October 15th. Activity will be on all bands 80-6 meters, CW, SSB, PSK31 and 29 MHz FM if band is open. The callsign is VI2BI, and the operators are: SSB - VK2EO, VK2NP, VK2PB and VK2JV
CW - Frank/VK2ZL, Ray/VK2ARY and Don/VK2ADM
QSL via VK2EO or via Bureau.

J8, ST. VINCENT AND THE GRENADINES (Update). Angel, WA2VUY, informs OPDX that their team of operators have received the special callsign J80WW (J8 Zero WW) to be used during the CQWW SSB Contest. Please refer to OPDX.478 for other details.

KH2, GUAM ISLAND. Look for Masanori/AA9WZ, JA1OBY, Hiroshi/JA1XHE, JH1FUD, Hiroshi/JL1LOW and JR1XIM to be active on IOTA OC-026 from October 26-30th. They will be active on HF bands including WARC bands SSB, CW and digital modes. QSL via the bureau to each home callsign or direct to each Callbook address. QSL AA9WZ/KH2 via JA1OZK.

KH5/KH5K, PALMYRA & KINGMAN REEF. By the time you read this, the KRPDXG team should be on their way to Palmyra. The Hawaii operators KH7U, NH6UY,

WB4JTT and KH6ND, along with Captain Bill Austin and his crew on the motor schooner Machias, should have departed from Christmas Island this past weekend to pick up Mike, KH6ND, from Palmyra to head to Kingman Reef. Activity is to begin on October 18th. Suggested frequencies are:
CW - 1826.5, 3503, 7003, 10103, 14023, 18073, 21023, 24893, 28023, 50105
SSB - 1826.5, 3795, 7065, 14195, 18145, 21295, 24945, 28465, 50105
RTTY - 7043, 14083, 28083 kHz
Other suggested frequencies: U.S. General operators are to look on 20 meters SSB on 14245 kHz and on 40 meters CW on 7023 kHz. JA stations are to look for them on an alternate 160 meters frequency on 1824 kHz. Look on 6 meters for a breakable beacon (TX 50105/RX 50115) and also listen to 28885 kHz.

OD, LEBANON. Pavel, OD5/OK1MU, has confirmed that he is now active also on 50 MHz and 144 MHz. He is using the following equipment: for 50 MHz 100W + 5 el. Yagi; for 144 MHz 100W + 10 el. DL6WU. His on-line log is available at both: http://www.qsl.net/ok1mu
http://www.okdxf.cz
QSL cards are still via OK DX Foundation, P.O.Box 73, Bradlec, 29306 Czech Republic.

OH0, ALAND ISLAND. Ari, OH1EH, informs OPDX that after several antenna parties, the Aland Islands contest station is ready to hit the airwaves with several new antennas, including a 3 element full-sized 80m delta-loop. For more info on the new antenna system, check out the Web page:
http://www.qsl.net/oh0z
OH0Z will be active in the CQ WW DX Contests, 160-10 meters, operated by OH1EH (SSB) and OH1JT (CW). QSL via OH1EH: Ari Korhonen, Kreetalank. 9, FIN29200 Harjavalta, Finland.

OOOPPPSS DEPARTMENT. In last week's bulletin, OPDX.479, under "9X, RWANDA" Charlie's callsign should have been N4CT not N4XT. Also, under "KH0, MARIANA ISLAND", the callsign "KH2F" was inserted instead of NH0S for one of the operators.

QSL INFO AND NEWS.....
Tex, 9M2TO, reports that all the September QSOs QSLs including the WAE and RTTY contests have been sent out to the JARL Bureau on October 2nd.

New Address. Beginning October 1, 2000, the QSL Manager for 3W7CW has a new address. ONLY QSL to Adam, SP5JTF, new address as follows:
Adam Perz, P.O.Box 12, 01-323 Warszawa 83, POLAND. The previous SP5AUC address (P.O.BOX 11 Warszawa 93) is open only until the end of the year. That post office has been relocated quite a distance away from SP5JTF, and it has been quite complicated to check POB there regularly. Additionally, a lot of IRCs and green stamps have been stolen from SASEs in that place. Also, SP5JTF has an E-mail address, so you can ask him directly for QSLs:
sp5jtf@radio.org.pl
The 3W7CW QSLs should be back from the printer probably early November and all request should be answered by the end of this year.

Roberto, EA4DX, is glad to announce that 8Q7XX cards will be hitting your mailboxes this week. All cards received with postage up to September 30th, have been answered. More than 1200 envelopes received in the last two weeks have been carefully processed since his return from the Maldives. Some of you will have a turnaround of less than one week for your QSL. Cards received from now on will be answered on a weekly basis. Roberto states, "Thank you all and especially NCDXF for their continuous support." Logs, guestbook and QSL info available at: http://www.qsl.net/ea4dx/

7Q7TB and VP2MDC QSLs. Send DIRECT cards to G0IAS. However, Dave, G3TBK, is handling the bureau QSLs. Dave is sorry about the length of time taken to answer the cards, but his work schedule is large and his time in the UK is very limited, so PLEASE BE PATIENT... A couple of weeks should see ALL direct cards answered. Bureau cards should be complete by the month's end. Dave will be back in J3-land at the end of the month and perhaps G0IAS will handle the cards (more about that when the picture unfolds....).

BI2J QSL Update. Mac, W3HC, reports that all photos and information for the BI2J cards have been received from Alan, BA1DU. Mac will send them to the printers this week.

Norby, LX1NO, reports that QSL requests for OZ1AA should be answered soon. He hopes to receive the cards from the printer by the end of this month. Your requests will then be answered as soon as possible.

R2, KALININGRAD (Attention Award and Prefix Hunters). Ben, OZ5AAH, will again be active from late afternoon October 30th through November 5th around midnight from the club station in Kaliningrad as R2/OZ5IPA. Activity will be on CW/SSB and also on the WARC band, but no 6 meter operations. Ben will, of course, participate in the International Police Associations Contest November 4-5th. QSL direct via his home callsign only: Ben Jakobsen, 9 Knoldager, DK-2670 Greve, Denmark (will be OK for most POLICE awards). Contest info can be found on both:
http://www.ipa-rc.de or http://www.iparc.com

SV9, CRETE. Roby, IZ3CYN, will be active as SV9/IZ3CYN from October 10-15th. Activity will be on 20/15/10 meters SSB. QSL via homecall.

SV/A, MOUNT ATHOS. "The DX News Letter" reports that Monk Apollo hits the airwaves with the special callsign SY2A now through the end of the year. QSL via the CBA of SV2ASP. OPDX spotted Monk Apollo on RTTY this past week on 14086 kHz around 2045z.

TI, COSTA RICA. Look for a group of stateside operators to be active from Quepos as K4QFF/TI8, October 7-14th. Activity will be on the satellites UO-14, AO-27, SO-35 and RS-13. QSL via K4QFF.

VB2, CANADA (Additional info to OPDX.479). Bob, VE3SRE, provides OPDX with the following additional info on the upcoming VB2R operation. A team of VE operators will be active from Zone 2 during the CQ World-Wide SSB Contest and a few days before and after the contest. The operation will be totally conducted under generator power from the James Bay Region in northwest Quebec. Operators at this point are: VE3BY, VE3DXE, VE3SRE,

VE3VFT, VA3KO, VA3MFE, VE3VAM, VE3TV, VE3RMF, VE3DBF, VA3IX, NB1B, VE3KJS, and VE3HAE. There is a special QSL card available commemorating the 100th anniversary of the birth of E.S. (Ted) Rogers, pioneer Canadian amateur, inventor of the "batteryless radio" and Canadian broadcasting pioneer.
QSL via VE3BY. A Web site is available at:
http://www.fortunecity.com/marina/westindia/597/zone2

VC5, CANADA (Update). Todd, VE5MX, informed OPDX that the special callsign VC5C assigned to him to be used between October 27-30th, is to commemorate the 125th anniversary of the Supreme Court of Canada. Also, look for VC5C in the CQWW SSB Contest as a Multi/Single entry. Sam, VE5SF, will be handling the QSLing chores.

XF2, MEXICO (Attention Prefix Hunters!). Jose Levy, XE1J, informs OPDX that he will activate the prefix XF2 on the air for the first time. Look for the callsign XF2UQZ to be active from the Isla de Sacrificios (Veracruz, Mexico) from 2300z October 11th through 0300z October 13th. Activity will be on 80-10 meters CW/SSB. QSL to XE1UQZ.

XU, CAMBODIA. You have only a few more days to work Toni/EA5RM and Pedro/ EA7DBO as XU7ABD. They will leave October 13th. Activity over the weekend has been on 20/15/12/10 meters. QSL via EA4URE. The XU7ABD logs are available via Web site at: http://www.qsl.net/xu7abd

XW, LAOS. It has been reported that Toni, Z21KD, managed to get a license, apparently valid until October 30th. The assigned callsign is XW4XJ. He is expected to be active mainly on 20 and 10 meters SSB (w/100 watts) presently. However, Toni will try other higher bands when he gets time to set up more antennas. Keep in mind that he is not in Laos for a holiday, so his operating schedule may vary. He was spotted on 10 meters over the past weekend on 28460 kHz around 1345z. QSL via Z21KD, direct only:
Toni Latz, P.O.Box 2081, Bulawayo, Zimbabwe.

They are held responsible for seeing the flashing lights but not
for hearing the siren. My father-in-law's deaf neighbor was arrested
for failure to stop when the local police turned on the siren behind
him. The judge threw the failure to stop charges out of court and the
policeman had forgotten to write him a ticket for the original speeding.
This was in the 50s back when the police cars were unmarked and the
flashing lights were located behind the front grill.

Ah, Ft. Jackson. Without getting into details, let me tell you a little secret - the Army is in the middle of conducting a little experiment (again).

They are taking some recruits (mostly from Ft. Jackson), and placing them on a "friendly military" track. These recruits get "stress cards" (a card they can hold up when the drill sergeant "stresses" them out during training), sensing sessions (talks to air their feelings), reduced training time, reduced physical fitness training, more free time, and assignments to similar units after training.

At the same time, other recruits (mostly from Ft Lenard Wood) are put on the "hard-core" track. These recruits are getting heavy training programs, styled after Marine, or special forces, training (complete with long training hours, sleep deprivation, severe physical fitness training, and little free time). And, after training, these recruits are often assigned to special forces, or airborne, units (even if they are not special forces, or airborne, themselves) where the conditions remain relatively "hard core."

The idea of all this is to see which group ("friendly military" or "hard core") does better during their military career (at least that part of their career while the study is conducted).

Of course, if you ask me for any details, or for proof that this is happening, I'll deny any knowledge of the issue. ;-)

Thanks for the tips. I spoke with a Kenwood rep at the Southwest ARRL convention this weekend about the interface.

It is TTL and while the level converter is still available at $89, another device is still needed and it is not available. Too much money either way.

The rep acknowledged the price was expensive, especially when the newer designs use conventional RS-232.

I will try the MAX232 method.

2094. Re: Top Ranking military resign; Here's WHY - in his own words

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-08 00:00:00 UTC
From: Jay Alcon <alconj@hawaii.rr.com>
Message-ID: <sYZD5.310$nY.4839@typhoon.hawaii.rr.com>
Source record: 101981

The attitudes and morale of the military have been decreasing for the last five years due to the fact that leaders of the military are not taking the time and the responsibility to get the job done. As stated below, YES, it is true that commanding officers tries to spend all of the budget given to them before the end of the year in order to receive a bigger budget the next year. But, what they are failing to see is that, they are spending those budgets on non-essentials instead of spending the money for training. Some of the most essential things that the commanding officers fails to see is the spending on the equipments needed for their personnel to their job.

I for one is a good example. My Army unit is continually recruiting soldiers for a certain job. The soldiers go to their required training (BASIC & AIT). However, when they return to the unit, the soldiers no longer able to exercise what they have learned because they don't have any equipment to work on. All they have is an open promise that they will have one. Although this is a Reserve Unit, it is a Force 1 unit, which is a capable ready 24 hour deployable unit within the Pacific region if a conflict of US interest arise within the region. I have asked the personnel who has been with the unit for at least five years if they have known about this promise and they stated that the promised have been made years ago and until know, it has not been delivered. Many of the soldiers has either requested a change of job within the military or left the military prior to their end of tour. In my case, everyone within that section has left the unit and most the Army in exodus due to their failure in providing the necessary equipments to do the job. I went on to work for a private company and was able to employ what I learned in training which I could have done also in the military with the proper equipment.

Surprising to see unpreparedness? You will hear more and see more as the military enters the new millenium. The military is now a joke. The story of the new half-ton-truck and one-ton truck is true that the drive shaft falls off after a certain speed limit is reached. I am a Telecommunications Computer Specialist who worked at the mechanic shop assisting the mechanics since they did not have the equipments for my job.

Although Ft. Jackson is not mentioned, it is one of the saddest basic training facility I've ever been to. The soldiers call the place Camp Jackson, as if they were in summer camp. Many of the basic training facilities I have heard off from my fellow soldiers are so terrible, that the soldiers will end up getting themselves killed if their is to be a war that the US is involved with.

I am not sure that this is totaly correct. Many of the older military vehicles with the exceptions of the tanks, is considered useless under a real military conflict. For instance, the old 1/2-ton to 6-ton truck series that the military has is so poor in performance, they are unable to climb a hill at speeds greater than 15 mph. A new truck has been provided but due to some job security features, they are not yet fully operational or deployable. And yes, I am still licensed to drive the new and old trucks the military has.

Going to specific on computers, with the retirement of AUTODIN and DMS as the replacement, new computers must be purchased. Each organization to their personnel office is required access to DMS as an all government and military messaging system. It will be the only government approves way to communicate between commands, within the gov't an military. My guess to why they bought 7 laptops instead of 3, they maybe getting more people in that personnel office and/or bought the extra for backup and to do work out of the office. Many organizations I know have extras as loaners to use for certain missions.

Military needs change.

Dear Friend

You'll love this

Imagine your website having thousands... even million
of visitors every week.

Would that help you earn more money?

Then get the latest tactics to pull in visitors to your
website like a giant magnet.

Download Superior Marketing Tools & Tactics
Software... It's 100% FREE!

You will discover how to reach 10 Million people for just
ten dollars per million.

A step-by-step, easy to follow, directions on how to pull
over 1000 people per day to your website FREE... (you
won't
spend a dime in advertising costs).

You'll learn how to backdoor your way into the 3 best
search engines... these search engines are
responsible for 89%
of all search engine traffic.

You'll get a tool to determine what keywords you
should use BEFORE you submit your website so you'll
get the most
visitors to your website once your listing appears.

You'll get an instant Meta-tag tool to get a higher
ranking in the search engines.

Our secret to maximize your profits... something most
people would never know about.

What Ezine's are best to advertise in to get the most
from your advertising dollars.

Viral advertising tactics that most people never thought
of.

How to use free incentives as a lead generator.

$195.00 worth of secret reports and how to use them to
attract visitors to your website by the truckloads.

And More!

For the Web address, mailto:
mailto:gerrard@oorhame.worldonline.co.uk

I will send the Web Address by return and you can
enjoy the free software!

Sincerely,

Gerry
mailto:gerrard@oorhame.worldonline.co.uk

You are correct Jeff about the scanners. Before the police used higher frequencies they had AM stations just above the BC band (near 160 meters). When the NJ law was first enacted it was meant to keep people from listening to the police radio frequencies... while possibly being chased by the police.

> ears while driving?
> --
> http://www.mindspring.com/~w6rca

Hmmm...That is a good question. Let us suppose a partially deaf person
has a hearing aid in one ear and a cell-phone ear plug in the other.
Maybe such a person can hear an approaching motorcycle or
ambulance...but can he know which side of his car is it going to pass?

Some folks will say that I should not make comments or jokes about
people who are even partially disabled. I'll stop right now...After
all - a guy with only one ear is not a good stereo-type.

Seriously I dunno what happened to the requirement for all cars,
especially those equipped with air-conditioning...to have two or more
microphones that pick up the sounds outside of the car and have their
audio outputs amplified and capable of overiding the other audio to the
stereo speakers inside the car...so that the driver is able to hear the
outside when all car windows are closed and/or when his radio is
blasting.
Does anyone know if this was ever made an automotive requirement???
IMHO it could be more important than seat belts or air bags.

Hams need MORE license classes,

> never do that (again)?

Rationalization!!!

I don't expect many hams will be able to custom build their own integrated circuits...although some have been instrumental in specifying I.C.s that have become commercial. Most old Hams never blew their own vacuum tubes either. Today you can buy kits that have been designed by members of TAPR, which exceed or preceed what may be available from Japanese manufacturers. We can buy I.C.s which are cheaper and more versatile than vacuum tubes were and experiment with them using low voltage batteries instead of potentially dangerous higher voltage power supplies. We can take advantage of the many cheaply available electronic components that are now even sold in Radio Shack, such as LEDs and opto-isolators.
If you have not been able to keep up with the solid-state age - that is your problem...but don't spread any fear of modern technology. I suggest that you read some of the booklets that were written by Forest Mimms for a starter. I am 67 years old but I never stop learning about electronic hardware.

> No, the future of Amateur Radio, if it has any future at all, lies in
> providing better personal and recreational communications for enough
> people to provide the political clout to keep the Ham bands dedicated
to
> that purpose.

Never happen...There is more "recreational communication" available via
the Internet than Ham Radio can ever provide. Hams can not expect to
be a very large percentage of the population in the future. Hams can
seek quality but not quantity. Hams can comply with providing the
kind of technical people who are an asset to the USA, as well as
themselves.

> Most CBrs are prolly interested in traffic and smokey reports but most
> of the ones on these NGs are more serious communicators, many doing
the

> artificial barriers to them doing that. My $0.02
>
> KA3DWW

Do you want Hams to only think like CBers? Or do you just expect CBers
to think like non-technical Hams? At any rate you must start to think
about what the difference is between CBers and Hams. You can start by
reading the Basis and Purpose of Ham Radio in FCC Part 97. Why do you
think that Hams are the only group of operators who are permitted to
build and service their own equipment?

I encourage techies to be Hams and CBers to remain CBers unless they
want to learn to be techies. I understand the difference between CBers
and Hams. Those who do not; will either kill Ham radio for everyone or
convert it into Citizn's Multi-Band (CMB), which for my $.02 is about
the same thing.

Hams need MORE license classes and/or endorsements.

2102. Books to study for license?

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-08 06:37:31 UTC
From: pstivers@proaxis.com
Message-ID: <39e014a9_2@news.pacifier.com>
Source record: 101976

I want to study for technician class and general class licenses.

From www.arrl.org/catalog/lm, I see:

Technician class:
- Now You're Talking, 4th ed, 2000
- ARRL's Tech Q&A, 2nd ed, 2000

General Class:
- ARRL General Class License Manual, 4th ed 2000
- Morse Code Cassettes and CDs

I noticed on Fatbrain and on Amazon that some of these books are on 3-5 wk back order. Is that because 2001 books are coming out soon? If so, anyone know when?

If I ordered from ARRL do you know if the books would still be on back order? Their web page doesn't indicate that I can tell.

I probably wouldn't test until Dec 2000 or later. Any recommendation on wait for 2001 books or buy 2000 books?

Thanks for any advice.

Paul

To be truthful, the number in Illinois is up over 14, the cases of
innocent men freed from Death Row, based not only on confessions of
the guilty, but also evidence that was either overlooked, or was too
sophisticated to process at the time of the arrest; much of it based
on DNA. Hence the moratorium, here, on execution.

Hi, Andy, Rick, N9GSU in Muncie here. 146.700 is your best bet, it's got great coverage and a great group of folks on it. Also, 145.250 is a good one, and 146.760 MIGHT be good from downtown, I don't use it much since I live about 60 miles north of Indy. Not sure about 440.....

What brings you to Central Indiana? We're glad you're coming!!!

73,
Rick N9GSU

Email Address Is Below !

Brand New ASTEC:
VS3-K0-K2-K3-00
Single Phase 85 - 264 VAC /// 47- 440Hz Input
Three terminals for output:
one 2v @ 150amps
two 5v @ 150amps
three 12v @ 62.5 amps - For Ham & CB Gear

Detailed Specifications On Power Supply:
http://www.astec.com/products/1150.astec.pdf
(Must have Adobe Acrobat installed to view)

This page show a different model for sale:
http://www.newark.com/
Search for "manufacturer" part number and enter "VS3"
for other models then use the PDF (Adobe) specification
chart to compare output watts / amps.

One example is a VS3-C6-C6-20
which is VS3 or 5x8x11 case
Terminal one is "C6" which is 28v @ 32.1amps
Terminal two is "C6" which is 28v @ 32.1amps
The unit on that page is about $2,000

I'm selling this for $120 UPS Shipped

Look at the backside of the 11pin socket. Find the lead that goes to
the on/off switch. The other side goes to one lead of a power
transformer. Check the backside of the 11pin again and find the other
side of the primary. I.E. Put an ohm meter across it. Should see
about 3 to 4 ohms.

If the driver is approaching an intersection on a green light, and an EV is approaching that intersection from the cross street (i.e., at a right angle to the driver), the driver can't necessarily see any red lights if it's a "blind" intersection.

That happened here -- a fire truck "met" a vehicle at an intersection and the vehicle's driver was killed (driver had the green light but windows were rolled up, car radio was on).

Geez Herman, what a dump huck question! The answer is obvious.

They don't hear the siren!

Like any other careful driver, they exercise due caution when driving,
including visual clues like flashing lights, the behavior of other
vehicles in the vicinity, and extra caution when approaching
intersections (even when you enjoy the right-of-way).

2117. new radio forum

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-09 00:00:00 UTC
From: "Express Electronics Inc." <exports@exportradios.com>
Message-ID: <NZpE5.102$Aa6.45194@nnrp3.sbc.net>
Source record: 101924

At Express Electronics Incorporated, we have just started our own radio forum. In the past 6 months, we have been kicked off or threatened by most radio forums and Newsgroups. Why, you may ask? The answer is very simple. We want the truth to be known. We do not sell products with problems, nor do we sell merchandise that has been refurbished, we even refuse to sell anything that won't stand up to our one year warranty. When these points are brought up, it seems to aggravate our "so called" competition, as well as the many radio enterprises out there. Then there are people who tend to nearly hyperventilate at the idea of selling something that can be used illegally. As we sell radio equipment worldwide, the same laws may or may not apply to one radio operator as they do with another. We have met many people that are wanting simple answers to simple questions, but are afraid of or are intimidated by snobbish American radio enthusiasts. We feel this is wrong, and for this purpose have started our own radio forum. We want radio enthusiast to be able to discuss Radio for the sake of radio, without censorship. This will not be the place to discuss laws or consequences of breaking laws in your country. This will simply be a place for questions to be asked and answers to be given. You can even tell some of your radio stories people have heard for years, and will not have to worry about your message being edited or deleted. Feel free to discuss Export Radios, FreeBanding, Linear Amplifiers, and even modifications. This is an open forum where you and our staff can give information and talk about everything radio. This forum is for radio enthusiast, not politicians, or lawyers. If you would like to enter this forum, just click on the link below. Opening topics are still being entered, new suggestions for new sub-forums are welcome.

It's dangerous to be deaf, self-imposed or natural. Naturally deaf
people compensate for their deafness and are therefore probably
safer drivers than stereo freaks.

Hmmmmm.....yeah, basically, but it has been proven that some deaf
drivers are able to discern certain types of vibration from certain
types of sirens in the right conditions.

2124. Michigan Hams

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-09 00:00:00 UTC
From: helmsman <>
Message-ID: <eek4us86cqrq8o87gglggb2pg85e69607j@4ax.com>
Source record: 101931

This is a call for action for all Hams that want to continue using their MOBILE radios, or even wish to transport their PORTABLE/HANDHELD radios in their vehicles without obtaining a special permit from the Michigan State Police.

On Sept. 27, 2000, Michigan Rep. Mike Kowall sponsored House Bill HB-6012 that amends sec. 508 of 1931 PA 328 (MCL 750.508). Co-sponsors to this amendment are Reps. Cassis, Julian, Shackleton, Birkholz, Howell, Scranton, and Tabor and has been referred to the Committee on Transportation.

Sec. 508 has been completely rewritten.

Subsection (1) states ...shall not either equip a vehicle with a radio receiver, or possess in a vehicle a portable radio receiver that receives...

Subsection (2) does not exempt Hams from the permit requirement as the non-amended sec. 508 did.
Subsection (2) states ...does not apply to a vehicle owned or used by an individual who has obtained a valid permit...
This permit requirement applies to Law Enforcement Officers and Amateur Radio Operators.

This is a bad Bill for Amateur Radio in Michigan on the whole, and especially for those attempting to provide a service to our communities. This is another hurdle which should not have to be jumped by the volunteers that give so much already.

Call or e-mail your State Representative today and let's put a stop to this foolishness. You can find your Representatives number in the phone book or by going to http://www.michiganlegislature.org/ and then scrolling to the "Links to Other Sites" "State House".

HB 6012 reads as follows:

(1) Except as provided in Subsection (2), A person shall not either equip a vehicle with a radio receiver, or POSSESS in a vehicle a portable radio receiver, that receives radio frequencies assigned by the federal communications commission for police purposes.

(2) Subsection (1) does not apply to a vehicle owned or used by an individual who has obtained a valid permit from the director of the department of the State Police on a form prescribed by the director and who is either of the following:

(A) a law enforcement officer certified pursuant to the commission on law enforcement standards act, 1965 PA 203, MCL 28.601 to 28.616.

(B) An amateur radio operator licensed by the Federal communications commission in 1 of the following classes:

(i) technician class
(ii)Tech Plus class
(iii)general class
(iv) advanced operator class
(v)Amateur extra operator class

(3) this section does not restrict or prohibit equipping a vehicle with or using a radar detector.

Violations of this law carry a 1 yr jail sentence and a $500.00 fine.

> --
> Jim Rosenthal, WA4STJ

Yeah...BUT if he was blind could he have been a patent attorney?
I guess he couldn't be an active CB operator...but if he knew the Morse
code he could have been a HAM.

A great great uncle of mine was a bigamist. He had two wives that were
known to exist and who knows if he had others? He moved from Georgia
to New York in search of women and in the days that he did so he was
hard to trace....even though he wasn't an attorney of any kind. I
dunno what, if anything, he did for a living....but it didn't require a
driver's license....nor good speech or hearing.
That was on my father's side of the family.

On my mothers side, an uncle of mine (not a great uncle)held patents
related to motion picture cameras and projectors. He was a movie
cameraman in the days of silent movies. He filmed the Keystone Cops
and various cowboy movies when they were made on Long Island, NY...but
he lost out when he refused to move to Hollywood, CA when the industry
did. He never had a driver's license but used the NY subway.

Peter, when Jerry was talking about criminals, I think he was refering to criminals as a whole, not just those on death row. And, if that is the case, your 14 examples of people with convictions overturned (not people proven "innocent") in Illinois amounts to far less than one half of one percent of that entire group.

And I want to be very clear on something here (at least when it comes to DNA testing). The fact that DNA testing has cast doubt on one piece of evidence used during the trial for the original conviction, it does not mean that the person is innocent. Instead, it simply means that the conviction was based on faulty evidence in that one instance, and therefore the trial was faulty, so therefore the conviction was overturned.

Once a conviction such as this is overturned, what should happen is that the person should be tried again, using the other evidence presented during the original trial, evidence left out of the original trial (considered unnecessary at that time), and newly discovered evidence.

Sadly, a new trial is often impossible. In some cases, because of the time period between trial and overturned conviction, the original evidence was either thrown away, destroyed, or has decayed to be point of being useless. Or, witnesses are no longer available. Or, in other cases involving lessor crimes, the statute of limitations has run out on prosecution.

So, in the end, DNA testing may indeed be letting truly guilty individuals go free. But, when it comes to liberals, that fact does not seem to matter as much as their desire to discredit the death penalty.

Once you're in the FCC's database, you can get on the air. It's a recent change I think (this year?) Previously, you had to wait until you got it in the mail.

Check www.qrz.com to find out if you're in.

Since you're a new ham (not an upgrade, which is faster), I'd say about a month. Hang on to the certificate that the examiners gave you though; if they forgot to send your stuff in, or if something else happened, you'll have that to fall back on. It's valid for a year (but not as a license, just proof that you passed the tests).

Most speakerphones (that I have seen) have a level sensor on the mic and when the input signal at the mic rises above a certain threshold the speaker is cutoff and the mic signal is passed on. Below the threshold, the mic signal is prevented from being passed on to the rest of the circuit. There is a time delay (a dwell time, if you will) so that once the mic is activated, the mic will remain active (and the speaker dead) for a second or so after the signal drops below threshold to permit you to take slight pauses between breaths and sentences without the circuits switching.

The mic is positions relative to the speaker such that the speaker is unlikely to get loud enough to activate the mic. But it can happen. The time delay feature ensures that this does not result in a runaway feedback situation.

The circuitry to be able to carry on a two-way conversation simultaneously (full-duplex) on a speaker phone is not trivial (but not ultra complex, either) unless you can acoustically isolate the mic from the speaker. Headsets and handsets do this very nicely.

Someone has to ask the question.
What is an acceptable percentage for
wrongful executions? Say, if we only
execute one innocent person per 200 total
killed, is that a "good" record? You'd
be lucky to do that well.
Maybe 1 per 500 would be as near
to perfect as you could ever hope for.

I guess that's plenty low enough so long as
the "1" wrongly executed is nobody you know.

If there was enough of a deterrent effect, you
might argue these innocents are "acceptable losses" to
ensure a safer society (even though that's an
ends-justifies-the-means argument and volunteers
people to be martyred for our benefit),
but frankly there's precious
little evidence (that I've seen anyway) that enacting
a death penalty has *any* validated effect on the
murder rate.

Maybe the BBC call-in show can solicit calls to
discuss the exact percentage to aim for... and how
we might develop technologies to dig them up and
reanimate them if they're later found to be innocent,

since we're playing God anyhow, so why not?

Zero. That's why the governor, a Death Penalty proponent, btw, put
a moratorium on them. If we can't do it right, we shouldn't do it at
all, was his thinking. And that's good thinking.

> Say, if we only

There are those who would argue exactly that. I'm, however, not one of them. As I said in my earlier post, the primary premise upon which the US system of jurispurdence is based is that it's better that 10 guilty go free, than one innocent man be locked up. I agree with that.

As far as the use of the Death Penalty as a deterrent goes...you're right that is a debatable point.

> Maybe the BBC call-in show can solicit calls to

: > the 1930s onward. He was also a patent attorney.
: > --
: > Jim Rosenthal, WA4STJ

: Yeah...BUT if he was blind could he have been a patent attorney?

I once worked at a place that had a blind inspector checking the wiring
in the back of relay racks by feeling around the back of the cabinet.

: I guess he couldn't be an active CB operator...

Certainly not in the 1930s :)

:but if he knew the Morse code he could have been a HAM.

He could have also been a telegrapher.

: A great great uncle of mine was a bigamist. He had two wives that were
: known to exist and who knows if he had others? He moved from Georgia
: to New York in search of women and in the days that he did so he was
: hard to trace....even though he wasn't an attorney of any kind.

Not being an attorny caused him to be a bigamist?

: I
: dunno what, if anything, he did for a living....but it didn't require a
: driver's license....nor good speech or hearing.

Submarine drivers don't have to have driver license either.

: That was on my father's side of the family.

Is that good?

: On my mothers side, an uncle of mine (not a great uncle)held patents
: related to motion picture cameras and projectors.

That doesn't count here. :(

; He was a movie
: cameraman in the days of silent movies. He filmed the Keystone Cops
: and various cowboy movies when they were made on Long Island, NY...but
: he lost out when he refused to move to Hollywood, CA when the industry
: did. He never had a driver's license but used the NY subway.

Even the subway driver doesn't need a [car] drivers license. Nor does he
have to stop for firetrucks.

: 73, Bob Wex w2ilp (Insure License Potential)

Man, we're really scraping the bottom of the barrel for something to talk
about ;-)))

I never referred to ANY cases in Illinois. What I referred to is the bleeding hearts who gather outside prisons with candles and protest the execution of a PROVEN murderer and rarely, if ever, mention the loss of innocent life of a child, the brutal rapes, or the ruination of lives caused by hardened criminals. I said it once, and I'll say it again: These scumbags should be HANGED instead of being given a "shot" to put them to sleep mercifully. Moreover, those who rob, beat, or swindle should be put on "chain gangs" building roads or breaking rocks instead of being placed in air conditioned hotels with cable TV! Why should the victims of their crimes be made to keep them up with exorbitant taxes while law abiding cicizens have to WORK to obtain the same amenities?

Hi, I was wondering if anyone knows of a good electronics dealer, preferably online, where I can find a replacement mic element for an HTX-100 microphone. I need a dynamic microphone element. I know Mouser Electronics sells mic elements, but I need a smaller diameter element than the ones they sell. Can anyone offer me the name of a dealer that sells replacement mic elements, or where could I find a replacement mic element for an HTX-100 microphone, short of calling Uniden? Thanks for the help!

73,

Mike Brown KU4UV

2162. 250 Free 'eyeball' QSL Cards

Vista Print is offering 250 free business cards that make great 'eyeball'
QSL's cards.

These cards are in full color, and look great.

You design the cards with software that runs in your browser.

Then pay a small shipping fee for them. (currently less than $5 in the US)
You can also order more than 250 at a discounted price.

The link is:
http://service.bfast.com/bfast/click?bfmid=26298982&siteid=34622821&bfpage=88by31links

(disclaimer: I don't work for VistaPrint, but I am one of their customers,
and affiliets. If you don't approve of me making fellow hams aware of this
offer, while getting affiliet points, please feel free to go direct to
vistaprint.com without using my link. They will still give you the 250 free
cards. [enjoy])

Well, since I don't anything about the Illinois cases you mention, I certainly cannot say anything specifically about them. However, I've not seen a single case yet where DNA evidence has proved conclusively to me that the person could not have committed the crime.

For example, in some rape/murder crimes, DNA evidence has come forward to prove that the person may not have committed the rape, and some convictions have been overturned where rape was an included charge in the original murder trial. But, in my opinion, that evidence does not prove the person didn't commit the murder, only that the person may not have committed the rape. So, what really should happen is that the person should be retried for the murder, without the rape charge added in that new trial.

In fact, in my opinion, the DNA evidence does not even prove conclusively that the person did not commit the rape. All it shows is that the specific semen sample tested did not match the accused. However, other untested semen material could exist that could be linked to the accused.

But, as I said before, it is often impossible to retry the person, since the original evidence, from the original trial many years earlier, has been thrown away, destroyed, or has decayed to be point of being useless. Or, witnesses are no longer available. Or whatever.

So, in the end, a guilty person is walking the streets (probably claiming to everyone who will listen that the legal system is bad because it convicted an innocent man - criminals love to discredit the legal system).

> It is a premise in the US system of
> jurisprudence that it is better than
> 10 guilty men go free than one innocent
> man lose his liberty.

Well, that might be true as long as you're not the original victims of those ten guilty men, and not one of their possible future victims.

However, I do agree with this in general. But my point is that we should be darn certain a person is indeed innocent before releasing them back onto the streets. And, because of the reasons mentioned above, DNA evidence is simply not enough without something more to go on.

Paul... You can go to: http://www.arrl.org/arrlvec/pools.html and study the questions on-line or print out to hard copies.

I would highly suggest ordering a study booklet that explains the answers in detail. Others have stated that the books are worthless once you pass the test. Nonsense! These are good reference books and I occasionally look through them to refresh my memory. I have and use the Gorden West books. You can buy on-line or go to Radio Shack to get these study books. They also have the code study cassettes that you will need..... Memorizing techniques that get you through your exams will work but actually knowing and understanding how to calculate the length of a yagi element for example will be much more rewarding for you as you enjoy the hobby through the years!

I was responding to his specific reference to the single Illinois
death row inmate released. My point was that there were far more
than one. In this State alone. Not just released. Not just
overturned, but proven to have been innocent, wrongly convicted.
Yes, regarding the total number of criminals, this is a small
number. But I wasn't addressing that issue. Only to Jerry's
reference of the Illinois inmate on death row.

That's a good point. And in many cases a single piece of evidence
so tainted doesn't prove innocence, you're correct. However in the
cases in Illinois, the inmates were summarily released because the
DNA evidence proved conclusively that they could not have committed
the crime. This is not the rule by any means.

It is a premise in the US system of jurisprudence that it is
better than 10 guilty men go free than one innocent man lose his
liberty. It would seem however that there are some in that number
who have taken to abusing the privilege.

I'm trying to hook up a very simple speaker phone by using a single stage 1.1W aduio power amp chip. The dc supply for the chip is 5V. Anyhow, when I brought my mic close to the speaker, I got a very sharp noise. I perhaps this is so called the "feedback noise"? I try to reduce the noise by adding a cap in parallel with the amp feedback resistor & in between the mic and ground line. This somehow help me to screen out all the noise. However, the output gain for my speakers was thus reduced. Could someone provides me some ideas on how to solve this feedback noise issue but yet still able to produce a high db gain at the ouput?

Thanks a lot.

The first oscillator that I made that worked was done by simply putting
a microphone connected to the audio input jack of an old radio near
the speaker. The result was a nice audio howl, not too bad if I didn't
move things around. I even used it to practice sending morse code,
by putting my code key in series with the wire from the microphone.
I have a recollection that I then made it portable by using a carbon
microphone out of a telephone handset, and a speaker out of a radio.

The point is, that any time you bring the input of an amplifier
near the output, you will get feedback. It can happen if you run
the input wire too near the output, or if you have a microphone
connected to the amplifier, and put it near the speaker.

There is no way to eliminate this. If you start filtering it,
you will also affect the amplifier's ability to amplify the signals
you want it to.

A speaker phone is not just a matter of amplifying the signal to
the receiver in the handset, and feeding a speaker. It can be
done to a certain extent, they sell amplifiers that mount
on the handset between the earpiece and your ear to amplify
the signal for the hearing impaired, but it is a controlled path
and relatively little amplification is needed there. Once you
start amplifying so you can fill a room with sound, you will
ensure that the sound from the speaker gets into the microphone,
and cause that feedback.

Speakerphones use more complicated circuitry. I'm not up to explaining
how it is done at this late an hour, but by nulling signals properly,
the sound that comes in from the microphone only reaches

the amplifier feeding the speaker in a severely reduced level, yet
the signal from the phone line receives no such attenuation. But
it's a selective attenuation. Simply turning down the volume,
as you attempt to do with your capacitors, only reduces the volume
completely.

I've been reading this NG, along with several others. Lately, we have read about a ham arrested in Indiana for having a mobile rig. We now read that Michigan is close to passing a law requiring police permission to carry mobile radio gear, with a proposed penalty of a year in jail for violation. I also seem to recall something about a county in NY having recently issued a rule against mobile operating.

Are these connected? Has the possession / use of mobile radio equipment been targeted for repression, in a similar manner as the possession of firearms?

I don't like the trend I've been seeing in the U. S. The place is rapidly becoming less and less "free". Liberties I have taken for granted all my life are being chipped away, state by state.

I suppose the problem is that the possession of mobile radio equipment (like the possession of firearms) gives a person some "power" of which the government is afraid. It is indeed unfortunate that the people are now so feared and mistrusted by their own government.

I know that some feel the current Democrat administration is responsible for this trend toward decreasing personal liberty. These people may believe that a Republican presidential administration would mean the salvation of our liberties. Unfortunately, I don't believe that is the case. I've been around long enough to note that this process continues on regardless of which of the parties holds the white house.

I don't have the answers, but I am alarmed. I think we all need to wake up to what is happening in the land of the free and the home of the brave. It's not pretty.

fighting the HB-6012 is important, but determining the motive behind this action, and removing the incompetents that would support such a bill (that was conveniently hidden in the Transportation agenda) is equally , if not more, important!
The energy and material required to prepare each Michigan ham with a state police permit will cost major bucks. Train the State police on this issue, and to acknowledge the FCC issued document is more than adequate.
What really is the motive?
Did you notice the party alighnment?

Why the hell is our tax bucks being squandered on this crap?

Think of some of the scenarios - my non ham son borrows my truck that has 706 installed.
I leave portable 2m in my non-ham wife's car and she is stopped and arrested on way to work.

My non ham neighbor borrows my truck to get his heart medicine.

etc etc etc!!!

It's downloading a ba-zillion "jar" files (the compressed format for holding all the d*mn java code. That's what the software world calls "thin client". Bah! It's sad that I'm going to have to go through that AGAIN, the first time was bad enough.

And you are right about the web site. What wonders the "low bidder" can produce, eh?

David M. Drumheller < david.drumheller@dsto.defence.gov.au <mailto:david.drumheller@dsto.defence.gov.au> > wrote in message news:39E3B211.C4711EBB@dsto.defence.gov.au <news:39E3B211.C4711EBB@dsto.defence.gov.au> ...
"D. Stussy" wrote:

Apparently, about a week ago, the FCC redesigned the ULS web site.

However, when I went there to SEARCH (and NOT SUBMIT any changes), the site
tried to cram about 3Mb of something downloading into my computer, just by
clicking on search. It is documented that for submitting information, it needs
to install a browser plug-in module, but nowhere does it say that it needs this
just to search, nor has such been needed in the past. Additionally, my browser
indicated that as a security risk, whatever it was that was downloaded wanted
to read a file local to my computer's hard drive. Needless to say, it was
promptly cancelled.

Does anyone know what's going on here?

I also found the ULS web site difficult to use.

I tried to renew my US license over the internet, but got "stuck". After entering my tax ID and license number, the site refused to display the renewal form because it said I didn't have any license that required renewal. This was incorrect, as I was doing this one week before the license expired.

I gave up trying to do the renewal electronically. I just downloaded the PDF version, printed the form, filled it out by hand and mailed it.

Generally I found the site to be rather confusing: lots of buttons to click on; too much text displayed in a small font; confusing,

jargon-laden narratives. I was also annoyed at the site when it tried to install software on my compute (which didn't seem to work). This may be another example of a site written by a "computer specialist" who doesn't really have to use it and doesn't see the failings of his own work.

> Shack, such as LEDs and opto-isolators.

Experiment with them to discover what? What kind of gear are you going
to build out of this stuff? A morse decoder that won't work because most
fists are too poor to copy? An archaic QRP rig? With all due respect for
TAPR, how are you going to advance the art by breadboarding somebody
else's design using Radio Shack components?

> If you have not been able to keep up with the solid-state age ....

I am a senior engineer in a Government lab evaluating off-the-shelf
(COTS) hardware for applicability to military needs because - guess what
- not even Uncle Sam can afford to custom design and build his own
hardware any more. It isn't cost-effective and the gear is outdated
before we can get it to the fleet.
>

>
I fear your statements re: the internet and population are true. In that
case, Amateur radio has no future and we may as well turn over 2-meters
to the CBrs
and the HF bands to businesses.

As far as hobby homebrewing providing qualified technical people, you must be joking. Tech's who breadboard other peoples' designs are a dime a dozen; or rather $10/hour. In 1950, industry was hungry for BSEE's to design new circuits but now only the best EEs - the top 1% perhaps - are designing circuits for chipmakers and the rest are overpaid techs using those chips like legos. Hell, most are coding software because there are more EEs than real EE jobs! Nothing you can build out of Radio Shack components is going to train anyone to join that 1%. Sorry ....

> Do you want Hams to only think like CBers? Or do you just expect CBers
> to think like non-technical Hams? At any rate you must start to think
> about what the difference is between CBers and Hams.

Hmmm.. we say "roger" and "OM" instead of "10-4" and "good buddy"? ;o) It may be a blow to your self esteem OM, but from my perspective there has been little difference since economics turned us into "appliance hams". Federal law makes CBrs buy COTS equipment; economics makes most hams do likewise. A tiny percent of CBrs violate FCC law to build their own gear; a tiny percent of hams violate economic common sense to do likewise. A few bad apples poison the CB barrel and judging by FCC enforcement logs a few hams do likewise. The major difference I see is that Amateurs properly report the bad apples and help the FCC catch them while CBrs do not, but that could be rectified.

> You can start by reading the Basis and Purpose of Ham Radio ...

" (b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.
(c) Encouragement and improvement of the amateur service through rules which provide for advancing skills in both the communication and technical phases of the art.
(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts."

Do you suggest that we are doing these things using Radio Shack components?

> Why do you think that Hams are the only group of operators who are
> permitted to build and service their own equipment?

For the same reason that my grandfather got to fly without taking an FAA exam: because it made sense back then. When the service was established, and radio was in its infancy, amateurs did indeed contribute a lot to the state of the art, both technically and operationally, and morse code was essential to operating proficiency. This is no longer true. Those who have contributed in the last decade or so may have been amateurs by coincidence but they didn't contribute *because* they were amateurs; they contributed because they had access to well funded labs. So, to address your question, the reason we still have the privileges they earned is that we have so strong a lobby that taking away those privileges has been politically unwise ... but that lobby is shrinking.

> Hams need MORE license classes and/or endorsements.

I have a better idea. Let's have just one class with one test: in one week, independently design a transceiver equal in size and performance to the latest COTS transceivers without duplicating any of their designs. That way there won't be so many people "cluttering up" the bands, right? Not even you or I ... :o(

> Does the name Pavlov ring a bell?

Indeed it does. Pavlov demo'd that one could cause a biological response by showing some abstract figure only, and the key is "only", just before the subject got to eat, et cetera. You may also know that porn is defined as that which arouses us sexually. It follows that censorship creates porn by turning otherwise common items into porn by denying us their common view and instead allowing us to see them only just before sex. How about them apples?

2180. Contest Logger - Which One?

Newsgroup: rec.radio.amateur.misc

I want to know which freeware/shareware contest logging program to down load. There are many to choose from out there. I'm not a big contester but I would like to participate in this weekends FISTS sprint (14 Oct 2000). The sprint is single operator and singel mode (CW of course). The two primary criterion for selecting a program are:

- Free
- Quick and Easy to learn

The particulars which the program needs to handle for this sprint are:

- Must log Call / Band / Name / RST / State / Member-Number
- Must Dupe check Call / Band
- Would be nice if log can be exported via ADIF file format so I can later import it into my regular logging program.
- The program doesn't have to be sophisticated - no keying of rig, canned messages (I have a memory keyer already), rotor/rig controle, etc. etc. Just a basic logging program.

Your suggestions would be appreciated. Please give me the URL where I can download your suggested program.

Thanks - Jeff - KA9S

> Does anyone know what's going on here?

I also found the ULS web site difficult to use.

I tried to renew my US license over the internet, but got "stuck". After entering my tax ID and license number, the site refused to display the renewal form because it said I didn't have any license that required renewal. This was incorrect, as I was doing this one week before the license expired.

I gave up trying to do the renewal electronically. I just downloaded the PDF version, printed the form, filled it out by hand and mailed it.

Generally I found the site to be rather confusing: lots of buttons to click on; too much text displayed in a small font; confusing, jargon-laden narratives. I was also annoyed at the site when it tried to install software on my compute (which didn't seem to work). This may be another example of a site written by a "computer specialist" who doesn't really have to use it and doesn't see the failings of his own work.

Well said, Senior Chief, very well said.

The problem is one has to have been in the Navy or know something about
the Navy to know how badly you insulted him by calling him that.

Did you ever hear the word "billet" in your years in Sam's Navy? Did you
ever hear anyone use it instead of "rate"?

Kind of says it all, doesn't it?

2185. HAM Operators: Call to help defeat Michigan House Bill 6012 (It affects you if you just travel to Michigan)

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-11 04:25:42 UTC
From: President Livonia ARC <bj6957@n8hqg.mi.org>
Message-ID: <aZRE5.44$U54.25867@typhoon.mw.mediaone.net>
Source record: 102027

To all Radio Amateurs!

I know you might not be from Michigan, but the bill may affect you if you travel to Michigan!!!!!

The bill as written (House bill 6012) re-writes the law that allows Amateurs to carry radio receivers that are capable of receiving law enforcement frequencies (pretty much anything made in the last 10 years! mobiles, HF, HT's etc...) in a moving vehicle to now obtain a permit from the Michigan State Police. The penalty is a $500.00 fine and or 1 year imprisonment, to be caught not only having such radio operating, but even transporting (listen up out of staters) such a radio in a moving vehicle w/o a permit.

I encourage EVERYONE to write the members of the Michigan State House of Representatives to voice our opinion and have them dismiss this bill and leave the law it is changing (A bill to amend 1931 PA 328, entitled "The Michigan penal code," by amending section 508 (MCL 750.508), as amended by 1990 PA 77) as it is currently written (which by the way is OK for us! It allows Amateurs Tech->Extra to have such receivers in their vehicles).

You can locate the Michigan house of representatives at:
http://www.house.state.mi.us/locate.html

Please help stop the lawmakers in Michigan from adopting such a stupid law.

Bill Johnston, W8WSJ
President, Livonia Amateur Radio Club, Livonia Michigan

Below is a copy of the bill as written:

6012

September 27, 2000, Introduced by Reps. Kowall, Cassis, Julian, Shackleton, Birkholz, Howell, Scranton and Tabor and referred to the Committee on Transportation.

A bill to amend 1931 PA 328, entitled

"The Michigan penal code,"

by amending section 508 (MCL 750.508), as amended by 1990 PA 77.

THE PEOPLE OF THE STATE OF MICHIGAN ENACT:

1
Sec. 508. (1) Any person who shall equip a vehicle with a

radio receiving set that will receive signals sent on frequencies
assigned by the federal communications commission of the United
States of America for police purposes, or use the same in this
state unless such vehicle is used or owned by a peace officer, or
a bona fide amateur radio operator holding a technician class,
general, advanced, or extra class amateur license issued by the
federal communications commission, without first securing a
permit so to do from the director of the department of state
police upon application as he or she may prescribe, shall be
guilty of a misdemeanor, punishable by imprisonment in the county

06295'00 JJG
2

jail for not more than 1 year, or by a fine of not more than
$500.00, or by both fine and imprisonment in the discretion of
the court.
(2) This section shall not be construed as restricting the
use of radar detectors.
(1) EXCEPT AS PROVIDED IN SUBSECTION (2), A PERSON SHALL NOT
EITHER EQUIP A VEHICLE WITH A RADIO RECEIVER, OR POSSESS IN A
VEHICLE A PORTABLE RADIO RECEIVER, THAT RECEIVES RADIO FREQUEN-

CIES ASSIGNED BY THE FEDERAL COMMUNICATIONS COMMISSION FOR POLICE PURPOSES.

(2) SUBSECTION (1) DOES NOT APPLY TO A VEHICLE OWNED OR USED BY AN INDIVIDUAL WHO HAS OBTAINED A VALID PERMIT FROM THE DIRECTOR OF THE DEPARTMENT OF STATE POLICE ON A FORM PRESCRIBED BY THE DIRECTOR AND WHO IS EITHER OF THE FOLLOWING:

(A) A LAW ENFORCEMENT OFFICER CERTIFIED PURSUANT TO THE COMMISSION ON LAW ENFORCEMENT STANDARDS ACT, 1965 PA 203, MCL 28.601 TO 28.616.

(B) AN AMATEUR RADIO OPERATOR LICENSED BY THE FEDERAL COMMUNICATIONS COMMISSION IN 1 OF THE FOLLOWING CLASSES:

(i) TECHNICIAN CLASS.

(ii) TECHNICIAN PLUS CLASS.

(iii) GENERAL CLASS.

(iv) ADVANCED OPERATOR CLASS.

(v) AMATEUR EXTRA OPERATOR CLASS.

(3) THIS SECTION DOES NOT RESTRICT OR PROHIBIT EQUIPPING A VEHICLE WITH OR USING A RADAR DETECTOR.

(4) A PERSON WHO VIOLATES THIS SECTION IS GUILTY OF A

MISDEMEANOR PUNISHABLE BY IMPRISONMENT FOR NOT MORE THAN 1 YEAR

OR BY A FINE OF NOT MORE THAN $500.00, OR BOTH.

And that's the really hard part about relying on the system.
Sometimes, it's at best a very bad compromise.

> However, I do agree with this in general. But my point is that we
> should be darn certain a person is indeed innocent before releasing them
> back onto the streets. And, because of the reasons mentioned above, DNA
> evidence is simply not enough without something more to go on.

There was a great paper I read about a year ago, and for the life
of my I can't remember where I found it, that stated that every so
many years there's a new 'definitive' evidentiary technique that
provides infallible, despository proof of guilt or innocence. At
first that was only eyeball witnessing. And subsequent testimony.
And it was considered infallible until the first case where the
person convicted looked just like the person guilty. And that
method was set aside as supporting evidence when a new technology
was found: fingerprints...also infallible, despository proof of the
presence or not of the accused. And in time, the infallibility of
fingerprints were set aside when two nearly identical prints were
found relative to a single case. And fingerprints became supporting
evidence. Blood types, tissue types, hair types...fibers...all of
which were to be the end of all arguments, eventually were all set
aside in favor of other infallible despository evidence.

And then there's DNA. And we have no reason to assume that it's
any more reliable than any of the others at bringing a case against
the accused. And yet we do.

Yes, you're right, it's not infallible. This too shall pass.

Hello Radio enthusiasts,

welcome to 9th Rheintal Electronica 2000
Date : Saturday: 4th, November 2000
What : Radio-, Electronics- and Computer-Fair
Where : D-76448 Durmersheim (Germany, Europe)
south of Karlsruhe
Autobahn A5 Frankfurt - Heidelberg - Basel,
Exit Karlsruhe Sued (Rheinhafen)

opening: 9.00 hr (a.m., CET)
closing: 17.00 hr (5.00 p.m., CET)

Where exactly: "Hardt-Halle" at 76448 Durmersheim

Parking: Free of charge Transfer from Parking-Lot
to the fairground

Directions:
Amateur-Radio : 145.500 MHz (call DF0RHT)
CB-Radio : 27.135 MHz (CB-Channel 15 FM, AM possible)

What to find: Amateur- and CB-Radio equipment, Transceivers, Antennas,
Computer, Periphererial, Software, Hardware, Components, Literature,
Additional Accessoires

Local Usergroups and Organisations for CB- and Amateur

Yes, they are, but most of the devices in question are authorized as Part 15
devices, not as ISM devices, so the non-interference clauses prevail.

On the bottom of the amplifier you will see a 4 terminal strip. It is
near the rear and where the power cord is hooked in.

From left to right you have 1,2,3,4. For 220 volts you have a large
jumper wire connected from 2 & 3.

For 110vac remove that jumper and connect a jumper between 1 & 2 and
between 3 & 4.

Hope that helps.

You said "However, I've not seen a single case yet where DNA evidence
has proved conclusively to me that the person could not have committed
the crime."

I thought perhaps that you meant that in a reasonable way. I can see
from the rest of your post that I was wrong in that. It is indeed true
that no one no where will ever be able to prove conclusively to you
anything you don't want proven. Reasonable people can look at evidence
and draw conclusions from the evidence. So it all depends, I guess, on
how willing one is to look at the evidence. That you are not much
willing to look is apparent in your reluctance to read the rest of the
links I gave you.

> In fact, prosecutor David Walker seemed to be trying to make the same
>argument about DNA testing that I made in previous messages - the DNA
>test of the semen does not prove that Roy Criner is innocent since the
>tested semen could have come from someone else.

Of course you have no idea if this is true or not (or even logical
given the evidence of the case) since you failed to read to the
conclusion of the case. I posted a number of URLs because it followed
the case from when doubts were first raised to Roy's guilt to his
final release. For example, you mention David Walker's opinion (the
prosecuter of the case) but you don't mention that Montgomery County
District Attorney Mike McDougal came to the conclusion that Roy Criner
did not rape Deanna Ogg, a crime for which he has served almost ten
years in prison. McDougal recommended clemency in a July 28 petition
to the Texas Board of Pardons and Paroles, saying the evidence shows
that "Mr. Criner in all reasonable probability did not commit
aggravated sexual assault."

I will also point out that the above is totally stupid given the facts of the case. I don't plan to post a bunch from the articles unless I absolutely have to, but it is total nonsense to say that anyone but the murder left the seman. Certainly you don't want to go down the same road that the Texas Court of Criminal Appeals went down do you? When Judge Sharon Keller, who rejected a district judge's 1998 recommendation for a new trial said the semen could have resulted from consensual sex with someone else before the killing, since the victim was known to be promiscuous, it set off a firestorm that is still being felt this day. Stop and think a moment, a judge running the reputation of a murder victim merely to make a nonsense point to keep an innocent man in prision.

> Actually, the Roy Criner case is exactly the type of case I was
>talking about in those previous messages. While the DNA test does cast
>some doubt on his guilt, to release him as an "innocent" man would be to

>that a blond woman was sexually assaulted and killed just down the road
>from the very remote logging camp deep in the woods where he worked.

I am guessing from this that you did not read the first link very well either.

> Now, lets face it, just how many blond women do you think were roaming
>around the backroads of those remote woods at about the time these two
>incidents happened? And, to go further, what are the odds that he was

>the DNA evidence, perhaps he should receive a new trial. But he should
>not be set free so that he can go around claiming to be an "innocent"
>man, like so many released due to DNA testing are doing.

One reason that a person should not depend on just one piece of evidence, nor read one link in a group.

Roy Criner -was- innocent of this crime. He is now a free man after having to serve 12 years for a crime he simply did not commit. Had you read all of the links you would have found this out to be true. Are you even aware that he was only charged with sexual assult? He was not found guily of murder as there was not enough evidence of that. Do you really think that a person should be found guilty of a crime on eyewitness testimony alone? Even when there is no physical evidence linking that person to the crime? Even more important than that, do you disagree with the idea that there are innocent people in prison?

The only reason I posted this was because of your statement. Once again you said "However, I've not seen a single case yet where DNA

evidence has proved conclusively to me that the person could not have committed the crime." This is just wrong. Why just here in Texas between 1993 and 1996, 28 rape and murder convictions were overturned or dismissed on the basis of DNA evidence unavailable at trial. Both prosecutors and defense attorneys believe that DNA-inspired reversals will continue. "I'm inclined to think there are more [wrongly convicted men]," says Clay Strange, the self-styled "DNA guy" of the Travis County DA's office. I would offer you the URL explaining the reason why Clay feels this way, but I doubt you will bother to read it.

>he's guilty are just not enough.

Should I be surprised that no one seems willing to actually read the
story as presented?

Roy Criner was completely innocent of the crime he was convicted of.
He was never charged with Ogg's murder, only of sexual assult. When
the DNA test showed that it was not Roy's seman inside of Ogg, it
became pretty damn clear he did not rape her either. To suggest
otherwise to claim that she was promiscuous, as Judge Sharon Keller
suggested herself.

I would highly suggest reading about the case. It is getting downright
scary as to how easy it is for a prosecutor to convict you of a crime
you did not commit. I am fast coming to think that Prosecutorial
misconduct is far ranging and a very serious problem. Look at Darlie
Routier. Or the West Memphis Three. Or Cesar Fierro. Can I go on? You
bet.

That we have locked up innocent men for crimes they have not comitted
I think is beyond dispute. For those that would like to dispute it try
these articles.

They tried, but I don't think they succeeded.

>Are these connected? Has the possession / use of mobile radio equipment >been targeted for repression, in a similar manner as the possession of >firearms?

Maybe not. I don't tend to make conspiracy theories when simple stupidity and ignorance are perfectly acceptable explanations. The fact is that today radios have been packaged so nicely that people don't remember what a two way radio looks like, works like, sounds like or even why it's there. They vaguely remember CB radio as a bunch of outlaw users.

So now they see some dude sporting some truck or car with enough antennas sprouting off of it to make people think of porcupines. And what happens next?

>I don't like the trend I've been seeing in the U. S. The place is >rapidly becoming less and less "free". Liberties I have taken for >granted all my life are being chipped away, state by state.

Yes, and what allows liberties to be chipped away? IGNORANCE!

>I suppose the problem is that the possession of mobile radio equipment >(like the possession of firearms) gives a person some "power" of which >the government is afraid. It is indeed unfortunate that the people are >now so feared and mistrusted by their own government.

People who really know how to manipulate a technology, any technology, are considered dangerous by the rest of society who can't. This is not new. The only solution is to produce so much technology that the rest of the world is trying very hard to understand and keep current with what's going on.

>I know that some feel the current Democrat administration is responsible >for this trend toward decreasing personal liberty. These people may >believe that a Republican presidential administration would mean the

Hello,

I want to thank all who helped me with the Lafayette HA 460 Six Meter rig. All cap changes made and works great! Now to just find someone to talk to here..... :-)

yep-notice I said GPM (and especially with special characters, say like
$,:,;,&,and that good old "rabbit tracks: ")

Say, how about the cut numbers like:
1 = .-
2 = ..-
3 = ...-
5 = .
7 = --.
8 = -..
etc?
5 characters per group at 35 gpm for 1250 group msg will work up a bit
of dew on the brow.

Very true, Peter. Which is why I said that Criner should get a new trial.

And I do mean that in a reasonable way, Dominion. I don't think DNA evidence alone should ever be to total means of deciding guilt or innocence in our legal system. Certainly you don't want us to forget about a jury trial in those cases where DNA "proves" the person guilty, do you? Then why are you so quick to advocate a person go free, without a proper trial of the new evidence, when new DNA evidence comes along that "proves" the person innocent (in spite of the other evidence that says he is guilty)?

Roy Criner was only charged with rape, instead of murder and rape, because the prosecutor was not able to find enough evidence at the time to insure a conviction for the murder. So the prosecutor went with the charge that had the greatest chance of a conviction. Had that DNA evidence been available at that time, the prosecutor would have continued to look for more evidence to support the murder charge, or would have changed the rape case to better fit the DNA evidence.

In other words, because that DNA evidence was not available at the time, he was not able to make a case (either for or against Roy Criner) based on that evidence. Now that the new DNA evidence has become available, then perhaps Roy Criner should receive a new trial (where

Criner's lawyer can present that new evidence, and the prosecutor can respond to that new evidence).

But in no way should Roy Criner be set free as an innocent man, because a jury has not found him innocent (or guilty) of the crime based on the total evidence, whatever that evidence might be. So, again, while Criner should get a new trial, the DNA evidence alone has not "proven" conclusively to me that he is an innocent man.

By the way, since you don't seem aware of this fact, let me remind you that rape also includes oral sex, not just sex involving copulation. Therefore, his story to the three witnesses about coerced oral sex with a blond woman in that very woods is strong evidence that points to his guilt in the rape case. Since he never said that he copulated with the woman, semen found elsewhere in her body is not "proof" that strongly supports his innocence.

And, that is my last comment on the Roy Criner case, Dominion. As I said before, this is a general discussion about DNA evidence, not a discussion of Roy Criner case (or any other specific case where DNA evidence was involved). Therefore, I am not about to get into a long, drawn out, argument with you about the details of the Criner case (or any other case).

> suggested herself.

The prosecutor went with the charge that had the greatest chance of a conviction. Since Criner had admitted to three witnesses that he had coerced oral sex with a blond woman in those very woods at about the same time as the murder, a sexual assault charge had the greatest chance of a conviction. And, since sexual assault can include oral sex, he is not proven innocent because semen found elsewhere in her body does not match his.

Judge Sharon Keller's comment, about the victim's promiscuity when explaining the possibility that the semen tested could have come from someone else other then the murderer, is accurate since many of the victim's own friends described her that way. Therefore, the firestorm surrounding that comment was nothing more than a rash of political correctness which probably helped to change the way the liberal press covered the story (which helped to change public opinion in favor of Criner's freedom).

2211. The search for a gene...

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-12 00:00:00 UTC
From: analog24@webtv.net
Message-ID: <13102-39E67BD2-19@storefull-177.iap.bryant.webtv.net>
Source record: 101868

GENETIC
FACTOR EYED

Biofeedback Systems in Los Angeles, is looking for volunteers with a rare genetic inheritance, to participate in a proprietary study.

At present, it is believed that fewer than one person in 400 carries a rare genetic makeup that predisposes them to having better health than most, a strong immune system, and an unusually high energy level. Aside from behavioral manifestations such as a generally positive outlook on life, the principal evidence that this genetic factor is present, is mirrored in the shape of the eyes.

It should come as no surprise then, that the eyes themselves would be used to select the people who are nost likely to have this elusive gene. Individuals selected for this study will be white, Caucasian, of either gender, and between the ages of 25 and 50. Compensation will be determined by a collective evaluation of the total number of applicants selected. Drugs will not be administered as a part of the study.

The eye contour that embodies the required genetic trait, has been roughly described as "almond shaped," but this is not an adequate definition. Exact specifications follow.

Looking in the mirror with the head level, the qualified applicant will see that the lower half of their eyelid is CONVEX UPWARD, from the bottom on either corner. The bottom part of the iris will be partially covered by the lower eyelid (this is important), and there will be a reasonable symmetry between the eyes on the left and right side of the face.

Applicants must submit a close-up facial photograph for evaluation. Since no risk or disease factors have been associated with this gene, any risk to volunteers in the study is contraindicated. Interestingly, it is apparent that the "energy gene" as it has been called, may be dormant in one or both parents, yet it may be actively transmitted to their children; but it is only infrequently active among two or more siblings.

If you know of a person, or happen to notice one whose eyes might qualify them for this study (preferrably among those employed in the technical community), you may want to share this data with them. Since so few people are fortunate enough to carry this gene, your only encounter with one of them may be in a fleeting moment. It would be wonderful if you had a copy of this announcement with you, and could share it with a prospect in passing. Alternatively, you could specify this website and posting date, or perhaps my email address.

They may then contact Mr. Norman Swartz at this

[virus-proof] email address: analog24@webtv.net (It is not generally realized that, because webtv has no hard drive, it is immune to destructive computer viruses.) Or, they may write to: Biofeedback Systems, Post Office Box 8501, La Crescenta, CA 91214. No telephone calls please. Depending upon the number of volunteers selected, applications will be accepted through the end of December 2000, with a possible extension through 31 January 2001. The duration of the study will be a minimum of two years.

2213. Strange Devices on Street Lights (San Gabriel Valley in LA County)

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-12 00:00:00 UTC
From: Brian Andersen <brian@pipeline.com>
Message-ID: <0h82$hcF9Kla3@pipeline.com>
Source record: 101870
Cross-posted to: rec.radio.scanner,rec.radio.amateur.misc

In recent months, I've noticed peculiar boxes appearing on the necks of neighborhood street lights throughout the eastern cities in the San Gabriel Valley of Los Angeles County. All of the boxes are white and have antennas with coiled elements suspended from their undersides. They also appear to have coaxial cables running from their top sides to unobservable termination points along the necks of the light poles. They are not being installed on all the street lights, actually, but apparently on random poles--perhaps a couple of miles apart on any given street around the valley. All of the street lights they are suspended on, however, operate via traditional light sensor switches which turn them off in the mornings and on at night. So, I'm a bit puzzled over what purpose the new boxes are serving: they certainly aren't related to the control of the lights themselves. Has anyone else seen these, or know who owns them and what they're doing?

If it helps, I drew up a quick graphic in PhotoShop that shows what the boxes look like. See <http://www.snpp.com/staff/streetlight.gif>

They Started popping up in Santa Cruz in 1997 when ricochet started testing
the wireless 128kbs wireless modem network...they are wireless modem
receivers.

But......
The housings are pretty standard and can be used with other applications
and networks.

> and not too long after it appeared, my phone started to work there. The
> antenna looks right for 800 Mhz cellular.

That's very possible. However, in this area, I do not believe the boxes
are serving any purpose related to cellular. For instance, one is located
about 50 yards south of my home, while 50 yards north of me is a macro cell
site. Certainly there would be no "hole" only 100 yards from a high-power
site to justify a microcell (etc.) installation. Also, the valley I live
in is 99% suburban and very flat. So with respect to all of these boxes
(in addition to the one planted on my street), I'd have to guess that they
aren't related to cellular services. There generally are no high buildings
or hills to block the macro sites.

Thanks for the reply, though. :-) The mystery continues...

That's an interesting possibility. Do you know of any web sites (somewhat like dslreports.com, but for wireless providers) that could give me a list of companies serving my area? I'd be interested in checking with them to see if any do in fact own the boxes I'm seeing in my area.

Many thanks for the response.

2218. FS Collins 75S-3C

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-12 02:20:54 UTC
From: radioleo@earthlink.net
Message-ID: <ae9F5.318$MK6.13301@newsread1.prod.itd.earthlink.net>
Source record: 101839

I have a Collins round emblem 75S-3C receiver.
Its in very nice condition, its a 75S-3B S/N 85534 converted to a
75S-3C (Collins Factory Mod) these are the items it has:
1. Weighted Spinner Knob (not plastic)
2. F-455-FA-05 500 HZ CW filter
3. Filter Cover
4. Skytec (Tubesters)
5. Original tubes
6. Spectronics DD-1C Digital Frequency Counter (made for Collins)

7. A BEAUTIFUL receiver addition that includes an extra F-455-FA-21
2.1 filter.
As you already know this radio comes stock with a F-455-FA-21 filter,
it now has TWO. This makes the 75S-3C receiver have more selectivity.
You are unable to see it. Its done in the bottom of the chassis, and
under a metal cover...VERY NICE JOB.
8. I have the manual for the 75S-3C, Tubesters, and Spectronics DD-1C
9. Original Paint, Knobs, and feet, no holes of mod's to the chassis

Price is $2000.00 plus shipping

If you need to se pictures just ask....

Thank You, & 73,

Leo KJ6HI
(310) 670-6969

We are providing the Technician, General and Extra exams, along with several other categories, such as the FAA pilot exams.

http://www.webexams.com

It is free. We are not charging or requiring e-mail addresses.

You can take predefined or randomly generated tests, design your own tests, browse through questions and answers, have exams and questions emailed to you, and more. Exams can be timed or open-ended, and you can pause or suspend exams as interruptions occur. You can track your progress, and focus on your own weak areas, all free of charge.

Visitors to the site have told us it is very helpful in preparing for the radio exams, and a fantastic confidence builder.

We are very excited about providing this free, the way we think it should be, and would love to have feedback on how to improve the work we have done. In addition, if there are other exams you would like to see up, please let us know!

Dave

Dominion wrote:
>
> Try the case of Roy Criner.

Well, Dominion, I'm certainly not going to get into a case by case argument with you. However, I glanced over the first link you offered, and I certainly don't see anything there that challenged anything I previously said.

In fact, prosecutor David Walker seemed to be trying to make the same argument about DNA testing that I made in previous messages - the DNA test of the semen does not prove that Roy Criner is innocent since the tested semen could have come from someone else.

Actually, the Roy Criner case is exactly the type of case I was talking about in those previous messages. While the DNA test does cast some doubt on his guilt, to release him as an "innocent" man would be to ignore the other evidence in the case - for example, the fact that he bragged to three people that he had picked up a blond female hitchhiker, and coerced her into having oral sex with him, at about the same time that a blond woman was sexually assaulted and killed just down the road from the very remote logging camp deep in the woods where he worked.

Now, lets face it, just how many blond women do you think were roaming around the backroads of those remote woods at about the time these two incidents happened? And, to go further, what are the odds that he was having sex with a blond woman at about the same time that another man was having sex with another blond woman (and killing her) in the exact same remote area of those same remote woods?

In other words, just on this alone (ignoring any other evidence), I'm fairly certain that Roy Criner is guilty of this crime. Yes, because of the DNA evidence, perhaps he should receive a new trial. But he should not be set free so that he can go around claiming to be an "innocent" man, like so many released due to DNA testing are doing.

What you have here, Dwight, is something loosely referred to as "a
likely story," which, in the American system of justice is all the
defense has to prove.

You may be correct in your assessement that Criner is guilty. In fact, the odds are highly in favor of it. However, unless it can be proven, there is no substantial cause to hold him. The odds that he's guilty are just not enough.

The DNA evidence suggests that he was not the one guilty of the sexual assault. That casts doubt on the murder, as well. It's the doubt borne of the conflict created by the DNA evidence that becomes the issue. If the premise is that both the murder and the sexual assault were committed by the same man, then he has to be released, because the DNA evidence does not implicate him in one, it then exonerates him in the other. Other proof will have to be secured to hold him for this crime.

The framers of the Constitution were very sensitive to teh abuses of power. They were subjects of the Crown, And as much as we like to think of England as a seat of civility, the Crown has a long standing history of abuse of power against it's subjects, manipulation of the law, and creation of law that favored the accuser in securing a conviction, often without a shred of evidence. To protect our liberties, therefore, it was decided at the outset during the foundation of this nation, that such abuses of power were to be guarded against, by forcing the state to secure conviction through a high standard of proof. Not accusation, nor weighing the odds.

Given the examples we've seen in the last 10 years, do you not agree that such limit should exist? To bar summary execution by a government that has the power, and the demonstrated inclination to put armed troops in your living room?

Criner may be, indeed, guilty. But to structure the law such that he may be held on the likelihood of his guilt, is to empower police officers to shoot to kill on the likelihood of assault in routine traffic stops, the power to incarcerate for possession of mobile radio equipment, on the likelihood that it be used to evade the law, or to empower armed incursions onto private property on the likelihood that there be weapons, or illicit activities there.

That's a pretty horrid state to live in, Dwight. Criner may be guilty. The odds, as you've described the story, certainly suggest that. But a suggestion, in my book, yours too if I read you correctly, is not nearly enough. A suggestion is all the police would need to put all of us away.

And it has been evident too many times, that some police are not to be trusted with such power.

2222. Re: Crackdown on radio owners / users

> repression, in a similar manner as the
> possession of firearms?

Yes, the police have become convinced that criminals are using radio equipment (anything capable of receiving police frequencies) to avoid detection and arrest. Indeed, police magazines are filled with articles of sample cases of radio equipment found during police raids (etc).

Of course, very few of those magazines articles mention that all the cases combined (ever reported) would not even amount to one tiny percent of one percent of the total criminal arrests. Or that the radio equipment found obviously did not prevent detection and arrest in those cases where radio equipment was actually found.

Or, for that matter, few of the magazine articles mention whether the radio equipment found was even capable of detecting police frequencies (most of the stories simply report that a scanner was found, but not the scanner's capabilities). For example, I know of one case in Seattle where a radio was mentioned in a newspaper article in such a way to suggest that it was used to avoid the police, when in fact it was nothing more than a marine radio on a boat with no ability to receive police, or Coast Guard (the arresting agency), frequencies.

So, in the absence of full details, police officers, and local lawmakers, are left to imagine that this is a big problem which they have to address immediately. So, lawmakers make laws, and the police aggressively enforce those laws.

> I suppose the problem is that the possession of
> mobile radio equipment (like the possession of
> firearms) gives a person some "power" of which
> the government is afraid.

Yep, I've also noticed that those in the government who should know better (such as the FCC and others) are not exactly speaking up to challenge these misguided laws. Therefore, one cannot help but to think that someone "up there" likes these laws.

> I've been around long enough to note that this
> process continues on regardless of which of the
> parties holds the white house.

Absolutely!! Both political parties (Democrats and Republicans) have
a long history of eroding our rights.

> I don't have the answers, but I am alarmed.

Follow the money. Look at the group that puts up most of the money
for the two political parties. Look at who profits in our country while
our rights are taken away. Look at who profits from the government's
actions, such as the current massive immigration programs. Look at the
well paid group that holds most of the powerful non-elected government
jobs. Or, to put it another way, it is not the "elected" government
that you should fear - it is the people that those in "elected"
government work for (and that is most certainly not you or I).

Subject: ** FLEA at MIT ** Sunday October 15th Cambridge MA
Summary: Buy Sell SWAP Ham Radio Electronics Computers 9AM - 2PM

This coming Sunday... The seasons last FLEA at MIT...

*** Great News, we again have full use of the garage... :-)

*** !!!! In our Traditional GARAGE and lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday October 15th 2000
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $4 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $10.00-each at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23-W1BOS/R and W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

It stands for Sub-Group Identification Number, which is used to identify a licensed sub-agency or a licensed subsidiary. Since it very seldom applies to individuals, it probably doesn't apply to you. In other words, ignore it.

Cops should be working "scrambled mode"
Regards the scanner-toting thief:
Will the bill stop the scanner-toting thief from stealing scanners?
Personally, I dont buy your rep's explanation. ROTFLMAO
There is a current established bill that recognizes FCC licensed
Amateurs - rewritting it and omitting a conjunction is "job security
and redundant redundancy-nothing more/nothing less.
ROTFLMAO.

Your comments are great and good luck in the endeavor.

You can't COMPLETELY ignore it. I recently tried a ULS
transaction and got the electronic version of a "raspberry" for not
having the SGIN filled. Three zeros did the trick, but it wants to see
something in there.

I was doing an administrative update to our club station, so I am
not sure if this also applies to "individual" calls.

========
Have you tried the Kenwood Manual download site? Its at URL:
ftp://216.133.235.165/Amateur/Current%20Instruction%20Manuals/

It has TH22AT.pdf

Well, since YOU did nothing to help me why does it matter to you
anyway? Sir, YOU are very rude and out of place here.
MYOB is the word for YOU.
Everyone knows your reputation anyway, so your comments are worthless
anyway!

During the 60's I was privy to certain activities. One of which
impressed me to no end. Using a wire recorder to record normal plain
text cw. Then increase the playback speed considerable. Play same
into a standard radio. And reverse the process on the other end.

Sounded like a short burst of buzzing.

I've seen them in a few places in Canyon Country, CA (northern Los Angeles county). I think they might be microcells or picocells. There is one spot in my neighborhood where my cell phone ALWAYS disconnected in the past, as I dropped into a hole (in a canyon, completely surrounded by very close hills), but the phone works fine in that spot now. The strange white box appeared in about the middle of that former dead zone, and not too long after it appeared, my phone started to work there. The antenna looks right for 800 Mhz cellular.

I'm cross posting to alt.cellular. Perhaps someone there might know.

FWIW - My phone service is on Verizon, which is 800 Mhz B side CDMA cellular.

And, of course, he doesn't use the telephone, doesn't have cable TV (because he doesn't own a TV...TV is federally regulated), and has never traveled safely in an airplane. In addition, he didn't get any student loans to attend college, and doesn't wear clothing which meets Federal requirements for being fire retardant. Oh! And that car he drive on the non - public toll roads...he removed all of the federally - mandated safety measures in that car. Also! As a business owner, he's willing to forego any kind of protection the courts can offer. And he would never DREAM of buying insurance for his business (because it's federally regulated).

Nope, Dan doesn't need help from the government, because he's one of them - thar conservatives!

My HERO!

Sheesh.

In many states, the tide is turning. Witness the state of California's leap out of the affirmative action biz (at least in the college system). In our (very) competitive service - oriented economy, color matters much less (though people exist on either side of the spectrum, i.e.love 'em or hate 'em (minorities, that is)) than cost - effectiveness. I'm aware of at least a couple of companies which will hire the lowest bidder who can pass their in-house competency exams, and who possessses the minimum educational requirements, without regard (in an absolute sense) to their color.

Aaron: Membership is inseparable from the subscription except for the
following two exemptions:

A family member can join for $5 if a relative in the same household
is already a member and receiving QST. Also, someone who is blind can
join for $5 (no QST subscription). See: www.arrl.org/join.html, about
half way down the page.

Fair enough, Jerry.
I identify myself as a liberal, but as I get older, I guess I am becoming more conservative. On some things, I'm already pretty damned conservative (I own guns, I think I pay too much in the way of taxes, yadda yadda), and I agree that government is far too intrusive. However, I ask simply what is the alternative? Anarchy? Self-regulation doesn't work...big brother doesn't work...do we just let everything burn, throwing out the baby with the bathwater?

A question respectfully asked.

Got my callsign today from the fcc website! KG4JYS... So it took a total of 7 days (counting the day I took my test, and today (found the callsign at 9am) or 5 business days counting today... that's not too bad of a turnaround!

I guess now I've just gotta sell that hf tranciever I've got so I can pick up a 2 meter or something that I'm actually allowed to use :)

I disagree.

Have you ever watched an actor give an acceptance speech for an Oscar? It's the same thing as the groom in your example.

...and would you expect a politician, if elected to office, to send individual "thank you" notes to everyone who voted for him/her?

Burst xmissions-in the 60's - possibly an evolution of the Type A Mark
III
compress the cw -used a metal cable with both fiber and metal washers.
load the washers onto the wire in the cw format, use power wand to pass
rapidly over the assembly completing conductivity with metal washers.
portable-easy to use - burst xmission - obviously for clandestine
activity.

Hey-did you every use a PRD-1, or operate "Da turd"
AN/TRD-4 near Plieku?

cheers&beers

No, No, and No.
A Petty officer third class is on the bottom of the food chain - they only carry out orders given to them by their supervisors, Usually a 1st class or Chief and above. Third class petty officers are a danger to themselves and others due to their lack of experience. A "Real" Officer is a commissioned Officer (Commissioned by congress). These are usually people with Bachelor/Master degrees. I have never heard of a third class petty officer with a master's degree - why enlist when you can receive a commission and a higher payscale, along with responsibilities? I have heard of a couple of senior Chiefs (16 yrs +) receiving a master's degree, and a bunch of us earned bachelor's (took me 11 years of part time study) degrees.
-No he is just a lost soul with a serious personality disorder, and feels that he is powerful by sending flame mail. This is an Amateur Radio newsgroup, and this thread is definitely off topic.

Read what I said, not how you want to reinterpret . I said I don't need any government handouts or entitlment programs. I worked for what I have (a novel concept to many these days), and paid through the nose to the Feds on every dollar I made. The fact that they try to control and/or regulate everything is a separate issue from the fact that I earned my way instead of holding my hand out to the government for every assistance program that comes along.

They must use them here in Connecticut too. I know of a site on top of a utility lattice tower. Two antennae, one pointing one way up the street, the other pointing the other. The Microcell cabinet (which looks like a miniature version of their full sized radio cabinet) is at the base of the pole. Good fill-in equipment.

Give Tom Ayers the prize. Those devices have been installed around the country by several PCS service providers. Just as Tom said, they are mini PCS cell site units. They provide local coverage for the troubled areas.

As time passes, and more companies get into the 3G upgrade, you will see more of these units all over the place. They cost much less than the big site boxes. As they are designed to cover just a small area, the ideal place to put them is on light fixtures and cable TV wiring.

Okay, to say that you can "completely" ignore it might have been a bit of an overstatement. I've never had any problems when doing my personal callsign, so I assumed that it must only be an issue for sub-agencies and subsidiaries. But I'll keep that "three zeros" trick in mind if it ever does become a problem.

Hey, the exact same boxes have started showing up on stop light poles throughout the county here (the east coast). I first noticed them about two months ago, but dismissed them as something to do with the stop lights - perhaps something to replace the in-pavement sensors commonly used to trigger the light changes.

That certainly did not explain the small antenna (which is slightly different then the one you show), but it was the only thing I could come up with at the time. Anyway, that idea does not make sense if they are also being placed on normal street lights.

Now I really do wonder what those things are.

Well, Mark, we certainly do not have any 128kbs wireless modem networks in this small county (heck, we don't even have full cable modem service yet), but those exact same boxes have started showing up here.

This may be true, but the FCC software should know to not
demand an input, and/or tell individual hams to type in "000"
into it. Unless I missed it somewhere, the FCC website makes
no mention of SGIN.

They are secret mind-control devices. The top of the light pole contains a minature satellite receiving dish which picks up the mind control signal from government satellites, which goes down the cable to the local transmitter in the white box. Then the antennas transmit mind-control signals to people on the street.

I know it's true because I read it on the internet.

Actually, on a message board devoted to conspiracies I recently saw a few posts from people stating that the many cellular towers popping up everywhere are actually microwave mind-control transmitters. Guess the paranoid wackos haven't realized that everybody and their brother has a cell phone now... Go to any airport and you'll see hundereds of people yakking away on them.

Oh well, it's more fun to spread paranoia.

How many times do I have to read messages from hams that send a
"Thank You" addressed to ALL. When one seeks help and
someone takes the time to respond, the least the receiver of
help can do is send a simple individual reply for thanks. After
all-the respondents to this call for help responded one by one.
I have received up to 75 messages in a call for help and sent
individual thanks to each. It was very time consuming, but it
was the right thing to do.

Would you at your wedding, if you were the groom, get up at the
end of the reception and yell out, "Gee, Thanks everyone for the
gifts?"
If you are a T Y P I C A L ham--absolutely.

It is unlikely you will respond to this if you did not even bother to
respond to someone who H E L P E D you.

Please visit my World Wide Web Site, you have never seen a page like it. You
will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chick with really big knockers
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in". 7. The writings of me
and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people. 9. An
amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.

Also, run some #10 wire from a 30 A breaker on your panel for the outlet you will be using. A 2 x 3-500 amp pulls >20 amps on 110V. That's why it's set up for 220. Also don't even think about running anything else on the circuit if you ignore this advice and try running on a 20A 110V circuit.

Since you will need to run bigger wire in the first place, just leave it set for 220 and wire for 220.

One tape recorder, and slowing down the playback speed several times, what encoding is really possible regardless of how much swing the sender has? Sure one could send encoded messages, but they also would be obvious. Besides, lots of hams read the mail on any cw signal they can copy, so it's not exactly good security procedure.

>P.S. Is the FCC now handling license renewals in Oz? :)

It appeared to me that he was renewing his US callsign. I signed up for the ULS quite a while ago, when it was first offered. I've had no difficulty getting to it, although since my license has not gotten close enough to expiring to test, I can't adequately describe how well it works. Of course, one thing the FCC probably should do is begin issuing licenses for 10 years when for example someone moves, or upgrades. I've figured out that the FCC is probably wasting more time not renewing as it used to than it could possibly save.

One other comment, the FCC is one of the few agencies actually trying to improve what it does for it users, it gets some things wrong, but not because it insists on doing things its way, since it keeps on changing how it does things.

I think that that statement may bee in error. Membership without QST is $5/year. Check the arrl application https://www.arrl.org/forms/member_general-99.html There are several reasons that one would be allowed to join and not recieve QST, and in each instance the price for membership ONLY is $5. Which would indicate that the remaining $29 for a 1 year membership (27.50/year for 2 year, 25.67/year for 3 year) and is to pay for QST.

Now, having said that, I'd have to say that I disagree with this person, and if he doesn't like the ARRL and/or QST he should just NOT join, and shut up about it. Not to mention that $29 isn't really too bad of a price for a 12 month magazine subscription.

If a major portion of the moneys collected go toward lobbying, then ham radio would probably be better served if the ARRL spent the money attracting new hams. I'm quite certian the fcc would not take bands away from hams if the band in question was used very heavily.

Just my 2 cents -- I've been wrong (many times) before :)

2276. Re: HAM Operators: Call to help defeat Michigan House Bill 6012 (It affects you if you just travel to Michigan)

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-13 05:12:52 UTC
From: President Livonia ARC <bj6957@n8hqg.mi.org>
Message-ID: <oRwF5.1024$FD5.43868@typhoon.mw.mediaone.net>
Source record: 101883

I'm glad you hit the point. Since I posted this, I've received dozens of pieces of e-mail telling me "Whats your problem Hams are EXEMPT". I KNOW THAT!!! I should have put my beef, which you hit perfectly in the note I published as well...

Another beef we have is that some people may decide that its 1. not worth the effort to to go apply for the permit. 2. can't afford the permit. 3. won't apply out of spite. or 4. may be out of towners with radios, and if any of these people get caught without their 'STATE OF MICHIGAN PERMIT; (forget the one you have from the FCC, Its not worth anything here I guess) they are in violation of the proposed law and subject to the fine/imprisonment. One problem I have are the people that are doing 1,2 or 3, will reduce the number of people that have radio's in their cars, and or HT's with them, such that if there is a disaster etc, the 'pool' of available volunteer Amateurs is now LOWER.. We have enough problems keeping people in our hobby, why add more resistance! (HMMMMM..... Maybe this is part of the "REAL" motive... Its like tapping you on the shoulder, after a while it starts to hurt..... Maybe this is a tap, to help them get our frequencies!!!)

Secondly, what ever happend to the paperwork reduction acts that all the states are adopting. Right now, I take some tests, I fill out a piece of paper, mail in a check, and the F.C.C. issues me a FEDERAL license to operate a radio. Now the state wants to duplicate this effort and collect a fee (tax). Why can't the state link their (LEIN, Law Enforcement Information Network) into something as simple as QRZ database. When the cop that pulls you over calls it in, the dispatcher can look you up to see if the FCC says you're licensed (which they shouldn't even have to do if you are operating legally and have a copy of your FCC license with you) why does the state have to have their own database. Heck, forget the integration into LEIN, just have them search the web at www.qrz.com and save the software development costs....

The state representative that wrote the bill, wrote me back and says that it's intention is to stop theives from carrying scanners. Apparently this has been a big problem in northern Oakland County according the the representative. Now do you really think not having a permit for the scanner he's using to monitor police dispatches while he's breaking into someones house is going to stop him/her from carrying the scanner, or better yet, stop him/her from breaking in!!! I'm going to compile a list of all the good comments people have written me, and send it to him and hopefully we can change his mind... Our FCC license should be good enough...

Thanks for helping bring the issue to light...

Bill, W8WSJ

You bet they are , it's spelled POWER! And the people wanting to turn
this place into a police state to protect us from ourselves. You will
find the Internet among the things that the "simple" and the powerful
want to control.
>
>I don't like the trend I've been seeing in the U. S. The place is

Do you remember the movies of the 50's about the freedoms the
"Commies" didn't have? Looks like Kruzchef was right when he said they
would get us from within.
>
>I suppose the problem is that the possession of mobile radio equipment
>(like the possession of firearms) gives a person some "power" of which

Mainly because he WANTS to be JUST LIKE YOU, Roger.
A simple obsessional stalker is anything but simple. The delusional stalker, they frequently have never had any contact with their victim beyond the boundaries of their own mind. They may suffer from mental illness like schizophrenia, bipolar disorder or erotomania.

A delusional stalker is usually a loner, unmarried, socially immature and does not possess the interpersonal skills to maintain friendships and relationships. They have had few if any sexual encounters.

2296. Lamp dimmer RFI

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-14 00:00:00 UTC
From: Walter Spector <w6ws_xthisoutx@earthlink.net>
Message-ID: <39E8EB11.D7B6A066@earthlink.net>
Source record: 101704
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.misc,sci.engr.lighting

I finally tracked some RFI in my neighborhood down
to some lamp dimmers in one of my neighbors homes.
These are the kind that mount in an electrical box and
replace simple on-off switches.

They have about half a dozen of them sprinkled through
the house. According to my neighbor, they are 10-15
years old. We took the cover plates off of two of them
and they were the following:

1.) GE 600 watt - Mexican made, model number 8E23.
This guy was *really* noisy!

2.) Leviton 600 watt - model 6B42. This one may or may
not have been a problem - but it was definately on a
problematic circuit (and different circuit than dimmer #1.)

So I am wondering what suggestions anyone has for
RFI-quiet (and 'popularly priced') dimmers?

Also - do these things start out RFI clean and gradually
get RFI dirty over time? Or are bad dimmers pretty much
bad from the start? I'd like to get a couple and test them,
but wouldn't want to go through the effort of using them if
the brand I buy is going to start buzzing again in 6 mos...

Help!

My Kenwood 7400 Died :(But I found the bad part....it's either the MI301 or the MI402 diode in the final stage.

Can anyone tell me where to get these items, or if there is a replacement available???

Thanks,
Akoss

2299. Re: Lamp dimmer RFI

Newsgroup: rec.radio.amateur.misc

They're made with varying degrees of RFI suppression, from none to
a lot. All are noisy with a radio next to them, but not across
the room, for the good ones.

Lutron has a bunch, I'll search up the post I just did.

Good ones will cost you $30-50 each, but it will be quiet, and
they're such neat dimmers that your relations with your neighbor
will be pretty good. Diva 3-way was $33 at Home Depot.
=====
NNTP-Posting-Date: Thu, 05 Oct 2000 13:13:43 GMT
Newsgroups: rec.radio.shortwave

Lutron responds to a query:

Ron,

In short, the Nova is better at RFI suppression than the Diva.

Lutron controls basically provde three levels of RFI suppression. The basic rotary dimmer Lutron makes has a very basic
RFI circuit, which is usually adequate. One step up in RFI suppression would be in Lutron's Glyder, Ariani/Toggler, Skyl
ark, Diva, Maestro, and Lumea2 controls. Finally, Lutron's spec grade dimmers have the best RFI suppression in them that
Lutron puts into any wallbox controls. The spec grade dimmers are Vareo, Nova, Nova T, Centurion, and Athena.

The residential grade dimmers use a capacitor and a bar choke for RFI suppression. The spec grade dimmers use a capacito
r with a torroidal choke for RFI suppression. Each dimmer's RFI suppression circuit works best when fully loaded, so don
't move up to a higher wattage rated dimmer unless you have to in order to avoid overloading the dimmer.

Thank you,
Charles Reifinger
Applications Representative

Nope, Mark, right now I live on the East coast, way out in the country
in a small southern county (hey, I'm just visiting). And there is
certainly nothing like 128kbs wireless modem networks around here.
Heck, we don't even have reliable internet connections by telephone
(though the phone/cable company promises that we'll have cable modems
one day).

I doubt that dimmers get noisier with age. Some are designed better than
others. Usually, the more expensive models have more RFI suppression
circuitry inside. And, based on my very limited experience with these
dimmers, newer models should all have less noise than older models.

Hi! I am trying to find a good dx/contesting headset. All I have found are the ones from Heil and another company called Warren Gregoire. Does anyone have any experience with either of these? Are there any other headsets out there not commonly known about? Any info will be greatly appreciated! Please email direct to: NZ8C@aol.com

Hi,all.
During my flight from US back to Japan,
I saw an interesting recent movie highliting ham radio.

It went like;
A boy makes a contact with his deceased father via ham radio.
He investigates his father's doubtful death through contacts with his dad.
The scenes include many many ham radio contacts with shots of
old day radios and huge HF antenna..

Regretfully I missed the title of this movie and almost all the scenes
because I was hakf asleep.

Does anyone kindly let me know the title so I can search the video-shop?

SGIN is mentioned on the FCC's web site somewhere. I found it one day and made a note about it on my computer's notepad. Of course, I don't remember exactly where I saw it, but I do remember there was a casual mention of it buried deep in one of the instruction pages. If your browser has a "find" feature, you can open a few of the instruction pages and search for "SGIN." Its there somewhere, but I don't remember it saying much more than what I already gave you.

Hi, Chikako, the movie's title was "Frequency" and it didn't do too well in the US, I think (I'm not suggesting anything about it, I didn't see it (but, then again, we don't get much of a chance to see movies anymore!)). If you do a web search on that title and the word movie, I'm sure you will get more precise information...

Hah, I know what you mean, Scott. Membership in the ARRL hasn't cost me a thing since sometime in the 80's -- that's when the amount of money I gave them for a life membership effectively "ran out" (I hope they invested it wisely, though!). Now, I have ordered a number of books and what-not from them, but I have gotten good service and good books in return for my money, so I don't consider that as "want[ing] nothing but [my] money" either.

Mikey the NUTSACK GOBBLER is a well-known QRMer in the Kalamazoo, MI
area.
He also has a CRIMINAL Record....I heard that there was an
investigation of allegations of domestic abuse.

2338. Phonetic alphabets (Alpha Bravo Charlie Delta) (Oct 2000)

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-14 00:00:00 UTC
From: bck1@shep.cl.cam.ac.uk
Message-ID: <8sablvqjs1@pegasus.csx.cam.ac.uk>
Source record: 101770
Cross-posted to: sci.lang,rec.radio.amateur.misc

Phonetic Alphabets (Alpha Bravo etc)
October 2000

There is a widely known alphabet Alpha Bravo ... Yankee Zulu.
Such alphabets, used for spelling things out over voice
links, are variously known as phonetic/radio/spelling/
telephone alphabets, and the term analogy alphabet is also
used. This collection currently includes alphabets for the
following languages:

English, French, German, Dutch, Flemish, Spanish,
Portuguese, Italian, Romansh, Danish, Norwegian,
Swedish, Finnish, Czech, Slovak, Polish, Hungarian,
Croatian, Serbo-Croat, Slovenian, Greek, Romanian,
Turkish, Hebrew, Russian, Ukrainian, Swahili, Kwanyama,
Ndonga, Afrikaans, Chinese and Esperanto.

This posting supersedes the one of 4 January 2000. There is
a Slovenian alphabet and new material for Swedish.

My thanks to the many contributors, not all of whom are
acknowledged below. Particular thanks to Gwillim Law
gwil@mindspring.com for numerous contributions and for
looking after posting for a while.

Please report any errors. I will be glad to receive new
material; further references; anecdotes; whatever.

A Web copy of this article, together with some further
material, can be found at:

<http://www.cl.cam.ac.uk/users/bck1/menu.html>

There is also a copy of the article at:

<http://www.columbia.edu/~fuat/cuarc/phonetic.html>

Also, but not currently up to date:

<ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/phonetic-alph/full>
<ftp://ftp.cs.ruu.nl/pub/NEWS.ANSWERS/radio/phonetic-alph/full>

Editorial comments are in square brackets.

Brian Kelk bck1@cl.cam.ac.uk
14 October 2000

***** ENGLISH *****

The NATO phonetic alphabet:

Alpha Bravo Charlie Delta Echo Foxtrot Golf Hotel India
Juliet Kilo Lima Mike November Oscar Papa Quebec Romeo
Sierra Tango Uniform Victor Whiskey Xray Yankee Zulu

[This alphabet dates from about 1955 and is approved by the
International Civil Aviation Organization, the FAA and the
International Telecommunication Union; note that different
bodies prefer different spellings, so one also sees:
Alfa Juliett Juliette Oskar Viktor]

[The alphabet above is from the Cambridge Encyclopedia of
Language. An alphabet with Alfa X-ray can be found in The
U.S. Department of Defense Dictionary of Military Terms.
Alfa Juliett X-ray, which is the ICAO version, appears in
A Concise Dictionary Of Slang And Unconventional English
and also two Langenscheidt dictionaries]

[UK police use Indigo(???) instead of India.
German army handbook 90/91: Alfa Foxtrott Juliett.
Italian version: Alfa Charly FoxTrot Giuliet Romio Wiskey.
An Indonesian phrase book: Beta Ultra Volvo Whisky X-ray.
A precursor of the present alphabet (1952?) had: Alfa Coca
Metro Nectar Siera Union Whisky Extra]

Phonetics for digits (from an amateur radio FAQ):

zero one two tree fower fife six seven eight niner

From the Cambridge Encyclopedia of Language:

zero wun too tree fower fife six seven ait niner

Atlantic City ITU convention 1947:

Nadazero NAH-DAH-ZAY-ROH
Unaone OO-NAH-WUN
Bissotwo BEES-SOH-TOO
Terrathree TAY-RAH-TREE
Kartefour KAR-TAY-FOWER
Pantafive PAN-TAH-FIVE
Soxisix SOK-SEE-SIX
Setteseven SAY-TAY-SEVEN
Oktoeight OK-TOH-AIT
Novenine NO-VAY-NINER

'Telecom B':

[Note similarity to Apples Butter Charlie]

Alfred Benjamin Charles David Edward Frederick George Harry
Isaac Jack King London Mary Nellie Oliver Peter Queen Robert
Samuel Tommy Uncle Victor William Xray Yellow Zebra

[Found also in Swedish, Dutch, Hungarian telephone directories. An 'analogy alphabet' in a Kenyan directory has Charlie and no Y. A Swiss directory: Andrew Charlie Lussy Queenie Sugar. French/German vocabulary books: Andrew Charlie Lucy Mike Nelly Sugar Xmas. English phrase books for Spanish/Italian speakers: Charlie. A 'British English' alphabet in a Langenscheidt dictionary: Andrew Charlie Lucy Queenie Sugar Xmas. Norwegian dictionary: Andrew Charlie Lucy Sugar Victory Xerxes. Collins Polish dictionary: Andrew Charlie Lucy Sugar Xmas]

[Used as an English alphabet by telephone operators in Israel]

'British A':

Amsterdam Baltimore Casablanca Denmark Edison Florida Gallipoli Havana Italia Jerusalem Kilogramme Liverpool Madagascar New_York Oslo Paris Quebec Roma Santiago Tripoli Uppsala Valencia Washington Xantippe Yokohama Zurich

[An 'international' alphabet in a Dutch telephone directory has: Danemark. A 'French' alphabet in a Hungarian directory has: Cassablanka Danemark Que'bec Upsala Zu"rich.
An 'international' alphabet in a business book for French has: Italy Kilogram Zu"rich; the corresponding book for German has: Italy Kilogram Xanthippe Zu"rich.
An 'international' alphabet in a Langenscheidt dictionary: Danemark Madagaskar Que'bec Upsala Xanthippe Zu"rich.
An 'international' alphabet in a Larousse business book: Danemark Je'rusalem Que'bec Xanthippe]

[West Berlin telephone directory 1965: Danemark Je'rusalem Madagaskar Que'bec Upsala Xanthippe Zu"rich.
Santa Fe (Argentina) 1955: Dinamarca Habana Jerusale'n Kilogramo Nueva_York N~andubay Upsala Wa'shington Xantipo Yokoama.
Azores 1966: Danemark Ita'lia Jerusale'm New-York Que'bec Upsala Yokoham]

[Used as a French alphabet by telephone operators in Israel]

Bombay telephone directory 1962 (also a later source):

Army Brother Cinema Doctor English Father Gold Hotel India Jam King Lady Mother Navy Orange Paper Queen Raja Sister Table Uncle Victory Water X-ray Yellow Zero

Kenyan and Tanzanian telephone directories 1966:

Africa Bombay Charlie Durban England Freddie George Harry India Japan Kenya London Mombasa Nairobi Orange Peter Queen Robert Sugar Tanga Uganda Victory William X-Ray Yellow Zanzibar

Johannesburg telephone directory 1965:

[Note similarity to Alfred Benjamin]

Arthur Betty Charlie David Edward Frederick George Harry
Isaac Jane Kate Lucy Mary Nellie Olive Peter Queen Robert
Simon Thomas Union Violet William X-Ray York Zero

Malayan telephone directory 1964:

Australia Bombay China Denmark England Fiji Ghana Hongkong
India Japan Kedah London Malacca Norway Osaka Penang
Queensland Russia Singapore Turkey Uganda Victoria Wales
X'Ray Yokohama Zanzibar

Used by police in New York City:

[Note similarity to ARRL and Western Union]

Adam Boy Charlie David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Peter Queen Robert Sam Tom
Union Victor William X-ray Young Zebra

[Variants: Eddie Larry Nancy Thomas Yankee Yellow]

Used by police in Nassau County, Long Island, New York:

Adam Boston Chicago Denver Edward Frank George Henry Ida
John King Lincoln Mary Nancy Ocean Peter Queen Robert Sam
Thomas Union Victor William X-ray Young Zebra

Used by police in San Diego, California:

Adam Boy Charles David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Paul Queen Robert Sam Tom Unit
Victor William Xray Yellow Zebra

Used by police in Hutchinson, Kansas:

Adam Boy Charles David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Paul Q.. Robert Sam Tom Union
Victor William X-ray Yankee Zebra

Alternative phonetics sometimes used unofficially in amateur
radio:

America Boston Canada Denmark England France Germany
Honolulu Japan Kilowatt London Mexico Norway Ontario/Ocean
Pacific Radio Santiago/Spain Tokyo United Victoria
Washington Yokohama Zanzibar

[Also: Amsterdam, Baltimore, Brazil, Chile, Egypt, Finland,
Geneva, Greece, Guatemala, Hawaii, Italy, Kentucky, King,
Luxembourg, Montreal, Nicaragua, Portugal, Romania, Russia,
Sweden, Texas, Uruguay, Venezuela]

The ARRL (American Radio Relay League) alphabet (1948):

[Note similarity to Western Union and Able Baker]

Adam Baker Charlie David Edward Frank George Henry Ida John king Lewis Mary Nancy Otto Peter queen Robert Susan Thomas union Victor William x-ray young zebra

[Nowadays the ARRL endorses the NATO/ICAO/ITU alphabet]

Pre-1954 U.S. Navy Radio Alphabet:

(Communications Handbook, 1945)

[Note similarity to Able Buy Cast]

Able Baker Charlie Dog Easy Fox George How Item Jig King Love Mike Nan Oboe Peter Queen Roger Sugar Tare Uncle Victor William X-ray Yoke Zebra

[formerly used by IBM engineers for hex digits and pin positions]

Same alphabet:

- British forces 1952
- "Used by Armed services of USA & GB" (ARRL Handbook, 1945)
- "The Complete Morse Instructor..." (1944)

'Allied Services 1945': Edward Tape

RAF 1943-56: Able-Afirm Item/Interrogatory Jig/Johnny Nab/Negat Peter/Prep

U.S. Army/Navy 1941: Sail

[In similar alphabets: affirm, cast, hypo, inter, negat, option, over, prep]

RAF 1942-43:

Apple Beer Charlie Dog Edward Freddy George Harry In Jug/Johnny King Love Mother Nuts Orange Peter Queen Roger/Robert Suga Tommy Uncle Vic William X-ray Yoke/Yorker Zebra

[cf. aircraft in Dambusters raid: A-Apple B-Baker C-Charlie E-Easy F-Freddie G-George H-Harry J-Johnny K-King L-Leather (officially L-London) M-Mother N-Nuts O-Orange P-Popsie S-Sugar T-Tommy W-Willie Y-York Z-Zebra]

U.S. Navy 1940:

Affirmative Baker Cast Dog Easy Fox George Hypo Interrogatory Jig King Love Mike Negative Option Preparatory Queen Roger Sail Tare Unit Victor William Xray Yoke Zed

Western Union:

Adams Boston Chicago Denver Easy Frank George Henry Ida John
King Lincoln Mary New_York Ocean Peter Queen Roger Sugar
Thomas Union Victor William X-ray Young Zero

British Army 1927:

Ack Beer Charlie Don Edward Freddy George Harry Ink Johnnie
King London Monkey Nuts Orange Pip Queen Robert Sugar Toc
Uncle Vic William X-ray Yorker Zebra

RAF 1924-42:

Ac Beer Charlie Don Edward Freddie George Harry Ink Johnnie

2353. I, as a good democrat, believe.....LOL

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-14 00:22:45 UTC
From: kk7ho@aol.communicate
Message-ID: <20001013202245.26777.00001797@ng-ft1.aol.com>
Source record: 101828

I, as a good democrat, believe

a. that Margaret Sanger & Gloria Steinmen are more important to American history than Thomas Jefferson, Robert E. Lee or Thomas Edison.

b. that standardized tests are racist, but racial quotas and set-asides aren't.

c. that homosexual parades displaying drag queens, transvestites and bestiality should be constitutionally protected while manger scenes at Christmas and the 10 Commandments in your classroom should be illegal.

d. that AIDS virus is spread by lack of federal funding and not lifestyle.

e. that global temperatures are less effected by cyclical, documented changed in the earth's climate and more effected by yubbies driving SUVs.

f. that the NRA is bad because it supports certain parts of the Constitution, while the ACLU is good because it supports certain parts of the Constitution.

g. that taxed are too low, but ATM fees are too high.

h. that the military, not corrupt politicians, start wars.

i. that self-esteem is a gift to students from teachers and not something that is individually earned.

j. that hunters don't care about nature, but activist "greens" do.

k. that businesses create oppression and government creates prosperity & jobs.

l. that capital punishment is evil while abortion on demand at any point in pregnancy is good.

m. that gender roles are artificial but being homosexual is natural.

n. that guns in the hands of law-abiding citizens are more of a threat to your safety than nuclear weapon technology in the hands of Chinese communists.

o. that government knows how to raise your children better than you do.

p. that Al Gore invented the internet.

Virtually anyone can be a democrat. Just quit thinking; and then, vote that way.

Al Gore Reasons.

Al Gore Campaign Information

The first post was correct. The Ricochet mobile system IS the user of the boxes. Not only do they provide a "WAP" (Wired Access point) for laptops..but are also used for remote meter reading by the local power company. The meters "talk" to the box on carrier current and retransmit on the 902-928Mhz band in Spread Spectrum mode. The new boxes are 128K boxes..much faster than the first generation.

I am pretty sure the previous poster who suggested they were for
Mobile data communications (Ricochet) is correct. They are also
turning up in my neighborhood in Phoenix, every few blocks. They were
not there a few weeks ago. As it is a residential neighborhood, I
have a hard time believing it would pay to put that many microcells in
residential area. A check at the Ricochet web site reveals I am in
fact in a Coverage area currently being built out.

The antenna is to long for 800Mhz. My gut feel is that it is something
in the 400-500Mhz range. It is white box mounted underneath a street

light with the antenna pointing toward the ground.

Ricochet's web site confirms that they are indeed mounting radio transceivers on light poles and utility poles...

When I build stuff it is built according to my own needs and
specifications and well within the parameters of the same hardware
(such as low noise FET front ends as any of the major mfgs can
perovide. My stuff might not look as good aesthetically or be as
compact as commercially mass produced stuff but it serves my purpose
and is easier to service with the tools that I built it with. I don't
care how few Hams can build stuff but I do care if we forget to try to
teach those who might be interested in building stuff how easy it is to
do so. The costs are not excessive and are frequently less than the
cost of finished gear. I buy newly developed chips and other
components in small quantities of what I need from Digi-Key or Mouser.
I am a pack rat and save lots of parts. I salvage parts from old used
equipment. I buy stuff at HamFests. In short I know what I may be
needing and I buy it of canabalize junk to get it. I have many low
voltage power supplies on hand for experimentation and can easily
duplicate them from parts on my shelf. Often the junk has been built to
MIL standards and the parts are of high quality....sometimes higher
quality than mass producers might use. I test new circuits on
solderless contact boards before building the finished product. For RF
circuitry I don't always use PC boards. Sometimes I use a matal ground
plane in which I mount teflon standoff terminals for point to point
wiring. Sometimes I do use stripline PC boards...but only when this is
necessary.
>

Radio
> > Shack, such as LEDs and opto-isolators.
>
> Experiment with them to discover what?

Some say that Columbus did not discover America because there were people already here. If I build a new circuit using a 555 chip and some blinking LEDs I might not be discovering anything that others have not been able to discover....but it is for me a discovery; Just like when I discover where I left my can keys after I lost them...it is a satisfaction!

> What kind of gear are you going
> to build out of this stuff? A morse decoder that won't work because most
> fists are too poor to copy?
Morse decoders that won't work may be troubled by their software. This is a problem that is evident in the commercial decoders as well.

> An archaic QRP rig?

It is not archaic if it meets or beats the specs that a commercial rig can provide. There are only QRP xmitters...Receivers IMHO are tasked to do the same job in any case.
> With all due respect for
> TAPR, how are you going to advance the art by breadboarding somebody
> else's design using Radio Shack components?

If I find any bugs I would report them to TAPR. To be honest I have not built any TAPR kits...but I do read TAPR literture and may try building their kits or duplicating them in the future. I am especially interested in Spread Spectrum and if all goes well with others who use it I may be building some stuff that can communicate with them...but first I must learn as much as will be needed. I can not get it all from text books such as Dixon...nor fro ARRL pubs. To boil it down to actual design with real components I must underrstand all that is needed first. Now...even if I never live to actually building any SS gear, I can enjoy planning to do so...Just as some people enjoy planning to build a house or garder even though they may never be able to astually do so. I can build "breadboard" circuits that would be part of the finished product and see if they can function properly. Even if I don't build an entire working system I can get some self satisfaction out of that and I can understand the difficulties involved for others and appreciate their innovation if my circuits fail as well.

> before we can get it to the fleet.

I know! I worked on many government projects as an EE. You are preaching to the chior on that point...but my cellar is not a government job operation and I don't have to work under the burocracy of government regulations and MIL specs...nor do I have to satisfy a corporate leadership that often fights innovation. That is the beauty of being a Ham experimenter. It is legal to build anything except weapons of distruction as long as you only test it on the air within the rules of Part 97. You can build a lot of stuff that they won't let you build at work. I have tried out some ideas at home in the past that I later did use in the designs of test equipment that I was able to use at work. A m,issing pulse detector which can sync up serial pulses was tested by me at home before I promised to design a serial to parallel digital converter at work. If I had not tested the circuit on my own I would not have been able to promise that I could design the converter at work because I wouldn't have been confident that it would work. I also use crude temperature testing and troubleshhoting at home...a heat gun for hot and freon cold spray for cold. I couldn't use these methods at work wher the bureaucracy might insist on more precise work to be done by environmental testing engineers in another department before proceeding to build the end product. Such testing could take months or even years...just as incoming inspection of each component often does.

> to the CBrs
> and the HF bands to businesses.

AMATEUR RADIO has a FUTURE...If and only if hams behave as real hams. If they want to just be fun operators and customers for Japanese manufactured products it has no future. Eventually the Hams will discover that they are being led by the Japanese designers who decide on what is going to be made available to them and advertised rather than the hams themselves. Hams can never survive solely as users. Even the ARRL may eventually realize that. I hope it is not going to be too late for them to do so.

>
> As far as hobby homebrewing providing qualified technical people, you

using
> those chips like legos.

Yep...I've used chips and components like LEGOs. Some techs can do
that and some can't. Some degreed EEs can do that and some can't. And
worst of all; Some engineering managers not only can't but don't know
how to get any value out of those who can.

> Hell, most are coding software because there are
> more EEs than real EE jobs! Nothing you can build out of Radio Shack
> components is going to train anyone to join that 1%. Sorry ....

I disagree...but I would include Digi-Key and/or Mouser parts with the
RS parts.

Yeah...but lingo is not the same as innmovation.

> It may be a blow to your self esteem OM, but from my perspective there
> has been little difference since economics turned us into "appliance
> hams". Federal law makes CBrs buy COTS equipment; economics makes most
> hams do likewise.

Not economy...I beg to differ...but ARRL's economy which sees Hams as
users of their pubs and customers for their advertisers and not as
radio experimenters. That is the only reason that I bad mouth the
direction being taken by most present Ham leaders.

> A tiny percent of CBrs violate FCC law to build their
> own gear; a tiny percent of hams violate economic common sense to do
> likewise.

Not economic common sense in the case of Hams...just Hams who have been
taught to emphasize the wrong basis and purpose for the entire hobby.

> A few bad apples poison the CB barrel and judging by FCC
> enforcement logs a few hams do likewise. The major difference I see is

> that Amateurs properly report the bad apples and help the FCC catch
them
> while CBrs do not, but that could be rectified.

Sometimes CBers do help to locate the bad apples.. Those who run only 5
watts don't always go along with those who run 500 watts.

> service of trained operators, technicians, and electronics experts."
>
> Do you suggest that we are doing these things using Radio Shack
> components?

Not entirely...but it might be a starting point and is far better than
just assuming that the best Hams are the one's whose ECONOMIC condition
permits them to buy the best Japanese boxes that their money can buy.
There are some Hams who can't even put a BNC connector on a peice of
coax. BNC connectors and coax cable are available in RS for tjhose who
want to practice doing so themselves. I suggest that they don't buy
the "solderless" type connectors that are ment for audio appliances.

> > permitted to build and service their own equipment?
> >
> For the same reason that my grandfather got to fly without taking an
FAA
> exam: because it made sense back then. When the service was
established,

AHH!...but it still makes sense for many Hams who don't think like you
do.

> and radio was in its infancy, amateurs did indeed contribute a lot to
> the state of the art, both technically and operationally, and morse
code

Spread Spectrum is now in its infancy. The interleaving of many
digitized duplex signals within the bandwidth formally reqiired for one
simplex signal is now proven possible commercially. This is in its
infancy as far as Ham Radio goes. I doubt if the Japanese designers
will introduce us to it as long as they can continue to sell what is
basically the same stuff that has been around for 30 years. It is up
to Hams themselves to adopt this technology to Ham Radio.

> was essential to operating proficiency. This is no longer true. Those
> who have contributed in the last decade or so may have been amateurs

by

> address your question, the reason we still have the privileges they
> earned is that we have so strong a lobby that taking away those
> privileges has been politically unwise ... but that lobby is
shrinking.

It is now easier to devise your own pulse generator from RS parts and
to adapt a computer to be a pulse analyser than it ever was in the
past. Innovation may be better than a well equiped lab for the Hams
who can make use of what they have.

> > Hams need MORE license classes and/or endorsements.

> bands, right? Not even you or I ... :o(

Nah...I don't expect all Hams to be receiver designers...Many might
have more fun designing companders or digital filters or whatever other
specialty they seek to acquire. Some will still be Hams just to
collect DX QSL cards and that is OK as long as they are constantly
trying to modify and update existing antennas, hardware front ends and
software modes to improve their efficiency.

> > Does the name Pavlov ring a bell?
>
> Indeed it does. Pavlov demo'd that one could cause a biological
response
> by showing some abstract figure only, and the key is "only", just
before
> the subject got to eat, et cetera.

Me thinks that you may understand Pavlov's experiment but remember that
it wasn't done on people. You could be mixing up Pavlov with Skinner.
Skinner worked with other animals.
Pavlov rang a bell every time his dogs were fed...After a while, the
dogs began to salivate after a bell was rung, even when they were not
being fed anything. I apply Pavlov's experiment to Hams as
follows:...As you said, in the old days Hams had fun building radio
transmitters and working other Hams on the air...Now they have been
conditioned to have fun just by working other Hams on the air, by
advertisements...But the real meat and potatoes of Ham Radio is
gone...and if this doesn't get turned around Ham Radio will surely go
to the "Pavlov conditioned" dogs rather than thinking humans.

> You may also know that porn is
> defined as that which arouses us sexually. It follows that censorship
> creates porn by turning otherwise common items into porn by denying us

> their common view and instead allowing us to see them only just before
> sex. How about them apples?

Each of us may have any kind of opinion about porn, depending on our own hormone systems, our cultural conditioning, etc. This is quite a big subject but IMHO may have little to do with Ham Radio directly. In fact it is worthwhile hobbies, like Ham Radio, which can get our minds off porn in our spare time. Porn can become an obsession that can take up all of the spare time of some people, which is unfortunately not as reproductive as real marital sex...and can't be done well with devises that can be bought in Radio Shack either.

PCs can introduce us to porn...How about those Apples?...Maybe Eve gave Adam an Apple and he made her get dressed so she could tease him by being a stripper and getting undressed before there was any censorship or adult verification. Yep...That is probably how porn was born...because before that they didn't wear any cloths all of the time...so it wasn't usually a hard and fast big thing.

Some Hams like to be teased by the uncertainty of propagation conditions. Some Hams prefer the certainty of their own technical abilities. They want to be productive. Some folks want to be teased by porn. They may subconciously want to be reproductive but can't be without actually making real contacts. Some folks are just natural fruitful multipliers and propagate humanity so that it continues to survive.

> 73 all, de KA3DWW

Hams need more license classes and or technical endorsements.
73 you all,

The only sure way to find out what these are is to sample the 'goods' going into them using a frequency counter and see what comes up.

Some people have luck with installing Magnetic Low Voltage Dimmers in place of the regular Incandescent Dimmer. I know these cost more, but the have better RFI filtering. Usually a better RFI choke inside the dimmer.

Also, you can try installing Electronic Low Voltage dimmers these have FETs in them instead of triacs and are almost 100% noise free!! This is what I am using because I had a dimmer that buzzed also....

These dimmers may not be available at local home depot but I got them from:
www.lutron.com

Fortunately touch lamps don't seem to be our problem.

PG&E was replacing the pole transformer which services our houses
a while back. The foreman and I went around to all the houses
and flipped off their main breakers before he turned the power
back on. Then we went, one-by-one, and flipped each main breaker
while I listed with a portable radio ($15 Chinese lw/mw/sw/fm
set on lw.) This was the only house which showed *any* RFI. Cool!

Fortunatly I have good relations with this neighbor, and we
finally got a bit time yesterday to do a bit of detective work.
The dimmers were the problem.

Uh, doesn't matter. Unless you do your sampling somewhere inside the
circuit, hanging a frequency counter (actually a spectrum analyzer)
around the outside only shows you what's being received around the
outside...DC to light. You can't draw much information from that. But
some internet paranoid will try.

2369. Farting In A Flower Garden

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-15 00:00:00 UTC
From: kjisux@aol.comakduyeqv
Message-ID: <20001015163341.13461.00002182@ng-fv1.aol.com>
Source record: 101643

Like a fart in a flower garden, the genetically-challenged Kosher Jerkoff Idiot (WA9KJI) was stinking up 14.313 today. In a QSO with one of the few knuckleheads that don't realize what a back-stabbing, devious, lying little weasel KJI really is, David "Fellatio" Castle continued to fool the gullible N4FZ into believing that KJI is a poor, innocent, perpetually-persecuted victim on 3950. "The Liberty Net won't let me check in", whined WA9KJI. "W1WCR is against free speech", moaned the little scumbag. This is the same mantra that KJI has been chanting for years on 3950, trying to drum up sympathy for "poor widdle persecuted KJI". He is constantly fishing for sympathy, and occasionally he catches a few uninformed suckers like N4FZ who are gullible enough to believe him. After a while these folks usually come to realize that they have been suckered into WA9KJI's ongoing vendetta against the Liberty Net, and end up telling Castle to take a hike.

Speaking of N4FZ, does the guy admire himself in a mirror whenever he talks on the air? Ever watch a parakeet babble endlessly while looking into a mirror?

But back to KJI. This jerk is totally obsessed with the Liberty Net. Every time he gets into a QSO, he always brings the subject around to the Liberty Net and about how evil the Liberty Net is, how it is full of Nazis, racists, and anti-American traitors; about how it should not be called the Liberty Net because he isn't allowed to check in, etc., etc., ad nauseum. On one hand, he hates the Liberty Net and its participants, yet on the other hand he is jealous with rage because he cannot participate in the net. What an idiot!

WA9KJI's ongoing campaign against the Liberty Net and its participants is based solely on jealousy. It has nothing to do with the views expressed on the net or his inability to check in. It is only because he is jealous of all the attention the Liberty Net gets. He wants to be the center of attention. That is why he jammed the Liberty Net for years and years and years. He was jealous with rage because the Liberty Net was getting all the attention, while he was getting ignored as the scheming little cockroach he is.

Will N4FZ ever see the truth about Castle? Probably not, since he's too busy admiring his own verbosity every time he keys his mic, and apparently not paying attention to what's going on.

"This is only my opinion. You may have a different opinion, albeit wrong."

I have nothing but the deepest sympathy for you....
I'm sending you a streetlight modem and 40 miles of cable...good luck!

Mark

I have a GP350 Sixteen channel VHF handheld radio for sale.
The model number is P93MGC2C2AA.

This is a like new radio cosmetically as well as electronically.

I will sell it for the first offer over 250.00.

The radio will come with good battery and rubber antenna.

Payment will be in postal money order or bank cashiers check.

Thanks for reading.

Art KR4JO

SB DX @ WW < KB8NW $OPDX.481
Ohio/Penn DX Bulletin No. 481

The Ohio/Penn DX PacketCluster
DX Bulletin No. 481
BID: $OPDX.480
October 16, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH/WB2RAJ & The 59(9) DX Report, W3UR & The Daily DX, W3HC, K4UTE, K6GNX, N6RT, NI6T, WC7N, W7TSQ, AC8G, AC8W, K8YSE, 4S7RO/6Y5, DJ5AV & DX News Letter, DJ8FR, DF3CB, DU6/K9AW, EY8MM, FK8HC, G4CXT, G0PSE, HA0HW, IV3TAN, IZ1DFI, JA1ELY, JI3ERV, PA0VDV, RA9AC, SM6CAS, VK4FW, YS1RR and YT1AD for the following DX information.

3A, MONACO. Look for Tony/IK1QBT and Gianni/IZ1DFI to be active from here between October 21-22nd signing as 3A/homecalls. They will be using a Kenwood TS570, 100 watt (maximum legal power in 3A) to a vertical antenna multiband "Multicres". The only CW activity will be on all bands (emphasis on the WARC bands). QSL via the bureau or direct to their respective home callsigns:
IK1QBT - Tony Gallo, Via Capo S.Spirito 1/16, 17052 Borghetto Santo Spirito (SV) Italy
IZ1DFI - Gianni Pastorino , Via Clavesana 68 17051 Andora (SV) Italy.

3D2, CONWAY REEF. Mats/5X1Z (SM7PKK) and Nils/SM6CAS have announced a DXpedition here in 2001. Operators Nils/SM6CAS, Mats/SM7PKK, Janne/SM0DJZ, Pekka/OH1RY, Siggi/TF3CW and Steve/G4EDG will be active between April 5-24th. Three of the operators have already been on Conway Reef once or twice, and the majority of team are well seasoned DX-peditioners. Please note that they are looking for 2 more operators to join the team! The DXpedition will feature 4 complete stations running 24 hours a day. All stations will have their own generators, amplifiers and Force 12 antennas. No callsign/callsigns were mentioned in the press release. They have secured a suitable yacht for the undertaking of this DXpedition. The estimated cost of the DXpeditioon is approximately 45,000 (USD). Any support from clubs and individuals are greatly appreciated. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

3D2, CONWAY REEF. Hrane, YT1AD, reports that he has organized an operation to Conway Reef from February 5-15th, 2001. The following operators have been mentioned: YT1AD, YU1RL, YT6A, YU1NR, Z32AU (YU1AU), Z32ZM and possibly one more operator from Central America. There will be three stations active at the same time, each with 1KW amp. Each station will have two 3 element multiband beam antennas, one vertical and wires for Top Band. The callsign will be publisized on February 5th, 2001. The licence was issued on October 5th, 2000.

4W, EAST TIMOR. The operation by Dennis/K7BV, Dick/N6FF and Made/YB9BV as 4W/K7BV and 4W/N6FF should be coming to an end by the time you read this. OPDX InterNet Subscribers will receive the latest press release by Rod, WC7N, as an additional bulletin, however, a log search is available on the Web at: http://www.xcvr.com/4w/logsearch.asp

6Y, JAMAICA. Ron, 4S7RO, will be active on the air signing 4S7RO/6Y5. He has moved to Kingston, Jamaica, and expects to be here for the next two years. Meanwhile, Ron is not yet fully set up from 6Y5-land due to various shortcomings and inadequate equipment. However, he is working on it and hopefully will be back on the air very soon. He states that the local 6Y5 ham community has been VERY hospitable and generous. Ron plans to be active mainly on 20 meters CW/SSB (due to space restrictions). Unlike 4S7, Ron will sadly be unable to get on 160/80 meters. However, he may also try 6 meters and hopes to be able to work into the US! Also, his XYL, VU2MAB, will also be on the air from there shortly. So, YL award hunters...watch out! Those who worked him as 4S7RO on the various bands over the years and still need cards, please send them to Franz, DJ9ZB. However, when Ron does show up on the bands, please do not send cards to DJ9ZB as he is only aware of his 4S7 operations. QSL info is still not set. Stay tune.

9M6, WESTERN MALAYSIA. "The DX News Letter" reports that Peter, G4MJS, will be on the air as 9M6BAA on 6 meters and all HF bands from October 17-31st. QSL via G4SHF.

AH2, GUAM. Aki, JI3ERV/NH2C, Chairman of Guam Contest Club (GCC), informs OPDX that GCC will be active in the CQ World Wide DX Contest (phone) at the end of the month. The GCC, which was the Oceanic leader as a Multi-Single category in 1996, 1997 and 1999 (1998 won second place in the Oceania, as a Multi-Multi category), will try again this year to build on their Oceanic record as a Muliti-Single category using the callsign AH2R from Guam Island (KH2 - Zone 27, IOTA OC-26). Operators will be Aki, JI3ERV/NH2C; Kaz, JG3RPL/N1BJ; Seo, JR3RVO/WX8M; Toshi, JR7OMD/WI3O; Sam, JR8VSE; Koh, JH7QXJ and Noz, JE8KKX. QSL via JH7QXJ (direct or JA bureau, NOT KH2 bureau). PLEASE NOTE: The QSL Manager has changed. Their Sunrise/Sunset will be 2015/0755z. Also listen carefully for them between 7075-7100 kHz.

C6, BAHAMAS. Look for Gary/KI6T and Salvatore/KA6WHA to be active from October 25-30th using their homecall/C6A. They will also use C6AGS in the CQWW SSB Contest. QSL via home callsigns and C6AGS via KI6T.

D4, CAPE VERDE ISLAND. Alberto, IV3TAN, will be active from Sao Tiago (AF-005) from D44BS's QTH, October 22nd through November 1st. He will

participate in the CQWW DX SSB Contest as a Single Op/All Band entry with the special callsign D4A. For all QSOs with D44BS callsign, the QSL route is via Angelo Mendes, P.O. Box 308, Praia - Cape Verde. For all Contest QSOs with the D4A callsign, QSL is via I2MQP.

EP, IRAN. On October 10th, Hamid/EP3HR and his friend Yar/EP3SP opened their club station EP4PTT. This club is working with a license from Ministry of Post and Telephone of Iran. This club will only be active on 14 MHz as their equipment is home-made. Their antenna is a dipole and the output power is only 20 watts. QSL via the Iranian Bureau.

EY, TAJIKISTAN. Nodir, EY8MM, reports that an International group will participate in the CQWW SSB Contest as EY2A as a Multi/Multi entry. This is the first ever M/M attempt from Tajikistan. QSL EY2A via K6VNX.

FK, NEW CALEDONIA. Franck, FK8HC, informed OPDX in the middle of last week that he would be active during the weekend on 160/80 meters SSB between 0700 and 1900z. Reportedly, Franck and Eric/FK8GN have put up new antennas for the low bands 2 miles away from Eric's house on a mountain for the CQWW contests and are trying them out. Since the weekend has past, you may want to keep a listen for possible future weekends for another operation to take place.

FO, FRENCH POLYNESIA. Joel, F5JJW, is currently active as FO0/F5JJW from Gambier Island (OC-063) until October 18th. Activity has been on 15/20 meters SSB. Look for him to move onto Moorea Island (OC-046) on October 18th through the 22nd and then from Tikehau Island (OC-066) on October 22-26th. QSLs via F5JJW.

FO, MARQUESAS ISLAND. Toshi/JA1ELY and Mako/JA1OEM are going to Nuku Hiva Island (OC-027) October 18th through 23rd. The two will operate as FO0ELY and FO0TOH. They will operate on all bands 160-6 meters and SSB/CW/RTTY. Because of heavy pileups for the KH5K DXpedition, they will use lower frequencies like: 14010/14145 etc... 160m 1832.5, 6m 50100, RTTY 14077 21077. QSL via their homecall.

FO0, MARQUESAS ISLANDS. "The 59(9) DX Report" reports that Phillippe, FO3BM, will be active from Nuku Hiva for at least a week between October 25-29th as FO0SIX, 6 meters only. He is planning activity for the Australs in March 2001.

FO0AAA VIDEO. You may have missed the info that James, 9V1YC, has finished the Clipperton Island Video because you are not an OPDX Subscriber. Details on how to receive the video can be found on the Web page:
http://home.pacific.net.sg/~jamesb
By the way, James states that the A52A Bhutan video is just being worked on now. Stay tuned!

FP, ST. PIERRE AND MIQUELON. Stan/AC8W, Henry/K8DD, Ken/N8KR and Kurt/W8IQ will operate from St. Pierre, October 23rd through October 30th. Wire antennas and four 100w transceivers will be used with an emphasis on CW and RTTY prior to a Multi-Single entry in the CQ World Wide DX SSB Contest using FP/N8KR. QSL via home callsigns.

HB0, LIECHTENSTEIN. There will be another Hungarian-German DXpedition to HB0-land which will take place between October 28th and November 4th. The QTH will be at a rented house on a mountain near Triesenberg at about 1300m above sea level. Participants are Kazik/DL2SBY, Tamas/HA4DX (ex-HA4GDO), Geza/HA4XG Geza and Laci/HA0HW. Three stations will be set up and two will work 24 hours a day, one with amplifier, on CW, SSB and RTTY on nine HF bands. Some satellite operations are also expected by HA4DX. They will have several monoband and trap verticals, yagi for 12 meters and dipoles for 80 and 160 meters with a 240m long bevarage for reception. Each operator will use his own callsign after HB0/ prefix, followed by /p. All QSL requests will be answered the same way as they arrive to the operators (either via DL and HA bureaus or direct to operators CBA). They state that they will be happy to give you a new one on any band or mode.

IOTA NEWS.....
NOT OC-125. Gary, DU6/K9AW, has informed OPDX that he and his QSL Manager Paul/WF5T have been getting queries questioning his IOTA number. Gary has only operated from Negros Island (his home) in the Visayan Island group OC-129. Someone has mistakenly spotted him on a DX PacketCluster as being on OC-125 in the Semirara Island group (also a DU6 prefix). He is sorry for someone else's spotting error. The widest dissemination of this information is greatly appreciated.

KH5/KH5K, PALMYRA & KINGMAN REEF (Update). Garry, NI6T, reports that the motor schooner "Machias" departed Honolulu (not Christmas Island as reported last week) on October 10th, bound for Christmas Island in the Kiribati Republic with most of the DXpedition's equipment. The departure was a bit later than planned and will cause a delay in the planned rendezvous with the operator group which flies to Christmas Island on the 15th. They have updated their itinerary to minimize the impact on their stay at Kingman Reef. For updates, check their Web page at:
http://www.qsl.net/krpdxg
OPDX InterNet Subscribers will receive the latest press release on Palmyra as an additional bulletin.

P4, ARUBA. Look for John, W2GD, to be active as P40W October 25-30th. This activity will include an entry in the CQWW SSB Contest. QSL via N2MM.

PJ2, NETHERLAND ANTILLES. Joeke, PA0VDV, is expect to be active from October 26th through November 15th as PJ2/PA0VDV from Curacao. This will be a CW only operation on all HF bands. QSL direct to: Joeke van der Velde, Delleburen 1, 8421 RP Oldeberkoop, Netherlands; or QSL via the bureau (please mention "via QSL Regio R14"); or QSL requests can be made by E-mail after November 30th to: pa0vdv@planet.nl (Replies will go via the bureau.)

QSL INFO AND NEWS.....
QSL KH2F ONLY TO JA2TBS. Ken, N4UK, states that he is receiving QSL cards for KH2F which was his old callsign. Only send cards to the JA address.

GB0SM LOG ON-LINE. Tom, G0PSE, reports that the log for recent GB0SM St. Mary's, Isles of Scilly (IOTA EU-011) operation (September 29th

through October 9th) is now available at: http://www.qsl.net/g0pse
Thanks to Doug/N6RT the LogMaster. The log contains all the QSOs of
the three DXpeditions (1998, 1999 and 2000). The log can be accessed
for all three years by testing it with the callsign G0UKX. Who is in
the log for each of the three years.

Ruslan, RK9AD, reports that he is the QSL Manager for RA9AC, RN9AA
and UA9APA. He also helps to receive cards for UE9AAR/P (not IOTA) and
any other stations from UA9A-land. If you have a contact with these
stations and want to receive a QSL card, please send (with any request)
to: Ruslan Verichev, P.O. Box 9696, Chelyabinsk, 454081 Russia (or send
via bureau). Also send E-mail to: rk9ad@mail.ru

Bernd, DF3CB, reports the following: The callsigns 5V7VJ and XT2OW have
been reissued to the current German DXpedition by DL7DF and crew.
QSLs for QSOs with 5V7VJ between September 12-20th, 2000, go via G4ZVJ
QSLs for QSOs with 5V7VJ between October 4-9th, 2000, go via DL7DF.
QSLs for QSOs with XT2OW in February 1999 go via F5RLE
QSLs for QSOs with XT2OW after October 11, 2000 go via DL7DF.
Online logs and news can be found at http://www.qsl.net/dl7df

SV9, CRETE. Juergen, DJ8FR, will be taking part in the CQWW DX SSB Contest
as SV9/OH4FR as a Single Op/Single Band (10m, possible qrg: 28580 kHz)
entry. QSL via DJ8FR.

T88, PALAU. Hiro/JA1WSX and Toku/JA1QGT are going to be active from Palau
(OC-009) October 27th through 31st. Hiro holds T88WX, but Toku will be
issued a callsign after his arrival in Palau. Their activity will be on
80-10 meters SSB, CW, RTTY and PSK31. Hiro hopes to participate in the
CQWW DX SSB Contest as Single Op/All Band. Toku will operate other bands
and modes during the contest. QSL to their homecall via bureau or direct
to CBA.

TI5, COSTA RICA. Carlos/TI5KD and his two Japanese friends Hiro/JA6WFM
and Naomi/JM6EBU (YL) will participate in the CQWW DX SSB Contest as TI5WFM
as a Multi Op/Single TX entry. Before the contest Hiro and Naomi will be
active as TI5/homecall. QSL TI5WFM via JA6WFM and others via homecall.

TZ, MALI. Mac, TZ6JA, will be active again from Bamako. Mac will stay
for one month beginning October 20th for a government mission. Mac will be
active during the mornings (his time) on weekdays, but on weekends he will
be on all time. Activities will be on 40/20/15/10 meters only. QSL via
JA3EMU.

UA0, ASIATIC RUSSIA. Yuri, UA0SJ, reports that he will once again be
active in the CQWW SSB DX Contest as a Single Op/All Band entry from
Bratsk city (this 600 kilometers on the north side from Lake Baikal)
QSL via direct only to: Yuri A. Maltsev, P.O. Box 2304, Bratsk-City,
665700, Russia / Asiatic /.

UK JOTA INFO. Malcolm, G4CXT, reports that a full list of all special
callsigns being used by UK Scout stations taking part in the "Jamboree
on the Air", October 21-22nd, can be found under JOTA at the following

Web site: http://www.radio-scouting.org.uk
Where available this list includes links to home pages and E-mail addresses active during the event.

V6, MICRONESIA. Don't be surprised when you hear V6T1A during the CQWW DX SSB Contest. JA7HMZ and JA7KAC just received a notice from Micronesia Telecomm that their contest callsign V6A had been changed to V6T1A. QSL via JA7AO.

VK9C, COCOS-KEELING ISLAND (6 meters!). Wal/VK6KZ and Don/VK6HK will operate as VK9CZ and VK9CK, respectively, next weekend from October 21st through November 4th. They plan to activate 50 MHz which will be their main interest with 28885 kHz available for liaison. General HF operation will be available, (50 MHz conditions permitting). If HF is used, look for them on 28485, 21285 and 14185 kHz. Other HF bands may be tried if time and antennas are available.

VK0, MACQUARIE ISLAND. Alan, VK0MM, announced this past week that he will try to be active on CW/SSB only on "20 and 30 meters as realistically possible over the final few weeks". He states, "please bear in mind that, as with all the other personnel on the station, I am VERY busy with my work programme here. My website will be updated with schedtimes regularly." The ANARE 2000 crew is due to leave on November 12th for home (via a 3 week voyage via Casey Station in Antarctica). There will not be an amateur radio operator on Macquarie Island for the year 2001.

VP2, ANGUILLA. Three members of the Southwest Ohio DX Association will visit Anguilla from October 26th through November 2nd. They will be an entry in the CQWW SSB Contest, most likely in the Multi/Multi class. The contest callsign has not yet been determined. The operators are: Harry/AC8G (ex W8KKF) as VP2EH, Joe/W8GEX as VP2EP and Ron/W8ILC as VP2ER. QSL to home callsigns; best direct with a SASE. Before and after the contest, they will be on all bands 160-6 meters, SSB and CW.

VP5, TURKS & CAICOS ISLANDS. The North Florida DX Association will be active during the CQWW SSB and CW Contests this year using the callsign VP5DX. Operators will be Steven/AB4UF, Dick/K4UTE, Ron/N4KE, Mike /N4EPD, Mike/NF4L and Jim/NU4Y. QSL is now via NU4Y. Before and after contest, operators will sign VP5/homecall. QSL to their home callsigns.

XU, CAMBODIA. Hitoshi, JE8XRF, is going to be active from here October 26th trough 30th. His callsign will be issued after his arrival in Cambodia. His activity will be mostly on 15 and 10 meters SSB. He hopes to participate in the CQWW DX SSB Contest on 10 meters Single Band. QSL via JA1ELY.

ZK1, SOUTH COOK ISLANDS. Jim, ZK1JD, reports that the Cook Island scouts will be operating during "Jamboree on the Air" the third weekend of October as ZK1BS. In spite of callbook or other info, the QSL address is ONLY: c/o J. Ditchburn, Box 491, Rarotonga Cook Islands. There is no QSL manager! It was also mentioned that "There is no longer an operating QSL bureau in the Cooks, so do not bother sending bureau cards for any ZK1 callsign." We hope to have more details on the status of the ZK1 Bureau next week.

#CQDX HAS MOVED. Doug, N6RT, reports that the #CQDX chat channel is being
moved from Othernet to the WorldIRC network at: http://irc.worldirc.org
Everything is exactly the same, you will just have to reconfigure the
address you connect to in your DX-Telnet, mIRC, or other IRC software.
Please visit http://dx.qsl.net/cqdx for information
and instructions on how to plug the new address into your software.
Complete press release will be sent to all OPDX InterNet Subscribers.

Actually, I should have clarified my posting: I suspect that the
devices in question are actually transceivers rather than receivers, so
if discrete frequencies were used, it might be possible to sample their
radiated signals. On the other hand, spread-spectrum transmissions
would not reveal much on a frequency counter...

It is part of the Ricochet 128Kbs wireless data network. The antenna that
is pointing down is for 902 to 928 MHz spread spectrum communication to
wireless modems. Check the Metricom and Ricochet web sites.

Forget the modem and cable, Mark. Send me a plane ticket back to
civilization instead!!

No, actually, after living in the Seattle area for a few months (and a
crowded city in Italy before that), there really is something to be said
for the country life. It is less stressful, more laid back, and more
confortable, here. And the people seem calmer, less aggressive. I'm
going to miss all this when I do head back to the city life in a few months.

I will make the assumption here that you are speaking of the US Navy.

23skidoo <23skiddoo@house.com> wrote
> A Petty officer third class is on the bottom of the food chain - they only
> carry out orders given to them by their supervisors, Usually a 1st class
or
> Chief and above.

Wrong! ALL Petty Officers have to attend "Leadership Training" because they
lead
the Non-NCO enlisted (E-1, E-2, E-3)

> Third class petty officers are a danger to themselves and
> others due to their lack of experience.

This above statement clearly shows you have little or no knowledge of
the military or navy. Petty Officers (of any class) are often the MOST
experienced in their jobs because they have the most recent
hands on experience.

> A "Real" Officer is a commissioned
> Officer (Commissioned by congress).

Wrong again, the commission is signed by the Commander in Chief, NOT
the "congress" as you state!

> Bachelor/Master degrees. I have never heard of a third class petty officer
> with a master's degree - why enlist when you can receive a commission and
a
> higher payscale, along with responsibilities?

Once again, the above statement clearly shows you have little or no
knowledge of
the military or navy. In order to receive a commission without the Academy
or
ROTC, you need to start out enlisted & then start applying for a commission
when
you reach E-6.

Hi all!

Just thought I'd let you know that there is a new Chipswitch manual out. The one you get/have gotten with the Chipswitch is a bit difficult to read the programming tables. Well, PROBLEM SOLVED! The new manual is designed to look like the Original HR2510, HR2600 owners manual. The programming tables are also very nicely laid out without any confusion.

The manual is indexed, and searchable. If you have a chipswitch, by all means download it!

http://kjv.homeip.net/~hr2510

Click on the chipswitch information link on the left hand side.

If you go to the Radio Service section you can go to the HR2510 model in the Uniden section and download a PDF of the HR2510 owners manual as well. This one isn't indexed as it's basically a lows res scan of the original document. Also worthy of note is that the front cover WAS a tri-fold with the Schematic printed on the folding. This schematic was much too small to scan in. So, don't download it and expect to get it as part of the manual.

The HR2510 PDF manual was laid out in such a way that it can be printed, then folded, and aside from being a little larger than the original you should have a manual that is pretty close to the original.

Enjoy!

2390. Re: Lamp dimmer RFI

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-15 00:00:00 UTC
From: Terry McGowan <TKMcGowan@worldnet.att.net>
Message-ID: <bViG5.2682$7N.142656@bgtnsc05-news.ops.worldnet.att.net>
Source record: 101734
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.misc,sci.engr.lighting

Some dimmer catalogs used to list an accessory called a "debuzzing coil" - a choke to smooth the output wave so as to minimize audible incandescent lamp noise (filament hum). I recall that lower RFI was also claimed. The coil was wired between the dimmer and the load. The trick was to find a place to put the thing. It usually meant adding another wall box.

The script of the weekly
GB2RS NEWS BROADCAST
Sunday the 15th of October, 2000

The main news headlines:
ï¿½ RSGB HQ Open Next Saturday
ï¿½ RA to Formalise GB2RS Broadcasts via Repeaters
ï¿½ Unclaimed Lost Property at the Leicester Show
ï¿½ RSGB HF and IOTA Convention is Taking Place Today
ï¿½ DXpeditions to Kingman Reef and Eritrea On Air Soon
The news in detail:

RSGB HQ Open Next Saturday

RSGB Headquarters at Potters Bar will be open next Saturday, the 21st of October, from 10.00am. At half-past-ten, Robin Page-Jones, G3JWI, will be presenting a seminar entitled "Why EMC Will Save Amateur Radio". Admission is free, but places for the seminar must be booked in advance, so please call the new RSGB HQ telephone number - 0870 904 7373 - to book your place. RSGB Morse code tests at 5 and 12 words per minute will be available on demand between 10.30am and 12 noon, but please don't forget to take along two passport-size photographs and the appropriate fee if you wish to take your Morse test next Saturday. Visitors will also be able to use the GB3RS shack and visit the National Amateur Radio Museum and the RSGB book shop. [More about RSGB HQ]

RA to Formalise GB2RS Broadcasts via Repeaters

The RSGB Repeater Management Committee has received a number of new requests recently to broadcast the GB2RS news bulletin via existing repeaters. There are already a number of such broadcasts and these provide a useful service to all radio amateurs and are generally popular.
The requests were taken to the Radiocommunications Agency and whilst they were generally warm to the principle, they wish to formalise the existing permissions, along with any new requests, by introducing a system of Notices of Variation to existing and new newsreaders where repeaters are in use. This is because GB2RS is a broadcast service and repeaters are not licensed as broadcast stations.
All repeater keepers should have received a letter requesting up-to-date details of the existing schedule, and new requests for this service. The RMC has gained agreement that pending issue of the new Notices of Variation all of the existing services via repeaters can continue uninterrupted.
Please address any queries regarding repeater matters to Carlos Eavis, G0AKI, Chairman, RSGB Repeater Management Committee, c/o RSGB HQ, Lambda House, Cranborne Road, Potters Bar, Herts EN6 3JE.

Unclaimed Lost Property at the Leicester Show

At the Leicester Amateur Radio Show at Castle Donington, which took place at the end of September, two items of lost property were handed in and have yet to be claimed. One was a bag of shopping and the second was a handheld transceiver. If you lost either of these items at the show, please contact Geoff Dover, G4AFJ, on 01 455 823 344 as soon as possible with a description of what you lost.

And the organisers of the Leicester show have told us that the dates for next year's show are the 21st and 22nd of September 2001 - an early date for your diary!

RSGB HF and IOTA Convention is Taking Place Today

A final reminder that the RSGB International HF and IOTA Convention is taking place this weekend at the Beaumont Conference Centre, Old Windsor. A full lecture programme with three lecture streams continues until the afternoon of Sunday the 15th and day visitors are most welcome. Full details are available in the October issue of RadCom and are on the RSGB web site.

GB8MC at classic car show

The Cray Valley Radio Society is using the special event station callsign GB8MC today, Sunday the 15th of October, at the Crown Woods Classic Car Show in Eltham, South-East London. The event is in its 8th year and there will be over 400 classic cars on display. It is the biggest show of its type in the South East. GB8MC will have three stations operating - on the high HF bands, on 40 and 80-metres, and on 2 metres. A special full-colour QSL card will be sent to anyone who works or hears the station.

GS2MP from Shetland in CQ WW contest

The CQ World Wide DX SSB contest takes place in a couple of weeks, on the 28th and 29th of October, and throughout the world many groups are planning DXpeditions to rare locations for the contest. The North of Scotland Contest Group will be travelling to the Shetland Islands, which count as a separate 'country' multiplier for this contest, and will be operating as GS2MP in the multi-operator, multi-transmitter category. For a few days before the contest, some HF CW-only activity may take place, and GM4AFF/P will also be active on the 50 and 70MHz bands. GS2MP will be active from WAB area HU27 and Locator IP90 and the Shetland Islands count as EU-012 for the RSGB IOTA awards and SH1 for the Islands of Scotland Award. QSLs should be sent to Edwin Musto, ZS5BBO.

DX News

Now more DX news, sources for which include Newsline, 425 DX News and the ARRL DX Bulletin:

A DXpedition from the very rare DXCC entity of Kingman Reef - KH5K - in the mid-Pacific is expected to be on the air in "mid-October", although the precise dates are not known. The callsign will be announced when the operation begins. QSL for this operation is via K4TSJ, 2011 New High Shoals Road, Watkinsville, Georgia 30677, USA.

Two members of the Bavarian Contest Club will be active from Asmara in Eritrea between Wednesday the 18th of October and the 1st of November. Their callsigns

will be issued on arrival. They plan to operate on 160 to 6 metres on SSB, CW, RTTY and PSK31, and will enter the CQ World Wide DX SSB Contest on the 28th and 29th of October.

F5XX will be active as either FR/F5XX or FR5/F5XX from Reunion Island from now until the 23rd of October. Reunion counts as AF-016 for the RSGB IOTA awards. Toni, Z21KD, is in Laos and has now been able to obtain a licence, which is apparently valid until the 30th of October. His callsign is XW4XJ and Toni is active on 10 and 20 metres, SSB only.

Members of the Surabaya City Club Station will be active from Madura Island in the Java Coastal Islands Group next weekend, the 21st and 22nd of October using the special callsign 8A3B. The Java Coastal Islands Group has not been activated for the IOTA programme before and it is expected that they will be issued with a new IOTA reference number during the operation. The licence is valid for a year, and the group plans to operate for two or three days every month until October 2001. Operation will be mainly on 15 and 20 metres on SSB, CW and RTTY, though they plan to also try PSK31 and SSTV.

Angelo, I6BQI, is starting to really enjoy his retirement! He and his wife are touring in the Pacific region and he plans to be on the air from the South Cook islands, probably as ZK1BQI, between the 12th and 19th of October, and from Tonga as A35BQ from the 22nd of October until the 1st of November. Activity will be on all bands 80 to 10 metres, mostly on CW.

International Broadcasting

Last week we suggested that listeners might like to listen out for some medium wave DX in the form of an Indian one megawatt station on 1566kHz. GM0EKM on the Shetland Islands listened last Sunday and heard this station at 1650UTC coming in quite strongly from Western India. Perhaps others would like to try and then let us know if they can hear it between 1645 and 1900UTC. The time of peak reception will change as our winter evenings become longer and the sunrise in India occurs earlier.

We have also had reports of reception of the 1 to 10 kilowatt broadcasters in the USA using 10kHz-spaced channels from 1610 to 1700kHz, which we mentioned last month. In particular, one has been heard speaking Spanish on 1660kHz and another in English on 1690kHz, but they have not been identified. The first-mentioned could be WMIB on Marco Island, Florida, whilst the English language station could be WMDM in Lexington Park, Maryland. These may be heard best just before UK sunrise. Send reports by voice mail or fax to: 01 565 634 560 or e-mail to: gb2rs@cwctv.net

Contest News

The RSGB 21 / 28MHz CW Contest is taking place today, Sunday the 15th of October, between 0700 and 1900UTC. UK participants should send an RST report, serial number commencing with 001, and their two-letter District Code. In most cases this is the first two letters of the post code where you live.
On VHF, the fifth and final session of the RSGB 144MHz UK Cumulative Contest takes place on Friday evening, the 20th of October, between 8.00pm and 10.30pm local time.

Next Sunday, the 22nd of October, the RSGB 50MHz Contest is on the air between 0900 and 1300UTC. Participants should send their District Code and Locator.

The full rules of all RSGB contests for the year 2000 may be found in the October 1999 issue of RadCom. Both the HF and VHF Contest Committees have web sites, from which comprehensive contest details are available. Links to these can be found on the RSGB web site.

[Details of RSGB HF contests are at: www.g4tsh.demon.co.uk/HFCC/index.htm and VHF/UHF contests at: www.blacksheep.org/vhfcc]

Propagation News

And now the solar factual data for the period from the 2nd to the 8th of October, compiled by Neil Clarke, G0CAS:

Solar activity was moderate on the 2nd and then declined to low for the remainder of the period, with only small C class solar flares taking place. The largest flare of the week was an M1/1N on the 2nd. Solar flux declined from 203 units on the 2nd to 149 by the 8th. The average was 174, and the 90-day average on the 8th was 182, that's one unit lower than last week. X-Ray flux levels also declined, from C1.3 units to B5.3 by the 6th and 7th. The average was B7.1.

Geomagnetic activity started at 'unsettled' levels on the 2nd but increased to 'severe storm' by the 5th, with an Ap index of 96. The average for the period was 37 units.

Auroras were reported on the 3rd, 4th and 5th. The aurora on the 5th lasted many hours on 2, 6 and 10 metres. GI0OTC thought that the aurora was right above him, for no matter which way he turned his beam he could not peak any auroral signals. For a time he was getting stronger signals on 6 metres on a horizontal dipole, so presumably the signals were coming vertically down from above.

Solar wind data from the ACE spacecraft saw solar wind speeds increase, to peak at 550 kilometres per second on the 5th. Particle densities varied up to 15 particles per cubic centimetre, except on the 5th when they rose to 35. Bz fluctuated between minus 16 and plus 10 nanoTeslas except on the 5th, which saw variations to minus 27. Bz was southward for long periods at a time and all day on the 5th.

Now the ionospheric data for Chilton, Oxfordshire. The F2 daytime critical frequencies averaged 10.4MHz, but on the 5th fell to only 7.3MHz. The darkness hour lows declined from 4.1MHz on the 2nd to 2.1MHz by the 6th, with an average of 3MHz. The daytime highs took place around midday except on the 5th, which they occurred at 1600. The darkness hour lows occurred between 0400 and 0500UTC.

And finally the solar forecast. This week the active side of the sun is expected to be looking our way. Solar activity could be moderate on some days, but there is also an outside chance of a X-class solar flare taking place at any time. Solar flux levels should increase and peak around the 220s later in the week. Geomagnetic activity could be disturbed at first but decline to

'quiet' levels around midweek. There is a slight possibility of a major storm, due to an Earth-directed coronal mass ejection during the coming week.

MUFs during daylight hours at equal latitudes should be about 32MHz for the south and 29MHz for the north. The darkness hour lows should be about 9MHz. Paths this week to Australia should have a maximum usable frequency, with a 50 per cent success rate, of about 35MHz. The optimum working frequency, with a 90 per cent success rate, should be around 26MHz. The best time to try this path will be between 0800 and 1300UTC.

This section is also available in a Saturday update, posted every Saturday evening and for more on propagation generally, see http://www.rsgb.org/society/psc.htm.

Source record: 101716

I have a Collins round emblem
75S-3C receiver.
Its in very nice condition, its a
75S-3B S/N 85534 converted
to a 75S-3C (THIS IS A
COLLINS UPGRADE) .
These are the items it has:
1. Weighted Spinner Knob (not
plastic)
2. Collins F-455-FA-05 500
HZ CW filter
3. Filter Cover
4. Skytec (Tubesters)
5. Original tubes
6. Spectronics DD-1C Digital
Frequency Counter (made for
Collins)

7. There is a BEAUTIFUL
receiver addition that includes an
extra Collins F-455-FA-21 2.1
filter.
As you already know this radio
comes stock with a
F-455-FA-21 filter, it now has
TWO. This makes the 75S-3C
receiver have more selectivity.
You are unable to see it. It has
been located in the bottom of the
chassis, under a metal
cover...VERY NICE JOB.
8. I have the manual for the
75S-3C, Tubesters, and
Spectronics DD-1C
9. Original Paint, Knobs, and
feet, no holes or mod's to the
chassis

Price is $1799.00 plus shipping

" TUBES RULE "

Leo KJ6HI

Source record: 101717

RADIONEWS presents Newsline #1208 for 10/06/2000 from the Newsline webpage at http://www.arnewsline.org

==========

The following is a QST

The FCC creates a new CB service at 151 MHz that could impact on growth in ham radio. This story and more on Newsline report number 1207 coming your way right now.

MURS: New CB Service that could challenge Ham Radio

There will soon be another hobby-like, license free radio service and it could be in competition with ham radio for users. This as the FCC finally announces the creation of MURS; the Multi Use Radio Service. But some say it could be a boom for revitalizing ham radio. Bill Burnett, KT4SB, has more.

With little fanfare, the FCC created the Multi Use Radio Service on July 12th. Its birth went just about un-noticed everyone except those in the telecommunications industry who fought long and hard to see it become a reality.

Murs is really a new kind of license free Citizens Radio Service, but one not subject to the vagaries of high frequency propagation. This is because Murs operates in the 151 MHz spectrum not far above the two meter ham radio band. But unlike 2 meters, the Murs service is expected to be filled by everyone from hobbyists to commercial users all vying for local communications that is virtually regulation free.

Unlike its predecessor the micro-power Family Radio Service in the 460 MHz band, MURS permits users to run up to 2 watts of effective radiated power. There is no restriction on connecting external antennas to a MURS radio as long as the 2 watt effective radiated power restriction is observed. Also permitted will be phone patching, paging, telemetry and remote control operation. In addition to voice, the FCC is permitting Murs users to transmit packet, data and imaging.

Does MURS sound like a clone of the VHF and UHF Amateur Radio service? Well it takes a step beyond because there is no restriction on the content of communications in the Multi Use Radio Service. Also, repeaters will be permitted, extending the range of communications across an entire region.

But there are a couple of negatives. First there are only five MURS channels. They are at 151.82, 151.88, 151.94, 154.57 and 154.60 MHz. The first three are

listed as having an 11.25 Kilohertz bandwidth while the last two permit a 12.5 kilohertz wide signal. Also, continuous transmissions are permitted on four of the five Murs channels which is bound to cause havoc with those attempting to share with voice and other modes.

So what will the impact of MURS be on ham radio? First, it will interest kids who want to connect their computers to the internet so that they can constantly be on-line. It will probably also siphon off those adults who have been considering becoming radio amateurs but do not want to take the time to learn the theory, rules and regulations. This is almost a parallel to those who

fought to create a codefree amateur license because they did not want to learn the Morse. And as we saw from ham radio's experience with no-code licensing, those numbers can be staggering.

From Miami, I'm Bill Burnett, KT4SB, reporting for Newsline.

The final Multi Use Radio Service rules are tentatively due out by the end of September or mid October at the latest. Radio gear should be available shortly thereafter. And from the ham radio perspective, the big question may become that of figuring out how to tap Murs as a potential source of new members for our hobby.

(FCC, W5YI, Newsline)

Ham Radio in Space: P3d launch date confirmed

I'm Bill Pasternak, WA6ITF with a late breaking story.

Good news. Barring any last minute delays, the long anticipated launch of the Phase 3d ham radio satellite will take as early as October 31st. This, AMSAT Germany Executive Vice President Peter Guelzow, DB2OS, says that the satellite will ride into space on Ariane Flight 507. Guelzow says that October 31st is the start of the launch window making it the first date at which the launch could take place.

But DB2OS adds that satellite operators planning to use Phase 3D should be made aware that it could be a few months after launch before the bird is ready for standard operation. He says that several things will determine the actual delay between launch and full user access. This includes the work that will be needed to nudge P3D into its final elliptical orbit.

The launch team has established an Internet web site that includes photographs of the team preparing the satellite for launch. The visit the site, point your browser to:

www.amsat-dl.org/launch/

More on Phase 3 D in future Newsline reports.

(AMSAT-DL)

Civil Rights in Ham Radio: LAMBDA vs ARRL vs BSA

The Lambda Amateur Radio Club wants the American Radio Relay League to sever ties with the Boy Scouts of America. This, over what Lambda says is the scouts policy of discriminating against gays.

The Lambda Amateur Radio Club is an organization comprised primerally of gay and lesbian radio amateurs. In an open letter from its President Art Joly, N1RPN, to League President Jim Haynie, W5JBP, Lambda requests that the ARRL officially and publicly distance itself from the Boy Scouts of America because of the organizations policy to dismiss and exclude gay scouts and scoutmasters.

As of airtime neither Haynie or any League spokesman has issued a public reply to the Lambda request.

(Lambda ARC Press Release)

Royalty: Luxembourg Royal Family leads to on air celebration

A shift in the line of succession in Luxembourg's Royal House has lead to an on the air commemorative event that will continue through early October.

This, as Grand Duke Jean announces his intention to abdicate in favor of his son, Grand Duke Henri.

As part of the ongoing celebration, Luxembourg radio amateurs have been granted use of two special call signs. LX0GDJ will be active through the end of the month while LX0GDH will come on the air at the moment power of state is handed over to Grand Duke Henri. This station will remain on the air through October the 8th.

(Press release)

Reallocation: Australian Hams lose 420 to 430 MHz

Australian radio amateurs will be losing the spectrum between 420 and 430 MHz. The Wireless Institute of Australia has been told by the Australian Communications Authority that commercialization of spectrum is proceeding with the first allocation already having been made to a trunked radio system in Western Australia.

But that's not all. Another user to get this prime ham radio spectrum is a radiolocation system called Quicktrak. Quicktrack, like the Lojack system here in the United States provides stolen motor vehicle tracking. It currently uses 422 to 424 MHz as well as 424 to 424.5 MHz in the region in and around the city of Perth.

While the allocations are currently only in Western Australia the Australian Communications Authority has told hams that it is under intense pressure to retrieve the lower end of the 70 centimeter band for the Land Mobile Service in other parts of the nation. Right now, Australian hams will continue to have 430 to 450 MHz on a secondary basis, including the Amateur Satellite band at 435 to 438 Mhz, but no promises are being made that any of it is safe from

reassignment to other users.

(Q-News)

Enforcement: One class is as good as another

Back here in the U-S-A, FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth says that no one class of hams causes more problems than any other. Speaking on Hap Holly's Rain Enforcement Log, the man who oversees the rules says that in the enforcement arena, every class has its good apples and its bad:

Hollingsworth here

In-Q: Ive gotten numerous...

Out-Q: ...as the most bothersome.

Hollingsworth indicates that his office may begin gathering some statistics on which class of license has the greatest enforcement problems. If one class stands out, he says that he will let all of us know.

(FCC)

Enforcement: FCC pulls license of alleged Captain Truth

The FCC has revoked the license of a ham that they believe is the so-called Captain Truth. The ARRL's Rick Lindquist, N1RL, has the details on this rather strange interference case:

The FCC has cancelled the license of the individual it strongly suspects was "Captain Truth." The Commission notified John M. Yount of Newton, North Carolina, on September 5 that it was canceling his Amateur Extra class ticket because he failed to appear for re-examination. Yount had held the callsign K4QIJ.

The FCC zeroed in on Yount last spring as a prime suspect in its "Captain Truth" investigation into unidentified Amateur Radio transmissions and malicious interference. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth wrote Yount on March 29, citing FCC and other close-in monitoring evidence that indicated Yount's station was the source of "malicious interference and jamming" on 20 and 75 meters.

Hollingsworth said this week that "Captain Truth" has not been heard on the air since the FCC's initial letter to Yount on March 29. After failing to get a satisfactory reply, Hollingsworth wrote Yount in July requesting that he retake his examinations under the supervision of an ARRL-VEC volunteer examiner team on or before September 1. "And he never showed up," Hollingsworth said.

The FCC says radio-direction finding bearings led to Yount's residence and antenna. Part of its monitoring evidence resulted from work done by the FCC's High-Frequency Direction Finding facility in Columbia, Maryland, the FCC said.

Yount suggested in his only reply to the FCC that there were a lot of vehicles and other houses on his property and that someone else could have been responsible for the transmissions the FCC had monitored and tracked.

Hollingsworth said he wrote Yount again on June 1 to seek clarification and additional information in the ongoing investigation before sending the retesting notice on July 17. "I never heard from him again," Hollingsworth said.

I'm Rick Lindquist, N1RL.

At airtime, its not known if Yount plans to appeal.

(FCC, ARRL)

Enforcement: That's Business

FCC rules enforcer Riley Hollingswotrth has told Joseph E. Mattern WW4WJD of Orlando, Florida to stop gathering of traffic reports on Amateur service repeaters. This allegedly for use by his employer who markets this kind of information.

In a letter to Mattern, Hollingsworth says that the government has other evidence that indicates Matten has been requested to cease operating on certain repeaters by the repeater owners and trustees, but has refused to do so. Additionally, Hollingsworth says that Matten has used repeaters in his area to extensively discuss business dealings regarding computer equipment.

Matten was given 20 days from the date of Hollingsworths letter to respond. That date is now passed.

(FCC)

Enforcement: FCC clears BHPD

Meantime, the FCC says that there is no evidence of any wrong doing by officers of the Beverly Hills California Police Department . This, in regard to a ham radio disaster preparedness net and a repeater operated by the group.

In a September 20th letter to Ronald Derderian, KB6VTN, the FCC says that it has carefully reviewed the use of the N6BBW repeater and Derderian's operation as net Control of the Beverly Hills Police Department Disaster Communications System. It concludes that inasmuch as the net consists of Amateur licensees organized as a radio disaster response group, and only Amateur radio communications are carried out on the system, the investigation finds no violations of Commission rules.

(FCC)

The FCC iniated the investigation based on a complaint alleging that the net was being used to conduct routine police business. Also, that those not involved with the group were being excluded from using the repeater.

In addition to Derderian's response, the FCC also received a reply from Captain Robert Curtis of the Beverly Hills Police Technical Services Bureau. In its letter closing the case the FCC thanked Derderian and the department for their assistance with the inquirey.

Hams in the news: KB7TVO in Pop Photog Magazine

On a more positive note, the October issue of Popular Photography magazine presents an excellent photo-essay on Warren Faidley, KB7TVO, of Tucson,Arizona.

For those of you who are not aware, Faidley is the nations premiere severe weather photographer. He is the person who chases tornadoes and lightning strikes to get that unbelievable photos that appear in magazines worldwide.

While the story does not mention Faidley's call sign, the article titled "Storm Chaser" by Popular Photography Editor in Chief Jason Schneider does contain a photo of KB7TVO operating Amateur Radio from his vehicle. The rest of the photos are some truly amazing examples of Warren Faidley's photographic artistry.

(Popular Photography, Newsline)

QCWA: The Ballots have been counted

And the ballots have been counted and Gary Harrison, has been elected as the new President of the Quarter Century Wireless Association. Also elected was Croft Taylor as the organizations Vice President. Both are expected to appear at the upcoming QCWA National Convention scheduled to take place October 13th through the 15th in Toronto Canada. More information is on the web at:

www.qcwa.org

(QCWA)

RAIN promo here.

Farewell to the leader: Media Network to go web only

As of the end of October, the 20 year reign of Radio Netherlands Media Network as the worlds premiere shortwave listeners magazine program will come to an end. This as longtime producer and host Jonathan Marks, G8WGN, steps away from the microphone to focus on other duties with the Holland based media giant.

According to the program's Andy Sennitt, the last edition of the broadcast version of the show will air on Thursday, the 26th October. But Media Network, as a "brand", is not going to disappear. Sennitt says that he will expand Media Network as a web based entity, while Marks concentrates on his main corporate role as Radio Netherlands' Director of Programs for Radio, TV and the Internet.

Preservation of our past: 8XK to KDKA

Pittsburgh's National Museum of Broadcasting is trying to raise $50,000 to save the garage where a ham radio operator started the broadcast industry.

It was 1919 when Frank Conrad, 8XK, began his twice weekly transmissions from a brick garage behind his Wilkinsburg Pennsylvania home. Conrad used audio from phonograph records to test his gear and unaware that the public was listening in. Listeners responded and Conrad's employer, Westinghouse quickly grasped the commercial applications of the new medium.

And in 1920 Westinghouse began the operation of radio station KDKA with its own high power transmitters, its own antennas and Frank Conrad as the stations lead engineer. KDKA's first broadcast was on November 2nd, 1920 when it brought the public the presidential election results., Conrad's garage station remained the back-up site for that first KDKA commercial transmission. If the museum can raise the needed $50,000 it will be used to purchase the garage and move it to another site.

(Pittsburgh Press)

Science and Technology: Radio by light

It's being called radio transmission by light. This as the National Institute of Standards and Technology announces a new radio receiving antenna capable of being fed by fiber optic cable rather than conventional coaxial transmission line.

According to NIST, the secret is in the antenna design which incorporates circuitry that converts radio frequency energy to an optical signal. NIST says

that the primary application is in the digital world allowing faster delivery of data while cutting down on losses inherent to wire transmission lines.

(NIST)

DX Special: 136 kHz across the Atlantic

The Radio Society of Great Britain reports that G0MRF in the UK has been heard on the North American continent on 136 Kilohertz using a very large antenna. Now, other stations in the UK are being heard across the Atlantic pond as we hear from Jeramy Boot, G4NJH:

Two more stations have now achieved this feat using ordinary 'backyard' antennas. G3LDO's signals were received very weakly by VE1ZJ on the 11th of September at 2248UTC, which is just before sunset in Nova Scotia. A talk-back link was used on 14MHz, but the 136kHz signal was not good enough for a full contact.

The following night G3LDO's signals were received clearly in Canada, but conditions on 14MHz were too poor for a cross-band contact. On the 16th, VE1ZJ successfully received G3LDO at good strength and also read M0BMU's signals. Attempts at talk-back on 14 and 10MHz failed owing to solar activity. Tests every night since then have not produced any results.

Both G3LDO and M0BMU are using Marconi antennas at about 16 metres high, with ERP levels at less than half a watt. The LF transmissions have all used extremely slow Morse with dot lengths of three seconds, displayed on a computer screen using DSP spectrum analysis software.

I'm Jeramy Boot, G4NJH.

G4NJH adds that a 136 Kilohertz transmitter is being shipped from the UK to VE1ZJ and a beacon is on its way to VE1ZZ. The hope is that a two way trans-Atlantic contact on 136 Kilohertz will be possible in the not to distant future.

(G4NJH)

DX

If you are a VHF DXer, nothing is more important to you than propagation beacons. These automated devices can tell you if a band is open and to where simply by listening in. Now, Jack Henry, N6XQ reminds us over the VHF Reflector that those looking for pacific DX on should keep an ear open for the KH6HME beacons. They sit atop the Mona Loa Volcano in Hawaii. The 2 meter beacon runs 60 Watts into stacked 7 element yagis on 144.170. The antennas are normally pointed toward the middle of California. Jack adds that information on

this and on other West Coast beacons is located on the web at:

www.wswss.org/bcns/Westbcns.html

(VHF Reflector)

On the high frequency bands, KH6O passes along a reminder that the Hawaii Afternoon Net meets daily on 7.288 MHz LSB at 0200 UTC. Jim Reid KH7M is the Net Manager.

(KH6O)

And for you S-W-L's word that Radio Kuwait broadcasts daily in English from 18:00 to 21:00 UTC on 11 point 990 MHz. While beamed primerally to Europe, reception has been made on the U-S East Coast. Radio Kuwait is easy to spot by its distinctive interval signal of a clarinet playing an old Kuwaiti tune. The station is well-equipped with nine 500kW transmitters.

(RSGB)

That Final Item: TV network caught using foreign bird calls

And finally, as most television viewers have discovered by now, bird chirps and other natural sounds are often broadcast to fill the audio voids in golf tournaments. In fact, viewers have come to expect it.

Now, The CGC Communicator reports that bird call experts have recognized that some of those calls are not native to the regions of the tournaments. According to an unidentified Washington communications attorney, the network, which also remains nameless now admits that prerecorded out of area bird calls have been used during some golf tournaments. In fact, some video crews say that they try to attract real birds by placing seeds close to a microphone, but that scheme has yet to yield satisfactory results. Or at least that is what they claim.

But some viewers know the difference. So score one for an educated and attentive audience.

(CGC Communicator)

With thanks to the ARRL, the CGC Communicator, FCC, The Ohio Penn DX Bulletin, Radio Amateurs Canada the RSGB, the W5YI Report and Australia's Q News, that's all from the Amateur Radio Newsline. Our webpage is at:

www.arnewsline.org

and our e-mail address is:

newsline@arnewsline.org

You can also write to us at:

Newsline c/o Andy Jarema, N6TCQ P.O. Box 60937 Arcadia, California 91066

The Amateur Radio Newsline audio service is a copyrighted compilation and may not be excerpted or edited in any form without prior written consent. Amateur Radio service bulletin stations may delete the closed circuit advisories that appear at the beginning of some newscasts.

For now, with Bill Pasternak, WA6ITF at the editor's desk, this is Jeff Clark, K8KAC, saying 73 and we thank you for listening.

"Welcome to ham radio in the 21st century, 73 and we thank you for listening."

2404. Re: Lamp dimmer RFI

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-15 03:12:08 UTC
From: Clive Mitchell <clive@emanator.demon.co.uk>
Message-ID: <gDcfvrAICS65Ewot@emanator.demon.co.uk>
Source record: 101725
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.misc,sci.engr.lighting

In article <39E8EB11.D7B6A066@earthlink.net>, Walter Spector
<w6ws_xthisoutx@earthlink.net> writes
>Also - do these things start out RFI clean and gradually
>get RFI dirty over time? Or are bad dimmers pretty much
>bad from the start? I'd like to get a couple and test them,
>but wouldn't want to go through the effort of using them if
>the brand I buy is going to start buzzing again in 6 mos...

RF suppressed dimmers have a chunky torroidal choke inside like a small
wirewound donut. This suppresses the switching transients that occur
when the triac is turning on mid wave.

While I was in the US in March I saw some unsuppressed dimmers on sale
in home depot.

Just a short remark on the German spelling alphabets:

the different versions with Samuel/Siegfried, Zacharias/Zeppelin exist due
to the fact that the nazis replaced Samuel and Zacharias with Siegfried and
Zeppelin; after the war the older forms were used again.

Regards, Th.

The wall(s) are exterior walls and do have a fire block. I can drill a hole in the first fire block but the other one is obscured by drywall. I need to use bulkhead connectors for my application to be feasible but will be installing a good ground rod and a lightining arrestor.

Thanks,

Greg

2408. NEW Amateur Radio search engine! No banners - VERY FAST - RELEVENT RESULTS!

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-16 00:00:00 UTC
From: Karl Vesterling <kjv@adelphia.net>
Message-ID: <EHIG5.715$%J6.65684@news1.news.adelphia.net>
Source record: 101586
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi all... I finally finished the Amateur Radio Internet Search engine at this site:

http://kjv.homeip.net/~hr2510

The URL's that are indexed are entirely Amateur Radio related (ok, some CB stuff) so you don't have to worry about encountering information about Presdient Abraham Lincoln when doing a search for information on say a Uniden President Lincoln radio, or worse yet some online classified ad advertising parts for a 1973 Ford Lincoln. The only anomoly I noticed is that some astronomy pages come up in the results when searching for galaxy. This is because a Galaxy radio buf happens to have a page on both topics. The Radios, and astronomy. But aside from that, should be ok. The URL's I've already submitted and indexed mainly have to do with Radio Modifications / alignment procedures, equipment information, etc...

The engine is very low on graphics, and there are no banner advertisements. This is provided as a free service and no revenue is generated from it by exposures for banners, etc et al so please don't regard this post as advertising. I just couldn't find a search engine that would return the information I needed so I created one, and I think you'll enjoy it.

Because it's so low on graphics the bandwidth taken up should be small enough that it won't affect my internet connection. (DSL coming soon anyways)

So Enjoy!

BTW, suggestions for the site and submissions to the engine please send by email to me for now. I won't have time for the next few days to improve the site any as I'm renovating part of my home. (ok ok, I just want to play with the new commercial grade 3/4HP airless paint sprayer I just got, but can ya blame me???) But I certainly can cut/copy/paste information into the URL index file. BTW, indexes are nightly at 03:00hrs Eastern. So it may be a little slow between 03:00 and 03:30. By slow I mean it will probably take 2 seconds or so to return the search results.

One thing I would do - that is to ask to try it at the store and have a few friends listening on 440 to make sure the thing is on frequency. A few years back, I purchased an HTX-404 from RS. Once on the air, the guys told me I was off frequency. I took it to a shop where I had previously worked (they do VHF/UHF/trunking radio). Yepper, I was 5 KHz high! I took the unit back and they gave me a new one (it was only a couple of days old). I got back on the air and - yep, off frequency. I checked with the shop and it was almost 4800 Hz high. Since the shop equipment is calibrated, and the hams gave me the same reports, I can only assume that RS does not tune the radios too closely. Also, check the specs. The HTX-404 claims stability only to 10 parts per million (meaning that 4,500 Hz off is in spec at 450 MHz! So I guess I was lucky they took the first unit back (although the second unit is the same). I've been using it since around 1995, however, with no problems (except for the lithium battery died). All the functions work and I have a good 8 mile range to repeaters from inside my car and a solid 15 miles outside the car (I can open 2 repeaters on Bristol mountian, probably 25 miles away, from my living room). My advice? Do an on-the-air check with it before you buy. Probably best check both 2 meters and 440 - but 440 will be the one to reveal if they still can't tune the things. Oh yes, I have permanently set the channels 5 KHz low on the HTX-404. It works.

I would like to re-coat the rubber pads (push buttons) that made contact
with the PC boards of electronic devices. It seems the conductive coatings
on many of these pads disintegrate over time. Does anyone know of a product
to re-coat and renew these pads?
Thank for any help.

> Thanks for the reply, though. :-) The mystery continues...

There could be a "hole" for one provider who wasn't using equipment on the tower. One of the problems is that there are often situations where "tower proliferation" occurs and zoning boards are getting tough with it. This might be a way to get around some of those problems for a company who can't get a contract to be on the main tower...

There is another possibility - it could just be that there is some new
generic microcell-type equipment available that can be implemented in a
number of (similar) ways - it's possible that it's being used in all the
different ways described in the postings in different areas.

>So I am wondering what suggestions anyone has for
>RFI-quiet (and 'popularly priced') dimmers?

Just replace the noisy ones. If the repples are noisy it quite
possibly is not the dimmer, but perhaps something as simple
as a loose rivet in a lamp socket.
If you are so inclined you can put an L-C filter onto the dimmer.
(If you do not know what that means you are not so inclined)
Teccor has recommendations, IIRC
>Also - do these things start out RFI clean and gradually
>get RFI dirty over time? Or are bad dimmers pretty much
>bad from the start? I'd like to get a couple and test them,

Started noisy and stayed noisy is most likely, but it is quite
possible for a filter capacitor to fail. If there's another of the
same dimmer that is not noisy blame the filter cap. But in
any case replace the dimmer. (I have the idea that the FCC
has rules about lamp dimmers and d### near everything else
electrical)

About two out of about a dozen going/staying bad over
10-15 years? Not bad.

If you have to use an exterior wall why not use a piece of 1/2" conduit and surface mount it to the outside of the house. Use a junction box with a hinged cover on the outside and you can disconnect it in the box during dangerous lightning storms, or you can use a condulet to enter through the house. You could also use wiremold brand raceway, they sell it in different colors and different sizes and also in UV resistant outdoor plastic. Just a thought.

2417. MURS

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-16 00:00:00 UTC
From: Rally The Sheep <nospam-rallythesheep@crosswinds.net>
Message-ID: <sun04mkug93s66@corp.supernews.com>
Source record: 101595
Cross-posted to: alabama.birmingham.radio.amateur,alt.ham-radio.packet,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy

In case ya'll haven't heard, on July 12th
the FCC created the Multi-Use Radio Service.
It's for people who want to be on the radio
but don't want to have to learn all the rules and
stuff for the amateur service. The difference between
MURS and CB is that MURS will have repeaters, packet,
data, imaging and, like CB, won't have any regulations.
Oh, there is one regulation, you can only transmit up to 2
watts of power. (I got this info from QRZ.com, the like to
the article below).

The full article is here:

http://www.qrz.com/articles/00/10/15/1215251.shtml

My personal opinion (which probably doesn't mean much
to anyone but me), is that the FCC isn't going to stop at the MURS service.
They're just going to continue on, and eventually, the entire amateur
service
will be regulation free.

What's your opinion?

Anyway, the reason for this posting is because most people don't
know about the MURS service.

(I'm probably gonna get tons of spam from this, too.)

Take a look at this site. This seems to be what you have. One of the links talks about doing the reading via cellular (sounds like a cdpd application using IP technology).

That's what I was told one time too. The ones in my neighborhood
(Orange, CA) were for automatic electric meters to transmit their
readings.

2422. For Sale: Heathkit HW-101, Matching Spkr & PS

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-16 00:00:00 UTC
From: David Ausley <dausley@hiwaay.net>
Message-ID: <39EBBAA6.571F8AA9@hiwaay.net>
Source record: 101600

For Sale:

Heathkit HW-101 H.F. Transceiver, matching speaker and AC power supply. Very good physical condition, extra clean inside and out, no mods, the only problem I could see was a dry rotted "o-ring" drive belt for one of the tuning caps. (I have not tried the transmitter, but receive works fine) These pieces have been in clean storage for several years and will make a great addition to anyone's Heath collection. $150 for all (you ship from Alabama)

I'm helping a non-ham, no-internet, friend with this sale, so email me with any offers and I'll pass them on to him.

73's
Dave

Bob,
I'm not aware of any practical way of doing this. Most
of the 'membrane' keypads are not for heavy duty, or for
very prolonged use. You might be able to find a replacement
though.

I have also seen these. One location was in the El Serreno area of Los Angeles. A microwave oven would be considered cutting edge there. I saw another one at Henninger Flats. That's a few miles into the mountains above Pasadena. Next to a microwave relay tower. My guess is that they are just telemetry.

It can be done without any insurance or inspection problems.

Use a metal chase and seal with fire calk.

It is! You could also use a metal chase to provide a non plenum air path through the duct.

2431. AA ACTION ALERT: Stop Handover of Nation's Public Airwaves to Religious Broadcasters

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-16 00:00:00 UTC
From: mdwait <mdwait@mindspring.com>
Message-ID: <8sdtk7iil1@nnrp1.deja.com>
Source record: 101665

ACTION NEEDED NOW TO STOP HANDOVER OF NATION'S PUBLIC AIRWAVES TO RELIGIOUS BROADCASTERS

October 15, 2000

A bill now in the U.S. Senate would dangerously alter the 1934 Communications Act, and make it easier for religious groups to acquire and operate public broadcasting stations. Disingenuously labeled the "Noncommercial Broadcasting Freedom of Expression Act" (H.R. 4201), this measure would put churches and other sectarian organizations on the same level as educational institutions and nonprofit groups when making application to obtain coveted public broadcasting frequencies.

The bill would exempt religious groups from the guidelines which apply to all other institutions currently operating public broadcasting outlets. It elevates religious programming -- sermons, preaching and other forms of proselytizing -- to the same level as "educational, instruction or cultural" content.

* There are already over 1700 religious broadcasting outlets in the U.S., many affiliated with the Christian National Religious Broadcasters Association. This does not include the dozens of stations operating on short-wave and other frequencies. Religious broadcasters operate networks of television and radio stations, and they stream their content to commercial outlets as well. Especially with the internet, there is no lack of opportunity for sectarian groups to spread their message.

* This legislation threatens to "religionize" a portion of the broadcasting spectrum reserved for the American people. These frequencies were set aside for educational content. We risk the loss of this resource if religious groups are permitted to gobble up these stations, and replace programs like "Nova," "Cosmos" and "The American Experience" with preaching, religious instruction and similar content.

Imagine the outcry if Congress attempted to hand over the Public Broadcasting System to commercial television networks! This is the same type of taxpayer fleecing, though, that is taking place with H.R. 4201 -- all in the name of religion.

HELP US STOP H.R. 4201!

This bill cleared the House of Representatives in June by a 264-159 vote. It is now in the Senate, and a vote could take place at any time. We need your help in stopping religious groups from grabbing control of

the public broadcasting band in America!

GET THE FACTS ON H.R. 4201.

Actually, you can use a frequency counter and other
instruments in close proximity to some non spread spectrum
antennas and get usable results. Quite often at hamfests,
you'll find someone with a frequency counter or signal
analyzer offering free reports on some ones signal. The
practice is to turn on the transmitter, with its antenna
near the instrument's. That signal will be far stronger
than any other in the vicinity (and there are lots of
signals at a hamfest) and the instrument can accurately
receive it.

Hi,
I've just purchased a Yaesu FL2100F amp. The amp uses 2 572B's, works great and I'm happy with it but I have a few questions about it. I can find some info on the web about the FL2100B and FL2100Z but I have yet to find any reference to the "F" and the photos I see these models look exactly like mine. I'm not a big Yaesu person..except for a 101EX I owned back in the early 70's this is the only other Yaesu I've owned or used.Does anyone here know anything about these amps and this model. How about parts? It seems the "B" has a problem with it's band switch...how about this one? Any help would be great and thanks

Since you have passed a code test at a higher speed than is now
required, that element will be grandfathered.

All you will need take is the Amateur Extra written test...all 50
questions.

Perhaps you would like to spend a few minutes scanning the ARRL
website. You may have other questions they could answer.

I dunno about that. By using low power transmitters you can simulate bad propagation conditions when there are good propagation conditions. This might improve your operating ability. Amateur Radio was never meant to be as predictable as commercial broadcasting. Heck...Whats a few dB down to most real Hams but a challenge? The Ham who becomes obsessed with QRP, like the obsessive porno watcher, may spend lots of entertaining time without making any real contact. To each his own!

Hams need more license classes ans/or technical endorsements.

I'm in need of suggestions on how to route my antenna cable from my attic to a room on the first floor. Ideally, I would like to route it behind the drywall and install an outlet box in the wall with the proper connector. I purchased some fish tape and began to try routing the cable but ran into the supporting 2x4 after a few feet. Anyone know of a good way to route this cable?
Thanks,

Greg

Are you trying to do this on an exterior wall? What part of the country are you located in? I ask this because building codes change in different areas and it easier to assume on how the structure is built. Some houses contain fire blocks. This is a 2x4 between the upright studs to keep fire from spreading up the wall. It can also be in the wall for strength, it all depends on the local building codes. One Thing is for sure. If you do get the cable down the wall I would not use a bulkhead connector I would leave enough cable to get to the equipment being used. Ground all equipment to AT least on 8' foot ground rod and keep in mind that you are giving lightning a direct path into your house. Instead of using the bulkhead connector in the house use it at the base (or within reach) of your tower and unhook it when not in use. Good luck

In my in Northern Virginia we have these boxes hanging from light poles. What they are is receiving units that receive data from the transmitting electric meter on your home. The electric company just drives through the neighbor hood and downloads this data into the computer in vehicle then it is taken back to an office uploaded to a computer and then you get your electric bill

Tom Ayers wrote in message <39E76AD8.782A1D46@SPAMBEGONE.polyflow.com>...

greg,
Depending on how long a run it is, how you would have to
run the cable(s), I think you would be better off to make
the run outside your house, to your operating position,
maybe come in through a window.
It sounds like you live in a multi-floor house, if so,
going from the attic to the first floor can be a real
'pain', it just won't be easy. Following A/C or heating
ducting is one method. Having to follow room contours to
'hide' cabling will make for a ~very~ long run and may not
be worth the trouble (lots of loss).
If you aren't using one, a ground point where you enter
the house is a good idea. Think big when installing a
ground for lightning protection, normal size wire isn't
large enough for much protection (actually, none).
Good luck with it...
'Doc

This was just faxed from the Birminham Field office:

The Great Pumpkin
Birmingham Post-Herald
October 14, 2000

Police arrested Lloyd A. Davies, a 27 year old white male, resident of Athens, Alabama in the Anderson Pumpkin patch at 11:38pm Friday. Davies will be charged with lewd and lascivious behavior, public indecency, and public intoxication at the Athens Municipal Courthouse Monday. The suspect allegedly stated that as he was passing a pumpkin patch, he decided to stop. "You know, a pumpkin is soft and squishy inside, and there was no one around here for miles. At least I thought there wasn't." he stated in a phone interview from the Athens Municipal Courthouse Jail.
Davies went on to state that he pulled over to the side of the road, picked out a pumpkin that he felt was appropriate to his purposes, cut a hole in it, and proceeded to satisfy his alleged "need". "I guess I was just really into it, you know?" he commented with evident embarrassment. In the process, Torrance apparently failed to notice the Athens Municipal police car approaching and was unaware of his audience until officer Brenda Taylor approached him. "It was an unusual situation, sure." said officer Taylor. "I walked up to (Davies) and he's... just working away at this pumpkin."
Taylor went on to describe what happened when she approached Davies. "I just went up and said, 'Excuse me sir, but do you realize that you are screwing a pumpkin?' He got real surprised as you'd expect, and then looked me straight in the face and said,
'A pumpkin? Damn... is it midnight already?"

Before purchasing a dimmer, you better find out what will match this person's house...

The spec grade dimmers usually aren't popular in residential homes... They usually have custom face plates that may not match the rest of the house...not practical And the Nova dimmer has this huge heat sink which stands off the wall... again not practical....

Lutron also sells the debuzzing coils...

If you call Lutron at 1-800-987-7897 and then press "5706" for the extension, talk to Russ Weightman. Explain to him your problem and I am sure that he can help you... He is an engineer there that has RF experience.. He can explain what products have FETS in them... That will totally eliminate any RFI you got..

Source record: 101659

Well, after people have written many letters to the Michigan House about Bill 6012, they have adjusted the wording which makes Amateurs completely exempt!!!!!

The wording in the original writing of the bill stated that permits were required AND the operator of the vehicle had to be a police officer or amateur. Now with a simple change of AND -> OR, we are exempt!!

Good News...

Thanks for all your support..

Bill Johnston, W8WSJ
President Livonia ARC
Livonia MI

In our city we recently installed a system that uses rapidly pulsed strobe lights on emergency vehicles to activate a receiver on the intersection lights, causing them to make the green light available to emergency vehicles that are approaching. Each vehicle blinks a unique pattern. The results are logged on a central computer, so there is a record of which vehicles went through the intersection and when.

No RF is involved.

The system we are using can be seen at:

They are for the Ricochet data network. We've had them in San Francisco (one of Ricochet's first two cities) at 28.8kbps for several years. There's been a box/antenna like this on a pole near my house for a few years, and I also was shown one in a Ricochet booth at a computer show.

After being in only two or three cities for several years, Ricochet is now expanding. See http://www.metricom.com

Greetings and thanks for reading,
Looking at the new r.s. catalog I noticed on page#85 there is a small dual bander (their #19-1106). It seems to have the options that I would require. I was wondering if anyone out there has tried one out and has any comments good, bad or neutral that might help myself and others determine if the radio is right for them and their area. Thanks and have a nice day.
Regards
Ray Miller N2NJK

Hi,
Nice drawing. Based on what I see, these should look very familiar...

http://www.williamcalvin.com/bookshelf/PoletopLocator.htm

Scroll down to the middle of the page and you'll see the Ricochet
antennas. Congratulations you're about to be covered with 128kps
mobile ip (not 3g, god knows when you'll have that! Probably never at
the rate it's progressing.)

go to http://www.ricochet.com if you want the details.

The Heil's are the best available unless you buy the spendy ($300+)
aviation stuff.

Get the full sized "Pro-Set" and specifiy the HC-4 mic element.

2459. Live in fear anonymous cowards

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-17 00:00:00 UTC
From: LRod <lr0d@my-deja.com>
Message-ID: <8si7e4$46s$1@nnrp1.deja.com>
Source record: 101536

http://www.sun-sentinel.com

MIAMI -- With a terse order that left defense attorneys wondering where to turn next, the 3rd District Court of Appeal has refused to take up a case involving anonymous postings on the Internet that allegedly defamed Fort Lauderdale executive J. Eric Hvide.

In refusing to hear the appeal by defendants listed in court papers only as "John Does," the three judges who listened to 20 minutes of oral arguments on Sept. 20 said in effect that they were refusing to hear the case after already having heard part of it.

"We're trying to figure out what our options are," said Ann Beeson, a national staff attorney with the American Civil Liberties Union, based in New York, who is assisting the Florida chapter in the case. "It's an odd posture for the court after allowing oral arguments. It is definitely a loss, but not as much of a loss because no opinion was issued. We will continue to represent anonymous posters in other cases."

Beeson said the case, one of the first of its kind to reach the appellate level, is among many around the country testing the limits to which users of Internet chat rooms may hide their identities while exercising their rights to free speech.

Hvide, former president and chief executive officer of Hvide Marine, claims anonymous postings prompted his ouster from the global marine services company founded by his father in 1958.

University of Florida law professor Lyrissa Lidsky, who represented some of the "John Does" at the appellate hearing, said she was both surprised and disappointed by the ruling, issued Thursday by Judges Robert L. Shevin, John G. Fletcher and David M. Gersten.

"These are important issues with more and more cases being brought against anonymous John Does," Lidsky said. "At some point a court is going to have to balance the rights of the plaintiffs to face their accusers and those of defendants who have a right to anonymous speech. This court chose not to do so.

"It's especially surprising because the judges seemed interested in the oral arguments. They were engaged and clearly put some investment into understanding the case. I didn't predict winning necessarily, but I at least expected an opinion.

"But this is better than having a negative opinion, because that would have affected John Does nationwide."

The underlying case is far from over. Even if the identities of the "John Does" are revealed, which now appears inevitable, Hvide and his Miami attorney, Bruce D. Fischman, still must prove their defamation case, which is before Miami-Dade Circuit Judge Eleanor Schockett.

Fischman was out of town and could not be reached for comment. At a hearing last month, he said Hvide had a constitutional right to confront those who accused him of being corrupt, committing fraud and cheating stockholders.

It is not clear whether Hvide's critics are current or former employees, or, for that matter, associated in any way with the Port Everglades company that was fined $60,000 in federal court last month for illegal payments to union boss Walter "Buster" Browne, and is recovering from bankruptcy.

Barring further appeal, Yahoo! and America Online will disclose the identities of the John Does so Hvide can pursue his defamation case against them.

By the way if you're curious as to what 128kbps of mobile broadband looks like from the inside out you can see the internals of one of those radios here:

http://www.conway-engineering.com/micrortu1.html

This is actually an antenna from their older 28.8 service but you get the idea.

After spamming six different newsgroups, five of which do not deal with scanning, I can see why you dont have the time or inclination to revisit each one to look for replies. You just do your spamming and run.

Next time, post your question to the appropriate newsgroup (rec.radio.scanning only) and be prepared to return to it to read replies and maybe even participate in the activities of that newsgroup.

Try to be a good netcitizen.

I will.
>
> 73, Jeff KH6O

The history of the Q code stems from the Morse code era. The Q code is
in fact an international radiotelegraph code which was designed with
shipboard CW operation in mind. Hams took many, but not all, of the Q
signals as there own in the early days when most Hams were only using
CW.
Yep...Maybe there was no choice in the matter.

Ten - XX code is much newer. It was not only used by police in chase
movies but was designed for radiotelephone land mobile usage.
Many emergency services train operators to use ten-xx codes. Naturally
it found its way into CB lingo where it may be more applicable than Q
code.

QSL?

Now on the Internet there is no need for Q code or ten-xx code IMHO.
We can't send QRP e-mail unless we can use a weak provider. My typos

and misspelled words leave enough stuff for NG readers to decode, so why would I need any codes...except maybe to be considered an "in" Ham OM?

The movie was titled "Frequency" in the US. It is scheduled to be released in Japan under the title "Beyond the Aurora."
If you are in Japan, you might want to search for the other title. Source: Amateur Radio Newsline #1209.

Cross-posted to: alabama.birmingham.radio.amateur,alt.ham-radio.packet,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy

I have bad feelings about this MURS thing...

What I can see happening on MURS is the same thing that happened on 11m CB. MURS'ers will buy inexpensive 2-meter FM amplifiers at hamfests and connect them between their MURS radios and their antennas. So much for the 2 Watt limit! No one pays attention to the 5 Watt limit on 11m CB either... they use 10 meter amps. With 2m amplifiers so commonly available for such little money, I think this will happen virtually overnight. MURS also allows external antennas. Soon, there will be MURS'ers using modified 2m directional antenna arrays and high-power amplifiers to work bootleg VHF DX.

Someone else has already pointed out that the MURS radios will be merely the existing "color dot" type radios re-hashed (including some of the frequencies that were once "color dot" frequencies, such as 154.600 MHz). This could pose a problem too. Many of your favorite fast food joints, such as McDonald's, Wendy's, and so on, use some of those same frequencies for the two-way radios in their drive-up lanes. Can't you just picture the MURS CB'ers, running high-power amplifiers, giving fits to the people working the drive-up lanes? It's gonna happen, folks!

There are countless thousands of "color dot" radios wasting away in closets and drawers since the advent of cheap and effective FRS radios. FRS offers 14 channels vs. one or two channels, PL tones for a degree of privacy, they cost half or less what the "color dot" radios cost, they offer similar range but the UHF signal seems to pass through buildings better than the VHF does, and FRS radios run on common household batteries instead of the usual NiCd packs. I guess the only big draw for MURS is going to be the ability to (illegally) use big amplifiers and to use powerful antenna systems. MURS will be a boon to the bootlegger, but of no value to the intended users. The FCC has bungled again!

Flame away, folks. I'm wearing my Nomex firesuit...

True, and some of us got in just to fly our RC planes on 6M. But, with good Elmers in the hobby, we can take that Codeless Tech and show him other, wonderful aspects of the hobby that 2m, low-power simplex can't compete with.

K5DH,
I agree, MURS is going to be subject to all the abuse that
other bands are subject to. It's a shame too, it could be a
fantastic oportunity, if everybody 'played' fair. There's
one 'happy' thought, though. Since it's VHF, it should be
easy to 'DF'.

Of course.....the First Floor in the US is the Ground Floor in the UK...this is why I couldn't see your problem at first.

Over here, drilling through the ceiling would in most cases get you from the attic to the First Floor.

I had the same solution to a similar problem of an antenna mounting on the chimney stack, I led the coax down the stack, through the roof and into the attic, along the attic joists, out through the attic air vents, down the exterior wall, and into the wall on the Ground Floor.

If you're running VHF make sure you get low loss coax.

2484. WTD: Worn-Out Nixie Tubes

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-17 00:00:00 UTC
From: afranzman@aol.compute.com
Message-ID: <20001017002945.05079.00002323@ng-fy1.aol.com>
Source record: 101623

You may have seen my earlier posts on buying/trading Nixie display tubes with digits over 1 inch (25mm) tall, or my other posts regarding the possibility to restore such tubes that have been blackened by long use or excessive current.

Though I am still seeking more of the large size Nixies, I now have sufficient information to begin experiments into the possibility of Nixie tube restoration.

For my experiments I need Nixie tubes that are no longer useful due to darkening of the glass, and/or failure to fully and reliably light one or more digits (up to and including complete failure to light at all.) I can't use tubes having physical damage such as cracked or broken glass, or pins broken off.

Due to the nature of the work necessary, I can only use tubes with digits 5/8 inch (15mm) tall or larger.

Anyone having such tubes is requested to contact me regarding donating or selling your Nixies to me.

If desired, I will pay reasonable shipping costs and a nominal price per tube depending on what you have to offer.

Please contact me by email. See below for a hint to get past my spam block.

Alan "A.J." Franzman

My real e-mail address does not compute.

Rally The Sheep,
Do you really see MURS as being threatening at all
to amateur radio? I don't. Seems more like the manufacturors
trying to revilalize their 'color dot frequency' radios.
I can see where there could be lots of interest in this.
As I read the proposal, it allows voice, and digital modes,
repeaters, and paging. By the way, it's 2 watts ERP, so
that opens up a bunch of antenna options. Interesting
options...

I have a Radio Shack Pro 2050 Trunktracker and was trying to directly punch in the Talk group IDs with the frequencies I have.Could some explain to me in a email in the most simplest term how I can do this ? And also I have tried to searches for ID numbers and unable to understand why I am not hearing anything ,I have gone through all the different trunking levels,i.e., E2 800, E2 900, E2 Hi, E2 UHF, Ed,E1 and still I have not heard a thing . When go out of trunking mode I can hear all the activity going on. What am I doing wrong ? I am trying isolate some of the radio traffic that I do not want to hear like EMS ,but not the towing services that use the same frequencies. PLEASE HELP!!! Send all replies to me directly ,not through the newsgroup Thanks!!

Tom

It might seriously cut into the No Code Tech future numbers. Lots of
them had no other goal in mind in ham radio than that sort of usage.

What a TROLL - I guess that since you have less than 3 months experience in the Navy you OBVIOUSLY know more about it than my 20+ years. Get professional help - you are sick. (by the way, leadership training is a one week info course on how to conduct oneself without making a fool of yourself - you must have failed)
I will not reply any further to your pathetic attempts to justify your self inflated ego. You are a Legend IN YOUR OWN MIND !! I was serious about the professional help - get it before you find out first hand what a "blanket party" is all about.

You are correct, however, once you have already enlisted, the only way to a commission is through the LDO [Limited Duty Officer] program. People with Master's degrees do not enlist - They are commissioned right from the start. Very few Commissioned Officers came from ROTC or the Naval Academy, most come from various colleges. Check out the facts before you start taking them out of context to suit your illness. With your personality disorder, I seriously doubt that you will last long enough to make E-6 without professional help.

I use an "N" type bulkhead for low loss.
It just looks better.
Cable guy who did cable modem install really had questions about
that large connector.
I had to inform him.
Also, my wall had no supporting horizontal 2x4's between the studs
so the fish was fairly easy.
Although, I had to drill through several stacked 2x4's at the top of the
wall.
I had the drill a smoking that day.

Most N connectors are 50 Ohms and not the 75 Ohms that TV (and cable modems) call for. Some N connectors are indeed 75 Ohms, but not many! In Greg's case it is probably easiest to go down outside of the building and in the wall. It doesn't make for the neatest install, but the cable TV monkeys get away with it.

2501. RADIONEWS presents Newsline 1209 for 10/13/2000

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-17 02:27:10 UTC
From: radionews@aol.com
Message-ID: <20001016222710.07674.00002214@ng-cf1.aol.com>
Source record: 101614

[Newsline 1209 - October 13, 2000]

This is Newsline report number 1209, for release on Friday, October 13th, 2000.
The newscast follows.

The following is a QST

The following is a QST. Phase 3 D suffers another delay and the FCC acts on
several high profile enforcement matters. These stories and lots more on
Newsline report number 1209 coming your way right now.

HAM RADIO IN SPACE: P3D DELAYED AGAIN

Another delay for Phase 3 D. This as the European space agency once again
postpones the flight that will carry the new ham-sat into orbit. We have this
report:

AMSAT says that the launch of its Phase 3D Amateur Radio satellite on board
Ariane Flight 135 is once again being delayed. According to AMSAT Germany'
Peter Gulzow, DB2OS, the launch of the new ham-sat will
be delayed until mid-November because of a problem with another satellite which
is slated to ride into space along with the ham radio bird.

Phase 3 D was scheduled for a Halloween launch on Tuesday October 31st. This
latest delay stems from the non-arrival of a commercial payload at the E-S-A
Spaceport in Kourou, French Guiana. Once it does show up it
will have to go through the normal pre launch preparations which will take
several weeks. Gulzow says that the unnamed satellite that has caused this
latest delay is due to arrive in Korou at any time.

In addition to Phase 3D, the Ariane Flight 135 will orbit the PanAmSat PAS 1R
communications satellite and two British microsatellites. No specific date for
the launch of Phase 3 D and the other payloads has yet
been announced.

Im Don Wilbanks, KC5MFA, reporting for Newsline.

More on Phase 3 D in future Newsline reports.

(AMSAT-DL)

ENFORCEMENT: REPEATER LICENSEE'S RENEWAL ON HOLD

Turning to enforcement news, the FCC has told the owner of an uncoordinated California repeater that the way he has run his system may impact on whether or not the agency will renew his Amateur Service license. Riley Hollingsworth, K4ZDH, is the agency's Special Counsel for Amateur Radio Enforcement:

"We notified Angus Winke through counsel that we needed information about his role in the KC6OKA-K6PYP repeater interferance matter before a decision could be made on his application to renew his amateur license. Recall that this is the repeater operating with no coordination and we have allegations of interferance.".

The interference complaints that Hollingsworth refers to are different than in most repeater to repeater cases. This is because the complainant is a repeater system in Mexico that is properly coordinated by a spectrum planner in Baja. This coordination is also considered valid by the Two Meter Area Spectrum Management Association of Southern California. This is the same group that denied coordination to the dual call sign
KC6OKA slash K6PYP machine.

(FCC)

ENFORCEMENT: FCC ENACTS CLUB CALL SETTLEMENT

The FCC says that it is unilaterally imposing an agreement on a family of ham radio operators regarding the number of club call signs the agency will permit each one to hold. This information comes in a letter to George L. Lyon Jr., who is the lawyer representing the Tucker family of La Mirada California.

The government believes that the large number of club calls held by family members violates the spirit of the FCC Amateur service regulations. Attorney Lyon has been negotiating the matter on behalf of the Tucker's, but it now appears as if the FCC is unwilling to wait any longer for a response. Again the FCC's Riley Hollingsworth, K4ZDH:

"We notified the Tucker family through counsel that we reached an agreement on consolidating the callsigns of Nancy, Ken and Eric... that is three callsigns each. but we have made four requests for clarification of their proposal to consolidate the club callsigns of Katherine and Roy and we got no responses to those four requests, so we notified them that we're implimenting our own proposed consolidation that we notified them about on November 3rd, 1999, that is three club call signs each for them as well."

Whether the Tucker's will accept this FCC decree or file a challenge is not known as we go to air.

(FCC)

ENFORCEMENT: THIS CLUB MAY NOT BE REAL

The FCC has told Sam Jacobs, K3SAM of Latrobe Pennsylvania, that his application for the club call sign KB3FGX has been dismissed by the Wireless Telecommunications Bureau. This after the agency received information that the club in question may not be what it seems. Once again the FCC's Riley Hollingswortth, K4ZDH:

"We also notified a licensee in Latrobe, Pennsylvania, K3SAM, Sam Jacobs, that there were apparent misrepresentations made in his application for a club callsign. And we notified him that since the vice president, or the person listed as vice president of the club, denied any knowledge of the club, and since the person named as trustee, Howard Goldberg, N9KTW had withdrawn his name, the application was dismissed. And we notified Jacobs that the apparant misrepresentations may jeopardize his license and we requested information about the filing under Section 308B of the Communications Act."

The information that Jacobs submits will be used to determine whether K3SAM may have made material misrepresentations to the Commission in the club call application. Hollingsworth's letter also implies that the information will be used to determine what action to take regarding the evaluation of Jacobs qualifications to hold an Amateur Radio license.

(FCC)

ARRL TO LAMBDA: WE SEE NO CONNECTION

The President of the American Radio Relay League has informed his counterpart in the Lambda Amateur Radio Club that the League will not drop its ties to the Boy Scouts of America. This, despite Lambda's claims of discrimination against the gay community by the scouting organization.

As reported two weeks ago, Lambda President Art Joly, N1RPN, sent a well publicized open letter to League President Jim Haynie, W5JBP. In it, Lambda wanted the ARRL officially and publicly distance itself from the Boy Scouts of America because of the organizations alleged policy to dismiss and exclude gay scouts and gay scoutmasters.

As expected, the ARRL did not issue a public response. Instead, League president sent a private response to Lambda president Joly which Lambda has chosen to make public. Jim Kelly, KK3K, is a spokesperson for Lambda:

"He stated, quote, I would suggest to you that it is unnecessary for the ARRL to take any position on subjects that do not pertain specifically to Amateur Radio. It would be beyond the scope of the League's charter to address political topics unrelated to its mission and purpose."

The letter comes only days before this falls Scout Jamboree on the Air, or JOTA. The ARRL is a longtime and highly visible supporter of the United States scouting movement and has very close ties to the Boy Scouts in particular. As such, nobody expected it to give in to the Lambda call for it to sever its

ties.

Its on the web in Real audio at www.rainreport.com.

(RAIN)

REPEATERS AND THE NET: WORLDWIDE LINKING REDUX

We also have an update on last weeks story concerning worldwide repeater linking over the Internet. It now appears as if the repeater in Great Britain taking credit for being the first -- wasn't. But Jeramy Boot, G4NJH, says that the honor still belongs to a UK machine.

"Following last week's story about the new GB3IW international Internet gateway on the Isle of Wight, Tony Whittaker, G3RKL, who is the keeper of the Sheffield repeater, GB3US, has written to GB2RS saying that the GB3IW is by no means the first for amateur radio in the UK. The gateway Internet operation has been implimented on GB3US on channel RB-zero by G3ZHI and G4NJI for some six months. While not on a regular basis, single gateway being the norm."

G3RKL tells G4NJH that the Internet Gateway connection is not only a way to get people onto a repeater, its also a great recruitment tool:

"Since operation started there has been approximately a three-fold increase in activity on the repeater, due no doubt to the opportunity to talk to stations in America, Canada, India, Singapore, Australia, New Zealand to list but a few. Tony says that most users have welcomed the experiment and they've seen it as a means of increasing activity, and so helping to win the use-or-lose battle as well as a way of attracting the younger generation to the hobby because of the obvious connection with computing."

For information on how to connect your repeater to the world wide web using an Internet gateway, go to www.irlp.net or www.g7wfm.co.uk on the world wide web.

EMERGENCY COMMS: LAPD UNVEILS NEW DATA BASED RADIO SYSTEM

The Los Angeles Police Department has announced that it has completed installation of the communications infrastructure for a new mobile data communications system. The department says that its new Motorola based 800 MHz system provides it with the capability to simultaneously manage multiple emergencies. This might include separate incidents of explosions, earthquakes and fires taking place in separate parts of the city. And it permits this to happen without compromising communications for routine or ongoing calls.

What's the cost of the new system, you ask? Its a lot more than even the worlds most expensive ham radio station. Try 21 point 6 million dollars!

(Published news reports)

PUBLIC SERVICE: NEWS HONORS MICHIGAN HAMS

Ten members of the Michigan Net have been presented Special Service Awards from the National Weather Service. This, in recognition of their outstanding support of the joint Michigan Net - National Weather Service
- Rain Gauge Network. This is a net where volunteers conduct routine and emergency weather observations, report precipitation and storm damage to National Weather Service Offices throughout Michigan and
Northern Indiana.

The awards were presented on September 16th. The Michigan Net itself is the nation's oldest public service communications system, established way back in 1935.

(Michigan Net)

PUBLIC SERVICE: HAM RADIO SPORTS THE NYC MARATHON

Ham radio is gearing up for one of its biggest annual events. This as the New York City Marathon is slated for Sunday November 5th.

Almost since its inception, ham radio has been a key part of this mega Big Apple event. It takes what amounts to a small army of hams to keep the New York City Marathon on track. You can watch them at work from
the comfort of your home. Check local broadcast and cable listings to find out who is carrying the New York City Marathon in your area. Again, the date is Sunday, November 5th.

(Newsline)

PUBLIC RELATIONS: FREQUENCY TO OPEN IN JA

The summer blockbuster movie "Frequency" is set to open in Japan early next year, but under a different name. JH1UNS reports that the film will be released under a Japanese title that translates into English as "Beyond the Aurora." This is an apropos name since the film depicts a three decade time travel QSO caused by a massive Aurora outburst.

JH1UNS adds that the Japanese distributor for the film screened it at the recently concluded Japan Amateur Radio League's Ham Fair 2000. The company also handed out posters and QSL cards promoting the movie.

(JH1UNS, W5YI)

SCHOLARSHIPS: DARA SAYS ITS TIME TO APPLY

The Dayton Amateur Radio Association is now accepting requests for their annual scholarships. These scholarships are awarded in varying amounts up to $2,000. An applicant for a DARA scholarship must be a graduating high school senior in 2001 and must also hold a valid United States FCC issued amateur license. To find out more or obtain an application please send a self addressed stamped enveloped to the DARA Scholarships, 45 Cinnamon Court., Springboro, Ohio 45066. Completed applications
must be postmarked no later than June 1st, 2001.

(DARA)

THE BAN WILL CONTINUE: NO RADIOS ON PASSENGER JETS IN THE USA

If you have any thoughts of using your two meter hand held or a cellular phone the next time you fly on a commercial airliner in the United States -- forget it. This as the decade old ban on the use of these
devices and others will continue. Newsline's David Black, KB4KCH, has more:

"The decision lets airlines continue restricting in-flight use of electronic devices. It comes after telecommunications experts told Congress that--while there is no definitive proof that cellular phones pose
safety risks on airplanes--the devices should stay banned as a precautionary measure.

The Federal Aviation Administration's Thomas McSweeny, testified that restricting the use of these devices prevents an extremely remote chance of a disaster from taking place.

McSweeny's testimony took place before the House of Representatives Transportation Subcommittee. The hearing was held because lawmakers say the public is confused about airline rules governing use of devices
including laptop computers, hand-held games, pagers, 2-way radios and cellular phones.

Tennessee Representative John Duncan says the ban against cellular phones in the air is one of the biggest causes of altercations between passengers and crew on board airplanes.

McSweeny says the FAA remains concerned that radiation from electronic devices could cause errors in the aircraft instrument landing systems or global positioning readings.

McSweeney notes that many hospitals prohibit using cellular phones and other transmitters because they can interfere with health monitoring devices.

But other witnesses testified that while there have been incidents in which portable electronic devices may have interfered with aircraft operations, they have never been able to repeat such episodes under controlled conditions.

The FCC's Engineering and Technology Chief, Dale Hatfield, W0IFO, also testified. Hatfield says Commission rules also prohibit cellular transmissions aboard in-flight aircraft. That, he says, is because calls made from high altitudes keep phones on the ground from being able to use the same cellular telephone base station
frequencies.

Representative James McGovern urged the FAA to promote technology which detects emissions from inside an aircraft cabin that could produce electromagnetic interference. That kind of technology, McGovern says, could lead to greater in-flight safety.

Meanwhile, the in-flight ban on the use of electronic devices -- including your 2 meter H-T and all other ham radio gear -- remains in place.

From Birmingham Alabama, I'm David Black, KB4KCH, reporting for Newsline."

The aviation industry now differentiates between intentional and unintentional transmitting devices. Devices such as cellular telephones, hand held two-way radios, two or more inter-connected electronic games or hand-held computers that receive e-mail are considered to be intentional R-F emitters and are totally banned in-flight at all times. Scanner radios and ham radio transceivers fall into this category. On the other hand, most airlines permit unintentional R-F emitters such as laptop computers or CD players to be used after a plane
crosses through 10,000 feet. Most other eiectronics, though, including all ham gear, remains banned

(Newsline from published news reports)

SCIENCE AND TECHNOLOGY: UNDERSTANDING RF

The FCC has released a new and easy to understand guidebook on radio frequency emissions. The objective of this publication is to assist local governments, businesses, homeowner groups and individual citizens
in better understanding the origin and application of the agency's safety rules.

The guide is titled `A Local Government's Official Guide to R-F Emission Antenna Safety.' It's well written and contains rules, procedures and other information. More information is on the web at www.fcc.gov/oet/rfsafety.

(FCC)

DX

In D-X, there have been two more crossband trans-Atlantic contacts involving the 136 kHz band. On the 23rd of September, OK1FIG established a world record of 5393 kilometers when he worked VE1ZJ. OK1FIG had the use of a 150-meter high commercial 'T' antenna and was probably running about 10 watts of effective radiated power. VE1ZJ replied on the 14 MHz band.

(RSGB)

And a few days later, on September 29th, VE1ZJ received G3LDO for the third time. This time the D-X gods were with them and they completed a crossband contact with VE1ZJ also operating on 20 meters.

(RSGB)

And the long anticipated 3B6RF operation has been postponed. This, after officials of the newly elected Mauritius Government asked the team to postpone the expedition for 2 to 3 weeks for security reasons. Since there are only two regular ships per year heading to Mauritius the team has to postpone its activity for six months until May of 2001.

(OPDX)

THAT FINAL ITEM: WHO PAYS THE BILL FOR THE FCC TO ATTEND A HAMFEST

And finally, some hams -- usually those on the wrong end of an enforcement letter from the FCC -- have been trying to spread rumors - mainly over the internet - that Commission personnel are wasting taxpayers money by attending hamfests. What these people are not aware of -- or what they are trying to deny -- is the fact that it does not cost taxpayers a single penny to have an FCC employee come to a ham convention.
The FCC's Riley Hollingsworth says that the conventions have to foot the bill:

"I have been getting questions here lately about all the tax dollars that we spend on these hamfests and conventions and I just wanted to point out that there are no tax dollars and we only go to these things if the ticket, lodging and so-forth is provided up front so that there is no expense to the government."

But Hollingsworth says, jokingly, that there is a personal expense for him. You see he is an avid old-time radio collector and -- well -- let him tell you himself:

"The only expense involved in the thing is that if my forums are later in the day that it lets me get to the flea market early in the morning and get the good bargains. So, the expense is my own and I've noticed that it's a lot cheaper for me to go if the forum is early in the morning so that by the time we get out all the good bargains are gone off the flea market."

The bottom line is this: The public tax money isn't paying for Hollingsworth or any other FCC official to appear at a hamfest or convention. Those hosting the show are paying the bill.

So, if I understand this correctly, you just lifted all 6 pages
of this report wholesale off of Newsline's website (probably without
permission), a site any of us could easily go to ourselves, and
cluttered up the newsgroup with basically redundant information.

For this you expect us to respond how?

What's the word for adding an address to a killfile? Plonk?

Done.

>on many of these pads disintegrate over time. Does anyone know of a product
>to re-coat and renew these pads?

Bob,
I've never heard of anything like that, though there is something else you can do. Find a similar contact pad in a junk device and use a razor knife to trim off the contact portion of BOTH pads. Glue the new contact pad onto the rubber from the device you're repairing using silicone adhesive/caulking. It can be difficult to make a straight cut through this material, so you may want to trim a thicker slice than necessary from the the worn-out pad, and use more silicone than needed with the replacement pad to build up back to the original thickness. Most silicone caulking is viscous enough that you can fine-tune the replacement pad to sit level and at the right height. Just be careful to keep the silicone off the contact face (use a bit of masking tape).

Before you go to this much trouble, make sure that it is in fact the contact pad that needs replacing. Often times the metal grids that the pads press against (as well as the pads themselves) get contaminated or oxidized, in which case all that's needed is a good cleaning. For oxidation a rubber pencil eraser (followed by wiping with a clean dry cloth to remove any rubber residue) may be sufficiently abrasive to restore the surface. For other contamination use a cloth and a little isopropyl alcohol.

Actually it seems every one in the house is noisy - just some
are noisier than others.

> If you are so inclined you can put an L-C filter onto the dimmer.
> (If you do not know what that means you are not so inclined)

Although I am quite familiar with L-C filters, I would rather
install a UL-certified device in my neighbors house than 'home
cook' my own. Liabilities.

> ... (I have the idea that the FCC
> has rules about lamp dimmers and d### near everything else
> electrical)

They may, but as many of us know too well, they are not exactly
vigilant about enforcing such things. As Clive Mitchell
commented earlier in this thread:

> While I was in the US in March I saw some unsuppressed dimmers on sale
> in home depot.

> About two out of about a dozen going/staying bad over
> 10-15 years? Not bad.

The two were the ones we had time to pull the covers off and
identify the brand. Then we had to go off and do our respective
honeydoos...

Tongue-in-cheek, Bob. I was questioning "enfield's" comment above
where he writes: "An archaic QRP rig?"

>By using low power transmitters you can simulate
>bad propagation conditions when there are good propagation conditions.

I suggest you read Adrian Weiss' book, "History of QRP in the U.S.,
1924-1960" to see what our predecessors were able to accomplish
with low power. In those early years, there was no choice in the
matter.

Easy way out is to make a small hole in the ceiling of the nearest
closet and bring the coax down through there, out under the door and
over to the rig.

Or, if you can get by with it, just make a small ceiling hold in the
corner of the shack and bring the cable down there. Easily patched with
a little spackling paste when no longer needed for the cable.

My Goodness loony!....remember, even though you're a little reservist attached to the Naval and Marine Corps Reserve Center of 6735 N. Basin Avenue, Portland, OR. 97217-3993,.....

You're still obligated to carry yourself in a professional manner and treat all naval personnel, whether they be active or retired with the respect appropriate to their rank, (be they active or retired). Failure to do so could result in disciplinary action in accordance with the Uniform Military Code of Justice. Specifically, "conduct unbecoming of sailor" comes to mind....

If you require guidance on appropriate behaviour of reservist program participant, I suggest contacting your senior commanding officers and chiefs listed below. (I've included their phone numbers for your convenience.)

(503) 285-4566, When prompted you can enter the extension number or press # 2 and type the FIRST 4 letters of the last name of the person that you want to talk to and the system well transfer your call to the proper extension.

Commanding Officer, Capt. P. A. Anderson, extension 510
Executive Officer, LCDR P. A. Sharp, extension 511
Command Chief, YNC J. E. Smith, extension 533

(If you want,..... I can forward your posts to the Command Chief, and then he can come looking for *you* to address your concerns. I'm committed to making this as easy as possible for you.)

You're welcome...

You friggin' loon.

Thanks to everyone who responded on this thread. I suppose I'm entirely convinced now that the boxes are in fact Metricom Ricochet R2 units as shown at <http://www.williamcalvin.com/bookshelf/img/R2.jpg>. (Thanks to RW <rwuhrman@hotmail.com> for pointing out this URL.) In fact, the box shown there is exactly what I see in my 'hood, down to the last detail.

Our club is considering becoming "incorporated" to limit member liability. This involves hiring an attorney and paying fees (about $850), drawing up a set of bylaws, keeping minutes of meetings to demonstrate compliance to corporate rules, record activities and persons who authorize those activities, making a report to the government on a regular basis and sending in the annual fees, to name some of the requirements.

There was an incident in a hunting club where a member shot another hunter and each club member was sued for about $130,000 personally. If incorporated, only the club could be sued and nobody would have personal liability as a member.

My question is: Is there a serious liability involved in a ham radio club? If one of the members were to record cell phone traffic, for example... would we all be in trouble for his misdeed? Would it be worth the cost and trouble of forming a corporation to limit member liability?

Brian
From what i hear on the strange boxes they are wireless internet transponders owned by a company called "Richochet". That might not be spelled correctly but they do have a web site with that name.
Thanks
Don

I think it can be done a for a lot less than $850.00 with all the do it yourself pages on the web now a days. But even at $850.00 I would think it might be a bargain. An example would be one of your members falling and being badly hurt or killed while installing an antenna during field day. After the dust settles it not a stretch for him or his widow to start talking to an attorney about a lawsuit.
Just my two cents worth and good luck

Although you did not mention your call sign. I do appreciate your
loyalty to Amateur communication....BUT

The odds of robust telephone lines failing are getting lower all of the
time. Commercial interests can spend many bucks 0n improving
reliability and eventually adding fiber-optic lines to the system.
Eventually fiber lines will not only be trunk lines but will go to a
box inside of your house. Besides the wired lines there is wireless
cellular access and systems that are going directly to satellite
repeaters. Yep - Technology can fail and those who offer technical
services can lose their customers and thus their profits...but I bet
that commercial communication will eventually be so much more robust
than anything that Hams can do that the comparason can not even be
considered. Do you use a telephone line to get on the Internet? I
hope it hasn't fallen down and gone boom - like a ham beam that I once
had which did not manage to survive an ice storm.

Lots of guys in this NG were worried about everything that they thought
would fail when we entered Jan 1, Y2K...BUT it didn't. From where is
sat nothing fell or went boom untill July 4th. I do perceive of fuel
shortages if there isn't peace in the Middle East, even though the gas
station pumps will not be stopped by technological failures.

73,
Bob Wex w2ilp (Internet Linking Progress)

Janaka, king of Videh...had a thousand cows
enclosed in a pen, with ten gold coins
attached to the horns of each one.
"Venerable Brhmans", said Janaka, "let the
wisest one among you take away the cows."
None of the Brahmans dared to move, except
Yagnavilkya, who said to his pupil, "Samasravas,
drive those cows home."
The Brahmans were infuriated. "How can he
declare himself to be the best Brahman among
us?" they cried.
Asvala, who was the priest to Janaka, asked:

"Yagnavalka, are you now the best Brahman
here?"
"I give honor to the best Brahman," Yagnavalkya
replied. "But I really want those cows."
--Upanishads, Brihadranyaka--

I'm not a Hindu coyboy BUT...
I give honor to Ham Radio...but when I want to
make a serious call I use the telephone.

Hi all.

The following software's have been added / updated on my download page.

MMTTY Ver 1.59 (Recent Upgrade) by JH3HHT
TS870S New CAT control software by EC4DFP
LOGGER Ver 7.09 by K4CY

There are other radio software's available as well.

http://www.g3vfp.co.uk

Best Regards,

Dave G3VFP.

2531. Re: Quality of Radio Shack small HT 2mtr/70cm radio

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-18 00:00:00 UTC

I have one of those radios.

I have been somewhat displeased with it. The 2 meter performance is pretty good. The 70cm leaves something to be desired. It seems to have problems getting into the repeater reliably. It is very sensitive to EXACTLY which way you hold the antenna. I have not tried it on any other repeaters to see if it is a repeater problem.

The problems I had was that the antenna covering broke loose and was able to be pulled off of the antenna.

The unit also started to clip the audio while transmitting and receiveing. I had to send it out for repair.

This was within 6 weeks of purchasing it.

If I had to do it again I think I would pass on this radio.

Dear Friend:

Do you need a change in your life?

Do you remember when the entire world seemed like it was
yours for the taking?

Do you remember a time when all of your hopes and dreams seemed
like they were attainable?

First of all, let's be honest. You are not going to earn $50,000 in
20 days. It just isn't going to happen. Anyone who tells you that
you can, is not being truthful. But, let me tell you about a plan
that can possibly make all your dreams come true...keep reading!

****

I would like to tell you about a plan that has changed my life.
Take a calculator and figure in the worst possible scenario. Decide
for yourself. If you decide that you want to take control of your
life and move forward...that is your decision.

****

Here's the step by step plan summary.

1)You order the 4 reports listed below ($5 each). They come to you
by email.

2)Save a copy of this entire letter and put your name at report #1.
Move all other names down. (You will be removing the person at the
level 4)

3)Use any of the hundreds of bulk email services out there.

4)Orders will come right to your door. Simply email them the report
they ordered.Isn't that about as easy as it gets???

****

Your cost to participate in this program is practically nothing (surely you can afford $20 and initial bulk mailing cost). You obviously already have a computer and an Internet connection and e-mail is FREE!

The primary method of building your downline is bulk email.

Let's say that you decide to start small, just to see how it goes. Let's assume that you and all those involved email out only 2,000 programs each. Let's also assume that the mailing receives a 0.5% response. The response could be much better. Also, many people will email out more than 2,000 programs. With a 0.5% response, that is only 10 orders for Report #1. Those 10 respond by sending out 2,000 programs each for a total of 20,000. Out of those 0.5%, 100 people respond and order 20,000. The 0.5% response rate to that is 1,000 orders for Report #3. Those 1,000 send out 2,000 each for a total of 2,000,000. The 0.5% response rate is 10,000 orders for report #4. That is 10,000 $5 bills for you. CASH!!!

****

Your total income in this example is: $50+ $500+ $5000+ $50,000 for a total of $55,550!!!

****

REMEMBER FRIEND. THIS IS ASSUMING 1,990 OUT OF THE 2,000 PEOPLE YOU MAIL TO WILL DO ABSOLUTELY NOTHING AND TRASH THIS PROGRAM!!! DARE TO THINK FOR A MOMENT WHAT WOULD HAPPEN IF EVERYONE, OR EVEN HALF MAILED OUT 100,000 INSTEAD OF 2,000. Believe, most people will do just that, and more!!!

Friend, you do the math. You look at the opportunity, if you decide that you would like to participate in this program, the decision is yours.

Recently, the Federal Trade Commission has tried to stop chain letters which promise you will make tons of money by participating. Such chain letters are NOT legal because of this reason. This new program complies with all the rules.

To be legal, a chain letter must offer a product and must not promise you will get rich by taking part. If you look at the program, do the math and decide that you will make money, it is your opinion. No such claim is here.

However, I do strongly encourage you to do the calculations. Figure out the worst possible response and see how it calculates.

Your orders come right to your door and you send your reports via email. You are not involved in personal selling.

You do it privately in your own home, store, or office. This is the EASIEST plan anywhere. It is simply order filling by email.

Order the four reports shown on the list below. You can't sell them if you don't order them!!!.

For each report, send $5.00 CASH, the NAME & NUMBER OF THE REPORT YOU ARE ORDERING, YOUR EMAIL ADDRESS, and YOUR NAME AND RETURN ADDRESS (in case there's a problem). MAKE SURE YOUR RETURN ADDRESS IS ON THE ENVELOPE IN CASE OF ANY MAIL PROBLEMS!

Report #1 will tell you how to download bulk email software and email addresses so you can send it out to thousands while you sleep. Remember that 50,000+ new people are joining the Internet every month.

By the way, there are over 50 million email addresses with millions more joining the Internet each year, so we don't worry about "saturation". People are used to seeing and hearing the same advertisements every day on radio/TV. How often have you received the same pizza flyers on your door. Then, one day you are hungry for pizza and immediately recall the flyer. Same thing with this letter. I received this letter many times- then one day I decided it was time to try it.

This program will not require you to come into contact with people or take any telephone calls. Just follow the instructions.

There is no guarantee either stated or implied that anyone participating in this program will earn $50,000+. (You must include that statement to make this legal.)

******* TIPS FOR SUCCESS *******

TREAT THIS AS YOUR BUSINESS! Be prompt, professional, and follow the directions accurately. -- Send for the four reports IMMEDIATELY so you will have them when the orders start coming in because: When you receive a $5 order, you MUST send out the requested product/report.

It is required for this to be a legal business and they need the reports to send out their letters (with your name on them!) -- ALWAYS PROVIDE SAME-DAY SERVICE ON THE ORDERS YOU RECEIVE. -- Be patient and persistent with this program.

****
Get started TODAY!! Notes- ALWAYS SEND $5 CASH (US CURRENCY) FOR EACH REPORT. CHECKS NOT ACCEPTED. make sure the cash is concealed by wrapping it in two sheets of paper. On one of those sheets write: (a) the number and name of the report you are ordering, (b) your e-mail address, and (c) your name and postal address.

REPORT #1 "The Insider's Guide to Advertising for Free on the Internet"

ORDER REPORT #1 FROM:

S. STARK
P.O. BOX 61009

HOUSTON, TEXAS 77208-1009

REPORT #2 "The Insider's Guide to Sending Bulk E-mail on the Internet"

ORDER REPORT #2 FROM:

WAYNE ELLIOTT
11918 SE DIVISION #358
PORTLAND, OR 97266

REPORT #3 "The Secrets to Multilevel Marketing on the Internet"

ORDER REPORT #3 FROM:

RYAN ROMNEY

I think it's a neat idea. Have you looked to see if the GPS gear
is in a place you can get to it without having to tear out headliners,
etc? Also, maybe a letter to OnStar to ask them if there's an
accessory output for navigation data?

2539. DECStation 3100 Replacement Monitor?

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-18 06:41:35 UTC
From: doug@_REMOVE_spotcheck.org
Message-ID: <8FD11A3ECdougREMOVEspotchecko@207.217.77.26>
Source record: 101565

I have an old DECStation 3100 RISC processor I acquired from my workplace when they decided it was time to update it. Great machine for its time, but problem is, the monitor is shot (it's a monochrome VR150 AA) and I'm looking for something to replace it with.

The adapter cable from the 15-pin male plug on the machine to the BNC adapter to the monitor seems to be in good condition. Does anyone know of a particular monitor with a BNC connector that I could get to replace this one with (mono is fine), or is there any way to use a standard monitor of some type with a little tweaking of the pinout from the DEC (yes, I'm a bit of an electronics hobbyist!)?

I'm just getting into packet radio, and would love to use this machine to interface with a TNC and amateur radio to play with. Thanks in advance!

I bought a ramsey PA-10 2m amp for my HT when I go mobile.A few years ago I bought the pre-amp when I used a
7el yagi for 2m ssb.
I'm looking for a copy of the schamatic so i can put the pre-amp in line any help?
I will cover photo coping and mailing expenses.
de dave-n2rhl

p/s ramseyelectronics.com doesn't have thes on-line.

tnx in advance.

Now on with the shows for this week.

Show #189 - October 17, 2000

"Aussie! Aussie! Aussie!... Oi! Oi! Oi!..." Figures we would get new indie music from Oz AFTER the Olympics are well over!(lol) Anyhow, we start off this show with a triple-shot of music from Down Under, including TRIBAL TRANCE, RIVERTRIBE, and SANDALWOOD. After that, we have 2 hours of new music, including IMMEDIA, THE WATERTRADE, MICHAEL PERRY, STREP NOTE, THE OX PROJECT, and UNFISTED (all from Florida), as well as CHAIN REACTION and DAVID NEIL CLINE (Michigan), PAUL SPRAWL (California), MJ (Wisconsin), ROBESTONE (Hawaii), and 5 artist from the WCRG Record's 'Radio-Active Toenail Clippings' compilation out of Maryland. You will have to check that out!

M-Florida - October 18, 2000

As the Fall season finally hits here in Florida, the indie music stays as hot as ever! Music this week includes FREIS, BUCK 32, THE BANDEES, new LUCID FLY, CRIZZY & THE PUNX, BOXELDER, blues from SARASOTA SLIM, BUILD, REFRIED CONFUSION (our version of The Grateful Dead), rock en Espa&#65533;ol from PARAFANELIA, and the heavier side with SEASONS OF THE WOLF, DARWIN, FLO, and BUNY...

Get A Life - October 6, 2000

The guest for this episode is the GREEN GOBLIN PROJECT, with the 'Pick of the Week' trax from BLACKBIRD ABBEY.

> any suggestions, I'm only to thrilled to incorporate them.
>
> Phonetic alphabet

Funny but not humorous.
The reason those words were selected is because they penetrate
interference and static in bad band conditions.
Some military people try to introduce their own with words like, America
Baker Ida and so on.
I listened to a contact between an Italian amateur and an American
A, the name here is Bill "baker ida love love"
I, OK Ball i got it (Italians know AIDA from the opera that sounds the
same as Ida)
A, no no no, I spell Baker Ida love love
I hope you get the idea that a standard phonetic alphabet is wiser than
blah blah

In today's joke of a society, ANYTHING involves serious liability IF a legal connection can be made to someone with deep pockets. The shyster lawyer is only interested in how many dollars he can extort from his target's bank account.

From what I have seen, most hams don't have much in the way of assets. It's not worth the shyster's time to go after that 1954 Halicrafters receiver or that 1971 Chrysler Newport with 17 antennas. I wouldn't worry about it.

I have to agree here.... Just cut a small hole in the ceiling and
thread your cables down. Slip a white PVC pipe over your cables and
you can paint it if you wish a finished look. My attic dipoles drop
right down to the shack..... Why would you want to mess with running
any cables through the wall? Simple is best.

That's one of the goals of communication security. Another is to keep
them from monitoring your communications and knowing what you are
doing. If they can only monitor one side of a conversation they only
get half the picture. Also, if you have codes and a plan for switching
channels they will have a very hard time monitoring all your
transmissions.

Here in the Ozarks that might not be so easy to do as in other places,
but it wouldn't be impossible. Anyway, I am aware of the difference
between a repeater and a manned relay station. I've served in a
military relay station, but never done anything as a repeater. ;)

Hopefully not too many dedicated radio operators would be trying to
locate me. ;)

The target group I had in mind with the security measures probably
wouldn't include too many people with RDF capability, and most of them
would probably be limited by their need for mobility, since they'd be
here looking for us.

I doubt you'll get much improvement from 2.4 GHz radios.

>I would like to put together a small transmitter that will run for
>several months off a watch battery, preferably at 900mhz or 2.4 ghz.
>This will allow me to track the turtles with greater precision (because
>I can use a more directional antenna). These turtles hang out in swamps
>filled with poisonous snakes and alligators so being able to localize
>from a high spot several hundred meters away would also be a plus!

The higher you go in frequency, the more absorbtion you should expect
from water, vegetation and the like. Of course, you can make up for
some of this with more directional receiver antennas. However, since
the radio collar itself needs to be omni-directional, you won't get a
whole lot of help from that end.

In the end, your receiver antennas won't be much smaller, though they
will be more directional, and I wouldn't expect the battery usage to
change all that much.

>There seems to be a number of chips available these days - byproducts of
>the cell phone and portable home phone industries. I was wondering if
>anyone out there has played with any of them?

The problem you have is with the RF, not the control. Most of those
chips you cite are already quite low power. Your remote transmitter
won't change all that much.

Do the math. Here's what I suggest: Find out how many amp-hours a
watch battery has for pulsed operation, figure out a link budget and
transmitter efficiency. Now, how long did you want to run this thing?

I think you see the problem...

Noah...that is where amateur radio has the moxy over CB radio. I doubt very many CBR's have the capability to operate under those conditions. A high number of amateur radio operators have taken training in emergency communications and dealing with problems that can occur during said situation. Traffic handlers, ARES, RACES are just to mention the basics. I'm sorry, but I would not like to depend on CB operators for emergency relay. We are licensed and have something to be proud of.....the knowledge I can do it legal and RIGHT. Amateur radio has many, many avenues and frequencies for communications during an emergency. There are far too many users of the CB's that will not honor a situation because they feel, I bought this radio...you can't tell me to shut up...etc. I'm an ex-CBer from a long time ago when you could get on and have a decent conversation with someone. My old call was KKM3379. When the foul language and all the carrier throwing started years ago, I got away from it. I do not miss the garbage. Have a great day!

In my turf they just run the cable outside of the house and use one of those bad-ass 18" long drill bits to -get into- the house. I think it makes a mess of the brick work and would never do it myself. I managed to wire every room in my pad without any wires being -seen-. It just takes a little more thought and effort but when it's your own place it is worth it.

My apologies for painting all cable monkeys with the same shit-covered brush. :)

Just curious here. Suppose my goal was to communicate with a family outside the range of say a 2 meter pushing five watts and I set up a repeater on a piece of terrain that would allow us both to reach it with no problem, BUT , I only placed my receiving antenna so it was line of sight to both of us and I placed say a pair cubical quad to transmit the repeater offset lower down on either side of the masking terrain. There would be line loss of course, but the gain from the Quad could make up for a lot and be very directional. We could each also use a quad at our ends, again masked if possible from sides or rear and we might be a bit hard for someone not pretty much between us and the repeater to find.

Would this work?

Simple: The radios were manufacturered as MISTAKES, and the manufacturers
didn't want to "eat the loss" so they petitioned to create a market for their
mistakes.

I know Jeff. I agree that 'Radio History' should be a part of the exam process. Most of the hams today have NO CONCEPT at all of how we got to where we are today.

200 meters and down by DeSota is a excellent book and should be required reading. It details the real 'old days'.

=========
Hi Jim -- all about contesting at URL:
http://ac6v.com/page6.html

Just check any of the contest calendars for dates and start/stop time. Then read the rules to determine what report to give. You don't have to be in the contest (i.e., submit logs) to participate. Just check the rules for eligibility. Some are open to certain parts of the world or associations --- most are not. For serious contesting its worthwhile to log by computer -- so get a logging program to avoid duplicate contacts and keep track of serial number reports (if required by rules). For logging programs -- see URL:
http://ac6v.com/pageaaz.html

Maybe ask local contesters for their preference and features of logging programs.

Good Luck in the contest -- great way to work DX

> Would this work?

Well, you certainly reduce your risk of detection whenever you limit where your signal travels. In fact, this is one of the main cornerstones of secure military communications now. The use of higher frequencies, and highly directional antennas, right off the bat reduces the chance that others can easily detect, monitor, or locate, your signal. The use of the very low power often associated with those higher frequencies and highly directional antennas reduces that risk even further. And, of course, the military also goes the next step of adding encryption to the mix also.

Anyway, getting back to your specific example, by attempting to communicate with only a single point (the other family), you task certainly does become somewhat easier. While I'll assume your system would work, the only problem I see with your example is that there would be a lot of antennas in the air. And the more antennas you have in the air, the more chance that someone will just stumble across one just walking through the woods. And, if those quad antennas are located, they point right to your location, and the location of the other family.

In your case, the best bet for point-to-point communications would be to use very high frequencies (microwave) with small highly directional dish antennas (as few as possible). The small antennas would be easier to hide, and harder to just notice as one walks through the woods.

If the distance between the two communications points is not too great, you could use passive repeaters between the two points to reduce power demands (and cost). A passive repeater is one that uses no electronics to rebroadcast the signal at each point. It simple consists of two antennas, one facing your transmission antenna and the other antenna pointing at the input antenna of the passive repeater down range. The incoming antenna of the first repeater simply receives the transmitted signal and passes it to it's transmiting antenna through coax where it is naturally rebroadcast to the receiveing antenna of the other repeater. Such a passive repeater can be effective over a range of ten to thirty miles, depending on the transmitted power level.

With all due respect, Randy, you are missing Noah's point.
It isn't about the sort of emergency relay that you have
during and after "ordinary" emergencies- hurricanes,
earthquakes, etc. It is about groups of regular folks,
using the communications equipment they are most likely to
have (CB and/or FRS, not ham) to communicate with each other
and, perhaps, their immediate neighbors in extraordinary
circumstances. All your nice ham equipment and practice
wouldn't do a thing for them. Using depressions and low
power for signal masking, and high points for message relay,
just might.

The part about your ham usage being "legal and RIGHT,"
laudable as that is now, wouldn't be a consideration in such
circumstances.

Why don't you post what you're trying to acheive again so those in the ham radio newsgroups can get an idea of what you're wanting to do with this. There are some ham operators who eat this type of stuff (RDF, communications security, etc) up for breakfast. If they know what you're seeking, they'll be better able to address the issue and you might gain some valuable insights from their experience.

No need to add another thread. Just add "(RDF, ham radio, etc)" to the end of the subject line in your response (or just reply to this message - its already added). That is sure to get some attention in this ham radio newsgroup.

But I think Randy's point is that ham radio operators are more skilled at emergency communications during disasters, and are therefore more likely to be on the air following those "extraordinary circumstances." Of course, if your goal is to only communicate with your immediate neighbors, then perhaps CB is an answer. But if your goal to to ALSO communicate with emergency personnel (disaster assistance), those operations are more likely to be manned by ham radio operators.

And now that it is so easy to get a ham license (written test with no morse code), a well prepared survivalist would be foolish not to add ham radio to his communications capabilities (including the extra equipment needed to communicate with those immediate neighbors).

No, I don't think you quite get it. I don't think Noah was
referring to unusually severe, but otherwise "normal"
disasters. >Big Clue directly ahead!< Otherwise, there
would be no need for signal masking, channel hopping,
communications security and codes.

Foolish? Perhaps. I know folks who have "run" the
potentials and come to the conclusion that going to the
trouble and expense of getting ham equipment, the license,
learning the subject, "staying current," etc., just isn't

worth the use of time and resources that could be used
otherwise.

Im sorry Noah, I have to really laugh at the thought of using CB's for anything productive. The massive dissaray that now exists on those frequencies would only be compounded 100 fold with the use of relay stations. Im sorry...BAD idea!!!

Don't know about the ham op's, their strange people from what I gather, but here's another story I found amusing in another NG:

This probably isn't news but ...

---------cut here --------

Several years ago I read a book written by Ion Pacepa, former head of the Romanian Secret Police (tm) under Nicolai Ceaucescu (sp?). Can't remember the title of the book, I leant it to my brother-in-law and (as usual) he hasn't returned it yet - but that's another story.

It seems that back in the unpleasant days before Arafat became the great humanitarian world-recognised leader of the peace-loving people of Palestine, and he was just a globally-despised airplane-blowing-up Jew-hating international-terrorist-organisation-leading towel head, Romania were sponsoring a lot of the PLO's fun 'n' games, including bringing some of the terr^Wmissionaries over for a bit of super-power-funded training.

Arafat and Ceaucescu paid each other a few good-will visits. When Yasser and his homies came over to Bucharest for a visit, it was Mr Pacepa's job to round up good-looking Romanian white boys for some international "companionship" with the guests (there are no pictures in the book, so no .gif's).

Seems like Mr Arafat had quite the appetite for nubile young Rom's and their chubby little buttocks, as did his entourage; there was quite a stream of used-up playthings with a load of swarthy donor-spooge to clear up after visits.

All this talk lately of Jihad and the coming of Allah, along with pictures of the man hisself, reminded me of the book. I just can't watch the news without a little chuckle any more.

Pete - submitting his resume to the Romanian Secret Police, just in case.

ObT: Wondering how much of a squick-hole one of thum-thar Israeli rubber bullets makes in a Ayrab teenager.

Transmit line of sight to repeater with SW out.

Skywave transmissions are not easy to trace.

Using multiple repeaters with varied repeat freqs are also not easy to trace.

In the situation I'm envisioning, the choices might be limited to a
bad idea and a worse idea. I'd prefer to have poor communications
with my neighbors via CB than no communications with them. If
something important is coming my way I prefer to know about it in
advance if possible.

Not completely, no. Communication security for a survivalist has
basically the same goals as in the military. Minimizing enemy
monitoring and maintaining friendly communication.

>
> And, of course, if you're seeking security for yourself, wouldn't a
>relay talking to you tip off those looking for you that you are located
>somewhere within the range of that relay point?

They might be able to figure that out, but that might not be very
helpful to them if they don't know the area that well.

A simple look at a map
>for where you might be hiding (where the relay point can hear you, but
>"they" can't) would almost certainly pinpoint your general location.

Only within a big circle. At the beginning of this discussion I
pointed out that I was mostly referring to a situation where both
sides were fairly equal in size and technology. Things would be
radically different if they were very different in size and technology
available. Of course, that was only in misc.survivalism.
>
> In other words, terrain masking is not a very effective means of
>obtaining security.

No, not when used alone, but it can help reduce the range of your
transmissions, along with directional antennae, low-power
transmission, and plenty of other things.

BTW, that was what I meant when I said using a relay station isn't so
much a security measure as it is a measure to help you communicate. I
was really trying to keep it tied in with the earlier threads on
communication security. Probably should have started another thread.

Again, you're not being very clear on what type of security you're trying to find (who, what, where, why), so I can only speak in general terms. The use of the phrase "terrain masking," and the mention of survivalism in the newsgroup list, suggests you're attempting to hide from people attempting to locate your position in a given area. So, I'll go from that direction in my response.

As far as the use of a repeater, the repeater itself would be very easy to locate since its signal is not highly directional. And, again, assuming you're in a remote location, it would not be that hard to guess your location based on the location of the repeater in the surrounding terrain. All one has to do is locate the general area of the repeater, and then look on a map for where your signal might not be heard from their position, yet the repeater can still receive your signal.

Of course, another option is to just locate the repeater itself and then use it to locate you. They can do so by simply following your signal from the repeater's location (if the repeater can hear your signal, then they can also hear your signal standing next to the repeater).

> Using multiple repeaters with varied repeat freqs
> are also not easy to trace.

A dedicated radio operator could locate almost any number of frequency pairs in a matter of moments. Its going to take a little more effort than that to offer any meaningful security.

I agree with Randy, Noah. CB, with its very limited channels, is simply not designed for repeater use. You seem to be forgetting that if you can key the repeater, so can anyone else who happens onto that channel. And given the limited number of channels, and the large number of CB users, there is a very good chance that many others in the area will want to use that channel also. And many of those people will not know that the repeater even exists, or that it is repeating everything they say on another channel.

Furthermore, anyone using the repeater for conversation will be using two of the very limited channels available, instead of the one channel that a normal conversation would use. This means that even less numbers can use the available channels at the same time, which will only cause more congestion on the band.

And it is for all these reasons, and still others, that the FCC does not allow the use of repeaters on the citizens band.

Source record: 101533

Hey Folks,

I am thinking of developing a system for radio telemetry of small animals - turtles in this case - and was looking for suggestions. We have been using small vhf transmitters that run off a couple of watch batteries. These are commercially available and very expensive, not to mention bulky and short on range.

I would like to put together a small transmitter that will run for several months off a watch battery, preferably at 900mhz or 2.4 ghz. This will allow me to track the turtles with greater precision (because I can use a more directional antenna). These turtles hang out in swamps filled with poisonous snakes and alligators so being able to localize from a high spot several hundred meters away would also be a plus!

There seems to be a number of chips available these days - byproducts of the cell phone and portable home phone industries. I was wondering if anyone out there has played with any of them?

Thanks.

Tim KC4YCX

I wasn't talking about repeaters. I was referring to relay stations
manned by people. They wouldn't need to repeat every transmission
made, just the ones which weren't reaching the intended station.

You seem to be forgetting that if
>you can key the repeater, so can anyone else who happens onto that

That's where a person monitoring the radio comes in handy. I don't
know how many hams are in my area, even though I listen on the
repeater frequencies sometimes, and know they have a club and meet
once a month, but I do know there are lots of CB's around.

If we're in a survival situation congestion on the band probably won't
be a problem for too long, once people start running out of fuel.

What the civilian world uses is called repeaters. You receive on one
frequency then rebroadcast on another. It can extend a handheld radio
to up to 40 miles (trunked radios can go statewide with links). Hams
have hilltop repeaters all over the US and Europe.

Yeah, I monitor one of the local ones on my scanner, but I was
thinking more of a relay station manned by people instead of an
automatic one. I figured since CB's would probably be much more
available locally, more people would be able to communicate with them
than ham radios.

You get off for just money? They want my time, too. To serve in the field organization, to be a VE, to give input that helps set the direction of the league, to vote... it goes on and on. And then they go and sponsor contests that use even more of my time. I'm checking out the shack even now to get ready for the next wave.

They are evil.

JAY LENO ON AL GORE!

"Al Gore ... he once was pro-life, now he's pro-choice. He once was against gun control, now he's for it. He claimed he invented the Internet. Hey, Gore just needs to debate himself!"

"Al Gore visited a bookstore today. He was shocked to find a book about everything he has said in his campaign could be found in the fiction section."

"Our country has come a long way: first we had George Washington, who couldn't tell a lie. Then we had Bill Clinton, who couldn't tell the truth. And now we have Al Gore, who can't tell the difference..."

and now, on to the serious stuff...

PROBLEMS FOR GORE??

Please read the following story on Al Gore's loss of support among the press - this really may be the beginning of serious problems for Gore. Even the liberal Washington Post feels Al Gore has troubles!

And don't forget to forward this e-gram to your friends and ask them to sign-up for more election updates at:

Gore: A Candidate In Trouble?

By Howard Kurtz
Washington Post Staff Writer
Monday, October 16, 2000; 8:48 AM

You know a candidate is in trouble when the Los Angeles Times is already mulling explanations for his possible defeat.

You know a candidate is in trouble when USA Today is reporting on internal backbiting in his campaign.

You know a candidate is in trouble when The Washington Post questions which version of the man will show up for tomorrow's debate, when the New York Times says his party is nervous, when Newsweek has his own advisers saying he couldn't win a popularity contest.

Al Gore is in trouble, at least according to the media measurement of such matters with three weeks to go. (Yes, we know, George W. Bush was in trouble a couple of weeks back, but that was several story lines ago.)

Here's part of Ron Brownstein's potential funeral notice in the L.A. Times "If Al Gore can't overcome George W. Bush's mid-October surge, the vice president's

campaign aides already have a ready explanation for his defeat. It's two words: Bill Clinton. Through millions of dollars in polling, Gore's camp has concluded that many voters have a deep, impenetrable, almost irrational hatred of the president."

Duh.

"But the same polls that show most voters disliking Clinton personally also show that a solid majority of Americans like his policies. Clinton's job approval rating remains higher than Ronald Reagan's late in his presidency. In Los Angeles Times surveys all year, only a small minority of voters have expressed a desire for major changes from Clinton's policy direction. Even Bush lately has conspicuously praised Clinton. ... So here's a provocative thought: If Gore loses it may not be because he resembles Clinton too much, but too little."

Al Gore Reasons.

What are you seeking security for, Noah? While I can see how using terrain masking could offer some control over where your radio transmissions might travel (aiding radio security to some extent), wouldn't a relay on high terrain completely defeat that effort?

And, of course, if you're seeking security for yourself, wouldn't a relay talking to you tip off those looking for you that you are located somewhere within the range of that relay point? A simple look at a map for where you might be hiding (where the relay point can hear you, but "they" can't) would almost certainly pinpoint your general location.

In other words, terrain masking is not a very effective means of obtaining security.

2613. Oil Crisis...and, make no mistake about it.....

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-21 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <20001021125009.04237.00000779@ng-fn1.aol.com>
Source record: 101386

Al Gore's Oil Crisis...and, make no mistake about it...it is Gore's oil crisis. He created it single-handedly.

By Jon Christian Ryter

Oil. Three presidents were denied re-elections because oil prices soared through the ceiling during their tenure. Democrats are worried...and Al Gore is running for cover--trying, somehow, to blame Texas Governor George W. Bush and his running mate, Dick Cheney for the skyrocketing oil prices because of their past association with the oil industry while ignoring his close, personal financial ties to Occidental Petroleum, the oil company founded by Gore family patron and former Soviet espionage agent, Armand Hammer.

An oil crisis exists today for four reasons.
First, from 1997 to the early spring of this year when Asia was suffering from a severe recession, the global demand for gasoline in the Orient was dramatically reduced. America benefited in 1998 with lower prices at the pumps because there was a glut of oil on the market. Second, the economy in western Europe improved in 1998 and 1999 as the transnationalist industrialists and bankers bolstered the economy to "prove the merit" of a consolidated Europe--and a consolidated European currency, stimulating interstate travel and the consumption of fuel at reasonable prices. (Europe did not benefit because new European Union taxes on gasoline offset the lower prices--the cause of much of Europe's dilemma with gasoline prices hovering at around $5.00 (American) per gallon at this time. Third, the Clinton-Gore Administration, pressured by environmental groups funded by the Rockefeller Foundation, the Carnegie Trust, the Pew Foundation and several other utopian one-world foundations, began the systematic task of dismantling the American oil industry through strict environmental regulation and by classifying most of the known reserve areas as either national monuments or endangered environmental habitats to prevent either exploration or drilling.

Under the Arctic Wildlife Preserve (which was discussed in the first Gore/Bush debate) lies approximately 16 billion barrels of oil--enough to replace all of the oil imported from OPEC for 30 years (although the Clinton-Gore Administration mantains there isn't enough oil there to supply the United States for a year and therefore is would not offset the damage it would do to the Arctic ecology to get it. Not true. Instead of oil exploration, Gore said, his plan calls for imrpoving the gasoline consumption efficiency of the automobile. "By getting just three miles more per gallon," he told those listening to the debates, "we will save more gasoline than is available in the Arctic Wildlife Preserve." Gore failed to mention to the listening audience is that there is almost no animal life in the area designated as the Arctice Wildlife Preserve. It is a seasonal mating area for calibou. Americans today are paying anywhere from 25 to 50 cents more per gallon for their gasoline so

that the caribou can procreate in an area devoid of drill sites or pipelines. Add to the lack of planning on the part of the Clinton-Gore Administration (who believe theire is an adequate supply of oil and are blaming refiners for the shortages and high prices) through the Clinton-Gore giveaway of what amounts to the potential of at least 130 billion barrels of oil to Russia and China--and you have the total sum of the Clinton-Gore Energy Strategy. The Clinton-Gore Adminsitration has allowed China to claim, as sovereign territory, about 100,000 square miles of the South China Sea around the Spratley Islands (part of the Haiwaiian Islands). Under that seabed lies almost 100 billion barrels of oil. Above the Arctic circle lies a group of islands which America has owned for over 100 years. While Jimmy Carter actually ceded those islands to the Soviet Union in 1979, and George H.W. Bush's State Department put their "stamp of approval" on the transfer, the boundary has been in dispute since that time. Al Gore, the Russian policymaker of the Clinton-Gore Administration, ended the dispute and sealed the deal for all time. Today, with oil prices reaching $38 per barrel, and threatening to reach $45, the Russian oil company Lukoil Holding, in a joint venture with Conoco Oil (see Rockefeller oil holdings below) is now going after it. Russia believes (and rightly so) that the oil under the Arctic will surpass the production levels of their Siberian oil fields. Surprisingly (other than Greenpeace who is losing its standing, and the financial support, of the utopians behind world government) the environmentalists never seem to cry "ecological disaster" when those planning to drill are either linked with a foreign nation...or the Rockefeller oil interests. Four: we have an oil crisis because the Saudis, who still have a fond and respectful relationship with George H.W. Bush and a contempt for Bill Clinton and Al Gore (since they mistrust both of them), want to see Bush's son in the White House. The Arabs, who see the Clinton-Gore team attempting to play both sides of the great Islamic/Jewish Divide, have no love for either of them.

Nor do too many of America's leading economists who lay the blame for the oil crisis squarely on the Clinton-Gore Administration due, they claim, to the failure of the Administration to show any leadership--or conscious effort--to either acknowledge (since early this spring) that an oil crisis existed, or attempt to solve the problem. To Gore, oil shortages and less fuel consumption was a good thing. So are higher fuel prices, since higher prices at the pumps translate into less consumption--and less consumption, in Gore's mind, translates into less fossil fuel emissions and less carbon dioxide in the atmosphere and therefore, less greenhouse gas emissions to contend with as the "atrium of America" heats up the entire planet. Gore was a happy camper...until his ecoalarmist-manufacturered oil crisis came back to bite him in the butt.

As America rightly blamed the Clinton-Gore Administration for rising fuel costs and shortages that will only get worse as winter hits, Gore dived for cover once again, using a staged setting, backdropped with oil tanks, in eastern Maryland for his photo op press conference to "play to the media" in calling on Clinton to tap into the Strategic Petroleum Reserve and release 30 billion barrels for oil for conversion to home heating oil...and to relieve the "price at the pumps." To capture the "senior" vote, Gore also asked for a $400 million home heating oil subsidy for the "elderly."

There were several things wrong with Gore's request.
First, Gore asked the oil companies to lower their gasoline prices in anticipation of the "glut" that was going to be forthcoming...when the oil being released from the Strategic Reserve was all earmarked for home heating oil--not gasoline. When prices at the pump did not go down, Gore could then blame the "greedy" oil companies...and point his finger at Bush and Cheney, the "oilmen." As it turned out, 30 million barrels of oil would supply the nation with gasoline for about 4 days if the oil was used for gasoline. Which it will not be. Second, the oil, valued at $38 per barrel, will be "loaned" to a select group of oil companies today, to be "repaid" later with $25 per barre oil, allowing Clinton-Gore "friends to profit by some $13 per barrel--or in terms of "real dollars," some $390,000,000.00. Third, those American refineries which Gore's environmental regulations have not shut down completely have been slowed down so much that little, if any, of those 30 million barrels will actually be available this winter. But then, Gore wasn't really concerned about actually providing enough home heating oil to cut prices this winter--he was only concerned about creating the appearance that candidate Gore was concerned, and was doing something about it. By spring, when home heating oil is no longer needed, Caspian Sea oil, already purchased by Gore to spur the Russian economy, will be flooding the American market. Throughout his congressional, senatorial career and executive branch career, Al Gore has fought hard to get the price of gasoline over $2 per gallon as a means of killing consumption. But, it was supposed to happen in such a way that someone else could be blamed--like his oil-connected political opponents...or the greedy, self-centered American consumer. But this one belongs to Al Gore all by himself. He fought hard and long for his victory...and for that reason, all the "credit" should go to him.

Al Gore Reasons.

2614. YOU AIN'T SEEN NOTHING YET ..

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-21 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <20001021130302.04246.00000742@ng-fn1.aol.com>
Source record: 101387

YOU AIN'T SEEN NOTHING YET ..

by Neal Boortz

That, my friends, is the very last line of the official Platform of the Democratic Party. "Now, we say to America .. you ain't seen nothing yet. Here we have the Democrats touting their so-called "accomplishments" of the past eight years, and telling us ". you ain't seen nothing yet."

You know, you sit down and you think about that line for a few nanoseconds, and you start to get a little worried! Oh, you're not worried? Well, then .. you're just not paying attention. Look at this wonderful closing the Platform of the Democratic party this way and see if your serenity starts to crumble ....

During the past seven and one-half years ....

We've seen the president's "wife" try to nationalize 17% of the nation's private economy through her heavy-handed plan for socialized medicine.

We've seen major Democratic campaign contributors sell and transfer vital American nuclear, missile and satellite technology to avowed enemies of freedom and of the United States.

We've seen wholesale violations of basic campaign finance laws.

Then we saw the Democrats and the Clintonistas engage in a concerted effort to

make sure that none of these campaign finance law violations were subject to a serious criminal investigation.

We've seen five members of Clinton's Cabinet come under criminal investigation.

We've seen 33 connected to the Clinton administration convicted of crimes.

We've seen the Lincoln bedroom in the White House turned into a high-priced five-star hotel almost 600 times with the basic rate being a huge campaign donation to the Democrats. We've seen seats on government overseas trade missions sold to the highest bidders --- sold for campaign donations.

We've seen a president dropping his trousers in the Oval Office to receive oral sexual favors from an intern barely older than his daughter.

We've seen the president grope and fondle a woman who came to him for help in securing a White House job --- wrapping up the sordid episode by taking her hand and forcing it into his crotch.

We've seen 45 witnesses in criminal investigations or critics of the Clinton administration subjected to IRS audits.

We've seen five women who were said to have been associated with Bill Clinton complain publicly of physical threats having been made against them.

We've seen Hillary Clinton issue a 42 paragraph sworn statement to a House investigating committee investigating Clinton wrongdoings and in those 42 paragraphs we see Hillary use the phrase "I don't recall" or its equivalent no less than 50 times.

We've seen Bill Clinton say "I don't recall" or its equivalent in portions of his testimony about Paula Jones 271 times.

And when it comes to failed memories, we've seen other Clinton administration friends and officials say the words "I don't recall" or its equivalent a total of 6,125 times before various investigating committees --- for a grand forgetfulness average of 235 times per person. In other words .. we've seen the most forgetful group of political operatives in the history of this country.

We've seen a president lie under oath - several times.

We've seen a president use the powers of his office to obstruct justice and to deny a private American citizen her constitutionally guaranteed right to a day in court.

We've seen American servicemen scattered to nearly 100 foreign nations to serve as glorified cops and cafeteria workers in various international "meals on wheels" schemes. We've seen aspirin factories in foreign countries bombed to divert attention from presidential scandals.

We've seen the bodies of dead American servicemen dragged through the streets of half-assed inconsequential foreign dog-patch nations by mobs of people who aren't fit to utter the "would you like french fries with that" anthem of the American high school graduate.

We've seen a president agonize over what the definition of "is" is.

We've seen a president refuse to personally respond to a very credible accusation of a violent rape.

We've seen almost one thousand confidential FBI files of those not friendly to the president's political agenda gathered by former bar bouncers working in White House security positions --- with absolutely no consequences.

We watched in 1996 as the Democrats rushed to naturalize tens of thousands of illegal aliens in time for them to vote Democratic in the election, and, in the process, including thousands of violent felons ... all for a few votes. We've seen all of this . and we've seen so much more. All of this ... and the Democrats are telling us "you ain't seen nothing yet?"

If they're right . we need to run like hell, and never look back.

Al Gore Reasons.

Well, it's like when a woman is raped, questioning whether or not she gave
consent. Evidently, it's already been heard by a jury and from everything
known, the rape happened.

Benefit of the doubt to the victim I say.

No, I'm no Art Bell fan. He kept my elderly, sick mother in fear the last
two years of her life with his kook-shit.

Gentlemen,
My HP 608F VHF signal generator after sitting for about a year has developed pretty severe drift at the top end of it's range. I use it for maintaining my UHF repeater but it drifts off freq so fast it has become a PITA (Pain in the ..)

Anyone have any idea what may be going on here. My only tube experience is with Amplifiers. Every oscillator I ever built was Xtal ref PLL.

That's not the point. The point is, he presented kookbait as science. He had every right to do so I suppose, and I have every right to dislike the nut. Don't make me pull out the Dr. Laura argument Dipshit.

His son was molested which implies statutory rape, the inability of the
victim to legally consent. Wasn't he 16 at the time? Whatever he's a
victim of, it certainly includes his father's celebrity, his father
dwelling on the incident and media sensationalism.

I get amused at the CB vs. Ham debate. Some hams still haven't gotten over the loss of the 11 meter band.

I spend much of my time at the family farm in a high valley in the Rockies. There have been times when a blizzard or severe cold settled in there, and the CB's provided the backbone of communications for people who had to have feed cattle, direct emergency vehicles into the community, or just plain be neighborly. The major town is about 20 miles away, and on some days of high sunspot activity, the only way to get a message to the feed co-op was by having that message relayed by a neighbor closer to town. We routinely relay messages from town to farms that are further out.

Ham radio may have worked better in these emergencies if there were hams available. As a matter of fact, every year the towns around here conduct a Civil Defense exercise, and hams do play a large part of the exercise. But there still is a need for CB's, especially in the rural areas. A ham can get a message to a anxious family member ten states away, but getting the message to the ham requires far less sophisticated equipment. CB fills that gap nicely.

We should plan for emergencies where the government isn't the enemy as well as the other scenarios. And in these scenarios, CB plays a useful role, specially for people who don't want to invest the time and energy into getting licensed. Most of the farm women here have no interest in ham radio, but will fire up the CB in the mornings and catch up on the latest information from the neighbors.

The last blizzard, I sat by the CB, ready to fire up the snowmobile and run to the aid of my neighbors house where his wife was pregnant and snowed in alone. I could have either taken her to the highway where the ambulance would have been waiting, called for assistance from other families or brought her to our home. As it turned out, she didn't go into labor until the county cleared the road, but still, help would have been there had she needed it.

:(snip)
:
:>Most outlaw CB operators use ham equipment like the Yaesu FT-101
:>and the Heathkit SB-200 family. There is a huge amount of ham gear
:>out there. You need to go to a hamfest.
:
:The problem is I'd have to bring all my neighbors, too, or just buy
:enough radios to outfit all of them. Another side benefit for CB's is
:that they're getting pretty cheap nowadays. I just picked up another
:handheld 40 channel CB on eBay for $5.50 plus shipping.
:
:I may get a ham radio(and license) one of these days, but it could be
:quite a while. For now I have CB's and FRS for transmitting locally,
:and receivers and scanners for monitoring more distant transmissions.

You must have an outlaw CB group in the area. They work outside
the regular CB band. They either use modified CBs or modified
ham gear. This is the biggest element of CB, not the shit sold
to the public.

Why use limited equipment? And ham gear is very cheap at
hamfests.

:(snip)
:
:>Even the Army is going away from manned rebroadcast. When we
:>do, it is two SINCGARS hooked together like a repeater (automatic).
:>Frequency hopping and all.
:
:Maybe in the high-speed, low-drag units, but I was stationed in
:Germany near the Czech border, in a Cav unit. We didn't have all the
:newest technology to patrol the border, so we had to make do with what
:we had. We had bodies and Hummers with radios, so we sent them out.
:The Cav patrolled that border for around 45 years or so, so they had
:figured out the best locations for relay purposes. What amazed me was
:the difference in radio quality. Our unit didn't devote much time to
:maintenance of the radios, like regular servicing and stuff. We were
:visited out there once by another unit, and their vehicles joined ours
:on a patrol of the border. Their radios were much clearer and able to
:communicate with the Ops center much further away. When they got back
:I asked what they did to make the difference, and they said it was
:probably the service program they had for their commo gear.

If a radio is not serviced regularly, it goes out of tune. That
means a lost of power.

:>The UAV (unmanned aircraft) are also being used to repeat
:>transmissions in places like Bosnia.
:>
:>Use Class A CB (GMRS) in the 460 Mhz band. The first 7 channels
:>of FRS are GMRS. Put a repeater up on a hill with solar power.
:
:Here in the Ozarks there are lots of people living on the high
:terrain, so manning wouldn't be that big a problem.

Which means that they are targets for incoming artillery.
Get an automatic repeater, use solar power. Then you
can check it remotely. Just stash it somewhere on their
property.

Remember, 10/11m is not to different from the military 30
to 88 Mhz band. And there are repeaters for 10 m.

I've got a touch lamp that has three brightness'..not sure of the manufacturer...it produces noise on all settings..the brightest setting seems to be the quietest..and it makes the worst noise while it is in the off position..i have to unplug it from the wall in order to listen to anything below 40 Mhz.

Br. Roulle
I have to agree about the GREAT debate....yes I'm a ham and have little use for CB as it is today. It is not because of the loss, but abuse. Being in a region like you are, it is an asset and used very well. In earlier posts, I referred to the maniacal garbage that has erupted over the years. I commend you and others in your region for putting a communications medium that is vastly abused to the proper use. Keep up the great work and my hat is off to you.

I agree Randy. The 11 meter poke was gentle joshing. I have much admiration for Hams and the dedication they have. If I didn't hate learning code so bad, I'd have my ticket. Somehow the voice only tickets seem to be cheating to me.

In an earlier incarnation, I had bought a semi-truck and hauled meat and produce to Eastern markets. Even at that time CB channels had become a horror show anywhere near a city. But then there times where there would be hundreds of trucks waiting for the DOT to clear the roads at Snow Shoe PA or LovelandPass/EisenhowerTunnel and the only communication I had was channel 19. I ran legal/barefoot in my rig as did most drivers.

There were a few fools on the road with 2kw rigs, but fortunately they were parked at the truck stop. Thank God they didn't last over a couple of years on the road.

There are a lot of "Gods little underachievers" on CB, but with a little practice and judicious planning, you can successfully run a net on CB, even in the city. I am at the age now where I leave the homestead to the kids and winter in the city, where I am near my HMO and HBO :)

I belong to the Colorado 57th Geriatric Militia, (underground) and we are spread out in distance and girth. We normally use GMRS for longer range work up to 30 miles and CB SSB for the same ranges late at night and as a backup. A couple of the wives have their Novice tickets and love QRP operation on the HF bands. I just noticed my old CB License taped to the side of an old 23 channel unit that I have. KBBE-1613

We also have a passel of FRS units that we use in lieu of CB's when we are convoying up to the mountains tho most of us are equipped with CB too. We use the FRS's in maneuvers too, mostly for storming the hot-dog redoubts and out flanking the potato salad.

And these days, even on the farm, cell phones are taking more and more of the load. :-(

Oh, come on, Roulle. We're not that petty, or that simplistic. In fact, many of us started out our radio hobby using CB radio. For example, I got my first CB license way back in 1976 (KBEO-0299) and I'm in the process right now of installing CB radio equipment in both of my vehicles for a pending trip (in addition to the existing ham radio equipment in those vehicles).

The difference is that ham operators like myself have used both types of radio equipment and are therefore more aware of the capabilities and limitations of both. And it is on that basis alone that we recommend one type of equipment over the other for a given situation.

> We should plan for emergencies where
> the government isn't the enemy as well

And thats fine, Roulle. But Noah's conversation seemed to center on the use of repeaters, and other techniques, in a quest for higher communications security between a specific point and another specific point. Obviously, since his neighbors in general would not have these capabilities with their basic CB radio equipment, this conversation is not about simple conversations with neighbors in general using basic CB radio equipment.

And, as we (Randy and I) pointed out to Noah, the CB radio service was simply not designed to do what he is seeking, and the ham radio service is. So, unless you're aware of something that we're not, our statements to Noah were both factual and honest (and not just sour grapes over the loss of the 11 meter band).

And I would urge those people to check out ham radio today. For the average CB'er, the (no morse code) Technician license exam should be fairly easy since the average CB'er probably already knows more than half the stuff on the exam anyway (antennas, coax, etc).

And equipment costs have come down quite a bit in the last few years. Today, there are several 2m mobile radios prices under $150, and several more priced slightly higher than that (less than $200). And, just like a mobile CB radio, these radios can used in the home as a base station with the addition of a relatively inexpesive power supply.

The only difference is that the basic 2m radio will offer so much more than the typical CB radio - more frequencies, more power output, less noise, less crowding, greater range, more reliable communications, the use of repeaters to increase range even further, and so on.

There are also several handheld 2m radios that cost less than $150 (Yaesu VX-1R, Icom IC-T2H, and others). Small, pocket-sized, units such as this offer fairly reliable (better than a cell phone) communications over a range of twenty to fifty miles through the use of repeaters.

Ham radio has a lot to offer, Robert. And, don't forget that you can still keep your CB (with all it has to offer) also. So, in the end, you get the best of both.

I think you need to be a little more clear on this, Gregory. You're not suggesting that CB'ers use the 10 meter ham repeaters for this, are you? There are huge fines associated with such activities and, as you should know, the FCC can be very strict when it comes to enforcement of the ham bands.

I know ... but I can't resist tweaking hams from time to time! hi hi

Perhaps I read it wrong, but it seemed to me that what Noah was addressing was a net where the net control would pass on messages from a more distant station rather than a repeater operation. In parts of the west and perhaps rural areas of the East, legal CB could run on SSB and a cheaply made vertical polarized half rhombic and get some pretty fair ranges.

I think that his further point was is that CB's are plentiful and could be pressed into service in an emergency. I agree that CB's aren't the best of all possible worlds, and in my own city where I winter, my group solved the problem of communication with GMRS units and directional antennas. Our city net is spread over a footprint of 30 miles by 50 miles in mostly a urban setting, but we still run the CB's on SSB once or twice a year to see if they are still operational. They are a major PITA with all the tuning and channel changes, but they can be made to work reasonably reliably. We did that so that if we *had* to, we would have the capability of interacting with inexpensively equipped mobiles who are not now a part of our group but might be in an emergency.

Ham units certainly will be better and in some scenarios, specially if the government is the enemy, can be set up a little more securely, cover wider ranges and can use packet messaging right off the shelf. And if the group is dedicated, getting most of them licensed wouldn't be a major obstacle unless some members wanted to stay off the information grid. A major obstacle is that amateur licenses *are* in the public domain.

I think that a discussion on it'lldo communications doesn't hurt.

Why the frownie? I know a grain harvester operator with 2
machines and the complete setup- service truck, etc. He
looked at business radio for comms, but then decided, given
the costs, reliability, wider usefulness, to go with cell
phones for his drivers. Makes perfect sense to me. Of

course, he wasn't looking for a hobby- just the best way to
communicate.

NOTICE:

Roy Lewallen, W7EL, d/b/a/ 'EZNEC' is in copyright violation for unauthorized distribution and publication of the antenna file marked 'MI2'. Lewallen has publicly made and advertised this file on his http://www.eznec,com web site. Furthermore he has publicly advertised its availability on USENET.

This MI2 file was first produced by me in 1994, with a revision in 1995. It's copyright was assigned to Fractal Antenna Systems, Inc. in 1995. The MI2 file posted by Lewallen is either an exact or "substantially recognizable" derivative of my copyright file. Lewallen has neither sought nor received permission to use this file in any way.

Mr. Lewallen's commercial publication and distribution of the MI2 file does not constitute "fair use" and he has been so advised.

On 20 October, 2000, the copyright for MI2 was transferred back to me, the author. I am the sole holder of said copyright and have not authorized any copies to be published or distributed by Mr. Lewallen. The file is not in the public domain.

I urge fellow amateurs to actively discourage Mr. Lewallen from unuathorized use of copyrighted material. To do so undermines the edifice of creativity which much of the software used by hams is built upon. Not only is it stealing, but it is an insult to those who try best to educate and help others.

Mr. Lewallen has been sent a certified letter formally asking him to cease and desist. If he does not remove the material he will be sued d/b/a EZNEC.

Please let Lewallen know how you feel about stealing someone else's property. His e-mail is:

w7el@eznec.com

Thank you!

Nathan Cohen, Ph.D. N1IR

Statement Regarding Art Bell Lawsuit
October 20th, 2000

On December 9, 1997, Ted Gunderson broadcast a radio show transmitted by WWCR in which a guest by the name of David Hinkson made certain statements that may have left the listening audience with the belief that former late night radio host Art Bell had been charged with child molestation.

On May 15, 1998, Mr. Bell filed a defamation suit in the Circuit Court for Davidson County, TN against Mr. Gunderson, his guest Mr. Hinkson and Radio Stations WWCR and WNQM. Mr. Gunderson and the ownership of WWCR have apologized to Mr. Bell and his family for the statements made by Mr. Hinkson.

Sadly, in point of fact, it was Mr. Bells's son who was victimized by a high school teacher who is now serving a jail sentence for his crimes.

Upon receipt of this apology and previous retraction, Mr. Bell, agreed to a confidential settlement releasing Mr. Gunderson and the radio station (WWCR/WNQM), Mr. Bell looks forward to putting this matter behind him and moving on with his life.

That's not painting with a broad brush. That's human nature.

Try this with your class: Take a plain white piece of 8 1/2" by 11" paper. Put a small, solid, black dot on it, about the size of a dime. Show it to your class and ask them what they notice about about it. The vast majority will notice the black dot. Very few will notice that the paper is mostly white, or that it is rectangularly shaped, or that the other side of the paper is still white. (unless you used a pen that bled through)

That is some people look at ham radio. It's human nature, and that is very difficult to change.

Tom - N8ECW

Cross-posted to: misc.survivalism,rec.radio.amateur.misc,rec.radio.amateur.equipment

:(snip)
:
:> Again, you're not being very clear on what type of security you're
:>trying to find (who, what, where, why), so I can only speak in general
:>terms. The use of the phrase "terrain masking," and the mention of
:>survivalism in the newsgroup list, suggests you're attempting to hide
:>from people attempting to locate your position in a given area. So,
:>I'll go from that direction in my response.
:
:That's one of the goals of communication security. Another is to keep
:them from monitoring your communications and knowing what you are
:doing. If they can only monitor one side of a conversation they only
:get half the picture. Also, if you have codes and a plan for switching
:channels they will have a very hard time monitoring all your
:transmissions.

Most modern repeaters can be controlled remotely. Control commands
are send via a touch tone pad (audio) on the input frequency. It
would be possible to even change frequencies.

:>
:> As far as the use of a repeater, the repeater itself would be very
:>easy to locate since its signal is not highly directional. And, again,
:>assuming you're in a remote location, it would not be that hard to guess
:>your location based on the location of the repeater in the surrounding
:>terrain. All one has to do is locate the general area of the repeater,
:>and then look on a map for where your signal might not be heard from
:>their position, yet the repeater can still receive your signal.
:
:Here in the Ozarks that might not be so easy to do as in other places,
:but it wouldn't be impossible. Anyway, I am aware of the difference
:between a repeater and a manned relay station. I've served in a
:military relay station, but never done anything as a repeater. ;)

Modern repeaters eliminate the need of a control operator on site.
That is why the Army is using UAVs with repeaters on board. All
controls can be done remotely.

:
:> A dedicated radio operator could locate almost any number of frequency
:>pairs in a matter of moments. Its going to take a little more effort
:>than that to offer any meaningful security.
:
:Hopefully not too many dedicated radio operators would be trying to

:locate me. ;)
:
:The target group I had in mind with the security measures probably
:wouldn't include too many people with RDF capability, and most of them
:would probably be limited by their need for mobility, since they'd be
:here looking for us.

That is why the Army uses aircraft for RDFing.

2651. Re: More Communications Security

:> As far as the use of a repeater, the repeater itself would be very
:> easy to locate since its signal is not highly directional.
:
:Just curious here. Suppose my goal was to communicate with a family outside the
:range of say a 2 meter pushing five watts and I set up a repeater on a piece of
:terrain that would allow us both to reach it with no problem, BUT , I only
:placed my receiving antenna so it was line of sight to both of us and I placed
:say a pair cubical quad to transmit the repeater offset lower down on either
:side of the masking terrain. There would be line loss of course, but the gain
:from the Quad could make up for a lot and be very directional. We could each
:also use a quad at our ends, again masked if possible from sides or rear and
:we might be a bit hard for someone not pretty much between us and the repeater
:to find.
:
:Would this work?

Hams have repeaters in the 10m band. Either ham equipment or CBs can
be converted. Remember there is a lot of expanded 10m and CB units
out there.

2652. Help Installing an ICOM CR-282

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-21 00:00:00 UTC
From: Deninson Barreira <barreiradg@worldnet.att.net>
Message-ID: <x7jl5.1154$MR3.63519@bgtnsc04-news.ops.worldnet.att.net>
Source record: 101475

Could someone help me install a High Stability Crystal Unit CR-282 in my 706MK II G?
The instructions in the manual appears to be brief, and I am not sure if the radio has to be powered to do the reference frequency (60.00000 mHz) adjustment at the procedure step #5 of page 60 in the manual. Where do one connect the frequency meter to measure the ref. freq? To the pictured pig-tail? My manual is not showing it very clear. There is a picture next to the right showing the PLL unit bottom with something being pointed to, but no description.
Could someone help me to decipher this?
Your help will be most appreciated.
Regards,

Dennis

:(snip)
:> Why don't you post what you're trying to acheive again so those in the
:>ham radio newsgroups can get an idea of what you're wanting to do with
:>this. There are some ham operators who eat this type of stuff (RDF,
:>communications security, etc) up for breakfast. If they know what
:>you're seeking, they'll be better able to address the issue and you
:>might gain some valuable insights from their experience.
:
:I was posting about the measures which many people might take to make
:their communications more secure in a survivalist scenario. The
:specific scenario I was aiming at was one in which both sides were
:somewhat equal, rather than a situation with one side having a huge
:technological and manpower advantage. The situation most often brought
:up in misc.survivalism involves something like a small farming
:community or small town being watched by some "predators" from outside
:their area. I know it's possible for the "predators" to have some RDF
:capability, I wouldn't consider that a major problem if good comsec
:procedures are followed.
:
:I posted some of the measures we used in the Army for communication
:security and some possible ways they could be used in the civilian
:world. Things like directional antennae, low-power transmissions,
:pre-planned frequency(channel) changes, terrain masking, and a few
:other things straight from the Army's manuals(and my training).
:
:The reason I stuck with CB's is because they seem to be much more
:common than ham radios. I know there are some hams in my area, but I
:don't think there are enough for everybody to be able to communicate
:that way with each other in that situation.
:
:I've checked out the local hams sometimes and think they could be very
:handy to have around, but it just doesn't look likely that everybody
:would be able to communicate locally that way. I've thought about
:getting a license some day, but I already have more hobbies than I can
:handle, so that's just another one on the list for the future. Between
:a full time job and 45 acres of land, I seem to have enough to keep me
:busy most of the time.

Most outlaw CB operators use ham equipment like the Yaesu FT-101
and the Heathkit SB-200 family. There is a huge amount of ham gear
out there. You need to go to a hamfest.

:(snip)
:
:>What the civilian world uses is called repeaters. You receive on one
:>frequency then rebroadcast on another. It can extend a handheld radio
:>to up to 40 miles (trunked radios can go statewide with links). Hams
:>have hilltop repeaters all over the US and Europe.
:
:Yeah, I monitor one of the local ones on my scanner, but I was
:thinking more of a relay station manned by people instead of an
:automatic one. I figured since CB's would probably be much more
:available locally, more people would be able to communicate with them
:than ham radios.

Even the Army is going away from manned rebroadcast. When we
do, it is two SINCGARS hooked together like a repeater (automatic).
Frequency hopping and all.

The UAV (unmanned aircraft) are also being used to repeat
transmissions in places like Bosnia.

Use Class A CB (GMRS) in the 460 Mhz band. The first 7 channels
of FRS are GMRS. Put a repeater up on a hill with solar power.

The problem is I'd have to bring all my neighbors, too, or just buy enough radios to outfit all of them. Another side benefit for CB's is that they're getting pretty cheap nowadays. I just picked up another handheld 40 channel CB on eBay for $5.50 plus shipping.

I may get a ham radio(and license) one of these days, but it could be quite a while. For now I have CB's and FRS for transmitting locally, and receivers and scanners for monitoring more distant transmissions.

:
:
:Dwight Stewart (W5NET)
:
:http://www.qsl.net/w5net

There is another way. We do have 10 metre repeaters. On FM. Face
it, hams use CB equipment on 10m and CBers use ham equipment for
outlaw activities. It would be posible to use 10m repeaters for
automatic repeat (with solar power). Since 10m is an HF band, it
would not be as easy to locate as an UHF repeater.
```

BTW, the miliary uses 30 to 88 Mhz which has many properties
like HF.

Maybe in the high-speed, low-drag units, but I was stationed in Germany near the Czech border, in a Cav unit. We didn't have all the newest technology to patrol the border, so we had to make do with what we had. We had bodies and Hummers with radios, so we sent them out. The Cav patrolled that border for around 45 years or so, so they had figured out the best locations for relay purposes. What amazed me was the difference in radio quality. Our unit didn't devote much time to maintenance of the radios, like regular servicing and stuff. We were visited out there once by another unit, and their vehicles joined ours on a patrol of the border. Their radios were much clearer and able to communicate with the Ops center much further away. When they got back I asked what they did to make the difference, and they said it was probably the service program they had for their commo gear.

Here in the Ozarks there are lots of people living on the high terrain, so manning wouldn't be that big a problem.

2660. Reasons NOT to.....

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-21 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <20001021124445.04237.00000777@ng-fn1.aol.com>
Source record: 101483
Body handling: HTML body converted to readable text

1. Gore thinks "human civilization is now the dominant cause of change in the global environment." Nevermind the sun, the oceans, volcanoes, and other natural phenomena that actually do control the environment.

2. Gore believes that "industrial civilization" is engaged in a "terrible onslaught against the natural world." Of course, without industrial civilization, we'd all be riding horses and growing our own food. Forget about cars, computers, air conditioning, television, telephones, plastic, pharmaceuticals, et cetera.

3. Gore's "strategic goal" is to "eliminate the internal combustion engine" by the year 2020. This particular kind of engine can be found in automobiles, trucks, vans, and a whole host of labor saving devices.

4. Gore believes that the "cumulative impact" of automobiles "is posing a mortal threat to the security of every nation more deadly than that of any military enemy we are ever again likely to confront."

5. Caught making campaign finance calls from the White House, something that is against the law, Gore declared that there was "no controlling legal authority" regarding this improper behavior. Like any longtime legislator, he knew federal law prohibits soliciting campaign funds in a federal building.

6. Gore favored a government crackdown on the tiny trickle of electricity used by devices like television sets, whether they are on or not, because it results in a steady emission of carbon dioxide. All his talk of greenhouse gases and global warming ignores the fact that 95% percent of all carbon dioxide produced annually comes from the evaporation of water from the oceans, decaying organic matter, and the respiration of human beings and animals.

7. In October 1997, Gore told television weathermen gathered at the White House that global warming could be eliminated if the over-population of Third World nations could be controlled. This is a kind of Final Solution approach. The entire population of the world could live in Texas. Populations in industrialized, prosperous nations have steadily decreased.

8. Gore was responsible in having Timothy Wirth named Undersecretary of State. Wirth is on record saying, "Even if the theory of global warming is wrong, to have approached global warming as if it is real means energy conservation, so we are doing the right thing anyway in terms of economic policy and environmental policy." Since there is no global warming (the earth hasn't warmed in over 50 years), this is a justification for a bad policy based on bad science. Wirth now administers Ted Turner's billion-dollar gift to the United Nations.

9. Gore has pushed hard to make environmentalism the basis for our foreign policy. He called it "a turning point in US foreign policy." A turn for the worse since national security and the advancement of our economic growth is widely regarded as a sound basis for foreign policy.

10. While the economy of Japan remains stagnant, Gore advised them in 1997 to agree to "limit carbon monoxide and other greenhouse gases" by supporting the much-disputed UN Treaty on Climate Control. This treaty exempts nations that include China and India. The US Senate is on record saying it will never approve it.

11. Gore attended an April 29, 1996 campaign fundraising event at the Hsi Lai Buddhist Temple in Hacienda Heights, California and then called it "a community outreach" program. Three months earlier, his own staff had told him it was a fundraiser.

12. During his Democratic nomination speech, Gore told of his grief over the death of his sister caused by her having smoked cigarettes. He neglected to mention that his family's fortune had been based on raising tobacco in Tennessee and that the family farm continued to do so for years after her death or that he continued to accept tobacco industry political action committee money through his re-election as Senator in l990.

13. Gore once told reporters that Eric Segal's novel, "Love Story", was based on the romance between himself and his wife Tipper. When Segal said this was nonsense, he disclaimed his statement calling it "a miscommunication."

14. Gore has compared the "struggle to save the environment" to "the struggle to vanquish Hitler" adding that this time "the war is with ourselves." Apparently, the entire human race is now the enemy.

15. Gore advocates that the United Nations consider "the idea of establishing a Stewardship Council to deal with matters relating to the global environment." In other words, give the UN total control over the actions and decisions of sovereign nations worldwide. Meanwhile, the UN already has a plan for "global governance" complete with the ability to tax nations, set up its own permanent army, and now has an international court which can indict and convict American citizens.

16. Gore has written that the "deforestation of Haiti, perhaps as much as the repression of the Duvalier regime" was the cause of Haitian immigration, numbering over a million, legally and illegally, to the US. Sure, they all left because trees were chopped down.

17. Gore once claimed that, if the Republicans didn't go along with the Clinton Administration's environmental legislation, "our drinking water would be dirtier; (it) would make more people sick, and would kill more people." This is typical of his habit of over-statement and harsh attacks on opponents of his beliefs.

18. Gore has claimed during a 1999 interview with CNN's Wolf Blitzer that "During my service in the United States Congress, I took the initiative in creating the Internet." The preliminary discussions for the creation of the Internet took place in 1967 and, in 1969, the Defense Department commissioned

the creation of the "Arpanet." Gore was 2l years old at the time and it would be eight more years before he was elected to the US House of Representatives.

19. Gore was a supporter of the creation of the so-called "Superfund" to clean up toxic sites. It was supposed to be a short-term program costing $1.6 billion. The program still exists and has cost more than $30 billion without having successfully cleaning up more than a fraction of sites.

20. Gore was an advocate of the "V-chip" to permit parents to block out programming they considered inappropriate for their children. It is widely regarded as a complete failure.

21. Despite the viewing public's disenchantment with the television show, "Ellen", starring Ellen DeGeneris, an outspoken advocate of the lesbian lifestyle, Gore lauded the star for "forcing" millions of Americans to "look at sexual orientation in a more open light." They stopped looking and the show was cancelled.

22. A comparison between the statements found in Gore's book, "Earth in the Balance", and the "Manifesto" of the Unabomber, demonstrates that it is impossible to determine which one is the author of which statement. (See "How to Tell the Difference Between Al Gore and the Unabomber" on this site.)

23. Gore is on record declaring William Jefferson Clinton as one of the greatest Presidents of modern times.

24. Gore has placed some of the most radical advocates of environmentalism in posts throughout the Clinton Administration, first of whom would be Carol M. Browner, director of the Environmental Protection Agency. The bad science, bad laws, and lies coming out of this single agency will impact the US economy for years to come. Another Gore appointee, the former director of the White House Council on Environmental Quality, Kathleen McGinty, has resigned to play a role in his presidential campaign. There are others too numerous to name.

25. Gore was put in charge of "reinventing government" in the Clinton Administration, but not a single union job was found expendable. Nearly three-fourths of the positions that were eliminated came from the Defense Department, which lost 16% of its civilian jobs. Many other jobs that were supposedly eliminated were "privatized", using government contracts. Other reductions came from retirements. The Federal Register of new laws and regulations has increased dramatically during the term of the Clinton-Gore Administration.

26. During the 1992 campaign, Gore said that the government should fund the "information highway", but reversed himself the following year saying the private sector should pay for it.

27. The Gore family had close, personal ties to oil magnate, Armand Hammer. After his defeat as Senator, Al Gore, Sr. was given a $500,000 a year job to head up the Occidental Petroleum's coal division. Hammer, however, was a longtime Soviet agent, a personal friend of Lenin and the only American to receive the Order of Lenin from the then Soviet government. Today, Al Gore, Jr. serves as co-chairman of the US-Russian Joint Commission on Economic and

Technical Cooperation, better known as the Gore-Chernomyrdin Commission.

28. Despite being provided with evidence in 1995 by the Central Intelligence Agency of the personal corruption of Victor S. Chernomyrdin, Gore dismissed the findings and did not want to receive further reports.

29. Gore's advocacy of the widely disputed global warming theory led him to blame it for everything from floods in North Dakota, droughts in Texas, and forest fires in Florida. One would think that floods, droughts and forest fires had never occurred before, but history reveals they are a common annual occurrence.

30. Gore did serve briefly in Vietnam, but his assertion that he came under enemy fire is false. He served as a journalist behind the front lines and never saw combat.

31. While a journalist in Tennessee, Gore said that his reporting "put people in prison." An examination of the record shows this did not occur and he admitted that he lied about this.

32. Both Al Gore and his wife, Tipper, have admitted to being "recreational" marijuana smokers when he attended Harvard. The Clinton-Gore Administration is notorious for having failed to stem the flow of drugs into the country.

33. When President Clinton gave misleading testimony about his relationship with Monica Lewinsky to the Grand Jury and the tapes were shown on television in September 1998, Gore characterized his behavior saying, "My overall impression was that it was much ado about not much new."

34. On a visit to New Hampshire in 1998, Gore predicted that Clinton would end his term in office "with a distinguished record and will go down in history as a virtuoso performance, producing economic recovery and an American renaissance with new solutions to problems once thought impossible to solve." Most people believe Clinton has disgraced himself and the office of the Presidency. The nation’s economic success is attributed to the end of the Cold War and the former Soviet Union. Policies administered by Alan Greenspan, chairman of the Federal Reserve are also credited. By contrast, the Clinton Administration has been engaged in efforts to purchase more of the nation’s landmass to put it off limits to any development or the use of our natural resources. The Clinton-Gore Administration has attacked major industries that include tobacco and one of the most successful corporate enterprises, Microsoft.

35. Gore once accused then President Bush of having "taken our tax dollars and subsidized the moving of US factories to foreign countries", but omitted that the program he was describing, the Caribbean Basin Initiative, was one for which he had voted when he served in the Senate.

For these and many other reasons, Al Gore, Jr. is a proven, accomplished liar, an environmental fanatic, and co-equal with President Clinton in the cover-up of the Administration's scandals

Al Gore Reasons.

Agree 95% (although your probably wasting your sound
reasoning post on people like T.B.B. above) All in all
I'd rather listen to Bell instead of Limb-auger and Dr (?)
Laura Strangelove. Bell was much more amusing.

They are Metricom/Ricochet wireless data network boxes. They are rolling out their 2nd generation of technology which uses unlicensed spread spectrum at 902-928 Mhz and the 2.4 Ghz Part 15 allocation. They also use licensed spectrum that they acquired at auction in the Wireless Communications Services allocation near 2.3 Ghz.

User radios, about the size of a celphone, attach to your computer and communicate to the network nodes, known as "pole top digital repeaters". Range is about 1/4 to 1/2 mile from your handheld to a pole top, typically. The pole top then forwards your traffic towards a wired access point for entry into the Internet. Traffic may be repeated more than once, from one pole top to another, to reach the WAP, if needed. The outbound traffic is broadcast on 2.3 Ghz pretty much straight out to the poletops that then relay to your wireless modem.

The handheld modems are operating at 902 -928 Mhz. The pole tops operate at 902-928, 2.4-2.483 Ghz and also in the 2.3 Ghz allocation.

While I tend to agree with you about hams vs cbers, I must point out that the nonesense down in the 80mtr band does not make us hams look all that better then your common, garden varity CBer. These guys are extras+, either passed or bought their ham licenses back before no-code was a gleam in the candy companies eye. And they make the filthy mouthed bums that hang out on ch14 [here in central Ky] look like decent people. So can we say, some hams could be very usefull to an emergency operation. Others might be better used for live fire drills.
I have been a ham for over 30 years and remember when Class D CB was carved from the then 11Mtr ham band. Where SSTV was developed. I was not a ham at that time, but a friend of my father was and I was interested. I still have the old Hallicrafters SW that my parents scraped up the cash for.
I even heard some of Capethorne[I may well have his first name wrong] Mcdonalds AM SSTV. God I wish that I had a recorder back then!

Why not seperate your receiver and transmitter and run audio/control/power
lines instead of coax. No coax loss. Build the receiver using something like a
Pro34, which in the monitor mode sleeps and only listens 1 a secon or so
cutting pwoer requirements by a large factor. Build a cmos controller,
dispense with the extras (CW ider time out etc). Using a Pro34 (or one of the
scanning ham HTs) as the receiver, with another HT as the TX, builing your own
controler, with a good deep cycle marine battery with a decent solar array and
you have a repeater for less than say 200. IT should be poisble to reduce this
by carefull scrounging.
What we used for backup "Secure" comms was a couple of old GLB PK1 TNC.
They used a Z80 running with a 3.58 crystal. Replace teh Z80s with Z80As, and
the crystal with a 4.0MHz Than ran 1200B*(4.00/3.58) AX25. We riiged a switch

to where it would works standard, or flip the switch and instant "secure".
We only tested it once[in the "Secure" mode] over a 25+ mile simplex path and it worked great. 25Wat mobile at my work end (inot a 1.4wave) and a 5 element yagi at the home end.
We also used it several time in the standard mode, late at night through one of the local voice repeaters. I even cobbed up a homebrew version and used the car as a digipeater with a IC-2at/Tandy TRS80/100 and the TNC for a truly portable setup. I never tested the whole system end to end in the speeded up mode, but it should have worked. And do not forget about running your tnc at a lower say 600B on VHF circuit. Fairly secure, and perfectly legal.
As long as you used two, or more, identical TNC ans do not speed (or slow) the clock too much it should work.
Yea Iknow it is not exactly legla. And there is the real risk of a smart lcoal ham have a baycom and the skill to tweak it to intercept. But this is much more secure than any voice comms. Shucks CW is getting pretty secure these day!

I was posting about the measures which many people might take to make their communications more secure in a survivalist scenario. The specific scenario I was aiming at was one in which both sides were somewhat equal, rather than a situation with one side having a huge technological and manpower advantage. The situation most often brought up in misc.survivalism involves something like a small farming community or small town being watched by some "predators" from outside their area. I know it's possible for the "predators" to have some RDF capability, I wouldn't consider that a major problem if good comsec procedures are followed.

I posted some of the measures we used in the Army for communication security and some possible ways they could be used in the civilian world. Things like directional antennae, low-power transmissions, pre-planned frequency(channel) changes, terrain masking, and a few other things straight from the Army's manuals(and my training).

The reason I stuck with CB's is because they seem to be much more common than ham radios. I know there are some hams in my area, but I don't think there are enough for everybody to be able to communicate that way with each other in that situation.

I've checked out the local hams sometimes and think they could be very handy to have around, but it just doesn't look likely that everybody would be able to communicate locally that way. I've thought about getting a license some day, but I already have more hobbies than I can handle, so that's just another one on the list for the future. Between a full time job and 45 acres of land, I seem to have enough to keep me busy most of the time.

2666. Re: EZNEC: Copyright Violation

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-22 00:00:00 UTC
From: Roy Lewallen <w7el@eznec.com>
Message-ID: <39F2E142.1B5C58D@eznec.com>
Source record: 101335

This whole business started on the rec.radio.amateur newsgroup. Chip (aka Dr. Nathan Cohen, Ph.D.) isn't getting any sympathy there, so I see he's taking it farther afield. Readers of that newsgroup who haven't put him into their kill files have been able to see the whole story develop, but for readers of this group who don't know the story, here's a brief synopsis.

On August 12, Chip made a posting on the rec.radio.amateur.antenna newsgroup offering $1000 for anyone who could submit a design for an antenna "which has a performance advantage over the MI2 fractal loop element". He referred to his web site for an example of the MI2, and required that all submissions be in the form of an EZNEC file. (EZNEC is antenna modeling software I develop and sell.) The posting includes an equation of several terms defining a "figure of merit" which must be beat. You can see the original posting at http://x67.deja.com/[ST_rn=ps]/getdoc.xp?AN=657467296&CONTEXT=972215956.414253064&hitnum=17.

In subsequent postings, Chip refused to provide an EZNEC file of the MI2 for challengers to compare with, unless they had signed up for, and were accepted to, his mailing list. He has a history of refusing admission to or removing people from the list who have disagreed with him, so several potential challengers were unable to get on the list to get the file. (Actually, I don't know of anyone who actually did get it.) I offered to post any submitted files on my web site http://eznec.com as a public service, so anyone could see for himself how various antennas compared, since Chip hadn't come forward with an offer to do so.

Steve Best, VE9SRB submitted several EZNEC files, which I posted as I had said I would, and with Steve's permission. (You can download them from ftp://eznec.com/pub/MI2. The file 0Notes.txt in that directory explains what each file is.) Among the files are one of the MI2 antenna which Steve created by measuring wire lengths from a picture of the antenna on Chip's web site, where he had directed challengers to look. Steve accompanied the EZNEC files with text files (same name but .txt extension) which explain about the models. In the text file accompanying the MI2 EZNEC file, he fully credits Chip for its design.

Rather than being pleased by this properly credited acknowledgement of his work, or address the issues raised by this response to his challenge, Chip then claimed that the MI2 EZNEC file Steve created infringes his copyright of an EZNEC file he created years ago and which neither Steve nor I has ever seen. (So far, I haven't located anyone else who has, either.) Chip sent me an email message requesting that I remove the file on the basis that it's infringing his copyright. I don't

believe there's any possibility it's infringing any copyright so refused. He's now threatening legal action, as he has with many people, but none has so far resulted. Fractenna (the company, of which Chip is president, which apparently owned the copyright until recently) apparently sees how foolhardy and pointless legal action would be, and has given the copyright to Chip. So now he's free to pursue it on his own, presumably with his own money.

I have very high respect for intellectual property, and indeed depend on other people's respect for it to make my living. If I thought for a moment that the file on my web site was infringing anyone's copyright, I would remove it immediately and issue an apology. But I see Chip's action as nothing but bullying, and I won't be bullied. So the file remains. I encourage anyone who's interested to read Chip's "challenge", and if you have EZNEC, to download the files and decide for yourself whether he owes Steve $1000. (Sorry, the files won't run on the EZNEC demo -- the full program is required.)

I apologize for the leakage from the antenna newsgroup of this bizarre matter. It's sad enough that we have to put up with it there.

:Cops should be working "scrambled mode"
:Regards the scanner-toting thief:
:Will the bill stop the scanner-toting thief from stealing scanners?
:Personally, I dont buy your rep's explanation. ROTFLMAO
:There is a current established bill that recognizes FCC licensed
:Amateurs - rewritting it and omitting a conjunction is "job security
:and redundant redundancy-nothing more/nothing less.
:ROTFLMAO.
:
:Your comments are great and good luck in the endeavor.

There are problems with moving ALL public safety commo
to encryption. First, most cops do not get all talk groups programmed
into their radios. So they use trunk tracking scanners to monitor
groups working around them. A scanner will cost $200 to $400,
a trunked radio cost nearly $4000. I was sitting next to a Marion
Co (indianapolis) deputy who transported prisoners from the jail
to the courts. He could not talk to the baliffs nor to IPD units in
the area of the courts. If he had an escaped prisoner, he had a
very difficult time getting backup. We have a situation in my county
were the ambulance service will not allow the fire fighters on their
talk group. It makes it very hard to guide the medics into an
accident scene. It is a lawsuit waiting to happen.

Second, how long before the media sues for open access. Even if
the media is given a radio, that does not mean that they will have all
talk groups. How long before there will be a few groups that are not
monitored by dispatch and will be used to go offline to tell dirty
jokes or get their stories straight after beating a suspect? In time,
I expect that encryption will require a court order.

I have several problems that I have noticed lately. When I spoke with
the State Police about the guy up in Elkhart, they mentioned that they
did not like the public "spying" on them. They also felt that there
were too many in our society who were constantly pushing the limits:
ie the gays, drug users, ACLU....

Then last year I showed some guys in my army unit, who were signal intelligence analysts (they do what scanner hobbyist do), how I could use my old ICOM W-2A to listen to cell phones. They went ballistic!! Absolutely paranoid. Some even called me a militia member. And these guys are suppose to know how to do this (I have more skill). My colonel can't understand their paranoia.

Second, at work I tapped into the frequency for the mainlander personnel (we rent the facility). The foreman found out, bitched at my boss that I had pirated (how can you do that if you do not transmit?) the frequency. My boss was so angry that he was shaking!! I tried to explain the law but he did not want to hear it. It makes me wonder if there is something going on that might be illegal that they do not want to be heard. And they did not understand their license was a matter of public record. Or that anyone with a freqency counter can find the freqency.

Something has happened over the last 5 years. More people are using radios, to include cell phones, They do not understand the technology, are a little scared of it, and want to use it like they do a phone. And they are paranoid to think that anyone can listen to them.

In the particular case of "radio" bans, the money trail leads back to the Cellular/PCS mobile telephone industry. Where do they get their money?

From people ON THESE FORUMS who pay fees for cellular and PCS phones and pagers. If you want the industry to stop paying Congress to take away your rights and privileges, STOP PAYING FOR MOBILE PHONE AND PAGER SERVICE! Quit using the damned things! YOU ARE PAYING FOR THE EROSION OF YOUR OWN RIGHTS. Boycott them.

I will not use a cell phone or pager until Congress stops accepting money from the industry. That may not ever happen, but I can outwait them. I don't NEED a cellular phone or pager.

The real reason he left, is that no one could ever prove or find out that all his statements and speeches were just science fiction fantasies, until his Y2K "war of the worlds" broadcasts that could finally show what a fraud he was on January 1st 2000 when absolutely nothing happened. No one could continue spouting off MORE bullshit after that one! He is now forever the "boy who cried wolf" and even his confused weak-minded listeners who were left with rooms full of bottled water, food, and batteries would never believe him again.

Rather than admit being a fraud, apologize and bow down honorably, he instead makes up another fantasy story about family problems to distract people from the Y2K hoax ("wag the dog" all over again) and get them to feel sorry for him.

Good riddance. We still have enough and too many of his type preaching false statements on the airwaves leading the mindless sheep into hysteria.

Get a Ham license, then you don't need "police permission" or "permits" and it is good no matter what state or state law you are dealing with as Federal law overrules any state laws.

For extra security, get the ham plates for your car, and carry your license with you, as well as copies of the laws that protect you to show to the dumb uneducated officers that pull you over.

Listen FRAC! You say he is "in copyright violation". You better be careful making this claim. It is your OPINION that he is in voilation. If, indeed, he is not, you are opening yourself up for a slander lawsuit.

If you are SURE he is in violation, take legal action in court and stop it. Don't waste our time with this petty bickering on your part.

Ron,
Yep very true.I live in an area away from close neighbors..unfortunatly i have a high tension distribution tower within 200 ft of my property also....very bad..foggy nights i can hear those insulators buzzing like a swarm of bee's.
Oh well soon i will move...

Gee, what an intelligent way to seek support for someone.

> Please show support for Herb by visiting his web page and sending
> him your best wishes. Herb needs our support. Help cheer
> him up!

Those friends he has will do that without your unwanted exhortations.
The ones that couldn't care less about him won't.
So, basically, you've accomplished nothing here except to try and stir
up feelings about an issue that is pretty much passe.

As Bobby Knight's wife tried to tell him, "it's time to get off the dead
horse."

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AA1AC, KF2HC, N2OO, W2GR, WB2YQH/WB2RAJ & The 59(9) DX Report, W3LEO, W3UR & The Daily DX, K4VUD, KJ4UY, W4SO, KG6AR/4, W1HIJ/6, K8YSE, 9K2HN, BA1DU, BD7NQ, CE6TBN, CO8LY, CT1EWA, DF6EX, DJ5AV & DX News Letter, DJ5JH, DL5XL, ER1LW, F6AJA & Les Nouvelles DX, FK8GM, FK8HC, G3XTT, GM3WOJ, HA0HW, I4UFH, RN3RQ, RN6AH, SQ9LR, TA3YJ, UK9AA, UR7GG, YO3FWC, YS1RR, ZL1DD and ZS5BBO for the following DX information.

EDITOR'S NOTES: WOW! What a week for DXing. A lot of exciting activity is expected in the coming week and weekend due to the CQ World-Wide DX Phone Contest, October 28-29th. Also, do not forget about the Kingman Reef DXpedition and the German DXpedition to Eritrea. Have fun! P.S. If someone wants to put together a nice CQWW SSB Contest List of all the operations for me (ASCII format, no graphics, keep it under 80 characters wide), I will send it out before next weekend to all OPDX InterNet Subscribers.

3D, FIJI. "The DX News Letter" reports that Ron, ZL1AMO/3D2RW, is once again active until October 30th. He is expected to activate Mana (OC-121) for one week, but this may be over with by the time you read this. QSL via ZL1AMO.

3D2, CONWAY REEF (Update). Another press release by Hrane, YT1AD, was sent out with more details on their DXpedition. The list of operators are as follows so far: Hrane/YT1AD, Rasa/YU1RL, Miki/YU1AU (or Ratko/YU1NR), Rale/YT6A, Dragan/Z32AU, Mome/Z32ZM and Ray/YS1RR (still not confirmed). Earlier in the week there were some concerns raised on the group's operation during the hurricane season. Hrane reported the following: "This year the huricane season will be starting 10 to 15 of Nov. 2000 and will finish at about 1 Jan. 2001 so later on, in the middle of January the sea is in calm again. The captain told me that after the Christmas season the weather is ok for dx epedition." Anyway, the press release states that the team will fly from LA to Fiji in the first days of February and expect to arrive in Fiji earlier in the morning. They

will depart in their boat from the Fiji Port "Pacifik Harbour" on the afternoon of February 5th. The team will all join together at the airport Nanadi. They will then take a boat trip at sea, which is quite long, for about 40 hours. They expect to arrive on Conway about 4:00 to 6:00 AM (local time) on February 7th in the morning. Hrane states that the boat "is big, 20 meters long and has 10 sleeping places, and we will have profesional kitchen." They will then start to assemble antennas, towers, tents, generators..etc... etc., and will try very quickly to have the first station on the air. They plan to have all 3 stations active and working at all times around the clock until February 15th. After the operation, they will return to Fiji where they will stay for 3 days on the island to operate. They will return to L.A. on February 19th. All the operators, with exception of YU1RL and YT1AD, will go back to Europe from L.A., and YU1RL and YT1AD will go to El Salvador to operate in the ARRL Contest from YS1RR QTH.

4M, VENEZUELA. Scott, W4SO, will be active from here as 4M5X for the CQWW CW Contest as a Single Band 20 meter entry. Hhowever, he states there is a slight chance that it will be a Single Band entry on 15 meters, but he is leaning towards 20. QSL via W4SO.

4U1VIC, VIENNA INTERNATIONAL CENTRE (Austria). In the CQ World Wide DX Contest 2000 (SSB), the Rhein Ruhr DX Association (RRDXA) will again join the competition from 4U1VIC in Vienna, Austria, with a multi-operator team. 4U1VIC is a separate country on the DARC's WAE list, and thus a multiplier in the CQ's contests. QSL cards will be sent via the OE bureau. If you need a direct reply, please send your card with SAE and return postage to: Vienna International Amateur Radio Club (VIARC), Vienna International Centre, P.O. Box 200, A-1400 Vienna, Austria.

9K, KUWAIT. Hamad, 9K2HN, will be signing 9K9X in the CQWW SSB Contest as a Single Op/All Band entry. QSLs are "OK" via Bureau.

9M6, EAST MALAYSIA (Update). Peter, G4MJS, will be active as 9M6BAA from October 17-31st, from Hillview Gardens Amateur Radio Club, Keningau, Sabah, East Malaysia. IOTA Reference is OC-088, Island of Borneo. The QTH Locator (Grid) is OJ85CH. Operation will be mostly on 50 MHz with occasional activity on HF as time allows. The 50 MHz operating frequency will be 50.115 MHz, with a CW beacon running when not in QSO. QSL 9M6BAA via G4SHF. More info can be found on the 9M6BAA Web page at: http://www.9m6baa.com

A5, BHUTAN (Update). Both Yani (9M6US, YB0US) and Charly (K4VUD, HS0ZCW, 9N7UD, V26V, XW1UD) have paid all their fees and airplane tickets in advance to travel to and stay in Thimphu, Bhutan, arriving December 1st and departing about December 9th. Charly states that he has paid the extra fee for permission to run 1 kw on all bands. The two operators will have a tribander (and maybe 2 more and a WARC-bander depending on repairs) and wire antennas. Charly states, "These are totally self-financed trips, so no web site, no huge 160 meters antennas, no E-mail, and so on, but we plan to have a lot of fun." Charly's callsign will be A52UD (Yani's was not mentioned). Charly will be on SSB and CW, emphasizing the low bands, and Jani plans RTTY.

QSL requests for A52UD go to K4VUD (direct with SASE is faster, bureau replies will be very slow); Jani will announce his separate QSL address and policy. Anyone still wanting to join the group must act very fast as a month lead time is likely needed for this kind of trip. OPDX InterNet Subscribers will receive Charly's complete press release as an additional bulletin.

A6, U.A.E. Frank, DL2CC, will be active from the United Arab Emirates as A61AJ from October 24th through November 1st. Activity will include an entry in the CQWW SSB Contest on all bands. Activity before and after the contest will include 6 and 160 meters. QSL only via W3UR.

B1, CHINA. A group of hams from "The Beijing DX Club" will participate in this upcoming CQWW SSB Contest as Multi-Single category. Their callsign will be B1Z. QSL via JA4HCK.

B7, CHINA. A groups of Hams in the Guangdong Province will be active in the CQWW SSB/CW Contests using the special callsign B7K. QSL via BD7NQ: P.O.Box 599, Foshan GD 58000, P.R. CHINA.

CE0X, SAN AMBROSIO ISLAND. Marco, CE6TBN, Team Leader for the San Ambrosio Island DXpedition 2001, informs OPDX that the following operators will be active from here: CE6NE, CE6SAX, CE3AQI/NP4IW, OH1EB, OH2BH, OH2RF, DJ9ZB, K0EU and himself CE6TBN. They will be on the air as CE0XT from San Ambrosio (IOTA SA-013). CE0X is ranked #34 on the ARRL DXCC Most Needed List. Activity will begin the second full week of Februry 2001 on 160, 80, 40, 30, 20, 17, 15, 12 and 10 meters on SSB, CW, RTTY and PSK. There will be three or four 1kw stations. QSL Managers is CE6TBN: Marco A. Quijada, P.O.Box 1234, Temuco, Chile. Any support is welcome. Please visit the DXpedition's Web site at: http://www.qsl.net/ce0xt

CO8, CUBA. Eduardo, CO8LY, will participate in the CQWW SSB Contest as Single Op/Multi Band/Low Power entry. QSL direct to his Manager EA7ADH.

CS7, PORTUGAL. Paulo, CT1EWA, states that he will be active in the CQWW DX SSB Contest with the special callsign CS7EWA. QSL via CT1EWA by bureau or direct.

D68, COMOROS. Another bulletin was released this past week on the forthcoming D68C DXpedition to the Comoros. OPDX InterNet Subscribers will receive the complete release as an additional bulletin. In short, you will have heard Don, G3OZF, operating as D68/G3OZF while on a survey trip for the D68C operation doing some invaluable work in getting everything lined up for the upcoming operation. Also announced was the D68C Web Page which is now up and running at: http://www.dxbands.com/comoros
Yaesu was announced as the a major sponsor, however, further sponsorship is being sought, especially from DX groups and foundations, to help with the high cost of shipping some 3 tons of equipment to D68. Since their last bulletin, the following have joined the DXpedition team: Tim/G4VXE (a technology wizz), Yoichi/JP1NWZ (an all-rounder), and Rob/PE9PE. Rob will be especially welcomed to 6 meters, VHF and satellite operators. He will be ensuring that D68C is available via the current range of amateur

satellites. The expedition itself will take place over the period of roughly 8th to 28th February 2001.

E3, ERITREA. Chris/DL5NAM and Dieter/DF4RD are now active as E30TA through November 1st. Activity is all over the bands with nice signals. QSL to DL5NAM.

EA8, CANARY ISLANDS. Look for Pekka, OH1RY, to be active from the EA8AH/ EA8BH contest station through the CQWW SSB Contest.

EM3/EN5, UKRAINE. OPDX was informed that the following stations will be active in next weeks CQWW DX SSB Contest. Look for EM3J to be active as a Single-Op operation and EN5J will be activated by the Crimea Contest Club as a Multi-Single operation. QSL both to KG6AR/4: Chris Williams, 220 Woods Landing Ln., Callaway, VA. 24067.

ER, MOLDOVA. Slawa, ER1LW, will be using the callsign ER6A in the CQWW SSB/CW/RTTY Contests. Please send QSL cards to his home address at: P.O.Box 112, Chisinau, MD-2012, Moldova.

EZ, TURKMENISTAN. Alex, EZ8CQ, will start being active on RTTY in early November. He has also begun to be active on 160 meters. Look for him around 1830 kHz at 2000z. Skeds are welcome, send E-mail to: ez8cq@qsl.net QSL via W0FS (USA only) or I2JSB (rest of the world, direct only).

FK, NEW CALEDONIA. Franck, FK8HC, informs OPDX that he will be active in the CQWW DX SSB Contest this month on 80 meters and a Mono Operator/Mono Band as FK8HC. He hopes this band will run well during this contest weekend. QSL via VK4FW, P.O. Box 929, Gympie 4570 QLD, AUSTRALIA. Also, look for Eric, FK8GM, to be active on 40 meters as a Single Op/Single band entry in next week's CQWW SSB DX Contest.

FM, MARTINIQUE. The "Les Nouvelles DX" reports that after some delay, Gerard, F2JD, is in Martinique. He will stay there for 6 months, at least. Look for him to be active as FM/F2JD.

FO0, AUSTRAL ISLAND. Look for FO0WEG to be operated by Janusz/SP9FIH and Rafai/SQ9LR who are active from Tubuai Island in the Austral Island group (IOTA OC-152) from now until November 4th. Activity will be on 80-6 meters. They will be active on SSB and probably RTTY near the usual DXpedition and IOTA frequencies or 10 kHz down, for example (14185, 21285, 28485) using two 100w transceivers and vertical + 3 element tribander + 5 element on 6 meters. Their minimum plan is 20000 QSOs. A longer operation or an operation on another country is possible if they receive additional donations. For donations and QSLs, send to SP9FIH: Box 480, 44-100 Gliwice, Poland.

FO0, FRENCH POLYNESIA. Bill, W1HIJ/6, will be active as FO0SCH from the Mai Moana Resort at Bora Bora (OC-067) between October 31st and November 8th. Plans are for mostly CW operations with some phone and PSK31/MFSK, assuming that the computer stays in operation. There will definitely be activity on 20/15/10 meters, but he will try 40 meters if the wire gods cooperate (he hopes to be on 80/75 meters as well). QSL via W6UFT either

CBA or via the bureau.

FS, FRENCH ST. MARTIN. Members of the North Jersey DX Association (NJDXA), Brass Pounders Club of Bucks County, and the West Essex Amateur Radio Club (WEARC) will be on the air from French St. Martin December 5-12th. They will operate Multi-Op/Mixed Mode in the ARRL 10 Meter Contest using the call sign FS/W2JJ. Operators Mike/WA2VUN, Jay/WB2BHC, Gene/K2KJI, Maryann/K2RVH, Bob/W5GJ, Ann/W2AZK, and Brian/KF2HC should be on the air by 2300z on December 5th. Plans are to have 2 stations covering SSB and CW on all HF bands as well as a station for 2 and 6 meters. A 6 meter beacon and satellite activity may also be part of the operation if conditions at their QTH allow. Efforts will be made to operate in the U.S. general bands as pileups and conditions permit. Individual callsigns may be used at times, but the majority of the operating will be with the callsign FS/W2JJ. QSL via the callsign worked.

GZ, SHETLAND ISLAND (SCOTLAND). The North of Scotland Contest Group is proud to announce that they will be using a new prefix in next weekend's CQWW SSB Contest. They will be signing GZ7V (not GS2MP as previously announced). Thanks to the RSGB and the UK Licensing Authority, the R.A., holders of UK Special Contest Callsigns, they can now use the prefix GZ or MZ when operating from Shetland in major contests. The 'Z' refers to the old name for Shetland which is "Zetland". For more information, send E-mail to: gm3woj@talk21.com
Or visit their Web site at: http://www.gm7v.com

HB0, LIECHTENSTEIN (QRP). A group HA ops will be active from here from November 1-8th and take part in the HA-QRP Contest which is organized by "The RADIOTECHNIKA and its publisher The RADIOVILAG Ltd." The members of the group are Laci/HA6NL, Zsolt/HA6PS, Csaba/HA6PX and Tibor/HA6ZV. The operators will work on all other bands, CW and SSB with their own HBo callsigns, however, during the contest they will use HB0/HA5RT/p. Look for them to be on 3511 kHz (+/- QRM) with a QRP transmitter. QSL HB0/HA5RT/p via HA6NL, all others, please send via the operator's own callsign via HA bureau or direct.

IG9, ITALY. Fabio, I4UFH, states that the IG9A crew will be active from Italian (African Island group, IOTA AF-019) in next week's contest, but BEFORE and AFTER the contest the IG9A crew will be reading their E-mail at the following address: ig9a2000@libero.it For any information, update please check their Web site at: http://www.mcc-italy.it/ig9y2k.htm

IOTA NEWS.....
EU-179. Mykola, UR3GA, will again be active from the Island of Orlov, October 24-27th. Activity is expected on or about 14260, 21260 and 28460 kHz. QSL via UR7GG: Victor Tkachenko, P.O.Box 73, Kherson 73000, UKRAINE

OC-201. Dr. Barry, ZL1DD, will be active on 80-10 meters from his home on Waiheke Island in the New Zealand North Island Coastal Island Group. He states that he is willing to make skeds via E-mail for island hunters at: bjk@ihug.co.nz

QSL via Barry Kirkwood PhD ZL1DD, Signal Hill Homestay, 66 Cory
Road, Palm Beach, Waiheke Island 1240, NEW ZEALAND.
Check the Web page at: http://www.waiheke.co.nz/signal.htm/

J2, DJBOUTI. The "Les Nouvelles DX" reports that David, F5THR, is signing J28EX and has been here since May 2000. He will be there for 2 years. We could not find any QSNs on this station to report.

J4, GREECE. Wolff, DJ5JH, informs OPDX that he will once again be active from here during the CQWW SSB Contest using the special callsign J43J.

KH5K, KINGMAN REEF. As this was being written Sunday morning, the KRPDXG team is active as "K5K". The team arrived on Palmyra October 19th to pick up Mike, KH6ND, and some equipment that was left from visits by various team members earlier this year.. They decided to stay a few hours and operate on Palmyra before heading to Kingman Reef on October 20th. The team arrived at Kingman Reef, have transferred all equipment safely to the reef, but high winds did hampered their efforts. Look for them to be active until November 1st.

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in southwest Scotland from about October 24th through November 16th. However, Leo states that this is again a vacation and not a DXpedition and "time on the air will depend on the antennas, on propagation, and on when the nearby pubs are open, HI..." He will use his new Scottish callsign MM0LEO and plans to be in the CQWW SSB Contest. He will use an Icom 706 (100 watts), an R-5 vertical [10, 12, 15, 17, 20 meters], and a Cheltenham Communications HFV-1 helical wound vertical for 40 & 80 with Slinky radials. He "may" try and get on PSK-31. QSL to W3LEO via his CBA (with SASE) or via the U.S. bureau. ADDED NOTES BY W3LEO: IOTA: EU-005 [Great Britain]; CQ Zone: 14; ITU Zone: 27; Grid Square: IO-74ku; Worked All Britain [WAB] Square: NW-95. WEB NOTES: The nearby pub is 27 steps from the front door of the cottage. Some URLs to check:

OH2BH CQWW SSB DX CONTEST NEWS.....
An excerpt of a press release from Martti, OH2BH, provided/sent out by Tim, N4GN, reports a lot of activity will take place by OH operators during next week's contest. (OPDX InterNet Subscribers will receive the complete OH2BH press release as an additional bulletin.) Martti is calling this year's operators approach to the CQWW DX Contest as a "FINLAND FORMULA ONE RACING TEAM". The team has been working hard to build competitive sites for the current racing season. Ilkka Korpela, OH1WZ, will be piloting the OH0BH site on Aland Islands, targeting a new European all-band record, while Timo Klimoff, OH1NOA is going to be at the controls at OH2BH, aiming for an all-time high from mainland Finland. However, due to a cancelled Far East operations, both Martti, OH2BH, and Pekka, OH2TA, will be participating in the CQWW SSB contest by joining the JW5E team on Svalbard and making a double multiplier available for this year's event together with Mathias, LA5NM/JW5NM,

and Ragnar, LA7FD/JW7FD, and their team.

OH0, ALAND ISLAND. Jukka, OH6LI, will be active in both the CW and SSB CQWW DX Contests as OH0V on 10 meters. QSL via Jukka Klemola, Aarontie 5, 31400 Somero, FINLAND.

QSL INFO AND NEWS.....
Fred, DF6EX, reports to OPDX that the "Online Manager Database" was updated October 16th. The file is available at:
http://www.winqsl.de -or- http://www.qrz.com/qsl.html

Ciprian, YO3FWC, reports that nice pictures, a searchable log and the story about the recently DXpedition on IOTA EU-183 (YP1W), Sacalinu Mare Island is available at the Romanian Amateur Radio Federation Web site at: http://www.qsl.net/yo3kaa

4W/K7BV and 4W/N6FF logs are now updated and posted on the following Web page: http://www.xcvr.com/4w/logsearch.asp

RW3, EUROPEAN RUSSIA. Andy, RW3RQ, will be active as a Single OP/All Band entry in the CQWW SSB Contest from Zone 16. All stations who work RW3RQ on 6 bands (Europe) or 5 bands (DX) will be presented by the "Michurinsk Contest Groupe" a medal/trophy free of charge. However, please, send 2 IRCs for postal expenses. Other information is available via E-mail: mcg@pub.tmb.ru
Send QSLs via Jack Yatskiv, RN3RQ, P.O.Box 30, Michurinsk 393760, Russia

SPECIAL EVENT (Extinguishing of "Last Oil Well"). On August 2, 1990, the Iraqi forces brutally occupied the state of Kuwait. Baghdad refused all worldwide appeals to withdraw. Consequently, the world waged a just war against Iraq. Upon their overwhelming defeat and retreating from Kuwait, the Iraqi forces set fire intentionally to over 600 Kuwaiti oil wells. After several months of firefighting, day and night, the catastrophe came to an end leaving behind an environmental devastation from which Kuwait is still suffering. The extinguinshing of the last oil well marked a great event for which the nation celebrated in November 1991. On November 4-6th, the State of Kuwait will celebrate in commemoration of this national event. KARS will participate by operating actively during these three days and it is pleased to invite all licensed radio amateurs around the world to take part. The callsign allocated for this event is 9K2LOW (LOW: Last Oil Well). Contacts will be made on any band and any mode. There will be special QSL cards, the requests of which should be addressed directly to 9K2RA.

SPECIAL EVENT. Look for special event station from Yugoslavia using the callsign YU130Z to be active until November 20th to celebrate the 130th Anniversary of Fire Brigade "Matica". QSL via YU1AVQ.

TA, TURKEY. There will be plently of activity from here durin the CQWW SSB Contest. Look the following station on the following bands:
TA3D - From Asiatic Turkey, CQ Zone 20, SOSB on 160 meters low power. QSL via TA3D to the Bureau or Direct to: Yasar GOCET, P.O. Box 963, 35214 Izmir-TURKEY. QTH is Fokai-IZMIR (KM38OG) using a

Delta Loop and dipole antennas for 160 meters. E-Mail is:
ta3d@yahoo.com
TA3J - From Asiatic Turkey, CQ Zone 20, SOSB on 40 meters low power.
QSL via TA3J to the Bureau or Direct to: Berkin Aydogmus,
P.O. Box 987, 35214 Izmir-TURKEY. QTH is Manisa, Spylious
Mountain, Turgutalp Village (1,000 Meters above sea-level)
(KM38OG) using a Delta Loop, Dipole and Vertical for 40 meters.
Web-Site: http://clubs.yahoo.com/cubs/contestclub
E-Mail: ta3j@yahoo.com
TA3YJ - Asiatic Turkey, CQ Zone 20, SOSB on 15 meters low power.
QSL via TA3YJ to the Bureau or Direct to: Nilay Mine Aydogmus,
P.O. Box 876, 35214 Izmir-TURKEY. QTH: Manisa, Spylious
Mountain, Turgutalp Village (1,000 Meters above sea-level)
using Mini Beam Yagi for 15 Meters.
Web-Site: http://clubs.yahoo.com/cubs/contestclub=20
E-Mail: ta3yj@yahoo.com

TT8, CHAD. Christian (ex-6W1QV, D2SA, FH/TU5AX, TT8SA, TR8SA etc...) is
now active for the next 16 months as TT8DX from Moundou (south of the
country) close to Cameroun and Centrafrique. Activity will be
80-6 meters SSB. He will use a TS690s (all bands HF w/6m) with a 1500 watts
linear for HF and 400 watts for 6m, HF2V and 7 element beam for the upper
bands. QSL via F5OGL bureau or direct.

UK0, UZBEKISTAN. Fedor, UK9AA, states that he may be the only station active
from Uzbekistan in the CQWW SSB Contest. He will use the callsign UK0A
as a Single Op/All bands entry in the contest. QSL via UK9AA: P.O. Box 58,
Tashkent, 700000, Uzbekistan.

V47, ST. KITTS. Larry, KJ4UY, will be going to St. Kitts. His daughter will
be going to Ross Vet. School in St. Kitts starting next year. He will be
arriving December 10th in the afternoon and leaving the afternoon of the
18th. Karl, V44NK is loaning Larry an A3 tribander and he is taking a R-7
vertical with an Icom IC-706. His callsign will be V47UY. QSL via KJ4UY.

V7, MARSHALL ISLANDS. Look for Bruce, AC4G, to sign V73CW once again
from Kwajalein Island, the club station, from Oct 23-28th. The QSL via
AC4G.

VP2, BERMUDA. Mark, AA1AC, will operate as AA1AC/VP9 from Hamilton Parish,
Bermuda, from December 8-12th. Operations will include 10-80 meters CW/SSB,
with an emphasis on the ARRL 10-meter Contest. QSL to CBA: 15 Coral Lane,
Tiverton, RI 02878.

XE, MEXICO. Doug, W0AH, will be operating the CQWW Phone Contest as
XE3/W0AH as a Single Op/All Band entry, either QRP or LP. He will use
an IC-706 and old Hygain 18AVQ on a small dock over the Carribean Sea
plus some loop antennas for 10 and 15 meters. There will be some 6 and
2 meters operations as time permits. QSL via W2GR direct or Bureau. Send
direct with SASE or SAE and GS or IRC to: Mike Benjamin, 1064-99th Street,
Niagara Falls NY 14304.

ZF2, CAYMAN ISLANDS. Steve, K3SA will be active as ZF2SA for the CQWW CW Contest and the ARRL 160 Meter Contests. Also, look for him (on CW) on all bands between contests. QSL via homecall.

2691. Multi-Band Mini Quad Antenna - Comments

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-22 00:00:00 UTC
From: antenna <antenna@attcanada.net>
Message-ID: <VeKI5.76424$YG5.53357@tor-nn1.netcom.ca>
Source record: 101360
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc

We are currently doing our field testing on a new antenna design that you may be interested in. This antenna is a multi-band (10m, 15m, 20m) mini-quad (smaller than a full size quad) and portable (easily folded).

This antenna is designed for:

1. High performance
2. Ease of installation (and disassembly, if required). No wires to string.
3. Small turning radius (7ft).

Our field tests to date indicates that the antenna is performing as designed on all bands.

Any comments are welcome either by the newsgroups or email as we are trying to determine the interest level in this product.

If you wish to be kept update with the latest information, please drop use an email at: antenna@attcanada.net

Thank you for your interest.

Or you could get a professional license. (General Class Radiotelephone
License) Either case will require one hell of a lot of money, time, and
good lawyers to get that individual case decided by the U.S. Supreme Court.
In the mean time, every ones freedom of speech, and press rights will be
compromised. The Government argument will of course be that it is a matter
of public safety to drive while one uses the radio. (Of course, Police
officers, being superhuman, can use the radio while driving, and even a
computer, thus should be exempt from this law.)

Not to mention cab drivers, bus drivers, FedEx drivers, etc. Besides,
anyone with a basic knowledge of electronics will point out that a cell
phone is a mobile radio.

2695. Question for Seattle-Area hams

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-22 00:00:00 UTC
From: Michael1998@webtv.net
Message-ID: <4228-39F38AFD-67@storefull-135.iap.bryant.webtv.net>
Source record: 101364

I saw a special on MTV today about former musicians who had once been in the spotlight and what they were doing now. One of the artists they profiled was Sir Mix-A-Lot, who used to be a pretty famous rapper several years ago. One of the things that the programmed showed that he was now doing, aside from producing record albums for other bands, was repairing ham radio equipment and radio equipment in general such as amplifiers, etc. My question is, does anyone in the Seattle area know him or how to get in touch with him? Sir Mix-A-Lot was one of my favorite rap artists, and I had no idea that he was into radio repair. Does anyone know if he is a ham operator and what his call sign is? I would assume that he is because he seemed pretty knowledgeable about electronics from what the program showed. If anyone knows him or how to get in touch with him, could you please e-mail me? Thanks for any information.

73,

Mike Brown KU4UV

Well, its certainly not a son's or daughter's rape, but Opra routinely talks about the time she was raped (or at least that is what a friend who watches the show tells me - I work when Opra is on).

And, while it is not rape, whats his name (Heat of the Night) talked openly about his son's death from a drug overdose (even had a press conference to talk about it).

And, while I can't remember each one, there are certainly other radio and tv personalities who have talked openly about the serious events in their lives. So, again, I don't see why Art Bell should be any different, or be singled out for criticism for doing something as common as this.

I had never heard of Art Bell before I read his grievance on this Newsgroup. His emotionally charged story drew my compassion.

However, the impersonal press release announcing the end of the matter is wholly insufficient in light of Art's original post. If the wellsprings of readers' emotions are tapped, the writer needs to keep faith with the readers.

On their face, the two posts juxtaposition show an Art Bell lacking in good faith.

2704. ARRL and Survival

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-22 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <12598-39F29B23-129@storefull-246.iap.bryant.webtv.net>
Source record: 101433

A ham for nearly 50 years, I believe we should evaluate ARRL in all its nuances. Because those who see only positive are not seeing the League any more clearly than those who find it wholly useless.

Though I've come down hard on the ARRL in the past, I've begun re-evaluating my position.

Ask yourself: 1) What one organization has always been there advocating for ham radio, 2) Which organization has the assets showing it will be around long into the future, 3) Which organization can give you the legislative background and case law surrounding "PRB-1" (the federal preemption argument in favor of towers and antennas), 4) Which organization has connections in the ITU, affecting ham frequency allocations, 5) Which organization is always fighting for our spectrum?

On the other hand, which organization editorializes in its news reporting, runs an unparalleled public relations campaign, deals unfairly with perceived competition, exercises control on the First Amendment expression of its employees, demonizes certain hams, rather than getting their true stories, thwarts reporting of anything shedding an unfavorable light on itself?

To judge ARRL equitably is to strike a balance. I believe, without the League ham radio is doomed.

Hello!
I recently got a Heil Pro headset. It seems to work very well except I do not like the thin wire they used to run from the headset to the radio. After it's warrenty runs out I was thinking of changing that wire to a heavier, possibly coiled type, like ones found on hand mikes. Has anyone done this before? Does anyone have a wiring diagram they could email me? Any help would be greatly appreciated! Thanks in advance! Please email me direct at: NZ8C@aol.com
73,
Renee

So what? Have you ever seen a radio personality, or tv personality, who didn't tell their audience about serious events in their lives? Then why are you holding Art Bell to a higher standard than all these other media personalities? Or, for that matter, since it is so commonplace for media personalities to tell about the events in their lives, why would you claim that Art Bell is only doing it to gain higher ratings? Or are you saying that all those other media personalities also do it to boost ratings?

Look, I'm certainly no great fan of Art Bell, but your nonsense seems a little petty. And the fact that this entire thread was posted in a ham radio newsgroup is a little irritating.

> mikes. Has anyone done this before?

No, no, no, no, no, Renee. That "thin" wire is actually fairly robust,
but it is also there for a reason: Heil got into the headset business by
making a headset that was very light weight, primarily for contesters.
There was one around for years before you got licensed. The ProSet was
an evolution from that lightweight set; among its improvements was a
full ear muff and a lighter mic boom.

But even with the development of the ProSet, weight was and is an issue
with contesters as you will definitely find out this weekend. That's the
principal reason for the "thin" wire.

A coiled mic cord replacement gives me a stiff neck just thinking about
it.

By the way, don't think the warranty period is cast in stone with Heil.
I've had a couple of things they've replaced well after the period
expired. They said "product defect" and sent the stuff out with no
questions. That's one of the reasons I recommended the ProSet to you.

> Does anyone have a wiring diagram they could email me?

It's pretty straight forward. The mic comes out in two wires (mic hi and
mic lo) to its plug, and the earphones are wired in stereo with three
wires (left, right, common) to its plug. No switching, no common ground
between the mic and earphones.

Er, listening to the radio...

I can hear the buzzing across a fairly wide swath of spectrum. From
long wave clear up through a good chunk of the short wave spectrum.

My goodness, that happened over 40 years ago. I'd guess that less
than 1% of today's hams were licensed when that occurred. The other
99% probably think that 11m has always been a citizen's band.

I believe the "debate" you mention is based on the lawlessness
some CBers display, especially those who are operating above
28 MHz; IMO that's a main cause of the animosity hams feel towards
CBers.

There may be such a group in my area, but I haven't listened to the CB
enough to know.
>
>Why use limited equipment? And ham gear is very cheap at
>hamfests.

For me, the main factor isn't the price of the gear. It's the fact
that a lot more people probably have CB's available in the area than
ham radios.

In a combat scenario incoming artillery would be a big concern of
mine, but in the survivalist situation I have in mind, I doubt there
would be that much of a problem with artillery.

>Remember, 10/11m is not to different from the military 30
>to 88 Mhz band. And there are repeaters for 10 m.

Yep, but there's still the problem of availability of radios. Even
right now when things are normal CB's probably outnumber ham radios by
quite a big margin around here. Since I'd want to be able to
communicate with as man people locally as possible, that's an
important factor.

Merci! You hams are a testy lot! Make a gentle dig and look at all the responses ... obviously I am old enough to remember the event. :)

You get no argument from me as for the CB operators using illegal freqs. I have no sympathies for people who don't play by the rules. I have never ever run a linear or a "slider", nor tricked out a 10 meter rig even though I have the technical knowledge to do it.

And I don't like the foul mouthed jerks on the CB bands either.

What I was guilty of is not looking at the headers to see who I was posting to. My apologies for that, but it is too late now to trim the headers. This discussion originated on misc.survivalism and I haven't traced it back to see who started the crossposting. I am a survivalist and actively use *legal* CBs, GMRS/FRS and we even have a couple of women in the group who are into *licensed* QRP operation. It was not a discussion on the merit of hams vs. foul mouthed CBers. But such is the nature of newsgroups that things grew heated for no apparent reason. :(

The discussion as I understand it is the use of CB's in a relay net. The terms the originator used normally mean an unattended relay station to most hams, but in this case he was simply talking about a network of operators forwarding messages back and forth in an emergency to reliably cover longer distances than the nominal range of CB's.

The exercise is an entertaining one to me because I have actually lived where CB's provided a lifeline for people snowed in after a blizzard. Some of my neighbors were trapped for over two weeks before the county cleared there roads and the more distant ones messages to family/friends/feedstore were relayed into town by closer stations.

There are thousands of CB's in cars and a whole host of base stations in rural areas, and a discussion of how to utilize them in the myriad of survival situations is a necessary and proper one.

You would be singing a different tune had it been your son. To even spread rumors like this without knowing the truth is horrendous, you should be ashamed of yourself. I respect the fact that Art left his show to be with his family when they needed him. There are no guarantees that things will ever be the same if he returns, but he left just the same. There should be more fathers out there like him.

As for his show, it was great. You may disagree, but millions of fans say otherwise. If he ever returns, I will be listening. So he's a salesman, that doesn't make him a bad guy.

There is something like that here in Huntington Beach, CA. The boxes are on the arm of the street lights like yours but much smaller, probably 6 x 6 in. I first noticed them about 5 years ago. There is only one on a block (1/2 mile). The neighboring boxes are on the opposite side of the street. They are usually placed in the middle of the block.

2723. Copper Electronics "not so" Specials

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-23 00:00:00 UTC
From: n7kn <n7kn@hotmail.com>
Message-ID: <wqYI5.1157$eB6.2004548@feed.centurytel.net>
Source record: 101287
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.antenna,rec.radio.amateur.misc

This is an email I received from Dan Asbjornsen (kb7uxe) regarding Mike Laferla (k7jml) and his experience with a 10 Meter rig bought from Copper Electronics. The letter is addressed to Jerry Seligman (w7bun) who is very active with the Radio Club of Tacoma.
I thought you may wish to share this information with other hams.
-n7kn

Hi Jerry, my sad story goes like this:

Mike Laferla K7JML purchased an RCI 10M radio from Copper Electronics (mail order)
at a cost of just under $400... Mike had the radio for about 3 months before he installed it and tried
it for the first time... It didn't work. It had cxr on am & fm,but no audio,
and nothing on ssb or cw..
He sent it back to copper for repair or replacement. They returned it saying
it was fixed..
When he tried it again, same thing, no change..... so he sent it back a
second time...
and once again, copper returned it, still not working. once again, Mike contacted copper
they wouldn't return his calls, or answer his e-mails. Mike returned the radio addressed to the
the copper VP.. they returned it, unopened.....
Mike has spent just under $100. in return charges, and still, the radio doesn't work, and it appears
that copper does not wish to face up and deal with the problem.....
Mike has contacted Ranger communications directly, and they have said, THEY
WILL make it right...
(repair or replace ?)...
So the moral of the story,
DO NOT BUY ANYTHING FROM COPPER ELECTRONICS,
THEY WILL NOT SUPPORT WHAT THEY SELL....

I would think twice about replacing the wires on the ProSet. I have had one for a long time and have dropped it, pulled it to hard, kicked it etc etc etc and it has not come apart yet. The wires and coating are robust. Put a larger coiled cord on it and you will have an awfully heavy headset. Heil knows what they are doing...They have been around a long time...They also have excellent service on their products if it ever breaks...

Two things:
1) Milk costs more than gasoline.
2) Driving is a right, not just a privilege.

(in the USA anyway)

Don't do it. It won't improve the headset, and will give a
stiff neck.

An obscure amendment, passed before the Constitution was ratified. The second half of it goes something like this. The travel shall not be infringed. Some people say that it doesn't preclude licensing and registration of car owners, and others say it is sets out a States right to have cars for official purposes.

Yes, but it doesn't say that you have a right to own a car or endanger other people's lives on the highway, and cars are by no means a necessity of life. There are always bicycles, mass transportation, horses (don't laugh - I used to ride mine to work and turn her loose in the field out back until my shift was over), carpooling (including hitchhiking which is ad-lib carpooling and highly encouraged in some countries with hitchhikers receiving coupons to give to motorists who give them rides), and the good old-fashioned method that everyone seems to have forgotten - walking.

Although many teenagers might argue that it is their right, vehicle ownership is a priviledge earned by those who work hard enough to afford one, and driving is a priviledge earned by those who do not drive so dangerously as to kill others.

In other words, even taking someone's license away for DUI does not take away their right to travel.

Your argument leads one to believe that freedom of the press covers
only newspapers using hot lead type.

Vehicle ownership is a right, just like ownership of anything else.
The question here is somewhat different, that being- the right to
drive YOUR car on public highways. Many believe that it is a right,
not a privilege. FIRST CLUE: Note that the state REPEATEDLY reminds
you it's not a right. :>

However, this is not a discussion I wish to continue, particularly since this is cross posted to groups that would probably rather not read about it. Therefore, I leave you with these links if you want to learn more.

The problem isn't/wasn't excess freedom; it's insufficient
responsibility. The *only* solution is to teach responsibility;
however people keep looking for a quicker, easier "fix" via
legislation.

Copper Electronics will screw you. I know because I have actually been to their store and bought their "junk" that were suppossedly good radios. I bought an Eagle Sidewinder 400 from them back in 1998 to the tune of about $160.00 after you include the $29 I had to pay for the book just to figure out how to make the radio cover the whole 10 meter band that it was meant to cover. The radio was junk. Horrible audio on transmit, and changing the crappy mic with a good mic didn't fix it. You buy a radio from them, and then have to pay another $30.00 to get a book to learn how to make a 10 Meter rig cover the entire band. They sell crap and illegal radios, and their owner last year in their newsletter suggested that C.B. operators get on 10 meters without a license to chat with the ham community because the C.B. bands were becoming too crowded. I think Copper needs a visit from Mr. Hollingsworth. Bottom line, don't buy from Copper! Don't let their prices fool you!

I recently acquired an HTX242 radio, all seems to be in good shape, except there is no TX or RX audio. I have checked the final amplifier, it is working. I am in the process of searching the scematics to find the problem, but any help that any of you could provide would be great.

A more detailed explanation:
the audio seems to be OK for about 1/10th of a second when switching from RX to TX, but goes away quickly to complete silence. test signal injected at C56 in the final audio amplifier produces good signal at the output/speaker. I can also hear the DTMF tones on the speaker when pressing the keypad on the microphone.

This radio has also had the freeband mod described at http://www.qrz.com/download/mods-e-h/htx242.txt performed prior to my obtaining it.

I am sure something simple is amiss with it.
I have also posted a file with the schematics if you wish to download them. the URL is:
http://www.kd6oji.f2s.com/HTX242.zip

The Natural Right to make and use tools. The Constitution provides no
authority to government regarding tools of transportation, therefor
the government has no legal ability to regulate it. See Amendment 9.

i am looking for some help on troubleshooting the transmit side of the tranciever. the screen grid voltage drops when transmitted in cw mode not as noticable in tune position, and this drops the output. i have cleaned the relay on the voltage reg board. i think the problem is somewhere around this point, but have not found it yet. i am looking for any help that i can get.

thanks in advance
jim

Frank,

The first thing I would go after is to check that the power supply is
stable.
Then I would
see if one of the frequency-determining components or a decoupling cap
might
have failed. Is the frequency drift associated with a particular band
switch
setting?

73,

Brian W6BY

Well, Theodore, there certainly is a lot of prejudice about age in your comments. First of all, "most" 16 to 18 year olds are not as strong as you seem to think they are. And certainly most "overweight 30ish" year olds (or 40ish, or 50ish) are also not as weak as you seem to think. You know, people (including the overweight ones) don't just suddenly lose all their muscle, and turn into weak whimps, when they turn twenty-five or thirty. And if you think they do, then you have a lot still left to learn in your life.

Well, what the heck did Mike expect from Copper Electronics? Their main business is the sell of radio equipment intended for illegal use in the CB band, which suggests they don't have a lot of respect for the law (so much for the character of the owners and employees).

In other words, if you're dumb enough to buy something from a sleazy company, then don't be surprised when that same company treats you in a sleazy manner.

While the government might argue otherwise, I certainly feel that a person has a right to drive an automobile. I base that on the notion that free travel, without government restriction, is a natural right of every citizen in this country. And, since the automobile has become the main means of travel in this country today, that right of free travel also extends to the use of an automobile.

Now, just as the right to own a gun can be taken away from a criminal, certainly the right to drive a vehicle can also be taken away under some circumstances (DUI, reckless driving, etc). But that does not change the fact that it is a right to drive a vehicle.

And, just like gun ownership, the government can regulate use of that vehicle (driver's license, speed limits, etc). But again, that regulation does not change the fact that it is a right to drive a vehicle.

What the right to drive a vehicle means is that the government cannot unfairly, and without just cause, restrict a person's freedom to use a vehicle (their property).

In other words, it is not a "priviledge" to use your property to travel freely in this country - it is a right. And that includes teenagers old enough to drive safely.

This might sound really stupid, but how do I regulate the output transmit wattage on this rig?

Do I just use Mic-Gain and carrier ?

Hope somebody can help with this. The manual does not say anything.

I assume the output is not fixed.......

Hope to hear from somebody soon!

Appreciate it!

Yes true. However most normal radio ops plop down on one frequency
and don't need to look at the rig. Cell users have to look at the
phone when dialing, even if only to hit one button.

I wish that folks would get it out of their heads that the average ham
on 75 meters is an Extra.

I would wager that 90% of the crowd that makes the most noise and
creates the most negative reactions to 75 these days are NOT holders of
an Extra ticket.

The Extra band segment is way at the bottom of the band, not up in the
3800-4000 segment where all the mess is located. Listen down there
sometimes where the REAL Extras hand out and see the difference.

C'mon folks, let's kill this particular urban legend. It just isn;t
true!

EEsh!!!

For starters, anyone using a cell phone, or transmitter should be smart enough to use the general "common sense" rule... Dont say anything on it that you wouldnt tell your mother. Anyone lacking "that" information NEEDS to be listened to!!

Police...???
Egads!!! Where would we be without them?? On the other hand.. Were are they getting some of these (few) idots?? It's a "RIGHT"! to bear arms, it's a frigin RIGHT! yet they will do their best to intimidate you if you have one in your possession.
While Im at it, Hats off to Officer Hornbuckle of Renton. This guy is great! Knows our kids and does a heck of alot to keep them out of serious trouble!

Silly public... Driving is just a privledge but yet more folks "get excited" over prices of fuel than losing their basic rights... Go figure!

Well, radio RECEIVERS have been made illegal in some states and in
some areas already. In those places, it is illegal to possess a device
capable of receiving certain radar signals. I'm not sure, but I *think*
certain scanners capable of receiving police frequencies may be illegal
too.

...Art has since admitted that LSD had nothing to do with his daughter's death...for an interesting take on the whole affair, I suggest going down to the library and checking out THE GLASS TEAT by Harlan Ellison, which contains an essay Ellison wrote for the Los Angeles Free Press about Linkletter's then-newfound "concern" for troubled youths...

...oh, and that wretched Capitol 45 that he cut with Diane just before she died? That suggests he was certainly not "on top of his game" at thetime...in fact, I think he'd just lost his second network TV show in as many years (that thing he did with his son Jack on NBC a few months after CBS dumped "House Party") when he and Diane cut that side...

That wasn't part of the question that was asked and answered. A law that enhances a criminal charge due to coincident possession of a radio is NOT a prohibition on possession or use of the radio.

However, I did misspeak when I mentioned motor vehicles as the sole exception. There are some communities (Rochester, NY is one) where PORTABLE use of a police (or fire in Rochester) receiver violates a local ordinance.

I think that we view hte definition of "right" differently. I believe that driving is a priviledge, granted by society to people who have demonstrated adequate skill and knowledge to safely handle a motor vehicle. As a priviledge, it can be revoked at any time for a variety of reasons, ranging from criminal behavior to national defense (remember gas coupons and blackout lights on headlights?). To me it is the same as the ham license that we earned that gave us the priviledge (not the right) of using certain specified amateur radio bands. At the time it was written, horseback was the most common mode of travel, so I'd say that was what they were aiming at. If we were to use the most common mode as a factor, I'd say that everyone else has better cars/trucks than I do, therefor I have the right to a better car. Bottom line is that The Constitution does not say that you have the right to drive anything....whether a faster horse than your neighbor's, a buckboard, stagecoach, or a shiny new SUV. All it says is that you have the right to go.

Besides, if driving was a right, don't you think you'd be able to get cars at the welfare office? Or are we depriving them of their right? Also, since flying is the more common means of transportation over distances, does that mean that the airlines can no longer deny service based on a lack of cash or innappropriate behavior (drunk and abusive)? If so, look out Hawaii, cause here I come! It's my right, and we all know that we cannot legally be denied rights based on socioeconomic status.

Interestingly, just renewed my recently expired passport. While filling
in the form, the gal asked my why I was renewing it. I said it's simply
the most positive ID anyone can possess, besides it's my right as a US
citizen to have it. She said that the US government considers a passport
a "priviledge" not a "right" or a "luxury."

I guess I paid $40 for the "priviledge". Got it a week later.

"Sorry, you're not priviledged enough to leave the country, have you
been to Disneyworld?"

It's normal to get a drop in Plate and Screen voltage when you go from
standby mode to transmit. The normal un-loaded positive voltage on the
screen of the finals should be around 250v. This voltage is regulated
(while transmitting) and should hover around 200 to 230volts.

The plate Voltage (B+) should run around 800volts. And will drop a bit
when keyed down. It is not regulated.

Question; how much of a power output drop do you get?

what kind of power do you get before it drops?

All bands? CW and/or SSB??

2778. FYI CD-album of different Wireless Telegraphy

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-24 00:00:00 UTC
From: Ludwig <szopinski@gmx.de>
Message-ID: <39F5928C.1942C2A2@gmx.de>
Source record: 101197

QSP FYI ----->

Maritime radio telegraphy world wide news,

" Maritime radio telegraphy world wide news " is the title of a CD-album of the former German radio officer Sylvester Fï¿½cking DH4PB and contains aproximately 2 hours of different Wireless Telegraphy.

He has composed this CD from collected information of the "Nautical high school Bremen" and from private sources. The CD starts with a short introduction of the 100 year old history of the Maritime radio telegraphy. It continues with telegraphic news from coast stations all over the world. Youï¿½ll find famous names like Norddeich Radio, Scheveningen Radio, Landï¿½s End Radio, Halifax Radio, Washington Radio and Sydney Radio, just to mention a few. Youï¿½ll hear from near SOS-, distress and security-messages, iceberg-warning, weather forecast and press release and youï¿½ll see how Maritime radio telegraphy was done in practice. From what you hear you may guess what kind of ability was necessary for a radio operator and what a sensitive ear was needed to select the right information. Today most of the coast stations do not sent messages anymore, at least not with this old method. Today communication via satellite has replaced everything else. Therefore the highlights of the CD are surely the farewell messages of some of the famous coast stations. With only some "CQ" and deeply impressive words in morse they said goodbye for ever. This may induce sadness, mainly when the Maritime radio telegraphy was part of your professional life. On the sea and on the shore the radio operators always did their duty. Today this profession has vanished and the communication duties had been taken over from the nautical officers.

With his private initiative Sylvester Fï¿½cking has saved a part of the history of world-wide telegraphic news. The double CD with registrations from the 70ies and 80ies from all over the world are not only of interest for former radio operators but for all those that feel somehow attached to CW. One could also recommend the homepage of the editor (http://www.seefunker.de) "Kï¿½stenfunkstellen und ihre Rufzeichen/ Coast-stations and their call signs". See also "international" There you can hear coast stations with their original CQ-loops, so that you may already find some interest for this album.

Order:
Sylvester Fï¿½cking, Wormser Strasse 16, D 55276 Oppenheim.
email mailto:foecking@main-rheiner.de
The cost of the double CD is DM 15 (E/$ 7.50)
We donate DM 5 (E/$ 2.50) to "Seefunkkameradschaft Bremen"

"Society of Radio Officers Bremen" Postage and handling in
Germany is DM 4 (in Europe DM 8 = E 4.00) CD in USA/oversea
$12 (all incl) Payment: pse ask pse no advance payment.

Why are you so down on Art Bell? Because you think you're
so superior to him? Or because you think the other entertainers in the
U.S. (as well as top jocks) are better than Art Bell?

Look at it this way: I'm opposed to illeagal drug use but I wouldn't
complain about it to a drug dealer. I say give Art a break. I wish he'd come
back; Ian Punett is good but Mike Seigel no way compares to Art Bell. Heck,
even Whitley is more interesting than Mike. In fact, the whole show is starting
to go downhill. Now they only archive last 30 days (used to have years) and
they want you to buy "Best Of" tapes. Sheesh!

BTW, I'm a ham and wonder if anybody knows Art's callsign?

I hate to disagree Old man, but you are the one that has no facts.
Bob Sherin is one of the originals of the Herby Saga. He has been out
of pocket for several years, and has recently re-joined the 14.313 crew.

Bob was actually at Herbs trial in the Virgin Islands. Bob likely
knows more about the Herbster than any living person, other than his
family.

Bob's is a kind hearted soul. Thus he is easly swayed by such a
personality. So cut him some slack, he really means no harm.

> I think that we view hte definition of "right" differently. I believe
> that driving is a priviledge,

Because that is what you have been told over and over again in school (the government)

> granted by society to people who have
> demonstrated adequate skill and knowledge to safely handle a motor
> vehicle.

What about before there WERE driver's licenses? Didn't know that there weren't always driver's licenses and people drove cars without them did you? Didn't need a permit for a gun either. Drugs such as cocaine and marijuana were not always illegal either, only in the last few decades. We went over a hundred years without an income tax too. When the government sneaks in new laws and taxes, people seem to forget the freedoms we once had before the government took them away from us. Remember the Boston Tea Party to protest the tax on tea? Well guess what? The US government put the tax back on tea and no one seems to question it.

Driving is a right, in the fact that you can not properly live and survive without driving, and that needing a license to drive was added later. Even though the government illegally requires you to have a permit to have a gun now (unlike before) it is still your right to own one.

> To me it is the same as
> the ham license that we earned that gave us the priviledge (not the
> right) of using certain specified amateur radio bands.

The airwaves belong to the citizens, and any citizen has the right to use any of the amateur radio bands, and again, there was no license needed in the beginning either, the government claims they need to test you to make sure you know how to use the power without causing interference and to understand what you are playing with, not to make it hard to get into a hobby like some silly hams think, or to "weed out" people or make it more exclusive.

> Bottom line is that The
> Constitution does not say that you have the right to drive
> anything...

It also doesn't say you have the right to breath air or eat food. You can't list everything, especially the OBVIOUS things. But on the Constitution, it was null and void the first time they changed it with an amendment. Try using your right to own and BEAR arms and see what happens to you. The Constitution no longer even holds up in a court room.

> Besides, if driving was a right, don't you think you'd be able to get
> cars at the welfare office?

Owning a gun is supposedly a right and they don't hand them out at the welfare office either. They give money which can be used to buy food, medicine, guns, and cars.

This whole "rights vs. privilege" thing is amusing and largely a bandying of semantics....

A "Right" under our system is generally considered to something conveyed to a citizen by the Bill of Rights. Most people like to throw around "Life, Liberty and the Pursuit of Happiness" as being a catch-all that basically entitles Joe Citizen to do whatever he wants to. This is not the case. We also have laws that are designed to regulate human behavior. This is where things like driving a car or using a scanner come in.

Driving a car is not a Right granted to a person by the Constitution. Driving is regulated by both state and Federal Law. This is done (theoretically) to ensure that motor vehicles are operated safely and that the appropriate taxes are paid to support the infrastructure that allows safe and orderly operation of motor vehicles. This is why we have fuel taxes, etc. You cannot say that your freedom of movement is being restricted because you can't drive a car. You are referring to your Liberty and your Liberty only goes away when you are arrested.

I sincerely hope that all you yahoos on here raving about this stuff put some of this misdirected energy to use and go vote this November. The whole reason most of these Draconian Laws are in place is that only 20% of the people bother to get off their dead worthless asses and go vote!

This kind of attitude is exactly why these laws work. If you want to use
the damned scanner and you don't agree with the law, then have some balls
and engage in the tried and true American tradition of Civil Disobedience.

True, we obviously do view the definition of "right" differently.
But, in the end, it is the government's definition that wins (they
control), and they agree with you that driving is a priviledge.

> Besides, if driving was a right, don't you
> think you'd be able to get cars at the
> welfare office? Or are we depriving them
> of their right? [snip]

Its not the government's job to supply a means to a right. For
example, the government does not have to provide printing presses to
insure the freedom of the press. A right just means that the government
is limited when it comes to taking that means to a right away. For
example, to seize the printing presses of a newspaper on political
grounds would be a violation of the right of a free press.

So, even if driving a car was a right, its not the government's job to
supply a car to the people - they're just limited when it come to taking
that car away.

But, all this is a minor point, since driving is a priviledge, not a right.

Dimmers user Triacs to chop the AC waveform to reduce power to the
light. That chopping results in serious noise. I'm surprised the FCC
didn't jump on them years ago. They restrict noisy pcs to non-home
environments, why not Triac dimmers?

With a few exceptions, the Bill of Rights does not convey
rights; it respects and protects rights. In most cases, the
language in the BoR assumes that rights are pre-existing.
Amendment 9 spells this out.

> Most people like to throw around "Life,
>Liberty and the Pursuit of Happiness" as being a catch-all that basically

The people's rights are not restricted to those spelled in
the Constitution. See Amendment 9.

>Driving is regulated by both state and Federal Law.

This may or may not be Constitutional. The fact that it
happens now does not make it Constitutional.

> This is done
>(theoretically) to ensure that motor vehicles are operated safely and that

A very good argument can be made that the public roads are
government property, and so the use of them is controlled by
the owner- the government. Practically speaking, the
licensing and permitting processes are so liberal that they
are not an issue worth disputing.

You mean like back when cars went 30 MPH and there were only a few in each city? That was before they started hitting things (like innocent people) and it was decided that they needed to be regulated. Did you know that pilots didn't need license either? I suppose you think that flying is a right that should be unrestricted as well....if you can afford a surplus F-18 or KC-135, you can fly it where you want.

> them away from us. Remember the Boston Tea Party to protest the tax on tea?

> without driving, and that needing a license to drive was added later. Even
> though the government illegally requires you to have a permit to have a gun now
> (unlike before) it is still your right to own one.

Funny...someone should have told me that I couldn't properly live and survive without a car before I let my ex take our car in return for not fighting me for custody. We rode our bikes for 2 years and were glad for the extra exercise and lack of bills that came with a car. When it comes down to it, a car is sometimes more of a pain in the ass than it's worth. Lot of people I know get along just fine without a car and are glad for the reduced stress of no payments or insurance.

If you think you need a car to survive, I sure as hell feel sorry for you if TSHTF. You think your right to drive is going to supersede a farmer's need for fuel to harvest his crop?

I think that the right to breathe and eat comes somewhere under the right to life, liberty , pursuit of happines etc etc. If you don't believe me, try fasting for a few months or holding your breath for an hour or so and tell me how alive or happy you are.

And as far as i know, driving regs do not apply on private property....which is why most of us backwoods folks learn to drive before city kids learn to ride a bike.

The worst I can say about testing and all is that it is a joke. Here in FL, they hold the test on a closed range and they even eliminated parrallel parking, which used to be one of the best tests of car-handling abilities in tight quarters.

Anyone that can be of assistance to me would be much appreciated. I recently pulled out an old ICOM 551 All Mode 6 meter rig from the "warehouse" (minus the FM module, I have a HT with 6 meter FM) I have been talking with a handful of HAMS that have been telling me that 6 meters is opening up again. That was enough for me to dust off the ICOM and check it out. It is operating within specs but so far, I have only had a chance to tune the band at night.

Has anyone had any luck on 6 Meter SSB lately and what times and frequencies are you making contacts on? The 551 is / was a great little rig and I would really like to put it to use. Many years ago I made contacts out of Europe and the Pacific Rim and would love to see this action return on 6 meters.

Many thinks in advance
Mike

PS - And if anyone knows where I can get the FM module for this radio, please let me know.

Because the government, at all levels, applies contract law while
you talk of common law as in the Constitution.

>
> Now, just as the right to own a gun can be taken away from a criminal,

SCOTUS has several times cited the right to travel the public
roads as a right.

>
> What the right to drive a vehicle means is that the government cannot
> unfairly, and without just cause, restrict a person's freedom to use a
> vehicle (their property).

Just cause and "due process". A jury of peers must apply a criminal
sanction in order to imprison which is the only Constitutional
way to effect the right to travel.

>
> In other words, it is not a "priviledge" to use your property to
> travel freely in this country - it is a right. And that includes
> teenagers old enough to drive safely.

The States, since 1934, have claimed that this is a privilege
in order to convert the natural right to fiat law. The same
was done with titles of ownership as with the automobile (certificate
of title) and property (warranty deed). When you register your car
or your land, you give title to the state which then places you
under statutory control.

The same is true of a marriage license and the drivers license.

Your birth was "certified" by the Department of Commerce,
hence the birth certificate.

Good thing you weren't too sure. There is no law anywhere in the USA that prohibits possession or use of police radio receivers, except in motor vehicles in some states. It can also be imposed as a condition of parole or probation after criminal conviction, depending on what the offense was.

Jewish Court Excommunicates Lieberman
CNSNews.com
Tuesday, Oct. 24, 2000
The New York Torah Court, Beth Din, has excommunicated Sen. Joseph Lieberman of Connecticut, the Democrat vice presidential nominee, it announced Monday.
The court stated that Lieberman caused grave scandal for the Jewish religion because "while claiming to be an observant Jew, Lieberman has been misrepresenting and falsifying to the American people the teachings of the Torah against partial birth infanticide, against special privileges and preferential treatment for flaunting homosexuals, and against religious intermarriage of Jews."

Rabbi Joseph Friedman, a spokesman for the rabbinical court, said that Lieberman has "flagrantly violated our sacred Torah by his Senate votes upholding partial birth infanticide and legitimizing homosexuality, which abnormal and unhealthy behavior the Torah strongly condemns as sinful and immoral."

"Mr. Lieberman, moreover, has, in violation of the Torah, supported harmful gender integration in the U.S. Armed Forces – in the barracks, on naval warships, and in combat training – all of which weakens and demoralizes our armed forces," he added.

Friedman declared that "under excommunication ... the person being excommunicated still remains a Jew. We hope that the senator repents and asks forgiveness so that the excommunication may be lifted."

Friedman stated that there were historical precedents for rabbinical excommunication of public figures as well as private individuals. However, those precedents have been few and far between.

In 1945, Rabbi Mordecai M. Kaplan was excommunicated for grave violations of the Torah. That excommunication was reported in the New York Times and other newspapers and publications.

The Gore-Lieberman 2000 Campaign Headquarters' press office in Nashville had no immediate response to the excommunication.

Here's a clue that might help. The output of the 830 is about half of the usual xmit power when in the tune position. I can't remember (it's been gone for > 10 years) if the high voltage was reduced in tune or what, but it sounds like your output is low in xmit but near normal in tune. Take a look at the process that is used to reduce the power in tune and see if it's being applied to normal output.

I'm not sure if that's clear or not.

Hello all, recently I bought an Icom IC-901A from someone on Ebay and it was supposed to be working perfectly, it's not. A number of the buttons on the right hand side of the control head (Call, Band, Mhz etc.) are broken (the little plastic parts on the back of the switches are all smashed) so I'm looking for a defective control head (defective pc board or display) that I can get some plastic switch pieces from. If you have a control head that all the switches work on (say the LCD is bad or the PC board is broken, let me know how much you want for it.

Thanks, Jennifer

I think that you will find that most states probably have a code that
imposes a penalty for possesion of an operational 'scanner' capable of
receiving police frequencies during the commision of a crime. Remembering
that speeding is not covered under criminal codes.

However, use of a scanner to avoid spped traps does go a long way to
identifying why some jurisdictions do forbid there use in vehicles, just as
they do radar detectors.

Gerd and fellow hams, you judge from the record how much of me is self interest and how much is social activism, as the following post in May of this year contains the answers.

Much of my life has been devoted to social activisim on any number of issues: i.e. mini and mainframe software untaxable under Florida's sales and use tax law (Nova v. Askew, Div. of Admin. Hearings), the State of Florida's power to place unwed mothers homes in communities as foster homes rejected (Sherin v. HRS, Div. of Administrative Hearings), HMO ordered to restore its original contract at the lowest rates in Florida with all original benefits intact (Sherin v. Av-Med, American Arbitration Association), et al.

Without pay, this work does indeed give a certain personal satisfaction.

I was there for Herb's criminal trial, recognizing that he did have minimal culpability. No consideration has come my way, only the satisfaction of walking in my beloved Dad's shoes, God rest his Consitutionalist soul.

(beginning of original message)
Subject: KV4FZ: When the Feds Fanned Out
From: Trebb@webtv.net (Bob Sherin)
Date: 2000/05/01
Newsgroups: rec.radio.amateur.misc

It was before Hurricane Andrew, 1992. I had been invited to St. Croix, all expenses paid. From the airport, we twisted some twenty minutes through the old island, turning up a dirt road where we bounced slowly to the top of a hill and stopped. Herb, Monika Shoenbohm and I got out of the car.

The scene was breath-taking: standing atop a one hundred foot cliff, the shimmering Caribbean, turquoise in color, danced gently as far as the eye could see, etched by a receding sun that highlighted St. Croix's tropical allure. Close by was a seventy foot tower crowned by monobanders, an unmistakable clue that a zealous ham lived nearby. This had to be the best ham location in the world!

Next day, a world away, we entered the island's, old federal Courthouse. (A new one has since been built.) I was told to sit outside the courtroom in an old veranda appointed with rickety chairs. During my few days wait there, characterized by dodging real time pigeon droppings in soaring temperatures, I would see a panorama of intrigue unfolding.

Like musical chairs, witnesses came and went. Except for some amiable FCC guys, people showed their animus against Herb as they buzzed secretively. An aura of importance underscored this scene, one I could never have imagined if I weren't seeing it with my own eyes.

The grapevine soon told that I was there to assist Herb, and the human dynamic changed from a modicum of warmth to ice cold. Some would not sit next to me or within ear shot. Education about federal prosecution was just beginning.

At lunchtime the Court took recess. Herb and Monika invited me for lunch a few blocks away. As we strolled, taking care to step up and down the curb stones of zaney sizes, we were followed by several of the trial people. We arrived at the restaurant, quaintly decorated with smart woodwork.

Sipping my drink, I surveyed the lunch crowd with the natural curiosity of a tourist. That's when I noticed the same people from the trial sitting nearby.
Herb pointed out the prosecutor. Others remained nameless during the entire ordeal, but I would see them everywhere. And whenever I used the telephone back at Herb's house, I heard suspicious clicks.
Some one million dollars was poured into this prosecution. The Secret Service and FBI, which had interviewed dozens of witnesses on the island and in the States, were there in force. It didn't take a genius to determine, they were scrutinizing our every move.

Herb, strong minded, outspoken and, at times, using very bad judgement, had made many enemies. As one of the Republican party faithful, he had exposed corruption and wrongdoing, impacting the careers of many, including the Governor. He had also rankled many hams.

I first met Herb in the mid-eighties at Miami International Airport. Seeking something meaningful in my ham life, I was there to interview him about the telephone, toll, bypass feud polarizing the ham community. Herb had taken a stand against the Intercon Net for allegedly misusing amateur phone patching. He often pointed out that the Jim Jones' group had used Intercon for some of their business. Herb was just the kind of subject I needed: hot news for information bulletins and print journalism.

Only the future would tell how hot the story would become. As Mr. Law and Order, Herb had raised the bar of justice for himself and created a coterie out to get him.

When Caribbean Long Lines Services started operating on St. Croix, Herb mailed a one hundred dollar check as enrollment fee. That check, which the prosecution tried to cover up, was never cashed. Meanwhile, the irrepressible Herb was fascinated by new telephone technology. His mind danced with protocols, frequencies, coverage, and entry codes.

He began hacking to learn how secure the system was, astonished to find that one out of three numbers went through. This new company, Calls, had virtually no security. Wrapped up with his discovery, he discussed it

openly, including on ham radio.

That's when his enemies joined forces. They cited the thousands of letters written to the FCC and others as evidence that Herb must be doing something wrong that needed to be stopped. His open talk about Calls' security was ideal corroboration. At the same time, new legislation was being enacted to thwart credit card crime and funded to go after exemplary cases. Herb was in the crosshairs: The million dollars was spent on building this one case against him.

But in order to return a conviction, the government had to prove more than $1000 telephone fraud. No such crime, in fact, existed, so they fabricated a printout with phoney charges that rose slightly above the minimum. The fact, the alleged recipients didn't know Herb and hadn't talked with him didn't matter.

The prosecution, with the cooperation of the investigators, invented people who in reality denied taking with Herb. Their expert testified to the authenticity of the list, and the Secret Service testified that they had interviewed every recipient of every call. With exculpatory evidence hidden, here was the trial's prelude: Pointing his finger at Herb, the prosecutor warmed up to the jury by telling them that here was a kingpin of crime. Seemed like an open and shut case.

Only after the trial was Herb able to research calls on the surprise printout. One was a Franklin Gell of Miami,Florida. I looked up Mr. Gell in his Little Havana home. Warmly welcoming me, he offered me a cup of Cuban coffee. We sat at the kitchen table where I produced the printout. Yes, we were looking at his Miami telephone number, but he said he didn't know any Herb Schoenbohm.

I asked him if he could document his telephone calls. Returning from a closet with an old leather binder, he searched his records. Although he hadn't ever talked with Herb, he was in contact at the time with a colleague on St. Thomas.

Here was a bold faced deception involving many on the prosecutorial team: random calls having nothing to do with him had been arbitrarily connected to Herb. The Judge reversed two counts of his conviction.

One count remains to the time of this writing: "possession of a counterfeit access device with intent to defraud."
And what is the device? Numbers in Herb's head. Not one number or any precise number but some number. Talk about Constitutional rights but don't put Herb under that umbrella, because those rights can be snatched in a heartbeat by those in control.

Like him or hate him, Herb Schoenbohm's right against self incrimination and to due process have been violated. What's more, because the FCC, at their administrative hearing, expected Herb to be completely open while still involved in his judicial process, his position has grown worse. His ham license may not be renewed.
Overreach is understatement!

Parallel Story to KV4FZ's

September 16, 2000
from The New York Times
ABROAD AT HOME

It Did Happen Here
By ANTHONY LEWIS

OSTON - In excoriating officials for their treatment of Wen Ho Lee, Federal District Judge James A. Parker said one question remained unanswered: "What was the government's motive?" There is an answer to that question, a chilling one. It is: politics.

In the winter of 1999, Republicans found what they thought was a promising theme. The Clinton administration, they said, is soft on Chinese nuclear espionage. It was an updated version of the charge that Richard Nixon and others had used so devastatingly, that Democrats were soft on Communism.

Dan Quayle charged the administration with "appeasement" of China in "espionage involving our most critical secrets." Republicans in Congress attacked the president's national security adviser, Sandy Berger, for supposed laxity in dealing with Chinese spying. Conservative columnists joined the chorus.

A House committee under Representative Christopher Cox, Republican of California, issued a 900-page report saying that China had been stealing our nuclear weapons secrets. Experts pointed out that the report was long on conjecture and short on evidence. But the committee's Democrats, evidently panicked, joined it without dissent.
The Clinton administration moved quickly to meet the Republican attack. Among other things Bill Richardson, the secretary of energy, appointed a "security czar."

Then a villain was found ☐ someone to blame: Wen Ho Lee, a scientist at the Los Alamos National Laboratory. In March 1999 he was fired. In December the U.S. Attorney's office in Albuquerque, N.M., had a grand jury indict him on 59 counts of mishandling nuclear secrets ☐ with a potential penalty of life in prison.

In the months after that indictment Mr. Lee was painted in the darkest tones. He was said to have compromised the "crown jewels" of U.S. nuclear weapons. Government investigators compared him to Julius and Ethel Rosenberg, who were convicted of giving atomic secrets to the Soviet Union and executed in 1953.

Prosecutors gave Judge Parker, as he told Mr. Lee the other day, "information that was so extreme it convinced me that releasing you, even under the most stringent of conditions, would be a danger to the safety of this nation."

At the prosecutors' urging, the judge denied bail. Mr. Lee was held in what Judge Parker called "demeaning, unnecessarily punitive conditions" ☐ in solitary confinement, allowed to exercise only an hour a day with his legs shackled, the lights kept on in his cell 24 hours a day.

In recent months the hyperbolic picture of Mr. Lee and his supposed offenses faded away. Robert Messemer, an F.B.I. agent who testified that in two incidents Mr. Lee had been deceptive, admitted that his account of those two incidents was false. It was "an honest mistake," he said. The great secrets to which Mr. Lee had access ☐ and of which he had wrongly made computer tapes ☐ turned out to be not so secret. Many had been available in thousands of sources.

But no one in the government backed off. Prosecutors continued to insist that Mr. Lee was a terrible danger to the nation. It was Judge Parker who pierced the stubborn denial of reality. When he made clear that he had had enough, prosecutors signed a plea agreement that let Mr. Lee go with the 278 days he had served in prison. It amounted, Judge Parker said, to a concession "that it was not necessary to confine you last December or at any time before your trial."

I do not think that Secretary Richardson or Attorney General Janet Reno decided overtly to use the Lee case for political purposes. I think that, feeling the political pressure, they allowed their judgment to be shockingly distorted.

For the Justice Department especially to go on and on with a case so weak is profoundly disturbing. To let the terrible weapon of criminal prosecution be used in a politically convenient way is a hallmark of tyranny.

The lead prosecutor in the case, George Stamboulidis, unregenerate after Mr. Lee's release, suggested that Judge Parker did not understand the national security issues. To the contrary, this country's security rests in good part on having judges with the character and courage, like Judge Parker, to do their duty despite prosecutorial alarms and excursions.

> longer even holds up in a court room.

Gentlemen, gentlemen, the Constitution does not give you any rights.
It doesn't have to, you already have them as *natural rights*.
That is why the Constitution is not loaded with all of the things you
can do. The purpose of the Constitution is to tell the federal
government what to do. The Bill of Rights tells the government some
of your rights that must be guaranteed.

The Constitution is an agreement of all the States to create a
central government to perform a few things that the States
could not do individually.

In short, under the Constitution, you can do anything that does
not infringe upon another person's rights.

This is the way it was until just after the turn of the century.
The big changes came with FDR. Most everything the federal
government does today is unconstitutional, but that's another
story.

The Constitution is still there but there are two law systems,
the Constitutional law system and contract law. Today most
everything falls under the contract law. Every time you
sign for a license or register to vote, register your
land or a hundred other now commonplace acts, you contract
with this second legal system.

Chance are, your grandparents had no birth certificates,
no income tax, no driver's license and no marriage license.
There were 90% fewer laws. Of course it was the grandparents
that allowed most of the unconstitutional crap to happen.
Today we're just beginning to see the results.

Some food for thought.

She was right. If you want a passport, you request a grant from the
government and agree to its conditions. As a natural citizen however,
you don't need a passport to leave the country. Of course all the
air and shipping lines are de facto government agencies and won't
cooperate with you but the fact remains, you don't have to have a
passport.

Just think, no one had a passport until this century.

Look around 50.125 for the US calling frequency. If there is any activity (outside of local stuff) it will be there . The overseas calling frequency is 50.110. There is some movement to make 50.200 the US calling frequency. Most of the time the band is open from my location during the daytime hours on the east coast. You can listen on ten meters and if that band is not open, chances are that 6 will not be either, most of the time.

2832. Mobile Noise Reduction...Solution?

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-25 00:00:00 UTC
From: njradiodude@aol.com
Message-ID: <20001025055830.05064.00001202@ng-fc1.aol.com>
Source record: 101243

I've been successful in the past in reducing or eliminating all sorts of noise in various mobile installations. Everything from grounding hood and fenders, to grounding fuel pumps, bumpers, running boards, roll bars, exhaust systems, the truck cargo bed, and roof racks.

My problem is engine electrical noise (varies with speed of engine). I have done everything...I mean everything. I have grounded everything possible. This problem is beating me. I've been reading and surfing and researching it for about 4 years now. The noise is not in the power lines. Not a "whine" but rather a high-speed "clicking". The noise is being broadcast by a component in my 1990 GMC 3500 Series Pick-up with a 350cid EFI engine. When the antenna (to anything) is removed, the noise goes away. I have separate radios for 10m, 6m, and 2m, all SSB and FM. Each has a dedicated single band antenna. On all of them, even my 751A that goes for a ride every now and again, the same thing...no antenna, no noise. I've tried headphones and a small radio (that would be suseptable to such noise) and sniffed the whole vehicle with no success. I've done this noise hunt before on other vehicles for both other people and myself and this is the first to beat me. I can't find the source. I'm giving up on that angle.

Last night, a revelation! (maybe)

Has anyone used one of those MFJ-1026 (or MFJ-1025) Noise/Interference reducers/eliminators in a moblie application? Of course, this would be for HF only (maybe to 6m), but I'm looking for input before spending $179.00 for something I won't need if it does not work. In theory, it most likely will...I think..maybe? The folks at MFJ don't specifically mention a mobile application, but why not try it?

I like my truck. I want to keep it. I like my radios. I want to play with them in my truck. I hate using my radios in my truck because of the noise.

Any thoughts appreciated.

the power drops to about 85 watts and the screen voltage drops about 40
volts. when you key up it peaks at about 110 watts and starts heading down.
it will also go up and downin watts from there.
thanks

2834. Michigan scanner bill gets Halloween-style stake through its heart

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-25 00:00:00 UTC
From: helmsman <>
Message-ID: <73edvscoiomogb54ukgonq62t3nchof52d@4ax.com>
Source record: 101245

Michigan scanner bill gets Halloween-style stake through its heart: A legislative proposal in Michigan that would have regulated the possession of scanning receivers capable of receiving police frequencies has been killed. Michigan ARRL Section Manager Dick Mondro, W8FQT, reports that the bill's sponsor scuttled the measure in the wake of complaints from amateurs--even though hams were specifically excluded from the bill's provisions. The measure, House Bill 6012, would have made it illegal to have a receiver in a vehicle that received police frequencies. "The word to anyone inquiring is that the bill is dead, thanks to the collective efforts of those that care," he said. Bill sponsor Rep Mike Kowall was much more direct and colorful. "Rest assured that I have driven a stake through the heart of this bill, and it will never see the light of day and will die before it reaches the committee process," he said. Kowall said the bill was introduced at the request of the Oakland County Sheriff's Department. "The intent of the legislation was to allow police officers to obtain warrants for criminals in possession of a hand-held scanner," he said, adding that it was prompted by an increase in the number of criminals using the scanners to elude the police in the commission of a crime. "Amateur Radio operators play an integral role in emergency/management agencies, and their freedoms are guaranteed under the first amendment of the U S Constitution and should never be challenged," Kowall concluded.--Dick Mondro, W8FQT

Yes, but don't you choose where you work and live? These are your
decisions and I don't knock you for them. But noone forces you to make
them either. Besides gunner, I wouldn't worry about you personally. I'm
sure that if TSHTF and your fuel supply disappeared, you'd get along
just fine LOL.

I recently spent almost three full afternoons and evenings calling about twice an hour on 50.125, 50.110, and 50.200, without a single response. This was a repeat of an experiment I tried in Washington State about six months ago, with the same results. And a friend of mine in Washington spent even more time trying to make a contact, again with no success. In fact, I've only had three contacts on 6 meter SSB in the last year (all three contacts in WA, prearranged on other bands). And I've had no contacts whatsoever since arriving here on the east coast.

As far as I can see, 6 meter SSB is totally dead. Of course, its not just SSB since I had no more success recently with FM. So I guess I really should say that the 6 meter band itself is dead.

In my opinion, its a total waste to have a 6 meter rig and, if I had it to do over again, I would not waste my money buying one.

I bet he means the 20th century, which ends at midnight,
Dec. 31, 2000. Or is that midnight, Jan. 1, 2001? Anyway,
right after 23:59:59, Dec. 31, 2000.

True, but unless you're entering unclaimed territory (rather rare I
presume), you are subject to the laws of the nation that you are
entering. From what I understand, it is not the United States that sets
it's exit requirements, but rather the nation that you are exiting to.

I presume then that you don't use landline phones either? Do you drive
a car? Watch TV? Fly commercial airlines? The building trade
associations and unions make political contributions too, so you must
not live in a building of any kind. Be careful, the cave you live in
is probably on government land.

I've been on 6m for about 20 years now. I've worked WAS and am at about 57 countries. It is a band that is a challenge. I run my my 551 from when I wake up until I go to bed. (8am to abou 11pm) I've recently worked TX0 from here in Arizona. So the band does open up from time to time. Even with a solar flux of 161. Preferably the flux should be over 200. The openings other mention are sporadic E openings which happen from April to the end of July. And November , December. The best bet is to program the 551 to scan between 50.100 and 50.130. The go on hf or do something else. If the rig is scanning and there is any activity on the band you will hear it. I've found that the fm module is quite expensive if you find on on eBay. You might be better off using a seoerate 6m fm rig.

Tune the bottom part of the band for the beacons and that will tell you
if the band is open from your QTH to other parts of the country. Be
sure your beam is oriented horizontally. A vertical antenna can cost
you up to 20Db in signal strength! With November and December comming,
there will be an increase in sporadic E openings. Good luck.

Gene, you're being a little unrealistic. There are 9 million people
who live in the Los Angeles area alone. And it is impossible for all of
them to live within walking distance of their work. By the same token,
it is impossible for all of the 260+ million people who live in this
country to live within walking distance of their jobs. Without the
automobile, our economy would collapse and millions would starve. In
other words, the automobile has become a necessary means of
transportation in this country - not an option that that can so easily dismissed.

PMJI (and it's probably a semantic thing as well), but is it not the case the the Constitution and BoR actually enumerate the limits of the federal government, rather than the freedoms of the people? I mean, the 2nd Amendment says in part, "the right ... shall not be infringed." To me, this is different than, "the people have the right to...". In the former, you're saying that "You (government) can't...", whereas in the latter you're saying, "You (people) can...". This is further strengthened by the 9th and 10th Amendments, as you've quoted.

Looked at from this perspective, both the Constitution and the BoR are not lists of rules for the people - they are rules for the government. So it doesn't matter whether a right is listed in the Constitution, because the Constitution doesn't limit the actions of the people...it limits the scope and power of the federal government (or is supposed to, anyway).

Just my $0.02 worth. Back to lurk mode.

THIS century nimbnutz, the 20th. The 21st doesn't start for a couple of
months yet. Passports were not around at the start of the 20th century,
some 1198 months ago.

That's why I like being back in school. I can debate with people who know how.

We were talking about scanner bans way back when this thread got started. Many offensive anti-scanner laws are sponsored by the cellular phone industry association (CTIA - which now stands for Cellular Telephone AND INTERNET Association - very scary). The way to combat CTIA purchase of laws is to stop giving money to CTIA.

All of which has ABSOLUTELY NOTHING TO DO WITH ANYTHING YOU JUST SAID.

For now, but this bill will have more lives than a cat on steroids. Just like the anti-scanner legislation on the federal level, it will be reworded, repackaged, and introduced again and again until it passes. In the end, it will probably be attatched to some totally-unrelated piece of needed legislation, in order to assure passage.

The same government which ultimately wants to disarm it's citizens under the guise of "gun safety legislation" also wants to prohibit said citizens from having the means to monitor their activities. This is the real purpose here.

I need the shipping tube for a Stationmaster antenna - our club 2m repeater antenna went south, and we need to ship it back to it's maker to fix or replace. We did not keep the original. If anyone has one of these, and you are a few hours from the Toledo, OH area and would like to see me pick it up, this would be most cool. Thanks bunches.

Please reply direct - the address is good.

I can be outraged about any number of topics, but I can also stay on topic
for the forum of the moment.

Let's see, this message is being propagated to rec.RADIO.amateur.misc,
alt.RADIO.SCANNER,rec.RADIO.SCANNER,talk.politics.guns,misc.survivalism .

Hmm, OK, the thread is probably off topic for the last two, but where do the
building industry or anyone else fit into the above list?

And, according to the regulations that govern Amateur Radio, obscene words such as those that graphically describe bodily or sexual functions CANNOT be transmitted over Amateur Radio. Period. Makes no difference about the "popular" usage of a certain word, it is STILL against the regulations which Amateurs must abide. Like it or not, if Mr. Hollings-worth hears of obscene language on the ham bands, he will enforce those regulations. I heard him say so in person. I am not involved in any dispute with anyone on or off the air. I am just stating the truth.

You need to brush up on your US history. Really.

A little reading about the philosophical underpinnings of the founders
would help you too. Look into what was called "The Enlightenment".

Educational and uplifting too.

We can safely snip the rest of your post if it is based upon this flawed premise. Rights are not conveyed or granted to the citizen by the Bill of Rights, rather they are pre-existing and _enumerated_ by the BoR. Do you get that? Rights are not granted, from the Declaration of Independence:

That to secure these rights, governments are instituted among men, deriving their just powers form the consent of the governed.

The Bill of Rights _secures_ these rights, rights which pre-exist, but it most assuredly does not create them.

Further, not all rights are enumerated:

9th Amendment

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

Also, if a power (governments do not have rights, only powers specificly vested by the people) is not specificly vested in government then said government has no business mucking about in that area.

10th Amendment

The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people.

Lastly, if said government does in fact insist on mucking about in areas where it has no Constitutional powers, well, that's what the 2nd Amendment is all about. Well, after the soap, ballot and jury boxes.

Best,
Jim

Is there any way to eliminate the noise in my radio that comes from my computer & monitor? (I have Yaesu 101)
It's nice and quiet with the monitor shut off, but well, it's kinda hard to see the waterfall screen then.
Tanks.
SteveS

Gary,
An isolation transformer in the leads to/from the radio may
help, but the 'best' cure is distance.

Hmmmm, first old message I pull up was on whether ham radio or computing is "the bag" for today; and the ultimate subject of whether ham radio is dying or not.

Gee, way back in September, Dwight, ya made a comment I actually agree with you on....LOL

Dear OM,

I am looking to complete the R.L. DRAKE VIRTUAL MUSEUM, for the following
Marine receivers: all are 19" except the DSR-1
Drake DSR-1
DRAKE MSR-1
DRAKE R4245,
DRAKE R8000,
Transceiver DRAKE TR4305
DRAKE MR-3;
From French Company:Compagnie Radio Maritime: Receivers CRM-3702 and
CRM-3928
From the German company HAGENUK: Receivers EE354 et EE421
From DEBEG: Receiver 7220
ITT Mackay 3822A
SAIT Electronics 1542

DEAD OR ALIVE, but in good cosmetic condition.

Please contact me with specifications and price: jmc@dproducts.be
or by Fax in Belgium: +322 660 04 59,

Thanks, 73,
JM CHERRY

Jerry-I believe you are sincere. Personally, I do not agree that the act of sexual intercourse is grossly obscene. While the PHUQUE WORD is considered vulgar, we live with it. Another F-word that carries the same vulgar weight is PHART. Both are bodily functions. I hear the PHUQING PHART word on all the bands and freaks (sic) I monitor. There is/was an Old PHARTS net in the early AM prostate call hours, on 40 meters, that frequently calls/ed each other old PHARTS. Should we ordinary ops report them to Riley?
I figure it is all dependent on what the definition of is, IS! Maybe, Just maybe, its time for government to back off! At least, that is this PHUQING old PHART'S opinion.
The original post left me with distinct impression that Riley would be notified. That, sir, is pathetic.

<< I recently spent almost three full afternoons and evenings calling
about twice an hour on 50.125, 50.110, and 50.200, without a single
response. This was a repeat of an experiment I tried in Washington
State about six months ago, with the same results. And a friend of mine
in Washington spent even more time trying to make a contact, again with
no success. In fact, I've only had three contacts on 6 meter SSB in the
last year (all three contacts in WA, prearranged on other bands). And
I've had no contacts whatsoever since arriving here on the east coast.

As far as I can see, 6 meter SSB is totally dead. Of course, its not
just SSB since I had no more success recently with FM. So I guess I
really should say that the 6 meter band itself is dead.

In my opinion, its a total waste to have a 6 meter rig and, if I had
it to do over again, I would not waste my money buying one.>>

Being a No-Code, I am on 6 Meters alot. I have at least 300 QSO's in a year &
1/2... Most of them Mobile...
I live in MA.

Theodore Baldwin Boothe III wrote the quoted material below:

" Besides , art was doing nothing more than a publicity stunt for ratings.

I know not much about Art Bell, BUT having heard his show a few times, and knowing that he already had a sizable audience, I doubt that he talked about his son's rape in order to get publicity.

Here's what probably happened: Like many talkshow hosts, Art Bell mistook his audience for friends and decided to confide in them. He mistakenly thought that his personal life should be the subject of his talkshow. This can be easy to do with a format as intimate as talkradio. There are a lot of lonely people out there; some of them end up in talkradio.

My mentor in talkradio told me, "Don't ever get too close to your audience; they can turn on you." As the posts in this forum indicate, my friend was right.

Not surprising to me. I have heard "Rambo" Dan threaten to kill people
on amateur radio. Blow a fuse and then Cuss a blue streak, (etc) and
just about every violation you can find in the rules. When cornered
about this he will say "IM crazy" , followed by "I can do these things"
Why he hasn't been brought to account for this shameful activity has
been a mystery to me for years.

And Polly don't know Jack Schitt....

Who is Jack Schitt?

The lineage is finally revealed. Many people are at a loss for a response when someone says; "You don't know Jack Schitt." Now you can intellectually handle the situation.

Jack is the only son of Awe Schitt and O. Schitt. Awe Schitt, the fertilizer magnate, married O. Schitt, the owner of the Needeep N. Schitt, Inc. They had one son, Jack.

In turn, Jack Schitt married Noe Schitt. They produced four children named Dip Schitt, Holie Schitt, Fulla Schitt, and Giva Schitt.

However, after being married 15 years, Jack and Noe Schitt divorced. Noe Schitt later remarried Ted Sherlock and since her kids were living with her she wanted to keep her previous name. She was then known as Noe Schitt-Sherlock.

Meanwhile, Dip Schitt married Loada Schitt and they produced a son of nervous disposition named Chicken Schitt.

Two of Noe's four children, Fulla Schitt and Giva Schitt were inseparable throughout childhood and subsequently married the Happens brothers in a dual ceremony.

The wedding announcement in the newspaper announced the Schitt-Happens wedding. The Schitt-Happens had four children named Dawg, Byrd, Hoarse, and Bull. Bull left home to tour the world and returned with his new Italian bride, Pisa Schitt.

So, now when someone says, "You don't know Jack Schitt", you can correct them.

Family history as recorded by Crock O. Schitt

Ole great one, Polly, PHUQE YOU and pass on.

I KNEW they should never have dropped the Morse code requirement to 5 wpm! Now we have all that CB language on the ham bands! '

We need to increase the code speed requirement to 20 wpm and that would stop all the obscene intercourse. That would filter all these kinds of hams out because everyone knows if you can do fast code, you HAVE to have decency and integrity.

No, my new vehicle isn't possessed!

I wanted to up the power in my HF Mobil setup in my truck. Is there any danger of running 500 or more watts in a new (2001)Chevy 1500 Truck? I have heard some bad things about running power in newer vehicles - does anyone have any insight/advice? I would being using 40 meters on up. Any bands cause more problems than others?

Scott.

I've got a GMC1500. When I tune my HS1600 on 40m, the speedometer
goes full scale past 100 mph. This is with only 100w and a rear
bumper mount. Only seems to happen on 40m. I haven't gotten my
SGC-500 installed yet but I plan to avoid 40m with 500w.

Some vehicles don't have sufficient shielding around their electronics when it comes to higher powered RF. What happens is one keys up on the radio and the computer which controls the engine gets RF overloaded, and as a result, the engine shuts off. I've heard that some 1980's Toyotas definently had this problem.

I have a friend who transmits with about 100 watts on 10 meters
sometimes and it will occasionally kill his 1980 Toyota Supra (EFI
I-6). But that is an old car too and the wiring is a rats nest as you
might expect. On my 1986 F-250 diesel truck the tach (electronic
reluctance pick up) drops to zero sometimes while transmitting on a
450-some odd MHz commercial channel with an HT, but on no other
frequency that I am aware of.

I would assume, (hope) that you could ramp up the power and if it
doesn't kill the engine or cause weird problems you would be safe. That
is my way of doing things. And then there is QST's mantra, namely,
"install six RF chokes over everything, 3 times over."

Birken

The bigger problem with 90s vehicles might be the ampacity of the
increasingly
lame batteries and alternators. With a 100w xcvr and a 500w out amp you
have
to be pulling 75-80 amps key down. Assuming a 50% duty cycle even 35
amps
average might fry something, never mind the lousy voltage regulation.

Hi Paul
If this amp is the same as the 2-117 then the pinout of the 5 pin din
is as follows

the pins are as numbered below

2
4 . 5
. .
1. .3

SSB FM
1.------------------------o ï¿½ o
|
2.-----------------o ï¿½ o |
POWER | -+ 10mfd
to J2 3.---+13.6---------.| -
PREAMP | |
4.-----------------o ! o |
|
5.---------------------------.

*note ï¿½ and ! denotes a switch leg and o denotes a switch contact

Paul Knight wrote:

Hey John, Doc, still has his license, but KV4FZ doesn't. He no longer
transmits because he lives in a condiminium.

OPDX Special Bulletin No. 482.1

The Ohio/Penn DX PacketCluster
Special DX Bulletin No. 482.1
BID: $OPDX.482.1
October 26, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, Dave/4L1DA, Alex/AI2Q, Juan/CO8TW, Andy/ES2NA, Mike/KA2AEV, and John/K8YSE for the following special DX information. Also a special thanks to Bill, NG3K, for the "CQWW Announced Operations" chart.

LAST MINUTE ANNOUNCEMENTS FOR THE CQ WORLD-WIDE DX SSB CONTEST!

4L0, GEORGIA. Look for 4L0Gto be active in the CQWW DX SSB Contest. The operaors will be 4L1DA/David, 4L2M/Mamuka, DL7BO/Thomas and 4L4CR/Micke. QSL via 4L1DA: David Devdariani, Shartava st.7, 380122 Tbilisi Georgia.

CO8, CUBA. Look for Juan, CO8TW, to be active in CQWW DX SSB Contest as a Single Op/Low Power/Single Band (28 Mhz) entry. QSL via direct to: Juan Carlos Veranes Ferrer, PO Box 8, Santiago de Cuba, CP 90100, Cuba. The log will be available after the contest on: http://www.qsl.net/co8tw/

ES9, ESTONIA. A serious Multi-Multi operation is planned from Estonia in the upcoming CQWW Contets. Arvo, ES5MC, Chairman of the ERAU, reports that this effort will be done mainly by the team of ES5Q and ES2X, but a surprise "guest star" should/will also participate... The contest site is located in South-Estonia (QTH of ES5Q). Some new antenna systems were just recently put up in preparation of the contest. The callsign for this operation will be ES9C. The prefix ES9 is not too common and is exclusively used in connection with the Estonian Radioamateurs Union (ERAU). This operation was put together with a lot of teamwork and also has international participation.

FP, SAINT PIERRE ISLAND (QRP operation, Not a contest Op). Hank, K8DD, left Toronto Monday morning and was expected to be here in the afternoon. He states to look for QRP contacts around, or below 7040 kHz:
(Eastern Time zone) October 26 from about 8 PM till 10 PM
(UTC) October 27 from about 0000 till 0200
We will try to keep it on one frequency (not much of a RIT and no split).

The radio will be 5 watts into a dipole or a vertical. The weather is expected to be cold, wet and foggy.

IR3, ITALY. Walter, IN3XUG, reports that he will be active in the contest as IR3Z as a Multi-Single entry. QSL via IN3XUG. A special thanks and QSL for QSOs on 4 bands or more! (Walter's E-mail address: mfronch@tin.it)

V26B - TEAM ANTIGUA Y2K OPERATION (Edited Press Release).....
Team Antigua will once again activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the Y2K running of the CQWW SSB Contest on October 28th & 29th 2000. Their plans are to enter the Multioperator/Multi-transmitter category. For a complete station description, complete with photographs and rate charts of "The Team Antigua, V26B, Superstation, please visit their Web page at:
http://www.frc-contest.org
(Click on the Dxpeditions page and then the Team Antigua, V26B Link!)
Their Grid Square is FK-97 and IOTA Number is NA-100. The Special Collectors Edition (Worked 5 Band & 6 Band) Certificate Program from V26B is continuing this year. In the past there have been quite a few certificates mailed. Therefore, due to the extreme cost of mailing, they are now requesting everyone who has worked them on all 5 & 6 bands, and would like a certificate, to please send them send them a Self Addressed Stamped Envelope (Business Size) along with $1 or IRC equalivant (to assist with printing costs) with your Log Information to W2UDT for processing.
"SPECIAL TOP GUN PLAQUE CONTINUES FOR THE 2000 CQWW SSB EVENT"
Congratulations to Bill Hider, N3RR on winning the 1999 V26B Top Gun Plaque! The team is sure that he will be defending his title for the Y2K Event! Starting on October 28th through the end of the 2000 CQWW SSB Contest, a "Special Plaque" is available to the FIRST operator to work V26B on all 6 Bands during the Contest. This Plaque is being sponsored by their very own Mr. Douglas Priest, W3CF/V26DX. So Ladies and Gentlemen, the very first person to work V26B on all 6 bands during the CQWW SSB will have this beautiful plaque awarded to them by Doug and the members of "Team Antigua".
Members of "Team Antigua" will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC Bands a few days both before and after the contest. There is also a possibility of some 6 meter and Satellite operations with conditions permitting! Most likely their operators will make their presence felt on all bands starting on or about October 25th until about November 1st. The members of "Team Antigua: and their Callsigns are as follows:
V26A Dale, N3BNA QSL Via WB3DNA
V26AK Tony, N2TK QSL Via N2TK
V26AU Carsten, DL6LAU QSL Via DL6LAU
V26B Sam, WT3Q QSL Via WT3Q
V26EW Ed, N2ED QSL Via N2ED
V26J Jay, WX0B QSL Via W3LT
V26O Bob, N5NJ QSL Via N5NJ
V26OC Brian, N3OC QSL Via N3OC
V26SZ Sharon, N5CK QSL Via N5CK

V26TZ Tom, ZP5AZL QSL Via W3HNK
V26U Bill, W2UDT QSL Via W2UDT
V26YR John, W2YR QSL Via W2YR

CQWW SSB 2000 Announced Operations (Final Version)

Fellow hams,

While KV4FZ has been removed from the data base, he is empowered to communicate fully on the ham bands. His privileges derive from special, written permission of the FCC and are continuous into 2001. His future thereafter murky, he is makng an extreme effort at rehabilitation.

Hi,

I was wondering if anybody had some additional information on the new Kenwood All-band, All-mode transceiver. According to my sources, it should be called TS-2000 (I also saw TM-2000 in the mean while) and be released February next year.

Looking forward to any additional information.

I have good news and bad news; first, that's a great amp; second, if memory serves, as wired from the factory, switching is +V, however the amp can be reconfigured internally to switch on ground.

The bad news is my documentation is in a file cabinet in storage 700 miles away. I should be going there within a month, and if you haven't gotten any better reply before then, I'll get it out and copy it for you.

The other reply you've gotten here covers the pinouts.

Paul
I just saw this and I hope it helps

" EXT KEYING: The amplifier is factory set for "plus voltage" keying.
Most transmitters do not provide a "ground" during transmit, but most do
have a positive voltage at their back panel. You must consult your
instruction manual, for your particular radio, to locate this voltage.
This is then connected to the phono jack on the amplifier.
To change the amplifier from "plus" keying to "ground" keying you must
remove the cover and move the wire from the "+" pad to the "-" pad."

Hope this helps!

Holy cow, Batman, there is trouble in River City for sure!

Anyone who has the money or adequate credit can stop in at HRO, AES, Radio City, any Radio Shack outlet, or one of dozens of other places and buy amateur radio transmitting equipment, with no background check or breathalyzer test of any kind!

Ain't it awful!

If they are bedridden, but can reach a telephone, these sickos can call one of a dozens of "1-800" numbers and place their order which will be delivered promptly.

Aint't it awful!

On their scanner they can clandestinely spy on swap nets to find equipment available for sale, or they can stop at the next swapfest/fleamarket/hamfest and purchase amateur equipment from any table, and take it home for their nefarious purposes with no waiting period,

Ain't it awful!

In years past we could buy amateur equipment at Sears (right alonside the Craftsman socket sets), or order it from their catalogs. Heath had stores all over the country. Anyone who had the money or credit could purchase amateur radio equipment from those folks. Here in my modest-sized midwestern hometown we once had several retail outlets which handled amateur equipment along with other electronic equipment including consumer items such as televisions, record players, and even

(gasp!) citizens band equipment.

It was TERRIBLE, I tell ya!

Even worse, some folks have been known to clandestinely acquire the bits and parts from infamous open markets such as "radio row" in New York and actually build their own equipment. Kids have been canabalizing their Aunt Emmas old junked TV and doing the same thing, probably with unsterilized soldering irons!

Ohmygawd, how awful!

I have heard that there is a network of deviants who use the codename "Elmer" who are trying to lure unlicensed youth with promises of help building their own station. I've heard even the Scouting programs give radio badges to unlicensed children if they show an interest in mystery codes.

This is clearly an affront to the sanctity of youth, the Boy Scouts, and probably the Constitution!

And all this has been going on right under our noses for about 80 years! It's gonna ruin the hobby if we don't clamp down right now! We must remove this temptation from the general public. We need new laws, including a waiting period to check out the background of persons who seek to buy a handheld weapon..... errr.... I mean handheld radio. Authorities must be consulted to make sure that prospective purchasers know all the right secret handshakes and belong to all the right clubs and societies. Especially we must take steps to ensure that the general public is not subjected to the sight of amateur equipment out in plain view of children and the infirm and elderly who might inadvertantly become interested in becoming hams. It must be HIDDEN from public view and sold only in regulated stores on the back streets of distant and obscure cities like Watertown, South Dakota. We must hire FCC guards to ensure that you don't get in the store without the proper credentials.

What a lot of hooey!

Amateur Radio is not a controlled substance!

Can you build one? I know of many CBer's that know all about
electronics and radios. They probably know a heck of a lot more about
radio equipment than the large majority of HAM's. Just because they may
not have a 'LICENSE' does make them automatically stupid. There are
operators that operate legally and illegally just like Hams.

The "TS" version made the Amateur Electronics Supply catalog this fall, but the writeup shows"not type accepted" and no price.

I guess the "TM" is the mobile they showed at Dayton last May. That's the one I am desparately awaiting. Paul, please comment on what you saw (features, hints on price). I hope it has APRS like the TM-700.

thanks

A friend has set up a web site for me to sell off a 28 year accumulation
of electronic components including:

Coaxial Power switch,
RF power and other transistors, RF I.C.'s,
Minicircuits mixers, ceramic 455kHz and 460kHz filters,

variable capacitors, both panel mount shaft type and trimmer
variable inductors and coil forms, RF feedthrough and standoff capacitors,

High voltage: VACUUM RELAYS, RECTIFIERS, resistors and capacitors,

Other capacitors including, Photoflash, polypropylenes, tantulums,

Switches, such as foot switches and industrial limit (micro) switches,

Ferrites cores, Transformers and inductors,

Transistors for power audio amplifiers and television deflection,
Super fast (35ns) 1 and 3 amp rectifiers, and lots, lots more.

Yes, But you cannot LEGALLY use an amplifier on 11 meters PERIOD. So, to answer your question, YES THEY ARE STUPID to build, own, or operate above 5 watts FM or 12 Watts SSB on 11 meters. - I have built 2 LEGAL linear amplifiers 1 kit and one from scratch - for operation in the amateur bands. Both are still in operation - Doesn't make me smarter, just HONEST and LEGAL.

If you find a CBer who's designed and built his own power amplifier, please ask him to place some photos and its schematic diagram on a web site; also ask him to include all its performance specs (which were no doubt derived from extensive lab testing).

>There are operators that operate legally and illegally just like Hams.

The major difference is that we try to police ourselves and will not hesitate to turn in lawbreakers within our ranks. Thankfully, of our 700 kilohams, only a fraction of a percent are lawbreakers.

I have a nice Kenwood TM-V7A in the box almost new with software and cable
for programing from a computer,also the optional cable for remote head.
This has box and all docs and all that comes in box.
I am asking $350.00 plus shipping.You won't be disapointed with this
radio.Any questions please email me.Thanks

W9NTP has been running a KW on SSTV in his trucks, recently a Suburban, for a number of years, mostly on 20. using a Heathkit SB220. Contact him for details on
problems & solutions found.

A number of years ago I could shut down the electronic ignition on a Renault Fuego by keying my 25 watt 2M FM rig if the ground contact on the antenna was not making a good contact with the metal car body.

Ford used to hire people to keep track of what make of car had its ignition system killed by getting too close to the Voice of America antennas. They were also concerned that the ABS brakes could lock up or airbags might deploy!

Nissans put out a spurious signal on 146.985 Mhz which opens the squelch on a 2M FM receiver.

Do you have the matching 8251A and 4040 IC's installed in the TS-440? The were an option that had to be installed before you could use the other box. The box you have is just a level converter that changes the TTL level serial coming form the 8251 into RS-232 level signals. You're lucky to have it -- I just had to build one for my '440...

Other than having all the pieces, there's not much to it. Nothing has changed since the '440 was built, so your software will work just fine. Some logging programs (like CT -- the contest logger) uses the same hardware to automatically control your radio in the heat of contesting.

Hello everyone. I'm fairly new to HF and have a few questions about my antenna setup.

1. I have a G5RV Dipole up about 40' set up as an inverted "v", and use it on 10-80 meters with an external tuner. I just got a new rig with a built-in autotuner. My question is: will the autotuner handle the SWR of the G5RV as well as my manual tuner does, or will I be better off to continue using the manual tuner? II have heard that autotuners have a low tolerance to high SWR, and in some spots, the SWR on the G5RV is very high (3.1+).

2. How far should the ladderline and coax be from the leg of my tower? Do the "arms" of the antenna have to be in a V shape, or can I string them to fit my lot (If I do a V config., one arm hangs about 10' above my telephone line, and I don't want to do that).

3. I notice that on 40 and especially 80 meters, I get RFI on our TV's and phones as well as radios, but only on occasion. Would installing a good low-pass filter help to resolve this situation, or should I look into installing line and high-pass filters on the effected equipment?

Any information would be greatly appreciated!

Thanks
Adam

Perhaps they (CBer's) APPEAR TO YOU to "know all about electronics and radios" because you know so little about the subject. Heck, I'll admit I don't know that much about electronics. But I do know enough to recognize that most of these so-called "electronics experts" in the CB community don't know a darn thing about electronics.

In fact, about the only thing these guys do know is how to fool gullable people into giving them money. They start out by putting on a show with cheap "for looks" test equipment and some fake story about how they learned electronics (the military is the most common, with my daddy was... the second most common). Then they follow that up with success claims that are total nonsense ("I tuned a Cobra 148 to key 10 watts and swing 75 watts").

At this point, there are plenty of fools ready to deliver their equipment so these "experts" can "fix" it. Once the "customer" leaves, these "experts" get out a book on radio modifications and simply follow the instructions (they turn a few things the book says to turn). Most of these guys don't know what they're turning, why they're turning it, or how to fix it if they turn the wrong thing (or otherwise screw up). And they screw up a lot - the CB community is filled with poorly modified, poorly tuned, radio equipment that was "fixed" by some "expert" somewhere (which is why I would never buy a used CB).

Now, there may be some exceptions to this in the CB community, but based on what I've seen over the years those exceptions are darn rare.

No kidding. A few years ago, I showed my wife that I could listen in on cordless phone conversations, using just an everyday plain old handheld scanner, and she just about flipped! I then explained to her how dangerous it is to provide credit card numbers and other such confidential information on a cordless phone....

HUH?

Here in NC, there are HUNDREDS--maybe thousands--of older John Deere models running. There are clubs dedicated to old tractors. We recently had "Cotton Ginnin' Days", an annual event where all kinds of old equipment was running. John Deere tractors went back to 1925 complete with metal tires/wheels. Even an old 1927 steam threshing machine in steam. Old cars, old "one lunger" engines, etc. There was homemade ice cream--churned by a small hit-n-miss John Deere engine. All my lawn and garden equipment is JD, of course, influenced by my younger days driving a JD Model G (Pop! Pop!)

That's great and I envy you. Where I live in Central
California, we just can't afford to use such old equipment
in actual ag operations. If I looked long and hard, I might
be able to find a 2-cylindar still working, but I doubt it.
My 1976 model 4430 is getting very marginal. But I drive it
myself, so I don't have to worry about the labor costs like
my neighbors do. The repair bills, on the other hand, are
killing me!

I just bought an ADI AT-201 2 meter handheld. I set it for 40 memory channel operation. I programed 20 freqs. into memory. When I hit the scan button, it scans the first bank of 10. While scanning, I hit the number 6, like the manual says, and it will scan all my memory channels. However, when I quit scanning, or power off/on, it looses the "scan all memories" function. I have to scan and hit he 6 again to scan all the memory channels.
Is this normal? Can I not tell it I want to scan all memories in all banks?

Thanks,
Mark

There are good websites about antique steam tractors and other farm implements. Every once in a while, the Discovery channel will run a program about clubs that collect and display antique farm implements. If you haven't been , sometime go to the Smithsonian Museums in Washington. They probably have the best display of different tractors, including a lot of steam tractors and other related items. They had one around, 1910 that was bigger than a railroad locomotive, developed 10 or 15 horsepower and only went something like 4 m.p.h. Originally the steam tractors only had steel wheels, got stuck in mud easily, and they eventually started using tracks like tanks and other military vehicles. The steam tractors originally gave the U.S. Army the idea to use tracks instead of wheels. The steam tractors provided the locomotion power to run a lot of things on the farms. There was a pulley, somewhere off the engine. They would hook a motion belt to power generators, corn shuckers, pumps and everything else you can think of. I like steam engines and you can find all types of websites about antique and modern steam designs. Most people don't realize this, but the old steam powered railroad locomotives didn't have an actual top-end speed. They would run until they blew up. You could easily go 100 M.P.H. and faster depending on the size of the engine. I read, two or three different places where they clocked a Stanley Steamer automobile going 197 m.p.h at Daytona Beach in 1909 or 1910. Whether this is true or not, I don't know.

2990. On Periodic DSL Loss of Sync

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-28 12:13:59 UTC
From: no spam <nospam@no.spam.org>
Message-ID: <PNwK5.73$WN.549536@news.ntplx.net>
Source record: 101134
Cross-posted to: comp.dcom.xdsl,rec.radio.amateur.misc

Disclaimer- Except for the quotes, I have assembled the following information from various sources but no one has verified it. Please feel free to do so and maybe we can add something to the DSL FAQ.

I have a similiar problem to Steve's. I have traced my interference to streetlights.
Steve may have a streetlight or such that is activated by a timer.

This following applies to DMT ADSL only; I have never learned anything about CAP type ADSL.

The DMT ADSL system consists of up to 256 carriers 4 khz apart starting at 8khz and going up to 1.1MHz. I think the uplink channels (to DSLAM) start at 8Khz and end at 138KHz. Downlink (DSLAM to modem) is from 142K to 1.1 MHZ. The role of the carriers is to "carry" data to/from the DSLAM. Modem constantly monitors
the signal to noise ratio on each and every carrier, assigning the bulk of data transfers to the carriers with the best Signal to noise ratio (SNR) (by increasing points
in the carrier modulation constellation on a real-time basis)

But not on Carrier 64 (276 khz)! {dont know if always Carrier 64} This is the magic carrier
from which all timing is derived. So if you get a bad signal to noise ratio on Carrier 64 (due to distance or intermittent jamming) you definetly get loss of sync.

Apparently, when you get a line cap to a lower data rate, the magic carrier gets
sent to a lower channel (frequency), where presumably its SNR will be better.

You can get a bad Signal to noise ratio in two ways.
1) Signal is too low (distance effects)
2) Noise is too high (jamming, crosstalk effects)

As you all know, DSL access is limited by distance. That takes care of 1) and explains
why those who are farther out tend to be "capped" to lower speeds.

What about 2)?

Your dsl signal comes in on two wires called a pair. The first wire is called tip. The second
wire is called ring. The dsl signal is put on these wires in a special way.

In a perfect world, these signals are of equal and opposite amplitude on tip and ring
of your pair.
The tip wire has DSL Signal + noise
The ring wire has -1*DSL Signal + noise.
The signal the modem sees is tip wire - ring wire or (DSL Signal + noise) - (-1*DSL Signal +noise), or 2*DSLSignal + 0*noise.

In the real world you cannot count the DSL signals being equal and opposite because of line
imbalance. And you cannot count on noise being impressed equally on tip and ring.

This is because the lines are the telephone pole are not twisted in the bundle of cables. {or in your house wiring } So the modem gets Something1*DslSignal + Something2*Noise. As
the amount of noise increases, your modem hunts around for channels (carriers, frequencies) that do not have the noise. You may see packet loss as a result of this. If the noise is on the "magic" carrier, you are SOL ---your modem will try and re-acquire sync.

TOOLS you can use to troubleshoot loss of sync.

1) Your DSL provider.

Be careful here. I have had the following discussion with a tier 2 ASI manager.
"If you call us to complain about loss of sync, we will cap your line to next lowest speed.
We will not roll a truck until you have loss of sync at the lowest data rate in your terms
of service."
I had loss of sync at night when my cap was 1.5 mbps. They capped me to 768kbps.
Had the same problem. They capped me to 384kbps. Had the same problem, although
it was not as frequent. They did a truck roll. Of course they came in the day when
there was no streetlight interference. "Hey", they said, "your line is great up to 1.5 mpbs
we are going to remove your caps. You are lucky" "Hey", I said, "Im going to see if cable company has internet access"

So, for now, I get 1.5mpbs in the day, and occasional loss of sync at night due to noise from streetlights. On bad nights I use dial-up. And the cable company wont have a date of
deployment ready to be announced until 1Q2001. Damn this a major step forward, planning
a date to announce the date of cable internet access availability (Optimum TV)

1a) Before you go further, move your external dsl modem far away from the monitor as

possible. Also move the phone line and LAN cable far away from other cables, especially
video cables. See if things improve.

Did you know that certain DSL modem manufacturers are petitioning the FCC to
avoid electromagnetic compatibility testing because "its a great new technology that
should not be hampered by burdensome regulations"?

Chances are that if there is no attention to shielding the dsl modem to prevent
it from making rf noise per FCC regulations, there is even less attention to shielding the dsl modem so it will not be susceptible to noise.

2) Use your modem as a troubleshooting tool.

Most DSL modems have a means to be programmed or queried.\

For the efficient 5260 modem, you can access this means with a telnet program. Go to www.dsl-reports.com to find out how to do this and for the details of getting the information below.

Telnetting to the 5260 allows you see A) The quality of the dsl signal in these terms- Maximum
attainable data rate you can download at and maximum attainable rate you can upload at IF YOU DO NOT HAVE CAPS) B)Any 'caps' or limits the dsl provider has placed on your line.

For instance, your modem may report it can receive data at 6.1 Mpbs because you have a good line, but your dsl provider has limited the download rate to 1 Mbps because he charges extra for
the 6.0 Mbps rate. Its a great way to see if you are getting what you pay for on those
384kbps-1500kbps plans. Sometimes you will even find that your maximum attainable
data rate is LESS than the caps.

Your effective speed is the MINIMUM of (line cap, max
attainable data rate). Also, you should be aware that your max attainable line rate is
calculated continuously and changes throughout the day and night due to noise and
crosstalk.

Generally, any cap you got was chosen from the results of line testing by the technician installer or remote test from your dsl provider when you called in to setup
your service. Of course if you have reported trouble, your line may have been capped again.

You can also use the telnet facility to change settings of your modem. If you try this, you could render the modem absolutely worthless. It will have to be sent back to the manufacturer to be reset. Yes it has happened to a few people.

So lets stick to viewing line quality.

Determine your line quality at your computer. Then take the modem and computer down to your demarcation jack, disconnect the house, and plug the modem right into the demarcation jack.
Determine the new line quality. If there is a big degradation, you may have to redo your interior wiring. Sorry if you live in an apartment where access to the demarcation is not available to you.

You can also watch your line quality throughout the day. You do not have to depend on speed tests from the various web sites to determine if you have a problem with noise or wiring. You can separate speed reductions due to a crappy router (SNET) or oversubscribing (SNET) or those due to crappy wiring on the poles (SNET) or interior house wiring issues (btw 500 feet of UTP CAT 5 wiring is about 48 bucks at home depot)

3) Use a radio receiver to locate the source of noise that degrades your dsl signal.

To locate interference, a portable shortwave radio that tunes from 100kHz to 1.104 Mhz.
You can start with an portable AM radio which tunes from 530 khz to about 1700khz.

Wait for your modem to start re-syncing. Get out the radio and tune to an empty channel at the lower end of the dial. Can you hear interference that happens only when the modem re-syncs? If there is steady interference on the radio, does turning anything off in your house stop this noise. Does the max attainable line rate increase before and after you turn off that dimmer?

This is how I traced my biggest problem to a streetlight. But you can also listen for those cheap dimmers, electric blankets, motors etc or anything that you can correlate to loss of sync or reduction in max attainable line rate.

4) Good luck.
Always helps.

5) Bribes to technician to get a new F1 pair or F2 pair.
To be determined. But first you actually have to get someone to come

out. You're doing
your part to take advantage of a great new technology that should not be
hampered
by burdensome company practices. "Yo, D'Amagetti, I heard it costs an
average
of $300 to roll a truck, you seein' any of dat?"

6) Getting a second phone line. Cancelling your first. Move the dsl to new
phone line.
?

7) Calling 611 and tell them you hear really annoying humming on your phone
line
and be vague about your son's/daughter's dsl if asked.

No joke this was advice heard by me from a tier 2 rep who heard it
from his supervisor!

Hi all. I have four nice items on Ebay for sale. The T4X-C auction
end Saturday October 28 at about 7:00 PM California time, and the
others end on Sunday, October 29 from about 6:15 to 6:45 PM California
time.

Drake T4X-C: Excellent, L@@k
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=477911482

DX Engineering Speech Processor for Drake
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=478931596

Drake AC-4 Power Supply: Guaranteed!
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=478953755

Drake MS-4 Speaker: Excellent!
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=478969726

At the present time, the T4X-C is at $150, the DX-Eng is at $160, the
AC-4 is at $50, and the MS-4 is at $50.

All items are fully satisfaction guaranteed.

Thanks for your interest and good luck with your bidding. You can
email questions to NeilR@innermedia.com

I would like to try contesting. I have been listening this week to QSO's during the contest and I hear stations responding with a three or four digit number--i.e. 5914, 5915, 594 etc. What are these numbers and how do I determine what one to use? Do they relate to call district or what? Thaks a lot.

My 97 chev 2500 van would amuse on lookers when I transmitted on 80, 40 or 20. Anything over 25 watts on 80 meters the windshield wipers would start. On 40 meters the interior lights and dash warning lights would turn on. 20 meters a warning buzzer would sound from under the dash. Transmitting at 100 watts would kill the engine.
Several emails to GM showed that they are completely useless (I already knew that after having transmission problems that they would not address).
Anyway, paying closer attention to grounding, PL connections and chokes have solved the problems, but have not tried more than 100 watts.

The exchange in a contest varies greatly from one contest to another. Many times (such as the CQ World Wide DX Contest going on this weekend) it consists of a signal report (almost universally 59; a source of irritation to purists and great delight to anti-contesters) and a zone.

In the case of CQWW the zone is the CQ zone upon which their popular Worked All Zones (WAZ) award is based. In the U.S., it's generally either 3, 4, or 5, depending on where you live. 3 for CA and other western states, 4 for the middle states, and 5 for the eastern states. Take a look at http://www.cq-amateur-radio.com/wazrules.html for a definition list by states (and provinces, or countries) as to which zone you might be in.

In the case of your examples, 5914 is the report given by an operator in western Europe, 5915 from eastern Europe, 594 is from central U.S. or Canada.

All contesters welcome contacts from non-contesters, curious would-be contesters, and little pistol contesters, in addition to whatever heavy hitters are out there. In CQWW, however, QSOs within one's own country have zero point value, so even though you may wish to gain experience with the exchanges, try to minimize your "within country" contacts so that you can help others maximize their points.

You may enjoy the activity itself, but even if you don't, contests are excellent opportunities to work countries, states, counties, zones, islands, or other potential award entities you may be interested in that you might have to look harder for at other times.

Yes, I agree with what Walt here says...I have a G5RV and use it with an FT-990 which has an autotuner and it works fine, my ant has several spots with swr over 3:1 and the tuner handles it fine...just for your info...

Hummm, I'd make sure all the bandswitches are clean. If you can wiggle them and see fluctuation in the rig, they are dirty. Also you could have a bad solder connection at the driver tube socket. This is real common on those. If you can wiggle the driver tube and it fluctuates, it likely needs a resoldering on all the pins. There is a little trap door underneith the chassis that will give a little better access. It's still kinda a pain in the rear, but doable. I resoldered mine about a year ago as it was acting up. It's also possible you have a bad driver tube or finals if you can get a smooth output, but it drops off after a few seconds of transmit. If it goes up and down erraticly, you have a connection problem, or relays etc. I'd check everything to try to avoid changing the relays. They are almost impossible to find these days. That exact relay is not made any more. "I checked the company that made them". Also look for Rick Measures website. He has some handy info on the 830. I used his method to align my VBT, etc and worked very well. The 830 is still a decent radio even being 15+ years old. I'm listening to one right now. MK

This was told to a rich young man, in response to a direct question. If he had been Dr Jesus, and wrote the boy a prescription for Demerol, does that mean that we ALL have to take Demerol?

Aww.. Poor Profit Nutsack Davies......still wearing your Spock ears
when you post, Trekkie GEEK?
You do seem to be obsessed with my ASS, Profit Nutsack. I guess you
think everybody's into your gay lifestyle. Sorry to disappoint you.
Speaking of disappointments, how _do_your parents feel about their
IDIOT son who supposedly has a "college education in computer
operations," <snicker> yet delivers pizzas in a town that has plenty of
computer careers?
And "post proof" of your allegations i.e your obsession, <my ass>
yourself.

GET back to your DUMPSTER, Dumpster Davies.

We are possibly on the same team.
I suggest that some authorized hams practice a form of cognitive dissonance (translate basically as "an inability to see what they dont want to see).
Personally, I object more to the jammers, the drive by unidentifieds, the "rabel that disrupts ongoing valid QSO's maliciously.
I have been monitoring freaks (sic) for many moons and suggest that the use of the F-word is no more, no less a violation of the code.
Possibly, the frustration of many good ops can be attributed to the lack of FCC action directed at the jammers.
Tonight, Saturday - The Liberty net will again be jammed.
And, tomorrow-14313 will be jammed.
Nothing changes.
Reporting the F-word violation, but not recognizing or reporting the jammer acts, seems trite.
Nothing more-nothing less.

Been listenin to 3.860 for the past couple weeks
starting around 10:00 Central. Seems there is a
couple of stations on that freq who are at odds with
the right wingnut politico crowd on 3.950 who meet once
a week Sat nites at 9:00. Appears to be quite a schism
of dotering old men on both freq's, 3.860 busy for much
of the week mainly. Fart noises, music playing, animal
sounds, circus caliopes, switchin sidebands till 2 and 3
AM. Builds up to a creschendo to Saturday night when
it's then "3.950's turn in the barrel" - and the whole cycle
then repeats itself. Actually it's quite fun to listen to both
these groups of senior citizens go at it, put yer teeth in the
jar and waddle up to that radio with yer oxygen bottle from
years of smoking and get it all out of your system! I sort of
hope Reily leaves this circus of old fools alone for a few more
weeks, their fun to listen to and one of the participants on 60
sounds like he's "this far" from havin an apeshit over the proceedings.
(you'll have to listen to guess who!) So park yer tape recorders on
3.860 vs 3.950 folks! The proceedings will make for great background
sound effect tapes for the front door "spooky noises" setup when the
little urchins come knockin on the door for their candy on Nov 31st!!
Trust me, the freq is BETTER than that classic Three Stooges
bit when Curley dumped a bag of cats into an upright piano and Larry
had to climb inside to retrieve them.....

(note: there is another group on 3860 earlier in the evening - these folks
are not connected to the screwballs who come on later when the
moon rises in the evening sky...)

ROTFLMAO

ps: postin this Sat evening, there's already german marchin music playin on
3950 - Think we all know already who this is eh folks...?? grin Have
another
drink ------!!!

Looks like he's baaaaaaackkkkk. And we thought he was gonna go study for his A+. No here's how it works, Bro. Roger.
First you get the A+. A lot to learn, but it ain't quite rocket science. And there's study guides and internet courses and local classes .. anyone can get an A+.

Then, you get your Network +. About as much information to learn as the A+, but no harder overall. Again .. a lot of information to cover, but it ain't rocket science.

By then, one should have a job. $550-$600 a week at least. But one doesn't stop there. One keeps on taking classes on Novell Networking, etc. In a year or so of taking Novell classes, the pay should move up rapidly. Don't take my word for it ..

http://www.novell.com/education/certinfo/

But then what would I know .. I'm a LOSER. (Or is that .. Certified LOSER?)

Certified .. Get it?

BRAVO Old sport - Well said!

Actually, the Chicoms planned to attack the USA a couple months ago,
but after monitoring 75M, have changed plans.

Lots of Tech. Colleges offer these classes. And they're usually offered AT NIGHT so anyone can get the training for a better job with some security and benefits.

The resources are out there .. classes, interactive courses, exam study guides .. all price ranges, all schedules. No excuse for not getting on the band wagon.

Oh well. Someone has to deliver the pizzas.

Hello NM5A. Thank you for the info on the 8251A and 4040 IC's. You have provided some clues and it gives me a place to start
looking. The interface that I have is one that was built by another fellow and the software seems to be working but it is unable to scan the 440 and collect the info that it needs. Also my software seems to be a trial version that is not fully functional. Do you know if the software is still available and where I might find updated software on the net or in other places? Thank you for steering me in the right direction. 73 de Wally VE7IF

A woman in a hot air balloon realized she was lost. She lowered altitude and spotted a man below. She descended a bit more and shouted, "Excuse me, can you help me? I promised a friend I would meet him an hour ago, but I don't know where I am."

The man consulted his GPS and replied, "You're are in a hot air balloon approximately 30 feet above a ground elevation of 2346 feet above sea level.You are 31 degrees, 14.97 minutes north latitude and 100 degrees, 49.09 minutes west longitude."

"You must be a Republican," said the balloonist.

"I am," replied the man. "How did you know?"

"Well," answered the balloonist, "everything you told me is technically correct, but I have no idea what to make of your information, and the fact is I am still lost. Frankly, you've not been much help so far."

The man responded, "You must be a Democrat."

"I am," replied the balloonist, "but how did you know?"

"Well," said the man, "you don't know where you are or where you are going. You have risen to where you are due to a large quantity of hot air. You made a promise which you have no idea how to keep, and you expect me to solve your problem. The fact is you are in exactly the same position you were in before we met, but now, it's somehow my fault."

Sorry, impeachment is when the House sends up the case to the Senate.

Paula Jones. The indictment that his lawyers are trying every trick to
avoid. Don't you watch the news?

Hi --

If you do a web search on TS-440 and 8251A you should get half a dozen hits
for copies of an article that describes setting a TS-440 up for remote
control. The one I have was from

http://artofhacking.com/Tucops/Radio/Two_way/IC10.1.TXT

-- I don' t know if the link is still good. It's s six part article that
also lists all the commands that the '440 can recognize and the data it will
send back. I don't know of any place that is selling the original hardware.
Again, a web search might well net several hits for control programs.

Sorry I can't be of more help.

73,
NM5A

Adam, As you well know, opinions on antennas are a dime a dozen, everybody has his favorite. I tell you from first hand experience (been there, done that, got the T-shirt to prove it) throw that G5RV away and just put you up an inverted V or a flattop for 80 mtrs feed it with coax (rg8x is light and will handle up to 600 watts and is inexpensive) Your'e autotuner will love the Vor strait dipole, and I will bet you will hear better and receive better signal reports.

> or a flattop for 80 mtrs feed it with coax ...

Opinions are one thing - physics is another. Your above configuration (with coax all the way to the dipole) is much worse advice than the G5RV on the bands where the G5RV performs well, i.e. 80m, 40m, 20m, 15m, and 12m. According to EZNEC, the 300 ohm series section transformer (matching section) lowers the 50 ohm SWR from 69:1 to 3.4:1 on 80m, from 64:1 to 4.3:1 on 40m, from 74:1 to 7.8:1 on 15m, and from 15:1 to 2.2:1 on 12m. Take a few minutes to calculate the relative losses in the coax due to SWR and you will see that the G5RV beats your antidotal advice all to heck. A good rule of thumb is not to run more than 50 ft of coax with an SWR higher than 10:1.

Roger writes ..
>And I wish him success.
>He won't beleive me, but what the hell...
>
I think lotsa people do, Bro. Roger. In a "guarded" kinda way. We gain nothing from his failure. If he follows the A+/Network+/Novell certification track we laid out for him in previous posts, he'll inevitably move up some. Maybe a lot. It's up to him.

But what do I know .. I'm a (certified) LOSER ! ! !

No kidding? All of that hard work, and only a barely passing grade?
Ouch. That has to hurt the Profit's feelings.

> I know. There's a Technical college near here that offers it, along
> with Cisco, MCSE/CCNA, etc.

Metropolitan CC here in O'ha charges $33.00 an hour. Not bad. I
imagine even a pizza - boy could afford that.

> Cool. I bet Profit Nutsack will still be delivering pizzas 5 years
from

Just happened to be scanning through 11-meters and caught "The Original Red Panties Man" on 27.385 LSB yesterday afternoon. Sounded like the real deal: was talking about 14.313, 3901, Vietnam Dan, Dumb A** Donnie, Pork Butt, etc. Said his ham rig was in the shop, so he has temporarily taken to agitating on the CB instead. Funny stuff!

Anyone else hear this?

Stories vary. I'm running an Icom 706-2G, Ameritron ALS-500 and screwdriver antenna on a 2k Ford diesel. No problems so far. The only "quirk" is that the 3rd brake light on the camper cover flashes when I transmit. That could probably be fixed with some 0.01 caps.

What's the rating of your alternator? Need 120 or so amps at least. My alternator is rated at 110, but the dual batteries seem to shave the peaks ok so far.

I knew a guy once who had a 2nd alternator added just for his radio gear. A little spendy, but it took care of all the power he'd ever need.

I hope that's "$33 per credit hour"! In that case, for example,
a 3 semester-hour course (about 45 classroom hours) would cost $99,
which is a tremendous bargain.

Thanks Lrod, been wondering about that for a while now. What prefix
did it used to be? IF any?

And the impeachment is toast when the Senate votes and Rehnquist tells
the House managers to start packing. It's over with. You lost.
But you're a bunch of sore losers, aren't you:

"If they had offered up their president for resignation,
we might have thought differently of it."
-- noted Republican strategist Rush
Limbaugh, explaining the Republican
reasoning in voting down the Comprehensive
Test Ban Treaty, Oct. 15, 1999

> avoid. Don't you watch the news?
```

Paula Jones was not a rape case. Nor was it even a criminal case.
Nor was it even a valid civil case. In the only judicial ruling
before settlement, the ase was tossed on _summary judgement_
(as I had predicted it would). A SJ dismissal is a real slap
in the face to any lawyer. Say, did you hear what Jones is
now saying about the case? She didn't want to go through with
it (she now says), but the RW people kept pushing her on it.
It was a political harassment, just as we have been saying all
along.

Nor will Clinton ever be indicted for perjury for what he said
in that case.

No. Not that you'd be able to figure that out. . . .

Cheers,

Source record: 100971

I had no intentions of upsetting you or anyone else, Simply the fact that there were illegal amplifiers. This was in contrast to your statement that there were no illegal amplifiers, only illegal operators. Most of the amplifiers one finds on E-Bay are manufactured non type accepted amplifiers for use by CBers. Both the amplifier and the user is in variance with FCC regs. Yes, you may actually build as many a year for your use as you like, provided however, no two are alike.

Jay,
Maybe the simplest program came with 'Windows'. You
can use the 'Paint' program to draw most schematics. To
really do anything fairly complicated, you'd have to make
a few 'stock' symbols. Just depends on how complicated
you wanna make it...

Ohio/Penn DX Bulletin No. 483

The Ohio/Penn DX PacketCluster
DX Bulletin No. 483
BID: $OPDX.483
October 30, 2000
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH/WB2RAJ & The 59(9) DX Report, K3MLA, K3TEJ, W3UR & The Daily DX, WB4PVT, K8IW, K8YSE, N9PD, K0RX, NU0Q, BD7NQ, CT1BWW, DJ5AV & DX News Letter, EA5RM, F5NOD, G3SWH, HK3JJH, HR1ERL, IZ1DFI, JA3MZB, JF2MBF, JF6OJX, LA9XGA, PS7AB, PY2YP, VK2GJH and VK4AAR for the following DX information.

1SL1A, SEALAND (Interesting report of the week! DX IS...). OPDX received a report this week from a person named Jon stating that he along with some other hams are going to be operating from the "Principality of Sealand" sometime next month or in December. The callsign that they will be using is 1SL1A. Sealand is currently being disputed worldwide as being its own entity. More details on this operation is forthcoming soon. You may have heard of Sealand, if not, here are some links you may find useful for research:
http://www.sealandgov.com/
http://www.fruitsofthesea.demon.co.uk/sealand/index.html
Here is an ABC News article on Sealand.. Click on the picture for a video news story using realplayer video.
http://more.abcnews.go.com/sections/tech/dailynews/sealand000606.html

5T, MAURITANIA (possibly S0). Eight members of the "International Amateur Radio Volunteers" (IARV) led by Yoshi, JA1UT, will visit 5T-land for their NGO project. They will operate as 5T5U, same as last December. In addition, if allowed, they will try to enter the land of Sahara Occidental and operate S07CRS. QSL for their operation will be handled by JA1UT.

9M6, EAST MALAYSIA. Members of the Borneo ARC will be signing with the special callsign 9M6C from November 3-5th. Activity is expected to only be on 14195 and 21195 kHz.

C21, NAURU. Jack Haden, VK2GJH, will be active as C21JH (RI-39) during the period December 10-22nd, inclusive. A special focus will be on 50 MHz band with HF activity on a limited basis. He will be monitoring 50.110

and 28.885 MHz using an IC-736 (100w) to a five element at 45 feet. Jack states, "Any donations from the 50 MHz fans for this operation would be appreciated due to travel costs incurred in the HIGH SEASON." QSL via VK2GJH direct only.

C6, BAHAMAS. John, K3TEJ, will be active from Treasure Cay (NA-080) from November 21-28th as K3TEJ/C6A. Activity will be on 160-10 meters including the WARC bands. He will participate in the CQWW CW Contest as C6AKW. QSL via K3TEJ

CQ2, PORTUGAL. Look for operators CT1BWW and CT1DGK to activate CQ2K in comemorating the year 2000 on November 10-12th. Activity will be on all bands (no 160m), including the WARC bands and an entry in the JIDXC Contest. A special QSL card will be available via QSL Manager CT1BWW.

E30TA, ERITREA OPERATION. There are only a few days left for this operation. Operations are expected to end November 1st. This station was very active during last weekend's contest. QSL via DL5NAM.

EIDXA 2001 OFFICERS. The Easter Iowa DX Association is pleased to announce its officers for the 2001 calendar year:
President - Heinz Blankenhagen, NR0X
Vice President - Rick Heinrich, N0YY
Secretary/Treasurer - Tom Kueny, K0DX
Congratulations and best of luck to these fine amateurs.

GD, ISLE OF MAN. Steve, G4UOL, is expected to be active November 17th through December 1st as GD4UOL. Activity will be on 160-10 meters CW only with an entry in the CQWW CW Contest. QSL via G4UOL.

IOTA NEWS.....
AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) several times during the next few months: November 14-24th, Decemeber 15-25th, January 5-16th, February 6-16th and March 20-30th. However, this is not a DXpedition and Masa will only be active during his spare time. Suggested frequencies are: 14260 (+/- 10 kHz) or 21260 (+/- 10 kHz). QSL only via the Bureau.

OC-129. John, G3IZM, will depart the UK for Manila on December 17th, and will be operational as DU7/G3IZM from Guimeras Island in the Visayan Group between December 19th and January 5th, as swimming and other holiday pursuits permit! His activity will be done with an IC706 MK2G with dipoles over the sea on 20/15 meters CW/SSB. QSL to home callsign.

JW, SVALBARD. Tor, LA9XGA, will be operating with the callsign JW9XGA from the JW5E Club hut in Longyearbyen Spitsbergen Island, Svalbard. He will be active from November 2-8th. Activity will be on all bands, CW/SSB /RTTY/PSK31. QSL via LA9XGA to the bureau or direct to: Tor-Atle Sandal, Hamnaflot 6, N-4200 Sauda Norway. For more info, check the Web site at: http://www.qsl.net/jw9xga

KP2/WP2, U.S. VIRGIN ISLANDS. Bill, NU0Q, will operate WP2Z from St. Croix during the ARRL CW Sweepstakes Contest November 4-6th. Before and after the contest, he will sign KP2/NU0Q. IMPORTANT: QSL WP2Z via KU9C. QSL KP2/NU0Q via NU0Q.

K5K, KINGMAN REEF OPERATION. There are only a few days left for this operation. Operations are expected to end November 1st. K5K was heard during the CQWW DX SSB Contest begging for QSOs on 20 meters.

P5, NORTH KOREA. Rumors continue to be pass around about a possible P5 operation to take place at the end of October. However, according to "The Daily DX" a multi-national team of operators who meet in Seoul, South Korea "in preparation for trip and possible demonstration operation of amateur Radio in North Korea", were informed by authorites "that permission to operate Amateur Radio would not be granted." The group was, however, given a new date of January 7, 2001, for a possible Amateur Radio operations. Only a few details are available because of the sensitive nature of this operation. More details are to follow. Let's hope that this operation can take place, KYFC and stay tuned.

PV3, BRAZIL (Special Operation). Look for PV3DC to be active from "Fort Duque de Caxias" from November 2-5th. The will be valid for the "Brazilian Historical Fortifications Award" (DFH) as RS-01. Activity will be on CW/SSB on all bands 80-10 meters. QSL Manager is Ruy Brasil (CBA/QRZ). E-mail address is: py3afe@sgnet-rs.com.br

QSL INFO AND NEWS.....
Logs for 3A/IZ1DFI (Gianni) and 3A/IK1QBT (Tony) for their October 21-22nd operation are now available at:
http://www.qsl.net/iz1dfi
http://www.qsl.net/ik1qbt
If you are missing from the log file, send E-mails to:
IK1QBT/Tony - k1qbt@amsat.org or Gianni/IZ1DFI iz1dfi@libero.it
with your callsign and log information, and they will do a search for you.

Terry Liang, BD7NQ, informs OPDX that QSLs for B7K go via W2AY, NOT BD7NQ.

Charlie, WB4PVT, has talked to Georgi, LZ1ZF, and he reports that Georgi is the QSL Manager for BT4ARDF. Georgi has just returned from China where he took part in The 10th Amateur Radio Direction Finding World Championship (were he took 4th on 2 meters band and 5th on 80 meters). He states that all logs (over 4000 QSO's) are at his disposal, and he is the QSL Manager for all contacts regardless of the operator of BT4ARDF. QSL cards will be printed in two weeks. Georgi will QSL 100% via the bureau, but states that the LZ QSL bureau is quite slow, so he will also confirm directly (please SASE) via CBA or to: LZ1ZF, P.O.Box 11, 4300 KARLOVO, BULGARIA.

Gil, F5NOD, reports that the FO0/F5JJW log is now available on his Web site: http://f5nod.waika9.com/
Pictures will also be available soon. The operation was from Mangareva Island (Gambier). Reference number: OC-063 (IOTA) and FO-108 (DIFO).

Gil states, unfortunatly, the operation from Tikeau Island was cancelled and Joel (F5JJW) is back home.
Gil, F5NOD, also reports that the FK-DX Group Wep page is now on-line at: http://www.multimania.com/fk8hc/

Two members of the Radio Club GRAPA (Grupo de Radioaficionaodoa al Packet) HR1AAB/Alberto and Antonio/HR1ERL were active in this past weekend's CQWW DX SSB Contest as HR1AAB. QSL via: P.O. BOX 1734, Tegucigalpa Honduras, Central America, Zip Code 11101.

SV9/K7BV QSLS. Mike, K8IW, informed OPDX that he talked to Steve, KU9C, and was told that the QSLs would be ready in about a month. They are having a full colored QSL card printed, but had some problems with the picture. The picture was sent to the printer just recently, and Steve thinks the turn around will be pretty quick. He is sorry for the delay, but wanted to do a nice card for this operaiton.

VK6BM QSLs. Alan, VK4AAR, advises that after several unexpected holdups at the printer's, he has been advised that he should be receiving the VK6BM (OC-234) QSL cards very soon. All the envelopes are ready with stamps on them, so as soon as he receives the cards, they will be on their way to the DXers, progressively over the following days. Alan will make sure such delays do NOT occur on future operations. He thanks all for your patience.

Toni, EA5RM, informs OPDX that the XU7ABD log is now available at the Web site: http://www.qsl.net/xu7abd

Cesar, PY2YP, Chairman of the Grupo de CW de Sao Paulo (CWSP), informs OPDX that the Grupo de CW de Sao Paulo (Sao Paulo CW Group) has a new URL address: http://www.cwsp.org.br
The CWSP site hosts the logs for AX0LD (Macquarie Island) and PS0S (Peter & Paul Rocks).

QSL cards for YC3ZMI (IOTA OC-237 operation) should be sent to IK8CCW at: Antonio Cannataro, PO Box 360, 87100 Cosenza ITALY (he is not member of ARI).

SPECIAL EVENT. Look for UA4SKW to operate the special event station to commemorate 80th Anniversary of Mariy-El Republic. The special event callsign UE4SMA will be used now through November 30th. QSL to:
80 years of Mariy-El, P.O.Box 145, Yoshkar-Ola, 424000, Mariy-El, Russia.
A "Special Commemorative QSL" card will be available. A donation of a USD to defray printing would be appreciated. For more information, contact Tom UA4SKW at: toms@mail.ru
There will be a special award certificate "Mariy-El 80" for those who made QSOs with Russian stations from "UA4S"-oblast during year 2000 (foreign stations need 2 QSOs, CIS - 3, Russia - 5 QSO`s). UE4SMA counts for 2 QSOs for everyone. The certificate fee is 4USD or 10 IRCs.

VK6, AUSTRALIA. Larry, K3MLA/KG4ML, will be in Geraldton, Western Australia, from November 5-17th. However, he states this will be a business trip and has been issued the callsign VK6BRP. He will be taking his FT-100, along

with a rigblaster interface and laptop, and will be trying to hand out some PSK31 contacts from Zone 29. Larry plans on operating 40-10 meters, including the WARC bands, operating CW and SSB. He is hoping that the "Best Western" motel will be "HAM Friendly" to antennas (this may be a problem). As a backup, Larry is taking an ATAS-100 mobile HF antenna just in case he can only operate from the rental car. Like his KG4 operations, if he is not working, he will be operating the radio! QSL via his home callsign, K3MLA.

VK9L, LORD HOWE ISLAND. "The 59(9) DX Report" reports that Ed, AA4EH, will be active from October 31st through November 6th as VK9LEH, His activity will be on 20/15/10 meters and the WARC bands. QSL via AA4EH.

VQ9, CHAGOS ISLANDS. "The DX News Letter" reports that Patrick, W3PO (ex F6DWY), will be active as VQ9PO beginning October 30th. Activity will last until next March. Look for him to be mostly on CW and on all bands. QSL via W3PO.

YJ, VANUATU (DXpedition Update). "The Prairie DX Group" has provided more details to their DXpedition to Vanuatu November 19-29th. The group plans to not only have real-time on-line logging, but also a live Web cam active during the operation. They expect to be assigned the callsigns YJ0PD for their general operating and YJ0V for the CQWW CW Contest. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin. The QSL route for the DXpedition (including CQWW CW Contest) is via N9PD, direct (please include SASE, IRC or USD) or via bureau. DO NOT SEND QSL CARDS VIA "YJ VANUATU BUREAU". For further information, please check their Web page: http://www.n9pd.com
Or contact them at: kf9zz@arrl.net

ZK1, NORTH AND SOUTH COOK ISLANDS. Remember to look for operators Yasu/ JI1NJC and Yu/JR2KDN to be active from Penrhyn Island (IOTA OC-082, Grid Locator BI11) now through November 4th as ZK1NJC and ZK1NDK, respectively. Both are veteran DXpeditioners. However, as this bulletin was being prepared during the CQWW DX Contest Sunday morning, PacketCluster spots show the duo is currently active from the South Cook. Hopefully the team will be able to travel to the North Cook Islands. Activity is expected to be on CW/SSB/RTTY on 160-6 meters. Please refer to OPDX.478 for further details and QSL routes.

I just aquired a MINT Lafayette 6 meter HA 460 AM Tranceiver....rig
seems to work great but NO ONE on the band it seems!! I even built a
half wave dipole and have it at 30 ft but only heard one local beacon
is all. A real shame as i know this is a wonderful band.....

I'm not sure it's ever been anything else. It doesn't count as a separate DXCC country, because it's too close to Sicily (between Sicily and Tunisia on the websites I found), consequently I've never chased it down.

It was always one of those oddities in CQWW that is easy to miss as a mult, because the CQ WAZ list varies from the DXCC country list by that one and a couple of others (that I don't recall right now).

I'm sure that given the size of the ITU zones versus the CQ zones that it's a separate zone there, too, but I can't say that for sure.

Just not a lot of circumstances where it counts separately from Italy.

Hello again, and thanks for the advice so far. I wanted to make a few clarifications about my setup though. I intend to use my G5RV on ALL HF bands (10-80, including WARC). The antenna has 102' of "flat-top" to it, and about 30 feet or so of 400 ohm laddeline which is connected to a balun, after which there is about 70 feet or so of rg-8x. If precise measurements are needed, I can provide some. I am aware that certain lengths of coax can increase the SWR, but if memory serves, the length I have is one shown to be within an acceptable SWR range (although the SWR is still really high in spots).

My main concern was that my new rig's autotuner would fail if too great of an SWR is shown to it.

Thanks for your patience on this matter...I am slowly but surely learning the "HF ropes", as I am more experianced with VHF antenna systems.

Adam

Follow up:

I couldn't remember the rules exactly for CQWW (not doing much radio stuff in the condo) but I went to some sites and looked, and CQWW uses the DXCC country list and the WAE country list, as well as the CQWAZ zone list, and the WAC continent list for multipliers.

These countries are in the WAE country list:
C3-CT-CU-DL-EA-EA6-EI-ER-ES-EU-F-G-GD-GI-GJ-GM-GM Shetland-GU-
GW-HA-HB9-HB0-HV-I-IS-IT-JW Bear-JW Spitsbergen-
JX-LA-LX-LY-LZ-OE-OH-OH0-OJ0-OK-OM-ON-OY-OZ-PA-R1/FJL-R1/MVI-
RA-RA2-S5-SM-SP -SV-SV5Rhodes-SV9 Crete-SY-T7-T9-TA1-TF-
TK-UR-YL-YO-YU-Z3-ZA-ZB2-1A0-3A-4U1 Geneva-4U1 Vienna-9A-9H

So there are quite a few "countries" in CQWW that aren't on the DXCC list: IS, IT, JW Bear, and 4U1 Vienna. Also, of course, working a TA in zone 20 could be either in Europe or Asia depending on its location.

Computer logging has simplified this stuff a lot since the first Multi-op CQWW I worked in 1978, and the one (Multi-op) I did from my house in 1982.

I also checked on the ITU zones, and it appears that Pantelleria Is. are in zone 28 along with all the rest of the "I"s.

Gee, you never let a fact get in the way of your bias, do you. The $90K fine was for contempt of court. Yes, it involved, false, misleading, and evasive testimony, but it wasn't perjury

Now I am sure a know-it-all legal whiz like yourself (who still apparently believes that legislation can become law straight from committee without action by the Congress or a President's signature) will scream that false, misleading, and evasive testimony IS perjury, but a sitting Federal judge, whom we can presume is just the slightest bit smarter than you, ruled it didn't meet the legal standard of perjury.

Of course, what's lost in all of this, is that Clinton was being persecuted and excoriated for his answer to a question that never should have been asked. And virtually every man I know or have ever heard of, when confronted with evidence of an extra-marital interlude, would follow the precept espoused by Robert Morse in "A Guide For The Married Man;" deny, deny, deny.

Now let me hear all you self-righteous hypocrites proclaim how, no, you would have said you did it. BS.

So what you do about that is run PARALLEL dipoles, such that one of
them always presents a modest SWR on all bands of interest. 80,40, and
twenty meter dipoles paralleled on a single coax run do a quite good job
of covering the HF bands here.

Precisely, Jeffrey.

Not a bad deal, if you ask me. I guess we're a minority, here - truly affordable education is, I believe, the best tool for sorting the wheat from the chaff. Want to participate in the economy in a meaningful way? Put your money where your mouth is, educate yourself, and participate. And for the Profit NutsacKKKs of this world: Don't moan to me about equal opportunity quota programs. There's never a waiting list at Metropolitan, and employers in the US are hiring immigrants, for piss' sake.

Affordable education: The ultimate egalitarian wet dream.

That is exactly correct...from the standpoint of the law. You have to keep in mind the framework of the discussion; like it or not, it all depends on what the definition of is is.

And if you don't want to do that, then I suggest you to go down to your local police station tomorrow and turn yourself in for speeding. Because I know you've done it. Everyone (who drives) has exceeded the speed limit at one time or another. Of course you all rationalized it at the time, and if you ever did get caught, most of you lied to the cop and said you weren't, and then most of you went to court and tried to beat the case. But that's okay, right?

Why is it so hard for you to think like a lawyer?

By the way, if the TS440 is anything like my TS850, you don't even need any particular software to talk to it to verify it works. In the manual should be the command set and instructions on how to use the computer to send commands to the radio.

When I first got the '850, I was using a DOS computer and ProComm for a terminal program. I don't know what the windoze equivalent is of ProComm, but there should be a simple communications program bundled as part of it, and as long as you have a piece of software that can talk to a modem (you know, type "atdt" and get a dial tone) you have software to talk to the radio. Just specify the COM port/IRQ combo you want to use, then plug the radio into that port.

Of course, to take advantage of the features of the radio that can be handled well by software, you will want something more sophisticated. Any of the modern logging programs, both general logger and contest logger, should make your radio dance.

Years ago I looked at a couple of shareware control programs that would work with the '440, but that was before the internet. Searches should turn them up, though. Still, in the long run, your best bet will be one of the computer logging programs.

Also, be thankful you chose Kenwood. They have the most computer friendly command set and will do the most things with software of the big 4 (Kwood, ICOM, Yaesu, Ten-Tec), although I don't know how rich the '440s command set actually is.

I'm having a problem with a "white noise" RFI source external to my home. The noise level is highest on the 17 meter band, where it reaches S5 on my TS850 S meter. The level is not constant, with a random variation of 2 S-meter scale segments. I'll search it down with my old Zenith Transoceanic in the next couple of days, but has anyone had experience with sources of white noise interference? This is nothing like RFI from dimmers, etc., just the rushing white noise sound. I'm in a residential development that's a few miles from any possible commercial source, so expect it's emanating from a nearby home.

But for crissake don't try to trim the individual flattops for low swr on their
own bands because they all interact and trimming one will make some other
dipole too long/short etc and you'll drive yourself nuts. BTW, don't try using
what cable companies and telcos use for 'lashing wire' to make antennas out of,
the manufacturers build a little resistance into the material in them and you
just cannot get the swr down. (drove myself nuts trying to once).

The standard G5RV does not work well on 30m, 17m, and 10m. However,
slight variations have a big effect on 10m. If you really want an
all HF band antenna, take a look at mine on my web page. Also follow
the G5RV web page selection to find out all about the G5RV.

It should be noted that the case law mentioned here was the result of one
group of 'believers' suing the dominant group of 'believers'.
Non-Christians and Atheists had exactly zero to do with it. Champion
tyrants up and champion martyrs down.

If it's breadboarded, I suppose so!

Though I don't have any experience in this area, I would assume that it's dependent upon age of the equipment, among other things. They might like to eat older equipment (with cotton wrapped wires) but probably use modern equipment as a nest. (Yuck!) Perhaps someone with direct experience will chime in...

I cut them for center band, separate them as much as possible,
avoiding close parallel installations and tune them with a tuner. It
has always worked for me.

That "carrier wire" is stainlss steel of high strength, and I never
pass an opportunity to grab it when available. I don't use it for
antennas but there are many other excellent uses for it.

IMO Nothing beats Copperweld for antennas. A few years ago I boubht a
spool of some new stuff called "Silky Smooth" or somethbing like that
from The Wireman. It was many small strands of plated steel and looked
like a good thing, and I repaced all my old copperweld with it. Turns
out it was NOT a good thing at all. I climbed the tower last week and in
looking things over and I see that ALL the entire length of each wire
element on all my antennas are now RUSTING! The plating is coming off
the small strands and over the entire length of every wire element small
points of rust are appearing. I'll have to replace every element on
every wire antenna, 160, 80, 40 and 30 meter dipoles. So much for
another "technological" advance! It's copperweld exclusively for me from
here on.

If I have troubles, I will take you up on this.

> ...or airbags might
> deploy!

I heard a story from a station in Denver - the guy told me when he ran 1KW (HF) in his Honda, the airbag deployed. Really, I am not sure if this is true or not...scary thought though!

Scott.

3114. Re: IC706Mk2G versus Alinco DX70TH

Newsgroup: rec.radio.amateur.misc
Date: 2000-10-30 22:59:43 UTC
From: jefff_b@my-deja.com
Message-ID: <8tkugrdak1@nnrp1.deja.com>
Source record: 101015

I can't really say that the article might have been amiss, because it does appear to be well thought out and well presented. However, having owned a DX70TH, and currently owning a 706MKII and a 706MKIIG, I really can't agree that the DX70TH is better on the low bands. Granted, these are "weenie" radios, and there's compromises made on these rigs, but the Alinco just plain sucks when it comes to the quality of the audio output. It simply can't be improved without going in and doing some modifications. The Icom, on the other hand, only needs to be realigned a bit. Sadly, the folks at Icom apparently don't have a clue about what good audio output should sound like, so they set the radios up from some weird paradigm that might include "keep it thin and himmy!"

Out of the box, both radios will usually show power output reduction with modulation in both AM and FM modes. The Alinco is practically impossible to get to behave in any other way, but the Icom can be re-aligned slightly to provide a nice forward swing with modulation in AM mode. You can then put a better audio chain in front of it and sound quite nice, indeed.

I have a 551 I haven't used hardly at all, with FM in it.
However the memory doesn't survive power off, so something
needs fixing. I probably paid too much for this rig, if
you offer too much, I could be convinced to sell. :-)
Say around $400 for it all?

For some AM QRP work, modify a few 49MHz toy walkie talkies
and give them to some ham friends in town. See the bottom of the page
http://www.geocities.com/wa2ise/radios/ham.htm
for a description. This may be good for the times the
band is otherwise dead.

The IC-551 required an external battery for back up. When I had mine I used
4 AA batteries in a holder. There is a jack on the rear of the transceiver
where the external memory battery plugs in.

I don't see anything wrong with people finding out what articles are
appropriate to what newsgroups before they start posting, and then
posting only to the appropriate newsgroups. As an example, for sale
articles belong in rec.radio.swap.

YOU'RE pissed off!?!!? You're the moron that not only sends inappropriate for sale SPAM to a shitload of NGs, you have the nerve to send it in HTML with crappy images embedded!

Plus, your HAM equipment for sale SPAM has little place in comp.sys.laptops. And the majority of NGs are for _discussion_, NOT for posting for sale ads.

As to reading or not reading an ad, you miss the point. Some people still pay per minute or per byte downloaded from the internet, as hard as this may be for you to believe. Why should MILLIONS of people around the world be forced to pay to download your trash?

There are appropriate forums for posting for sale ads, and appropriate formats for doing so. People subscribe to these forums knowing before hand what they'll receive. When people subscribe to discussion newsgroups, they expect discussion, not HTML laden SPAM.

Rather than sharing your childish tantrum with us for the rasher of well deserved shit you received in response to your selfish act, spend a little time educating yourself as to the form and function of the newsgroups.

After reading your most recent post, you're even MORE of a DICK than I had originally thought, if that's possible!

GTFU!

James

It depends. If you have a post April 15th, 2000 restructured amateur radio psuedo-license, then your ham callsign & CB handle are interchangeable and you can freely use both anywhere.

If you have a real ham license, pre-April 15th 2000, you probably haven't seen a CB in years and wouldn't want to transmit on it anyway.

Fine! BUT due us all a favor. if it is on Ebay or another auction
house please put FA = For Auction.. FS = For Sale..

Their are those of us that do know where ebay is and how to
use the search engins to find what we are looking for..

I do not need to download something that has a subject line
that interests me only to find a link to ebay. IT'S a WASTE.

That is the other side of the coin.

What a bright and shining beacon of ignorance you are. It's almost refreshing if it weren't so sad. Have you never heard the term "think globally"? It applies to the internet.

Many people in countries throughout the world have one means of accessing the internet, the local government operated phone system. For which they often pay on the basis of per minute of connect time. It has nothing to do with "rich bastards on cell phones". I'm very happy that you have unlimited internet access, but not everyone is as fortunate as you.

Apparently, you have never bothered to read the Acceptable Use Policy of your ISP at: http://www.qsl.net/aup.html so why don't you use some of your unlimited access to educate yourself right now.

The simple fact that you can take umbrage over the fact that the answer to your assumption "Is the News groups for selling items or what???" was NO, is ample evidence of who has best earned the title of moron.

3's!

PLONK!

So blow it out of your shorts!

I and other have asked NICELY to place FA in the subject line if it is for auction. That way those that do NOT want to deal with it can filter it out. Then some purported "intellectual" does a FS FA that hoses up the filtering.

For YOU that insist that everyone drop dead for YOU - Stuff it!

I don't hide behind anything. Some courtesy was asked for, and it IS obvious that it isn't to be had from THOSE of YOU whom THINK that this is ONLY for their personal SALES.

IT IS NOT!

You want to be pissed off? GREAT! I hope this pisses you off even more. Go READ the FAQs - Or are you also illiterate?

Or what. This newsgroup is for talking about laptops. Others are for talking about other subjects, such as ham radio (alt.ham-radio.mods) and amateur radio (rec.radio.amateur.*).

Most are not for selling anything. Who told you they were? (It's clear you are both new to usenet, and not possessed of any great degree of social skills.)

i think most people would appreciate a FS is its available for immediate sale
and FA if its on auction listing, clearly very different as posting FS already
makes it slightly deceiving

Vince,
Is there any particular reason why your wasting our
time with this nonsense? If you just have to make silly
comments like that, use an alias, or a 'handle'. You're
making the rest of us feel embarrassed for you.
'Doc

The newsgroups which have "SALE" in their name are for selling things. If a newsgroup hierarchy includes a selling newsgroup, that's where you're supposed to post your message; anywhere else is merely spam.

Funny, that "psuedo-license" gives those operators the same privileges
and authority to operate as a license issued before April 2000. So,
what are you saying about your own license - it is only worth as much as
a "psuedo-license?"

On Wed, 25 Oct 2000 18:52:44 GMT, an orbiting mind control laser caused
"Sidney J. Latham" <sidneylatham@home.com> to write:

>A cell phone is actually a 2 way radio.

I pointed this out to the morons running a gun show who were enforcing their
"no 2-way radios" against my 2-meter HT but not on all the folks (and vendors)
running around with cell phones. Then I told them they would be answering a
civil complaint of selective enforcement if they didn't kick out all the cell
phone users.

They stopped enforcing their lame rule that instant.
